The total fellowships both under the expanded and regular programmes with tenure in India were 154: UNTAA 24; ILO 28; FAO 8; UNESCO 8 and WHO 86.

Subjects in which technical assistance was offered were: urban water supply and sewage disposal, textile technology, production of structural steel, housing, fermentation industry, use of equipment for aerial survey and mapping in relation to development resources, statistics (of planning, inter-industry study, national income, quality control, national sample survey, machine tabulation, demography), dam designs at Bhakra, hydro and thermal plants, electrical machinery, leather technology, plastic and glass moulds, DDT factory, penicillin factory, inland water transport, naval architecture, highway construction, bridge maintenance, light-house equipment, rock salt mining, power drilling, housing research, primary metals development, water resources development, manpower organization including vocational training, national labour market and vocational guidance and apprentice legislation, development of TWI programmes, productivity centre, industrial relations and personnel management, use of farm machinery, grassland and fodder improvement, artificial

insemination of animals and animal production and disease control, dairy and milk production, veterinary education, refrigeration, rinderpest vaccine manufacture, sheep and wool production, hides and skins, tanning, wool-spinning and weaving, surf boats in fishery, mechanized equipment for fishing, training in fisheries, fish harbour designing, Fishery Technological Station, forest resources and industries, erosion, soil conservation, tea-chest plywood, afforestation, nutrition, horticultural practice, fruit processing, infant foods, home economics, catering management, fundamental education, basic education, training and checking of air crews, airport lighting, environmental sanitation, public health engineering, vital and health statistics, domiciliary nursing and midwifery, T.B. control, preventive and social medicine, rehabilitation of handicapped, mining, time and motion, electronics, ship-model testing, photo-elastcity.

Among the institutions that benefited were: Indian Statistical Institute; Roorkee University; Indian Institutes of Technology, Kharagpur and Bombay; Central Water and Power Commission; National Physical Laboratory; Central Bureau of Vocational Guidance; Indian Institute of Science, Bangalore; Banaras University; Institute of Radio Physics and Electronics, Calcutta; Engineering College, Poona; All India Institute of Hygiene and Public Health and All India Institute of Medical Sciences.

U. S. AID TO INDIA

American aid to India, public and private, totalled \$1,035,500,000 as of Sept. 1957, or nearly Rs. 518 crores†.

The biggest single item under the U.S. aid programme was the \$360,100,000 Agricultural Commodities Agreement signed by the Governments of India and the United States on August 29, 1956. This agreement enables India to buy needed agricultural commodities from the United States during the next two years, including 3,500,000 tons of wheat (\$200 million), 500,000 bales of cotton (\$70 million), 200,000 tons of rice (\$26.4 million), six million pounds of tobacco (\$6 million), and dairy products worth \$3.5 million. It will help assure India of an adequate supply of basic agricultural commodities and aid the Government of India's efforts to keep prices stable during the Second Five-Year Plan.

All commodities are to be sold for Indian rupees, thus yielding foreign exchange to the extent of nearly Rs. 170 crores. Eighty per cent of the rupee proceeds is to be used for economic development under India's Second Five-Year Plan.

The biggest transaction entered into by India and the United States before the Agricultural Commodities Agreement was the 1951 Wheat Loan of \$190,000,000.

Other financial assistance to India from U.S. Government and private sources has included:

- Indo-American Technical Co-operation—\$392,400,000.
- Milo Assistance in 1950-51—\$12,000,000.
- Flood Relief—\$6,400,000.
- Fulbright and Smith-Mundt grants for Educational Exchange—\$4,500,000.
- Ocean Freight Assistance—\$600,000.
- Food Distribution by American Voluntary Agencies—\$61,900,000.
- Ford Foundation—\$19,100,000.
- Rockefeller Foundation—\$5,400,000.

During Fiscal Year 1957 the Government of India and TCM signed nine new project agreements. The largest of these provided \$4,000,000 for the construction of a new 30 megawatt thermal power plant in Delhi. This will increase the

present availability of electric power in Delhi and New Delhi by approximately 40 per cent.

The other new agreements were mostly in the field of education.

The bulk of the \$75.6 million provided to the Indo-American programme by TCM during FY 1957 was in the form of supplements to the already existing agreements, which numbered 63.

AGRICULTURAL COMMODITIES AGREEMENT*

The Agricultural Commodities Agreement signed in August 1956 is the largest such agreement the U.S. has signed with any country. It was negotiated under U.S. Public Law 480—the Agricultural Trade Development and Assistance Act of 1954, as amended in 1956—which permits the sale of surplus agricultural commodities to foreign countries for their own currencies.

Although the U.S. law is designed to cut down on agricultural surpluses, India is not required to buy surplus products from U.S. Government storage. The agreement permits the Indian Supply Mission in the U.S. to buy the commodities from whatever source in the United States it finds most advantageous.

The agreement also includes \$54,200,000 (Rs. 28 crores) for payment of half the shipping costs.

Rupee proceeds are to be used as follows:

- 65 per cent (\$234 million) to be loaned to India on a long-term basis, for economic development, \$55 million of which will be for the private sector;
- 15 per cent to be given as a grant to the Government of India for economic development projects;
- 20 per cent (\$72 million) will be for U.S. Governmental expenditures in India, including purchases of Indian goods for other countries getting U.S. aid.

Both Governments will take precautions to assure that the sale of the commodities will not unduly disrupt world-price of the products. The two Governments agree that the imports of the commodities will be over and above usual commercial imports from all sources.

WHEAT LOAN

Large-scale American aid to India began in 1951, when India was faced with a threatened famine. Americans in large numbers voluntarily contributed hundreds of thousands of dollars worth of foodstuffs, clothing and medicine. This aid was channelled through various relief groups, which have continued every year to send large quantities of such items since.

Also, in 1951, the U.S. Government provided a loan to India of \$190 million on easy terms for the purchase of nearly two million tons of foodgrains in the United States. The loan is to be repaid in 35 years at an interest rate of 2½ per cent, with no interest due for a year and no principal due for five years.

In addition, the U.S. Government at that time specially re-activated nearly 100 World War II Liberty-type ships for quick transport of the grain to India, as there was an acute shipping shortage at that time.

The Wheat Loan agreement also provided that the first \$5 million of interest paid by India to America would be set aside in a special fund in the U.S. Treasury for the support of higher education in India and to a lesser degree in the United States.

Under the India Wheat Loan Educational Exchange Programme, Indian universities and other institutions of higher education and research in all parts of the nation are now receiving American books and scientific and technical equipment. There is also provision under the programme for professional visits to the United States by Indian scholars, professors and technicians and for similar visits to India by American specialists.

The programme began operation in June 1954, and is scheduled on a five-year basis, wherein approximately \$4,000,000 worth of scientific and other academic resources are to be provided to India each year.

As the greater part of the programme is designed to rehabilitate and develop Indian universities and other centres of advanced study, the Union Ministry of Education has been made the co-ordinating agency for determining the best usage of these funds for supporting and supplementing the educational development

* It is calculated that in the three years million tons.

† A new loan was arranged in March 1958—150 million dollars from the Export-Import Bank and 75 million dollars from the Development Loan. See below for details.

(1957-1959) about Rs. 172 crores worth of U.S. farm surplus might be imported—about six

pattern of the five-year plans. Each year the Ministry invites eligible institutions to submit their requests for assistance under this scheme, and, after consultation with the Wheat Loan Office staff as to the various projects, the annual Government of India proposal is forwarded to the American Embassy.

In the first year's programme (1954-55), 57 universities and research centres throughout India participated. Approximately 30,000 books were provided to 31 institutions and \$411,275 worth of scientific equipment was ordered for 25 institutions. In addition, five medical research stations received specialised books and laboratory instruments for use in a project of Indo-American exchange of pathological tissue specimens. Also, 12 Indian librarians went to America for a five-month study tour, and one American specialist came to India to consult on plans for the development of the National Museum in Delhi.

The second year's programme provided approximately \$500,000 worth of American books to humanities and science libraries at colleges and universities throughout India. Approximately the same amount of money was allotted for procuring scientific instruments for university laboratories and other research centres. In support of and in conjunction with these allocations for material resources, 12 Indian librarians and 21 Indian scientists made professional study tours of the United States. Two American scientists came to India to lecture and to conduct seminars in their fields of specialisation. By the end of the second year, the programme provided assistance to all of the 31 universities and to 37 non-university institutions in India.

The third year's programme will provide \$375,000 worth of scientific equipment to the laboratories at 15 Indian universities and 4 non-university institutions. Approximately \$325,000 will purchase books for libraries at institutions of higher education. In addition, \$200,000 has been allocated for an exchange of persons project which has sent 24 Indian academicians to the United States for study of the General Education movement at American universities. In return, nine leading American educators have come to India to participate in the general education programme at certain Indian universities.

TECHNICAL CO-OPERATION PROGRAMME

U.S. governmental aid to India is channelled mainly through the Indo-U.S. Technical Co-operation Programme, which has been shaped to support the objectives of India's Five-Year Plans, and is now in its seventh year. The programme has expanded steadily and now includes a wide range of activities.

The essential purpose of the Technical Co-operation Programme is to make available knowledge, techniques, men and material of one country for the economic and social development of the other. The assistance given to India is mainly technical and developmental, and comprises a five-pronged approach:

1. The use of American technicians or experts who demonstrate new techniques or methodology under the various projects;
2. The additional training of Indian technicians abroad, who upon their return to India carry forward work already undertaken by American counterparts;
3. Procurements of demonstration equipment not available with India for pilot projects;
4. Payment of costs for contracted services; and
5. Substantial assistance in the form of foodstuffs, steel and capital equipment.

TYPES OF AID

In its present form the Indo-American programme dates from the signing of the general agreement between the Governments of India and the United States on January 5, 1952. Since then the two countries have signed agreements covering a total of 72 projects in support of India's First and Second Five-Year Plans. These projects have been developed by the appropriate Ministries of the Government of India, and approved by the Planning Commission

and by the U.S. Technical Co-operation Mission (TCM), representing the International Co-operation Administration of the United States.

Contributions of the Government of India to the joint effort—rupee expenditures—are mainly in payment of local construction costs, project sites, transport and handling charges within India of American-contributed commodities, and finally, salaries of Indian personnel who work side by side with Americans on the jointly administered projects.

Where imported commodities such as fertilizer and iron and steel are sold within India (commodity or development assistance) the rupee proceeds are used to finance within India other projects of economic development. For example, out of the sale proceeds under the 1954 steel agreement, \$15.7 million (Rs. 7.5 crores) was provided as part of the revolving fund for the Industrial Credit and Investment Corporation of India, an agency established to assist private industrial development.

Initial emphasis of the Indo-American programme was on agriculture, since this occupied top priority in India's First Five-Year Plan. Accordingly, commodity and technical assistance stressed such activities as community development, tube-wells, river-valley development, fertilizer and steel for agricultural implements. The emphasis has now shifted somewhat from earlier problems of food, over to the problems of industrial development and transportation.

With special economic aid funds available from 1954, transport and industry received major attention, with programmes for railway equipment, steel for railways and industry, for the Rihand hydro-electric development and increased electric power facilities in the city of Madras and the State of Rajasthan.

As of June 30, 1957, U.S. technical and economic aid obligations to India totalled \$392.4 million. Obligation and Expenditure totals during each U.S. fiscal year (July 1 of the previous year to June 30 of the year given) are shown below. Totals reflect expenditures against both current and prior-year obligations:

	Obligations (Millions)	Expenditures (of dollars)
FY 1952	50.5	1.2
FY 1953	40.1	27.4
FY 1954	76.8	23.4
FY 1955	78.0	57.0
FY 1956	80.5	81.3
FY 1957	75.6	58.7
Total	392.4	254.9

The following table gives a summary of data showing component elements of the Indo-American programme for the fiscal years 1952-57 (as of June 30, 1957):

Participants (Indian technicians)	
Covered by Contracts	\$ 765,944

	\$ 360,198,569

Grand total of U.S. Technical and Economic Aid

\$ 392,400,000

Cost-Sharing

The Indo-American Technical Co-operation Agreement provides that programmes be mutually developed and projects established for which costs are shared by the U.S. Government and the Government of India. U.S. dollar financing normally covers foreign exchange costs whereas GOI rupee financing covers costs within India. While U.S. contributions to Indo-American project costs for the period from January 1952 to June 30, 1957 totalled \$392.4 million, India's contributions for the same period totalled Rs. 3,700 million, or the equivalent of \$765 million.

While the U.S. contributions to Indo-American projects derive exclusively from funds appropriated by the U.S. Congress, the Indian contributions derive from a variety of sources including: (1) sales proceeds of the American Wheat Loan of 1951, (2) sales proceeds of U.S. financed fertilizer, steel and agricultural commodities, and (3) regular development budgets of operating Ministries.

TECHNICAL SPECIALISTS

Technical specialists from the United States are brought to India on agreement between the Government of India and the director of TCM to assist development work in particular fields. Specialists may be assigned to agencies of the Central Government, to the States, groups of private concerns, of educational institutions, or to TCM.

Assignments range from a few months to two years and in various cases have been renewed for additional periods. Salaries and travel of the U.S. specialists to India are paid entirely from dollar resources available to the Indo-American programme. Since the technical specialists are recruited from regular work in the United States, the level of salaries is comparable to that for similar work in the United States.

Measured in terms of activities, American assistance is a composite of the agriculturist, the doctor, the educator, the industrialist, the railroad engineer, the chemist, the nurse and the social welfare worker. As of June 30, 1957, there were 230 U.S. men and women technicians in various fields working in India.

The following table gives the number of U.S. technicians in different fields assigned as of the end of each U.S. fiscal year:

INDIAN TECHNICIANS

Under the Indo-American programme, Indian technicians study in the United States and in other countries as well.

Since 1951 there have been 642 Indian participants in this programme who have either already been abroad or are in process. The nature of participant training is very broad and goes all the way from a two-week seminar in audio-visual techniques in the Philippines to an intensive 18-month academic study programme in electronics at a leading American university. Emphasis throughout these years has continued in the agriculture and natural resources fields, with industry and mining sharing almost equally

in importance. The fields of health, education, labour and transportation are also represented in the Indo-American participant programme, as vital adjuncts to India's overall economic development.

As of June 30, 1957, 498 technicians had completed their advanced training in the United States and third countries, and returned to India to carry on work in their particular fields. Also, as of that date, 68 technicians remained in training in the United States and 78 technicians were in final process for further study there.

The following table gives data on Indian technicians participating in the programme:

Field of Activity	1951-52	1953	1954	1955	1956	1957
Agriculture & Natural Resources ..	38	45	54	15	30	49

INDIVIDUAL PROJECTS

The 75 project agreements under the Indo-American Technical Co-operation Programme signed as of June 30, 1957, cover the fields of agriculture and natural resources, industry and mining, transportation, labour, health and sanitation, education, community development, social welfare and housing, and public administration.

The American approach and interest in India's agricultural and natural resources development are based on the conviction that the United States can make its most effective contribution by helping in the solution of basic problems and the development of basic institutions. At mid-1957 a total U.S. commitment of \$73,600,340 had been reached, under the following heads:

Fertilizer

Total U.S. Commitment to June 30, 1957—\$25,267,973.

Import of fertilizer, largely ammonium sulphate, was agreed in 1952 to be a primary means of increasing agricultural production in India as rapidly as possible. Since the original project was set up, India's big Sindri fertilizer plant has become the main source of supply of ammonium sulphate for India's needs.

The Indo-American programme provided for the import of fertilizer for distribution to the farmers, the sale proceeds being credited to Fund B, for the acquisition from within India and from abroad of certain types of fertilizer for demonstration purposes and for a survey of Sindri leading to its expansion. A contract for carrying out this expansion has been entered into by the Government of India, in addition to making available the services of a chemical engineer who will work on research and development problems.

The 1952 and 1953 fertilizer programmes provided 216,000 tons of fertilizer. In 1954, the programme was confined to additional types of fertilizer to be tested under Indian conditions—5,000 tons of urea and 5,000 tons of ammonium sulphate-nitrate.

The 1955 programme provided for the import of 44,000 long tons of fertilizer including urea, ammonium sulphate, sulphate-nitrate and nitro-chalk (calcium ammonium nitrate). For the demonstration aspect of the programme, import of 14,500 long tons of fertilizer was provided for.

The programme for 1956 provided for 400,000 cultivator demonstrations, compared to 100,000 and 200,000 respectively in 1954 and 1955, to acquaint Indian farmers with the importance of phosphorus for crop fertilization. It also provided for approximately 4,250 tons of fertilizer for free distribution and another 50 tons for storage experiments. This brings the total amount of fertilizer under the Indo-American programme to approximately 287,300 long tons.

Soil Fertility and Fertilizer Use

Total U.S. Commitment to June 30, 1957—\$472,304.

The original soil fertility and fertilizer use project, set up in 1952, was designed to extend the work already being done at various Indian research institutes. Several thousand agronomic field trials of fertilizer experiments are now under way all over the country. Data are being assembled by technicians of the Indian Council of Agricultural Research and Indian Agricultural Research Institute.

Expansion of the present soil survey zones, establishment of 18 soil laboratories in various States of India, establishment of soil physics laboratories at two existing States' soil laboratories, and use of a mobile soil testing laboratory were subsequently provided for. It has since been agreed that soil testing laboratories are to be established in eight more States.

The 1956 programme provides for the additional procurement from outside India of soil testing, soil conservation and audio-visual equipment, books, publications and chemicals.

Locust Control and Plant Protection: The locust control project under the Indo-American programme has supplied jeeps and other vehicles, power sprayers, wireless communication sets and other equipment to augment what is already available. Originally covering locust control only, the project has been extended to cover other forms of plant protection, and a supplement during 1954 provided for fumigants for a demonstration programme on protection of grain in storage.

Total Commitment to June 30, 1957: U.S., \$631,160.

Fisheries

Total U.S. Commitment to June 30, 1957—\$2,785,032.

The original fisheries agreement provided for the initial purchase of three trawlers, small diesel engines to equip small fishing craft, and for the overhaul of trawlers already in use. Later recognizing that inland waters, particularly lakes created by river development projects, would provide other sources of fish for markets, a supplement to the original Fisheries Agreement provided for procurement of equipment necessary to develop inland fisheries also.

Continuing aid in 1956 provided 20,000 pounds of nylon twine and nets to be sold, leased, or given to fisheries' co-operatives; seven audio-visual units; six jeeps; two sets of films on fisheries; scientific equipment for establishing a fisheries technological station on the west coast, and four purse-seine fisheries experts, as well as additional technical services for further improvement of the fisheries industry in India.

Ground Water Irrigation (Tubewells): Under the Indo-American programme, 2,650 tubewells were approved for construction in Uttar Pradesh, Bihar, Punjab and construction work began late in 1953. With the addition of 350 wells in 1955, the Indo-American programme now includes 3,000 tubewells.

Contracts for the construction of some of the wells were let to an American, a German, a British and a French firm; and the States of Uttar Pradesh, Punjab and Bihar received equipment for constructing some of the wells departmentally. Dollar aid is used for technical assistance as well as for specialised equipment needed for the programme.

Total Commitment to June 30, 1957:

U.S., \$18,675,480

Ground Water Exploration: Under the Indo-American programme, a ground water project was set up in 1953 to drill 350 exploratory wells and collect hydrological data in 16 areas where usable supplies of ground water for irrigation are believed to exist but where there is insufficient data upon which to plan sound developments.

Drilling operations have been under way since January 1955 under the Exploratory Tubewell Organisation in the Ministry of Food and Agriculture, with the assistance of the Geological Survey of India and U.S. technicians.

In addition to technical assistance, dollar aid under the Indo-American programme has been spent on scientific field and laboratory equipment, as well as drilling equipment to be used in the exploratory projects.

Total Commitment to June 30, 1957:

U.S., \$3,94,949.

Water Resources Survey and Minor Irrigation

Total U.S. Commitment to June 30, 1957—\$465,000.

Under this project it is proposed to assist in the development of a systematic, integrated approach towards the full utilisation of water resources with emphasis on minor irrigation. An overall survey of areas in the States of Andhra Pradesh, Madhya Pradesh and Bombay is being undertaken in order to collect basic data on rainfall, stream flow, underground water, etc. An appraisal will then be made of the total water and soil resources of water sheds or similar areas. The project is to demonstrate the development and application of necessary survey data for other areas of India through the planning and construction of selected, properly designed, minor irrigation works.

Dollar aid will be used to purchase equipment and supplies outside India for use in surface water studies, including current meters, sounding reels, sump pumps, casing pipe, heavy earth moving equipment, etc.

Agricultural Machinery Training

Total U.S. Commitment to June 30, 1957—\$109,273.

To provide a centre where operators and mechanics can be trained, to demonstrate proper methods of utilizing agricultural equipment and to test the suitability of various types of machinery under Indian conditions, a pilot training and demonstration centre has been set up.

Dollar funds will provide various kinds of machinery and shop equipment for the training centre. Agricultural machinery specialists requested by the Government of India also will be obtained.

Modern Storage of Food Grains: The Indo-American programme in 1954 set up a demonstration programme to provide two 10,000-ton capacity silos with elevators to handle grain in bulk. The project will permit studies in aeration, drying, disinfection, and other techniques of this form of storage.

Experiments also will be conducted with prefabricated metal storage facilities which can be set up on short notice and which can be moved from one part of the country to another in times of emergency. Storage facilities of this type under the programme will take care of approximately 50,000 tons of grain.

A 1955 supplement to this programme provided equipment for the purpose of reducing grain damage caused by high moisture content, and dust and other foreign particles. The pilot and demonstration equipment provided under the programme is expected to assist in improving methods for handling and storing grain in the future.

Technical assistance provided under the programme includes the services of a grain storage expert, an agricultural engineer and an entomologist. Provision is also made for officers of the Union Ministry of Food and Agriculture to study grain storage in the United States.

Total Commitment to June 30, 1957:

U.S., \$1,433,660

Village Worker Training: Before the broad programme of rural development embodied in Community Projects got under way in 1952, training of village workers had begun at five training centres set up by the Government of India, the States and the Ford Foundation.

Twenty-five additional training centres followed soon afterwards, with the Ford Foundation providing full operating expenses for a two-year period, and with the Indo-American programme furnishing vehicles, training aids, agricultural demonstration equipment and other supplies. American agricultural extension specialists have worked with the training centres helping the staff train the village workers who in turn carry better agricultural techniques to the farmers of India. At present there are 43 training centres and they have trained more than 5,000 village workers who are on the job in Community Projects. More than 600 supervisory personnel also have been trained.

Courses have also been set up in 25 existing training centres to train women in home economics extension work. Instructors receive part of their study course in India, part in Japan. New courses in farm leader training also have been introduced, and instructors are being sent to Denmark to study in the Danish folk schools, famous for their contribution to improving farm life.

The 1955 programme provided instruction facilities, equipment and supplies for 97 such basic agricultural schools as well as 16 additional training centres, and 16 additional home science wings to be attached to training centres.

The 1957 programme makes available funds for the acquisition from outside India of books; demonstrational supplies and equipment for the training centres; for financing motion pictures and

film strips to be locally produced, the services of 24 extension specialists plus the training of 12 Indian extension personnel.

Total Commitment to June 30, 1957:

U.S., \$1,036,208.

Livestock Improvement

U.S. Commitment to June 30, 1957—\$329,003.

In addition to technical assistance and training opportunities abroad in animal disease control, this project will furnish pilot and demonstrational biological production equipment for the Biologic Products Division of the Indian Veterinary Research Institute. This project is associated with the work of FAO in India, which is at present concentrating on the production of a dried rinderpest vaccine and its use through a country-wide rinderpest eradication programme.

Under this programme, funds are provided for acquiring from outside India demonstrational and training equipment and the services of five experts in animal nutrition, poultry husbandry, etc. Two Indian personnel are also to be trained abroad.

Agricultural Education and Research

Agricultural research and agricultural education institutions at the college level in India are filling a vital need in training leaders and technicians. From more than 20 such colleges about 1,250 students are graduated each year. Many of these institutions do not have adequate laboratories or classroom and training equipment.

A number of institutions devoted primarily to agricultural research was assisted under the programme in 1954, and previous years, by the provision of more complete field, laboratory, classroom and training equipment, books and journals. Provision was also made for the interchange of staff personnel and advanced students between agricultural institutions in India and the United States.

In the 1955 programme further provision was made for equipment as well as the interchange of faculty and students with emphasis upon a regional programme. On this basis five United States land grant colleges and universities accredited to the Ministry of Agriculture—Kansas State College, Ohio State University, University of Illinois, University of Missouri and University of Tennessee—each co-operates with the agricultural institutions in a particular region in India to carry out an interchange of selected faculty and students, provide supporting and advisory services, as well as assist in procurement of equipment and supplies under the programme.

The 1956 programme provided for expanding the Kansas State College contract, and additional funds provided to the Universities of Missouri and Tennessee will make possible the establishment of post-graduate training courses at the Indian Veterinary Institute and the National Dairy Research Institute. Eight training grants will be given to Indian technicians for further study abroad and the services of five veterinary professors will be provided for assignments with veterinary colleges in India. Other technicians' services will be provided as needed.

Total Commitment to June 30, 1957:

U.S., \$5,390,542.

Agricultural Information Production and Training: The provision of technical assistance, equipment and supplies in connection with the All-India Agricultural Information Programme is the main purpose of this project.

Approximately 15,000 village extension workers, plus additional extension workers in specialised fields such as home science, were at work in Community Projects and National Extension Service Development blocks by March 31, 1956. This project is to supply simple reference materials, audio-visual production and teaching

aids to relay information on the latest findings in agricultural research and experience to these extension workers as well as cultivators.

Support is also being given to the Indian Council of Agricultural Research to enable the Council to perform its key role in the programme, which includes organization of national workshops, establishment of regional training courses and preparation of extension material.

Total Commitment to June 30, 1957:

U.S., \$109,853.

Agricultural Economic Research: As agriculture is by far the most important means of livelihood in India, special steps are being taken to develop research in the field of agricultural economies in order to increase production and raise the standard of living of the people.

The Government of India has established four agro-economic research centres and six farm management centres which will specialise in agricultural research and farm management studies respectively and encourage research.

This project is to provide further technical assistance, training opportunities, equipment and supplies to assist in developing and implementing work in various aspects of agricultural economies, and particularly to assist in the research programme noted above in farm management and economies of agriculture. Such equipment as calculators, card punching, tabulating and verifying equipment and books on agricultural economies, will be provided from outside India for the use of the research centres.

The 1956 programme was to provide training facilities in the U.S. for an Indian production economies specialist and an agricultural production economist.

Total Commitment to June 30, 1957:

U.S., \$104,891.

Pilot Project on Production, Processing and Marketing of Citrus Fruits

U.S. Commitment—\$14,310.

The present project is intended to assist in the development of co-operative techniques in the production, processing and marketing of citrus products in India in the light of American experience.

Provision was made for the training of one Indian at post-graduate level in the improvement and standardisation of citrus culture, citrus research, and allied horticultural problems.

Crop Production and Development

U.S. Commitment—\$83,052.

Extensive experience in the United States, Mexico and Italy with hybrid seed, accompanied by increased fertilization and better cultural practices, has shown that increases in maize yields of up to 100 per cent are possible in India.

Although testing of hybrids has been undertaken in India at several places under the auspices of the Indian Council of Agricultural Research, the limited quantity of hybrid seed available has hindered research and developmental efforts.

This Indo-American project, initiated in 1955, is designed to support the compilation of comparative data on both grain and fodder yields, the study of the adaptability of varieties, and the determination of the best dates of planting and the best methods of culture and fertilization. Dollar aid will be used to acquire moisture testers, corn planters, two-row cultivators, foundation stock seed and double cross seed from outside India.

Under the 1956 programme, hybrid corn and crop seeds were supplied free of charge to selected flood-stricken areas for a mass demonstration of the potential hybrid corn production in the Punjab and for demonstrating improvement of grass-lands in the hills of the Punjab and other areas. In addition, a sugarcane clone collection will be established at Coimbatore, and equipment and books supplied to the Central Rice Research Institute.

Calcutta Milk Supply Scheme

U.S. Commitment—\$840,000.

Under the Indo-American programme financial assistance has been provided towards the cost of establishing a milk pasteurising and processing plant in Calcutta having a capacity of 500,000 lbs. Also, technical assistance has been provided to assist in the training of Indian technicians in the operation of the processing plant.

Dairy Development

U.S. Commitment to June 30, 1957—\$575,000.

Under this project the U.S. is assisting India in its effort to increase and improve the quality and supply of milk and milk products, improve diet, afford additional income to the farmers, help stabilise prices by providing milk processing plants for the availability of dried milk, and extend the market area.

The U.S. is providing technicians to advise Indian Government officials and train personnel on the practical aspects of dairy herd management, dairy processing plant operation, and the marketing of dairy products.

Pilot demonstration and training equipment for one milk processing plant and associated rural collection centres, three rural creameries and several co-operative milk union plants will also be provided.

INDUSTRY AND MINING

American aid is directed to those aspects of industrial and mineral development in India where technical and commodity assistance could best serve India's need. During the 1952-53 period, approximately 29 per cent of all United States assistance to India—\$91.7 million—was spent to assist to the maximum extent possible India's own efforts in the field of industrial and mineral development. Project agreements in this field are:

Iron and Steel for Agricultural Purposes

U.S. Commitment to June 30, 1957—\$10,839,227.

It is the intent of this project to further production of improved farm machinery and implements in India. There are at present a number of factories which produce the latest types of farm machinery, but only a portion of their total capacity is being utilized because of the acute shortage of iron and steel.

In order to partly meet these deficiencies, this project has acquired from sources outside India a total of 135,000 long tons of iron and steel. Iron and steel imported under this agreement has become part of the steel pool of India for distribution to blacksmiths and farmers as well as to farm implement factories.

Forest Research: The forest research project under the Indo-American programme is supplying various types of testing and laboratory equipment, of latest design, for use at the Forest Research Institute in Dehra Dun. Machinery and consulting services are also being supplied for completion of a pulp and paper mill.

Total Commitment to June 30, 1957:

U.S., \$607,010.

Building Materials Development

U.S. Commitment to June 30, 1957—\$106,817.

This project supports the work being carried on at the Central Building Institute at Roorkee, Uttar Pradesh, with the addition of laboratory and pilot plant equipment. This is for experimentation with indigenous materials, with a view to the ultimate establishment of a pre-mixed plaster industry in India.

This project will consist of a Soil Engineering Laboratory, the Concrete Engineering Laboratory and a Structural Engineering Laboratory, as well as a pilot plant for preparing light-weight aggregate and cement asbestos sheets.

River Valley Development

U.S. Commitment to June 30, 1957—\$9,275,844.

This project is designed to provide technical assistance and heavy equipment required for the river valley development programme. In addition, two training centres for operators and mechanics have been established to help cope with the problem of efficient utilization and maintenance of construction equipment.

Heavy equipment under this project started arriving in May 1953. At Hirakud Dam, power shovels, crawler type tractors, air compressors, dump trucks, road scrapers and other equipment are in operation. Similar equipment has been supplied for the Kakrapar, Mahi and Gangapur projects in Bombay State, Ghatprabha and Tungabhadra in Mysore, Jawal project in Rajasthan, Chambal in Rajasthan and Madhya Pradesh, Pathri power-station in U.P., and for several projects in Saurashtra.

American engineers and river development specialists, requested by the Government of India, work with Indian counterparts of the Central Water and Power Commission. An American engineering concern working on the Damodar Valley development is also under a contract provided for under the Indo-American programme.

In the 1956 programme the United States has made available two large dragline excavators for the Chambal project, together with a factory trained erector to supervise their assembly, and two operators and one mechanic to train Indian personnel in dragline operation and maintenance.

Rihand Valley Development: Development of the Rihand River Valley in eastern Uttar Pradesh will make possible the irrigation of possibly two million acres of land in U.P. and Bihar through power for tubewells and by direct use of canal waters.

Total cost of Rihand development is some \$95 million, with 47 per cent of this in foreign exchange costs. The Indo-American programme is assisting in the first phase of the project which includes construction of the dam, the initial power plant and switchyard installation, and a major portion of the transmission system. The U.S. contribution includes both economic and technical assistance funds.

Total Commitment to June 30, 1957:

U.S., \$6,413,017.

Exploratory Lignite Excavation and Development: The State of Madras requires about three million tons of coal a year, but for the past several years it has been able to bring in less than two million tons. Yet the South Arcot district has a one-hundred square mile deposit of lignite or "brown coal". Estimated reserves run to 2,000 million tons.

Various exploration efforts have been under way since 1945, and from October 1951, to June 1955 Paul R. Evrich, lignite engineer from the U.S. Bureau of Mines, worked in company with Indian mining engineers and geologists assembling data. Investigations in 1953 reached the stage where the Indo-American programme set up an exploratory excavation project, to determine the costs of mining and the most practical manner of utilising the lignite deposits. The experimental excavation has been under way for several months, with power shovels and other equipment supplied by the Indo-American programme.

Under the 1955 supplement, a pilot processing plant, a power plant, laboratory equipment, technical reference books, and other supplies and equipment were provided for as well as funds for additional technical services.

Total Commitment to June 30, 1957:

U.S., \$651,322.

Augmenting Steel Supply

U.S. Commitment to June 30, 1957:

\$48,100,988.

The shortage of steel is a major obstacle to the attainment of India's economic development objectives. Whereas the normal annual production is approximately 1.1 million tons, the estimated annual demand is 2.3 million tons. The United States has recognized that if economic development is to succeed in India the capacity for steel output must be increased. In the interim period U.S. assistance has provided for the import of 135,000 long tons of steel for agricultural purposes.

Under this agreement approximately 336,345 additional long tons of steel will be made available to India for use by Indian Railways, by steel processing industries such as ship-building, for the manufacture of hospital equipment, oil drums and containers, pipes and tubes and industrial machinery, and for requirements of river development and some additional agricultural purposes.

Heavy Equipment Training: For its river development projects India acquired a great deal of heavy equipment—tractors, dump trucks, shovels, graders, crushers, scrapers and the like. Both American and Indian technicians have recognised that more thorough training of operators and maintenance crews is necessary, and two heavy equipment training centres are being established—one at Hirakud Dam, in Orissa, the other at Kotah in Rajasthan, near the Chambal project, each to train at least 40 operators and mechanics a year.

Dollar aid under the programme is for heavy equipment to be used in training as well as for technical specialists.

Total Commitment to June 30, 1957:

U.S., \$682,000.

Improvement of Rajasthan Power Facilities: The programme aims at meeting a particular shortage. Equipment will be obtained to renovate and augment 19 thermal stations in the State of Rajasthan and to extend transmission and distribution lines. A total of 20,000 kilowatts of generating capacity is to be installed.

Total Commitment to June 30, 1957:

U.S., \$1,065,000.

Industrial Research and Technical Service Organisations: To strengthen research organisations and technical service departments under the Ministry of Scientific Research, a programme for supplying technical assistance and essential items of equipment was drawn up in April 1954.

The National Physical Laboratory at New Delhi has received electronic and other precision testing instruments; the National Chemical Laboratory at Poona has received library and laboratory equipment and microfilm equipment. Pilot plant and other equipment has been provided for the Fuel Research Institute at Jaikora. Special equipment and training of engineers are provided for the Central Electronic Engineering Research Institute at Pilani.

The Geological Survey of India is to be assisted with geophysical, petrological and mineralogical equipment for its laboratories; the Survey of India with photogrammetric equipment for making maps, and the Bureau of Mines with equipment for handling low-grade manganese ore and chrome ore.

The 1955 supplement to this programme provided for additional technical assistance, equipment and supplies to the following research organisations: Leather Research Institute, Central Glass and Ceramics Research Institute, Central Food Technological Research Institute, Central Drug Research Institute, National Chemical Laboratory, and Physical Research Laboratory.

Total Commitment to June 30, 1957:

U.S., \$2,356,592.

Flood Control

U.S. Commitment to June 30, 1957—\$187,000.

This project provides assistance in the design and construction of major and minor flood control works in India. Financial support from the United States is used to cover technical assistance, and to meet offshore costs of equipment, including fully equipped motor launches for measuring speed of current and depth of flood waters, and helicopter services for observation and supply purposes.

Electrical Distribution Systems Maintenance Training Centres: Under this project it is proposed to establish centres in India for the training of workmen in "hot line" maintenance of electric lines in order to reduce the number of interruptions to service. Equipment to be provided at each centre under the project includes basic "hot line" tools, service vehicles and other instruction and demonstration equipment. Instruction will first be provided in the fundamentals of routine line maintenance and thereafter in "hot line" maintenance. These centres will also provide training in advanced techniques and demonstrate new tools for routine line maintenance. U.S. aid will provide specialists in "hot line" maintenance and routine line maintenance to provide instruction and advice at the training centres.

Total Commitment to June 30, 1957:

U.S., \$290,375.

Industrial Technical Services

U.S. Commitment to June 30, 1957—\$2,299,161.

Technical assistance has been provided to India's industrial progress by making available under the Indo-American programme productivity teams and individual experts who will assist in production technology, quality of production and industrial management. They will function among such industries as the textile, steel, cement, blocksmelting, well-drilling tools and equipment, and foundry industries.

The United States assistance also includes provision of supporting equipment, supplies and technical literature. Other assistance includes provision of training opportunities abroad and the establishment of a technical and visual aids library and a technical information unit in the Ministry of Commerce and Industry.

The 1956 programme made provision for additional specialists to aid in overcoming insufficient management and productivity skills, as well as providing mobile blacksmith and machine shop vans for demonstration purposes.

Rural Electrification

U.S. Commitment to June 30, 1957—\$5,000,000.

The objective of this programme is to assist in the development of rural electrification in India by providing foreign exchange funds for purchase of materials not now available within the country. Approximately eleven million rural people will receive electric service under this project.

Tubewell Casing

U.S. Commitment to June 30, 1957—\$2,000,000.

The Indo-American programme of 1952 and 1953 included financial and technical assistance to the Central and State Governments for the construction and powering of 3,000 tubewells.

Subsequently, 3,600 wells were allotted by the Central Government under the Second Five Year Plan. In 1956 Indo-American aid consisted of supplying water well casing pipe for an estimated 2,000 wells at a cost of \$2 million, bringing the total aid amount for a five-year period to \$21,530,000. The pipe has been allocated for the construction of wells in Uttar Pradesh, Bombay, Punjab and Bihar.

2,000 wells will provide supplementary irrigation to approximately 600,000 acres of land and are estimated to increase food-grain production by about 150,000 tons annually.

Steel Casting Foundry

U.S. Commitment to June 30, 1957—\$1,341.

The establishment of a foundry for the manufacture of large steel castings in India was essential if Indian locomotive production was to be expanded to meet the railway targets of the Second Five-Year Plan.

Accordingly, the Government of India is to establish a steel foundry at Chittaranjan, West Bengal, as an ancillary project to the Chittaranjan Locomotive Works for the manufacture of steel castings: mainly locomotive underframes, twin steam cylinders, and manganese steel railway crossings and points. Heavy steel castings, all of which are now imported to India, are the main current bottleneck in locomotive production.

U.S. assistance to this project consisted of demonstration equipment.

Irrigation Research Institute

U.S. Commitment to June 30, 1957—\$85,200.

Under this agreement, the U.S. will provide technical equipment and advice and information for the installation and operation of a modern construction material research laboratory and materials testing laboratory, and for the expansion of the present hydraulics laboratory at Roorkee for the Uttar Pradesh Irrigation Department. American assistance will cover, apart from the equipment, the services of a technical expert for at least one year to advise and assist in the installation of the laboratory equipment and to instruct Indian personnel in its use.

Small Industries Development

U.S. Commitment to June 30, 1957—\$746,633.

Under this project the United States will contribute various items of basic machinery and equipment not available in India for the training and demonstrational units of the Delhi Industrial Estate. The United States will further make available, under contract, the services of six technical men who will advise on the planning, layout and equipment required for the pilot production and development centre; they will also advise and assist in the development of plans, programmes and construction specifications necessary for the establishment and initial operation of the component units of the Delhi Industrial Estate.

Training facilities are also provided for an Indian technician to study vocational and industrial training techniques in the United States.

Water Resources and Power Development

U.S. Commitment to June 30, 1957—\$164,000.

This project is intended to assist the Central Water and Power Commission in keeping abreast of the latest technical developments in this field.

TCM will provide funds for procurement in the United States of technical publications, documents and reports for the use of the Commission. In addition, the services of eleven engineers from abroad will be made available to the Commission. Provision is also made for the training in the U.S. of Indian personnel in engineering fields. Under another project, \$100,000 is provided for technical and engineering advisory services to the Central Water and Power Commission.

Telecommunication Development

U.S. Commitment to June 30, 1957—\$106,392.

The Posts and Telegraphs Department of the Government of India, Ministry of Communications is now establishing a Telecommunication Research Laboratory to carry out design and other development research work. This project will provide assistance in the form of a nucleus of modern laboratory-type precision testing and measuring equipment for line communication systems, technical books and publications for

reference purposes, and a telecommunication engineer to assist in the organisation of this unit, setting up the laboratory and training research personnel.

Industrial Design

U.S. Commitment to June 30, 1957—\$162,800.

The Regional Small Industry Institutes provide an extension type of advisory services to small industry in India. Industrialists in this field can obtain technical advice on such problems as production, materials, marketing and engineering.

Under this project, one industrial design specialist will be assigned to each of the initial four Regional Institutes of Delhi, Bombay, Calcutta and Madras. The specialist will evaluate local production and develop new product designs in the light of production plans, and recommend materials and distribution methods for both small industries producing mainly for internal consumption, and handicrafts producing mainly for export.

TRANSPORTATION

The urgency of helping India to resolve her transportation problems has influenced the support given by the United States for this purpose. Approximately 19 per cent of total U.S. aid given to India in the years 1952-56 was for the modernisation and expansion of her surface transport facilities. Of the \$65.6 million made available for improvement of railway and aviation facilities \$63 million has been apportioned for the import of new equipment to replace uneconomic, outmoded equipment; for the import of semi-finished steel products necessary to augment India's present allocation of steel for railroad purposes; and for the services under contract of a Railway Survey Team which will supplement the efforts of India's own Railway Board. Project agreements in the transportation field are:

Railway Rehabilitation and Expansion

U.S. Commitment to June 30, 1957—\$78,088,742.

The railway rehabilitation project under the 1954 Indo-American programme provided for the purchase by India of 100 new locomotives, 2,500 broad gauge freight cars and 2,500 meter gauge freight cars. An additional \$7,975,000 was made available by the United States Government to offset the excess cost of railway equipment procured in the U.S. under 1954 funds, but not formally covered by a project agreement.

Under the 1955 programme the U.S. provided approximately another 3,700 freight cars. Altogether the Indo-American programme will have added 8,730 freight cars and 100 locomotives to the Indian railway system.

Additional technical assistance is making possible an extensive survey of the Indian railways to suggest immediate as well as long-term recommendations necessary to meet the increasing pressure on the present inadequate system.

A study has also been made of how to achieve optimum capacity as well, by increasing certain basic capital expenditures over a five to ten-year period.

A second survey has been undertaken into the economic feasibility of utilizing combined rail-sea shipment of bulk commodities, thereby relieving pressure placed on the railway system caused largely by increasing coal traffic.

In addition to supplying locomotives and freight cars, United States assistance in 1956 provides from outside sources 255,000 tons of steel and 4,000 tons of rails for the expansion and rehabilitation of Indian railroads.

Expansion of Aviation Ground Facilities

U.S. Commitment to June 30, 1957—\$2,517,751.

Radio teletype facilities established under the Indo-American programme have permitted the decommutation of the much slower, manually-operated radio corresponding telegraph circuits.

The project has provided additional assistance for modernization and expansion of telecommunication, navigational and meteorological aids. This includes installation of 10 duplex radio teletype network terminals, one ground-controlled approach radar (GCA) facility for handling traffic in bad weather at Bombay, and at least 10 very high frequency semi-directional range (VOR) facilities for use as short-range navigational aids. A storm warning radar system has been provided at Calcutta for use by the Indian Meteorological Department.

Subsequently, it was proposed to provide modern electronics equipment for the Civil Aviation Training Centre at Allahabad in order to ensure that personnel receive training in the same type of equipment they will later have to maintain. It is expected that 200 Indian technicians will receive training at this Centre. Training opportunities in the United States will also be made available for five Indian personnel in flight inspection, electronics engineering and air traffic control.

Civil Air Transport

U.S. Commitment to June 30, 1957—\$33,500.

Under this project, designed to improve Air India International, an executive of broad experience in the general management and operations of an airline is to be furnished for a four-month period and a specialist in stores and inventory management for a six-month period to examine the management, organization and operations of Air India International and make recommendations for improvement.

As a result of the recommendations to be made by the specialists, the United States may, on request, furnish additional technical assistance during a one to three-year period in order to ensure that the development of operations is on high standard, long-range basis and that adequate co-ordination is established between the various AII departments. A programme for development and training of management and supervisory personnel will also be considered; as well as the studying and improving of aircraft maintenance and utilization leading to improvement of operations in the stores department.

LABOUR

The Labour Division of the U.S. Technical Co-operation Mission is co-operating with the Government of India in the labour field by providing the services of American experts to work with officials of the Union Ministry of Labour, by sending Indian experts to the U.S. for study, and by supplying necessary commodities and equipment for use in India.

Specific projects have included assistance to the Central Labour Institute, programmes designed to improve the vocational training system and to train foremen for industry; studies in the field of industrial health, and union leadership training schemes.

Central Labour Institute

U.S. Commitment to June 30, 1957—\$96,401.

This project is assisting the Central Labour Institute in Bombay, to promote industrial efficiency and increased productivity by encouraging improvement in the safety, health and welfare of industrial workers.

The Institute has a centre of visual demonstration, an industrial hygiene laboratory, a library and information bureau, and provides facilities for training. It also can serve as a meeting ground for government, management and labour groups, and provide a hostel for 25 students.

U.S. funds are being used for exhibits, equipment and apparatus for the laboratory, technical books and other supplies and equipment.

Trades Training: The Central Government and States of India have established over 570 training centres which are training annually 35,000 workers.

It is planned under the Indo-American programme to assist in co-ordinating, re-equipping and improving the standards of performance of existing centres for the training of skilled workers in the basic industrial and construction trades.

Nine key instructors went to the United States for a year's training which included a course at Cornell University, followed by training at industrial plants in the United States. These key instructors will train other instructors for India's training centres. The United States will provide a trades training expert and also other technical assistance as required under this project.

The Indo-American programme also provided among others, the following types of equipment for instruction purposes: electrical apparatus, construction equipment, lathes, drills, presses and other machine tools, metal working machinery, automotive repair and maintenance equipment, and such scientific and professional equipment as planimeters and small electric oven furnaces.

In addition, the 1956 programme provided for the contract services of a trades training adviser and for the initial funding of a contract by which 10 expert craftsmen are to be made available for setting up the second instructors' training institute.

Total Commitment to June 30, 1957:

U.S. \$ 650,000.

Thermal Environment

U.S. Commitment to June 30, 1957—\$15,137.

Indo-American studies in industrial hygiene were first undertaken in 1951-53. In continuation of these studies, the 1955 project provided for investigations, demonstrations and training in the measurement and regulation of the thermal environmental conditions of workers, with special reference to the textile industry.

Special laboratory equipment was installed at Ahmedabad to assist in detailed investigation of thermal environmental conditions in basic industries in various parts of India. These investigations sought to draw a relationship between thermal environment and physiological and other effects on workers and on their productivity, with a view to determining standards of industrial hygiene and efficiency ranges. Reduced labour turnover and increased production are among the other results expected. Dollar aid was used for special equipment and supplies to be used for testing purposes.

The programme also provided for additional special equipment and the services of an industrial hygienist and thermal environment consultant.

HEALTH AND SANITATION

Malaria control offers the best example of the results of Indo-U.S. teamwork in this field. The National Malaria Institute has announced that in 1955 there were more than half a million deaths and over 50 million cases of malaria prevented by the control programme.

In the fields of water supply and sanitation, medical education, nursing education, malaria control and health education, co-operative programmes are well under way, and although the results cannot be so clearly measured as in the malaria programme, they are all contributing heavily to building a strong, healthy people that will be the basis for a prosperous, stable nation. Projects under this category include:

Malaria Control

U.S. Commitment to June 30, 1957—\$28,033,143.

The National Malaria Campaign involves the organization of control units. In the first three years of the Indo-American programme 125 units were organized, each extending protection to one million persons. The 1955 addition to the programme raised the number to 186 control units.

The 1956 programme provided for the establishment of 64 more units to cover a population of 200 million people. It is proposed to acquire from outside India 10,000 long tons of DDT powder, 200 tons of dieldrin powder, 240 trucks and 64 jeeps to meet the needs of the 64 new units as well as meeting the continuing insecticide requirements for the control units now in operation.

National Water Supply and Sanitation: After malaria, the outstanding health problem in India is the group of diseases which are water-borne or filth-borne. These include cholera, dysentery, typhoid fever and others. At present only six per cent of the total population of the country is served by adequate piped water.

For more than two years, American and Indian health authorities have been working out the details of a national programme. Plans were developed to improve water supplies and sanitation in some 10,000 villages and 25 municipalities during the first Five-Year Plan, with the expectation that a much more comprehensive effort can be undertaken by the Government of India and the States in the Second Five-Year Plan.

Dollar aid has been used to buy pumps, well drilling rigs, trucks, jeeps, air compressors, well casing, galvanised iron pipe and cast-iron water pipe. The 1955 programme provided for additional equipment, training facilities and technical services with stress on the demonstration phase of the programme.

The programme provides for continuing aid in purchasing over 8,000 tons of cast-iron pipe.

Total Commitment to June 30, 1957:

U.S. \$6,376,532.

Medical Colleges and Allied Institutions: Under this project such equipment as spectrophotometers, centrifuges, incubators, blood cell calculators, ultimate analysis apparatus, vacuum ovens, extraction apparatus, sterilizers, microscopes, X-ray and other laboratory, hospital and research equipment is obtained to assist in teaching and research on diseases constituting basic health problems affecting economic development.

Classes of institutions to be aided include medical colleges, research institutes, schools of nursing, and institutions which have courses in public health engineering.

Under the 1956 supplement to the agreement, additional technical assistance, training opportunities, equipment, and supplies were provided for colleges and allied institutions.

Total Commitment to June 30, 1957:

U.S. \$909,114.

Health Instruction Training Centres: The importance of training in basic public health, and of health education for instructors at village worker training centres, as well as for others dealing with health programmes in Community Projects, is recognised in a programme for setting up three health instruction training centres.

The programme was developed by the Ministry of Health of the Government of India, with the Ford Foundation and the Technical Co-operation Mission. Three health instruction training centres, are being established at Poomalallee in Madras State, Singur in West Bengal, and Najafgarh, Delhi State.

Under separate agreement, Ford Foundation made available \$353,105 for construction of hostels and residential accommodations for the staff and for full operating expenses for two years, one-half of such expenses during the third year and one-third during the fourth year.

Funds available under the Indo-American programme supplement this effort with necessary equipment and supplies for the health instruction centres, such as personnel carts, audio-visual aids, teaching materials and other equipment.

Total Commitment to June 30, 1957:

U.S. \$27,555.

Control of Filariasis: Under this project assistance is provided for the development of a nucleus for a nation-wide filaria control programme to be implemented under India's Second Five-Year Plan. Objectives are reducing substantially the incidence of filariasis by providing treatment to infected persons, protecting people in endemic areas, and finally stopping the spread of the disease to new areas. It is estimated that the initial programme will provide protection to approximately four million people living in hyper-endemic filarial areas.

The U.S. has already assisted in expanding the facilities of the National Malaria Institute to enable it to provide training facilities, consultation services, research facilities and overall direction of the programme, as well as setting up 13 control and 22 survey units in 12 States. The initial survey stage has now been extended and the number of control units will be increased by 35 to 48.

The U.S. will make available additional insecticides for the 13 existing units, and insecticides, drugs and equipment (including station wagons, jeeps and microscopes) for 13 of the 35 new control units to be established. The services of a public health engineer and an entomologist will also be made available under this project. Added training facilities for Indian technicians in parasitology and entomology will aid further in the fight against filariasis in India.

U.S. Commitment—\$2,415,700.

EDUCATION

The TCM is actively assisting India in the gigantic programme of reorienting, strengthening, and expanding education in India, focussing emphasis upon leadership education through demonstration, teaching and guidance, developing research programmes and extension services. Projects in this field are:

Technical Education Institutions: Technical assistance and essential items of equipment will be provided for the Indian Institute of Technology, Kharagpur, to facilitate the training of increased numbers of engineers and technologists, at post-graduate level, needed for India's industrial development.

The Indo-American programme already is financing the exchange of faculty personnel between the Indian Institute of Technology and the University of Illinois in the United States.

Inter-institutional arrangements have also been in effect between the University of Wisconsin and the Bengal Engineering College, Indian Institute of Science, Roorkee University, Indian School of Mines and Applied Geology, Birla Engineering College, and the Bihar Institute of Technology.

A 1955 supplement to this project provided for extension and expansion of the inter-institutional arrangement between the University of Illinois and the Indian Institute of Technology. It will further strengthen and activate instruction and research in the field of engineering at Roorkee University through an arrangement with the University of Illinois.

The services of specialists totalling 22-man years, and training in the U.S. for a number of Indian staff members have also been provided for.

Total Commitment to June 30, 1957:

U.S. \$3,499,364.

Home Science Education and Research

U.S. Commitment—\$683,000.

This project is assisting selected Indian institutions by providing home science specialists, interchanges of staff personnel and advanced students between home science institutions in the United States and India, as well as special equipment and supplies for classroom and laboratory purposes.

Secondary School Teachers

U.S. Commitment—\$1,529,000.

A contract will be entered into with the University of Texas to provide technical experts in teacher education who will assist in estab-

lishing and carrying forward a strong programme of teacher training. In addition, U.S. funds will be used for books, teaching aids and audio-visual equipment, as well as supplying each of 54 participating institutions with a vehicle.

Educational Administration

U.S. Commitment—\$60,000.

U.S. aid consists of the services of a highly qualified specialist in educational administration who will work directly in the Central Institute of Education in the Ministry of Education, as well as working with the State Departments of Public Instruction.

Commodity assistance will consist of professional publications in the field of educational administration, books, bulletins, periodicals and other related library material.

This project serves both as a projection of and a complement to the secondary education project, mentioned above.

Foundry Training

U.S. Commitment—\$180,500.

This agreement provides for U.S. financial assistance for the purchase of essential foundry equipment and supplies not now available in India and to extend the services of a U.S. foundry technologist to the Foundry Training Centre at Kharagpur.

COMMUNITY DEVELOPMENT, SOCIAL WELFARE AND HOUSING

The Community Development Programme has been largely an Indian programme, but the American contribution in its most basic terms—the ideas of extension, the American techniques to teach the idea of extension and the jeeps to carry its benefits to the people—has played a vital catalytic role. Projects in this category are:

Community Projects

U.S. Commitment—\$14,589,028.

As of September 1956, there were 557 Community Development Blocks and 802 National Extension Service Blocks in India, covering 126,857 villages with a population of 82,200,000.

TCM aid which had arrived and been distributed to the States for community project use totalled \$7,884,348 and the equipment included 1,994 jeeps; 236 station wagons, pickups and other trucks; 30 health vans; 34 motor graders; 163 tractors—some of them fitted with bulldozers; 34 road rollers; 350 trailers, and 1,000 film projectors.

Improved Methods of Low-Cost Housing

U.S. Commitment—\$51,206.

This project aims at supplying technical advice and demonstrating materials and techniques. It is also intended to train Indian labour in the new methods and techniques. Such materials as roofing, doors, windows and chemicals for treating wood to resist damage by termites, are purchased from abroad in limited quantities with a view to their being manufactured in India if found suitable.

Social Welfare Education

U.S. Commitment—\$398,280.

Initially the Indo-American programme provided the services of a child-welfare worker for the Delhi School of Social Work and short-term consultants to the Indian Conference of Social Work. The 1955 programme provided for additional specialists from outside India in social research, group and field work, medical social work, child welfare and community organization. The specialists were assigned to various institutions in India, including schools of social work, at Delhi, Baroda, Lucknow, Bihar and Madras to assist in curriculum development, research programmes and social welfare projects. Each specialist was provided with visual aid, testing and other equipment, and pertinent technical publications. The project received continued support under the 1957 programme.

PUBLIC ADMINISTRATION

Public administration has not occupied any important place in the Indo-American programme for the reason that there have been other

fields where U.S. assistance could be more meaningful. However, there have been special areas in which relatively small projects have been taken up, and more of these are likely to develop in the future. In addition to the specific projects listed below, a number of experts in administration have come to India to make suggestions for improving operational methods, and Indian administrative personnel have gone to the United States for special training. Projects in this field are:

Improved Statistics and Reports

U.S. Commitment—\$13,630.

A new Statistics and Reporting Section was recently established within the Department of Economic Affairs, Ministry of Finance, for the purpose of processing operating statistics for the Foreign Aid, Economics and Budget Division of the Department, and other statistical reports required by the Government of India. This project will equip the new section with basic modern office machines to enable it to perform as efficiently as possible in tabulating, presenting and reproducing data required for projects aided by the Technical Co-operation Mission and the Government of India economic programme.

The installation serves as a demonstration unit for other departments of the Government of India, with a view to improving operating statistics and reporting, and aiding in the improvement of public administration generally.

Assistance to Indian Statistical Institute

U.S. Commitment—\$2,800.

Under the present agreement a statistical quality control expert will be provided to the Indian Statistical Institute for up to one year. In addition, an electronics equipment specialist is to be provided for a short period to examine the Institute's needs.

Under another agreement the United States will provide a set of approximately 400 management books and periodicals for the particular use of the industry and management research unit of the Institute.

FOUNDATION AID

As mentioned above, major institutional aid includes programmes by the Ford and Rockefeller Foundations.

In August 1951, at the invitation of the Indian Prime Minister, Paul Hoffman, then President and Director of the Ford Foundation visited India to discuss the possibilities of financial assistance. Activities supported by the Ford Foundation in India include: rural development, development of small industry, education, public administration, research and training, and cultural interchange. As of May 15, 1957, Ford Foundation aid to various programmes in India totalled about \$10 million.

Specific project allocations include: pilot extension projects, \$1,200,000; training of village extension workers, \$1,873,485; training of social education organisers, \$375,363; training of rural public health workers, \$353,106; training of women extension workers, \$618,000; training of village blacksmiths and artisans, \$407,575; aid to agriculture colleges, \$1,360,000; training of project executive officers, \$204,000; aid to regional conferences for project executives, \$37,985; international planning team on small industry, \$107,000; training and provision of senior technicians, \$180,000; secondary education study team on teacher training and curricula, \$102,500; seminars for headmasters, \$58,500; study tour of rural educators, \$26,000; study and planning team on rural higher education, \$22,625; workshops on writing for new literates, \$12,630; Institute of Public Administration, \$350,000; and a Gandhi Memorial Community Centre in Delhi, \$85,000.

An omnibus education grant by the Ford Foundation totalling approximately \$2,000,000 in 1955 was used to support an institute for teachers and a national clearing house of information on education; to aid four technical institutes to help small scale industries; to sponsor a training programme for public health workers; and to help finance a project designed to make good books available at low cost.

The Ford Foundation announced on 18th Oct 1957 grants to India totalling approximately \$ 4 million dollars, including a grant of \$85,000 dollars to the Government of India to assist in the establishment of an English language training institute

Other Ford Foundation grants to India are :

The Government of India—418,000 dollars to help support the programme of the All-India Council for Secondary Education, 357,000 dollars for the establishment of departments of extension services at the secondary school teachers training colleges, 258,000 dollars for a research and action project in environmental sanitation, 34,000 dollars for strengthening the teaching of science at the secondary schools.

Agricultural missions—14,000 dollars for research and writing on changes in Indian village life and the caste system

Indian Literacy Board—69,000 dollars for training in the preparation of reading materials for new literates

Indian Council of Medical Research—291,000 dollars for teaching and research regarding the social sciences in health education

Institute of International Education—8,000 dollars for a study tour in the United States by Indian accountants

Foundation-administered projects—120,000 dollars for consultation, equipment, and training to advance the publications programme of the Southern Languages Book Trust, 73,000 dollars for advisers on small industries development, 53,790 dollars for an adviser on extension training, 35,000 dollars for a specialist and research assistant on rural development, 20,000 dollars for a consultant on extension and community development, 5,700 dollars for a consultant in industrial relations research, 2,200 dollars for a consultant on general education

The Foundation also made an appropriation of 575,000 dollars to the Indian Law Institute "to assist a co-operative programme of legal research and training on Indian legal problems" conducted by the Indian Law Institute in association with American and other non-Indian lawyers and law schools

The total grant in 1957 was 5.5 million dollars

Rockefeller Foundation Aid: The Rockefeller Foundation has also extended aid to India in the field of public health, especially training of health personnel. This programme has been in existence for more than two decades. The Foundation has had one or more representatives in India since 1920, helping the Government of India and State Governments, at their request, to develop public health programmes

It supplied funds for the construction and equipment of the All-India Institute of Hygiene and Public Health in Calcutta in 1932, and also aided in the setting up of seven rural demonstration health units. As of mid-year of 1957, Rockefeller aid to India was estimated to total \$5,400,000.

The Watumull Foundation also has a sizable programme for India in the fields of education and population control.

A new loan was arranged on March 4, 1958. Parts of the Communiqué issued on the occasion are given below.

"A delegation from the Government of India, led by Mr. B. K. Nehru, has had discussions during the last four weeks with the authorities of the Export-Import Bank of the United States and the Development Loan Fund in Washington. As a result, letters of commitment were exchanged on Tuesday, March 4, 1958, at Washington between Mr. B. K. Nehru and Mr. Samuel Waugh, President of the Export-Import Bank, and Mr. Dempster Macintosh, representing the Development Loan Fund.

PRIVATE AID

Impressive though the above figures may be, it is the private voluntary aid—both from individuals and voluntary welfare agencies—that reveals the extent of good-will that ordinary Americans bear towards India.

Relief supplies of all kinds valued at about \$41 million (Rs. 20 crores) have been donated by individual Americans in all walks of life during the five years from July 1951 to June 1956 for distribution to needy persons throughout India, according to the Council of Voluntary Agencies.

All supplies are expressly intended for free distribution among the poor and needy, regardless of religion, caste or creed. These gifts of late have consisted chiefly of milk powder, ghee, cheese and multipurpose food. In times of emergency grains have also been imported. Having reserve stock on hand, these voluntary agencies have been able to move the relief supplies to emergency areas without any loss of time.

In addition, there have been several lakhs worth of hospital supplies and equipment, including ambulances and health vans, steel ploughs for farmers, kits to midwives, text books, clothing and blankets.

The following quantities of relief and self-help goods have been distributed in India during the last five years

Year (July-June)	Value in dollars
1951-52	765,365
1952-53	957,712
1953-54	1,996,192
1954-55	18,792,000
1955-56 (estimated)	18,932,000
1956-57 (estimated)	19,500,000
	60,933,269

On July 9, 1951, an agreement was signed between the Governments of India and the U.S. "to facilitate the flow of and to effect the efficient entry and distribution of donated goods and supplies for relief and rehabilitation." The purpose of the agreement was to assist a people-to-people movement which had spontaneously gone on for years.

Under this agreement, in regard to gifts sent from the U.S., the Government of the United States pays ocean freight, while the Government of India allows duty-free entry and provides for inland transportation charges.

The distribution of relief supplies under the Agreement is carried on under the aegis of certain U.S. voluntary agencies approved by the Government of India and the U.S. Government. These are: American Friends Service Committee, American National Red Cross, CARE (Co-operative for American Remittances to Everywhere), Catholic Relief Services—National Catholic Welfare Conference, Church World

Service, Lutheran World Relief, and Mennonite Central Committee.

The representatives in India of these seven American voluntary agencies formed a Council of Voluntary Agencies in December 1951 to share ideas and to co-ordinate their programmes. To see that supplies are directed to areas of greatest need and are otherwise efficiently distributed, the Council has the benefit of the counsel and assistance of a National Advisory Committee composed of a number of prominent Indians.

To help co-ordinate the programme at the State level, State Advisory Committees have been established.

Some 19,000 Indian committees, distribution centres and agencies are co-operating in this programme. The success in distributing these foods is therefore due to the selfless service of thousands of Americans and Indians, known and unknown. In every case the State Government and the district officers are informed of the receipt of the supplies and the plan of distribution to ensure the Governments of India and the U.S. that the terms and conditions as laid down in the agreement are fulfilled.

In the normal programme, the supplies are handled chiefly through Indian medical institutions including sanatoria and leprosy homes, welfare centres and schools.

The work of these U.S. voluntary agencies in India forms part of the world-wide effort of the American people to serve the needy. Since 1939, the American people have contributed nearly \$2,000 million for relief abroad through scores of voluntary agencies. These agencies have increasingly been instrumental in meeting emergencies arising from natural disasters, epidemics or famines.

Exchange of Persons

A closely-related programme to foster closer understanding between India and the United States is the so-called Exchange of Persons Programme.

Early in 1950, the India-U.S. Fulbright Agreement was signed, as sequel to the Fulbright Act of the U.S. Congress, which provides for the use of U.S. receipts from sales of World War II surplus property abroad for travel grants to students.

The agreement provides for the utilisation of the rupee equivalent of up to \$400,000 a year towards travelling expenses of Indian students to and from the U.S. and all expenses of Americans coming to India for study, research or instruction.

More than a hundred Indian students are awarded Fulbright travel grants every year, while nearly one-fourth of that number of Americans come to India annually under the programme.

Another U.S. exchange programme under the Smith-Mundt Act enables leaders of public opinion, both American and Indian in various fields to visit each other's countries. Under this programme several prominent Indians visit the United States on study-observance-lecture tours every year, and Americans come to India on similar tours.

NEW U.S. LOAN TO INDIA

"A credit of 150 million dollars from the Export-Import Bank will be utilised for the procurement in the United States of capital equipment, machinery and services needed by India in the next 12 months for the following programmes: Irrigation and reclamation, power, transport and communications, mining and certain selected industries, like textiles, chemical industries, the fabrication of heavy structural and electrical equipment and machine tools.

"Payment made in the United States after February 28 for goods under these programmes will be eligible to be paid from this credit. The credit will bear interest at 5½ per cent and the term will be 15 years. Repayment of principal will, however, start only on January 15, 1964.

"A credit of 75 million dollars from the Development Loan Fund will be utilised for the purchase of components for the manufacture of trucks, buses and jeeps needed for India's road transport development, purchase of structural steel and other steel products required by Indian Railways and for the purchase of machinery for India's jute and cement industries. Repayment will start on March 15, 1960, and can be in rupees. The credit in respect of railway purchases will bear interest at 3½ per cent and will be repaid in 40 semi-annual instalments. The other credits will bear interest at 5½ per cent and will be discharged in 30 semi-annual instalments."

* From Aug. 15, 1945 to Dec. 1, 1956 the Red Cross contributed \$9,000 dollars.

† Had a two-acre programme for 1957 for free distribution of food grains, medicines, agricultural machinery and implements for cottage industries.

COLOMBO PLAN

HEADQUARTERS: P.O. Box No. 596, Colombo.

Director: R. H. Wade; **Dy. Dir.** S. A. Shereef; **Information Officer:** R. K. Chatterjee; **Asst. Information Officer:** L. P. Goonetilleke.

Present Plan period: 1951-61.

Original Plan period: 1951-57.

Members of the Colombo Plan:

Australia, Burma, Cambodia, Canada, Ceylon, India, Indonesia, Japan, Laos, Malay, Nepal, New Zealand, Pakistan, Philippines, Thailand, United Kingdom (with Brunei, North Borneo, Sarawak, Singapore), U.S.A., Viet Nam.

From 1951 upto Oct. 1957 about 700 experts were made available to Asian countries and training facilities were provided for nearly 5,000 selected trainees.

The value of the training equipment supplied reached a total of £1.4 million by the end of 1956.

Contributions from the Commonwealth Governments amounted to (upto the end of 1956):

Britain \$662,958; Australia \$522,512; Canada \$72,711; New Zealand \$29,094; Ceylon \$97,813.

India (to Nepal): Rs. 40 mln. up to 1955-56. There is a promise of a further Rs. 100 mln.

India provided from July 1950 upto June 1957, 19 experts and 511 training places.

India received during the same period 1,011 training places and 139 experts.

The original members of the Scheme agreed to provide assistance upto the value of about \$8 million made up as follows: India: \$750,000; Pakistan: \$161,230; Ceylon \$400,000; New Zealand: \$400,000; Canada (an annual): \$400,000; Australia: £2.8 mln.; Britain an original £2.8 mln. and a contribution of £7 mln. over a period of seven years from April 1956.

Australia, Canada and New Zealand have pledged continuing participation.

The Colombo Plan was conceived at a meeting of the Foreign Ministers of the Commonwealth countries at Colombo in January 1950.

A consultative committee was set up to consider ways and means of carrying out the desired co-operative economic development. This committee met at Sydney in May 1950, where it was agreed that Commonwealth countries in the area should draw up development programmes covering a six-year period from 1st July 1951, and that the other countries in the area should be invited to take similar action. Agreement was also reached at the meeting on the establishment of the Technical Co-operation Scheme.

The original members were Australia, Canada, Ceylon, India, New Zealand, Pakistan and the United Kingdom, together with Malaya and British Borneo. These were Commonwealth countries, but it was contemplated from the beginning that all countries in the area should be invited to participate in the Plan on equal terms.

Subsequent meetings of the Consultative Committee were held in London (September 1950), Colombo (February 1951), Karachi (March 1952), New Delhi (October 1953), Ottawa (Oct. 1954), Singapore (October 1955), Wellington (December 1955) and Saigon (October 1957).

At the London meeting the six-year development programmes prepared by the Commonwealth countries in the area were considered and incorporated in a report (The Colombo Plan for Co-operative Economic Development in South and South-East Asia). At the Colombo meeting the Commonwealth countries announced the financial contributions they would make towards the cost of carrying out the programmes.

Five annual reports were prepared at the Karachi, New Delhi, Ottawa, Singapore, and New Delhi meetings respectively, in which attention was concentrated on the developments of the previous year and on the progress expected in the coming year.

At the London meeting of the Consultative Committee in September 1950, Burma, Cambodia, Indonesia, Laos, Thailand and Viet Nam were represented by observers. Laos, Viet Nam and Cambodia became full members in 1951.

Burma and Nepal first attended the Karachi meeting as full members; while Indonesia attended the Delhi meeting in 1953 as a full member.

The United States of America, which in 1950 had assistance programme in operation in the area, associated itself with the other members of the Committee and attended as a full member the Colombo meeting of February 1951.

Thailand sent observers to London and following meetings while the Philippines had observers at the Colombo, Karachi and Delhi meetings. At the Ottawa meeting Thailand and the Philippines attended for the first time as full members of the Plan, and Japan was also admitted as full member of the Plan.

The Technical Co-operation Scheme provides a framework for the exchange of technical assistance between participating countries. Co-ordination is provided by a Council at Colombo, on which participating Governments are

represented, and by the Bureau for Technical Co-operation, located in Colombo, which reports to the Council. Representatives of the United Nations Technical Assistance Board and the United States attend as observers the meetings of the Council.

The International Bank for Reconstruction and Development has maintained close liaison with the Committee in its work and has been represented at the Colombo and later meetings.

The studies and activities of the ECAFE are related to development problems of the area and it has sent observers to the Karachi and subsequent meetings.

An Information Unit in conjunction with the Bureau of Technical Co-operation at Colombo, assists member countries in promoting in their territories knowledge of the Colombo Plan. The Unit collects information material from member Governments, collates it and distributes it in a suitable form through member Governments. It also maintains a central pool of information on the Colombo Plan.

It was agreed at the Singapore meeting that the Colombo Plan be extended from July 1957 to June 1961.

ACHIEVEMENTS OF PLAN

During this period (1951-57) national income in the region has continued to rise at a rate slightly in excess of the rate of population growth. Much effort went into this achievement as the population of the area is rising at a rate of 10 million annually.

The countries have made advances both in the planning and implementation of development programmes. India completed her first Five-Year Plan with encouraging overall results and a second Five-Year Plan has been adopted. In Pakistan, a new draft Five-Year Plan has been prepared. In Burma and the Philippines, development programmes have been adjusted in the light of the available resources, while Indonesia and Nepal have drafted their first comprehensive plans. Other countries in the area have devoted attention to the need for comprehensive planning, for example, in Ceylon, a National Planning Council has been established.

The countries of the area are also investing more and more on development, although the progress of expenditure is not uniform in all cases. For the region as a whole, development expenditure increased from \$520.5 million in 1953 to \$791.4 million in 1955. The estimated expenditure in 1956 is of the order \$1,070.3 million or more than double three years ago.

Expenditure on development in the public sector (\$ million at a constant rate of Exchange):

	1953-54 or 1953, Actual	1954-55 or 1954, Actual	1955-56 or 1955, Actual or Revised Estimates	1956-57 or 1956, Estimates
Burma	54.4	38.0	32.4	40.0
Ceylon	18.3	29.5	36.8	35.9
Federation of Malaya	17.4	16.4	15.6	25
India	237.2	365.6	502.9	632.7
Indonesia	68.0	76	40	102.7
Nepal	0.7	0.8	2.1	2.3
Pakistan *	39.9	61.8	83.7	129.1
Philippines	47.8	36.1	55.6
North Borneo	2.2	2.1	2.8
Sarawak	1.6	2.4	1.5	4.1
Singapore	11.4	15.8	13.5	14.3
Thailand *	23.1	33.0	24.8	31.8
Total	530.5	695.9	791.4	1,070.3

* To facilitate comparison all Pakistan and Thailand totals have been calculated at rates of exchange in force in November 1954.

Agricultural production in 1955-56, on balance, showed little improvement over the previous year. There was an increase in mining output, particularly in petroleum production. Significant progress was made in industrial production as a result of greater utilisation of existing equipment and expanded facilities resulting from new investment.

After a setback owing to unfavourable weather

The following table shows the volume of

conditions in 1954-55, food-grain production rose moderately in 1955-56 (except in India and Pakistan) despite serious damage caused by droughts, heavy rains, and floods in most countries. The production of rice showed an increase of 6 per cent. In 1955 the production of electricity was 11,796 million kwh., representing an increase of about 12 per cent over the preceding year.

The provision of agricultural and industrial credit on reasonable terms and the organisation and efficient management of rural co-operative societies are also being increasingly recognised as essential to development.

Adequate communications have high priority in the plans of the area, and Governments have considerable achievements to their credit.

production of certain commodities in 1954 and 1955:

(Thousand metric tons)

	1954 (thousand metric tons)	1955 (thousand metric tons)	Percentage Increase

Electricity (million KWH.)	10,548	11,796	12

(Source: Economic Bulletin for Asia and Far East (EOAFE) August 1956)

The development expenditure is met in each country largely from internal resources and by valuable assistance received from external sources.

The external sources are: grants, loans and commodity assistance, sterling balances, private foreign investment, loans floated by private investors in London and other financial centres, loans from the International Bank for Reconstruction and Development

Total Contributions to the Plan by Member Countries:

Total amount of aid offered by various countries (spent or committed to the end of the financial year 1955-56, including both capital and technical assistance) is as follows: Australia: £(A)32.2 million; Canada (by the end of the financial year 1956-57): \$167.8 million; India: Till 1955-56, assistance to Nepal has been of the order of Rs. 40 million. India has further promised to help Nepal to the extent of Rs. 100 million; Japan: 98.5 million yen; Malaya: £926 (till Dec. 1956); New Zealand: £5.47 million; Pakistan: (Till Dec. 1956) £21,565; Philippines: 100,000 pesos (1956-57); Singapore: £543; United Kingdom £0.86 million by way of grants, loans, credits and technical assistance excluding private investment and drawings by India, Pakistan and Ceylon on their Sterling balances. In addition U.K. has authorized £1.18 million to the area from her sterling subscription to the IBRD; United States of America: over \$2,000 million, excluding private investment and

assistance by private organisations such as Ford & Rockefeller Foundations.

TECHNICAL ASSISTANCE

Australia, Canada, Ceylon, India, Japan, New Zealand, Pakistan, Philippines, Malaya and Singapore and United Kingdom are contributing 9.7 million to finance the Colombo Plan Technical Co-operation Scheme.

Technical assistance consisting of provision of facilities for training, supply of experts and provision of equipment for training and research institutions, is also offered under various programmes of the United States and the United Nations and its Specialised Agencies.

Till 30 June, 1957, 12,895 places have been found for men and women of the area to receive training outside their own countries. Not all the training is arranged outside South and South-East Asia; some Asian countries are helping others in training facilities.

Approximately 6,223 experts have placed their skills at the service of the area. A number of countries have established technical schools and polytechnics in special fields such as textile and nursing education. Many countries are using the services of consultants in preparing general development plans and specifications for particular projects. Ideas are also being canvassed for the establishment of workshops, for small scale industries and also of new regional training centres, or the expansion of existing facilities, so that more than one country may benefit from institutions available for the study of common problems.

The future holds out great opportunities for technical training so essential to economic development. The United Kingdom has announced a contribution of £7 million towards the provision of technical assistance for the seven years beginning April 1956. The Canadian Government has provided a NEX atomic reactor to India. This type of reactor is a high-powered research and experimental unit. In accepting the offer the Indian Government has indicated its willingness to allow accredited foreign scientists, including those from other Colombo Plan countries in South and South-East Asia, to work with this reactor. The United States has also offered to locate an atomic research centre in South and South-East Asia.

Under the Technical Co-operation Scheme of the Colombo Plan, 792 experts and 5,622 training places had been provided to the countries of South-East Asia till June 1957. Their distribution is as follows:

	Training	Awards	Experts
Australia	2,063	238	..
Canada	737	133	..
Ceylon	83	2	..
India	511	19	..
Indonesia	10
Japan	64	65	..
Malay	27
New Zealand	468	75	..
Pakistan	59
Singapore	34
Thailand	2
United Kingdom	1,614	260	..
Total	5,622	792	..

The following table gives the accounts of expenditure by supplying country and type of assistance, Technical Cooperation Scheme July 1950 to December 1956.

INDIA

India has offered both economic and technical assistance to the countries of the region. Economic assistance has been given primarily to Nepal, upto Rs. 40 millions till 1955-56. There is a promise of a further Rs. 100 million. This assistance was for development of roads and communications, construction of an air-field, mapping and air survey work, construction of Trisuli Project and minor irrigation works. Till 1955-56 a sum of Rs. 40 million was estimated to have been spent under this aid programme.

In 1956-57, a sum of Rs. 10 lakhs was given to the Government of Nepal under the Annual Treaty payment. A similar amount was given during 1957-58, under the same Head.

An expenditure of approximately Rs. 15 lakhs was incurred for the provision of training facilities and the services of experts to member countries of Colombo Plan. Also under the Colombo Plan, technical and economic assistance of the value of approximately Rs. 1.08 crores was given to Nepal for implementing its 5-Year Plan. Both these amounts were given for the year 1956-57.

For 1957-58, a sum of approximately Rs. 9 lakhs was given upto November 30, 1957 and a sum of approximately Rs. 32 lakhs was given upto the end of September, 1957. Both these figures relate to assistance to Nepal under the Colombo Plan.

A loan of Rs. 20 crores had been advanced to the Government of Burma for the economic development of that country. Another loan of Rs. 4.93 lakhs had been given to the Government of Indonesia for training Indonesian air force personnel. This sum had been given out of an agreed loan of upto Rs. 50 lakhs.

In the technical field, India has provided 511 scholarships and fellowships to students of South-East Asia in various technical subjects at the Indian Universities, Scientific and Research Institutes and in other projects up to 30th June 1957. Of this number 273 were to Nepal; the rest were for Ceylon (103), Philippines (34), Pakistan (89), Burma (30), Indonesia (11), Thailand assistance was for the development of roads and (10), Malaya (5), Singapore (3), Japan (5). The largest number of places were provided in the field of statistics (115), second came engineering (98), followed by industry and trade (78), (97), second came statistics (89) followed by education (70).

The training in statistics (89 places) have been provided by the International Statistical Education Centre, Calcutta, which is jointly sponsored by the International Statistical Institute and the Indian Statistical Institute in collaboration with UNESCO.

In addition, India has offered facilities for practical training in Civil, Mechanical and Electrical works at Hissard Project, main-ten-

ance and operation of heavy earth moving equipment, and engineering at Bhakra-Nangal Project.

Training facilities available in the various research laboratories of India such as National Chemical Laboratory, Poona; Central Drug Research Institute, Lucknow; Fuel Research Institute, Digwadih; National Physical Laboratory, Delhi; National Metallurgical Laboratory, Jamshedpur; Central Glass and Ceramic Institute, Mysore; and Central Leather Research Institute, Madras, have been offered for junior scientists from the countries of South and South-East Asia.

Training facilities in dredging river survey, port traffic operations and management, harbour engineering works, etc. have been offered on the major ports of Bombay, Calcutta, Madras, Cochin, and Kandla and also pre-sea training in the Mercantile Marine Training Institutes in India.

Offers of training facilities in Civil Aviation and in Agriculture and Industrial fields have also been made.

To give random examples of the sort of assistance India is receiving:

Canada assists in nuclear research. About 30 nuclear scientists from India are being trained in connection with India's second research reactor which Canada is helping to build at Trombay, near Bombay.

An Australian expert is advising on the best types of boats and gear for training local fishermen of West Bengal.

For a million-ton steel plant under construction by a British consortium at Durgapur, West Bengal, 800 engineers and technicians are to be trained.

Britain has also sent two missions of experts to India, one to advise on the establishment

and siting of a second ship-building yard and the other on reducing port congestion.

The provision of technical assistance by countries of South and South-East Asia to one another is an increasingly important feature of the Scheme and the level it has now attained reflects progress in the creation of technical skills.

Of 5,622 training places provided during the seven years of the Scheme 676 places were pro-

vided by countries of the region. India provided 511 of these places, 273 being for Nepal; 108 for Ceylon; 89 for Pakistan; 84 for the Philippines; 24 for Burma and the rest for Indonesia, Malaya, Singapore and Thailand.

Pakistan, Ceylon, Singapore, Malaya, Indonesia and Thailand are other countries which have provided training facilities.

India and Ceylon have also supplied experts.

INDIA'S FOREIGN LIABILITIES AND ASSETS, 1955*

THIS article presents the main results of a Survey conducted by the Reserve Bank of the country's foreign liabilities and assets as at the end of 1955. Like the two previous enquiries in this field viz., Census of foreign liabilities and assets as on 30-6-1948 and Survey of foreign liabilities and assets as on 31-12-1953, the present Survey provides an indication of the country's international investment position on

long-term and short-term accounts as at the end of 1955, and an analysis of business investments from abroad, particularly in foreign-controlled enterprises.

Some 1,700 companies filed returns under the Survey. The data were supplemented by information obtained from official agencies including the departments of the Bank.

India's total liabilities and assets at the end of 1955 amounted to Rs. 768.8 crores and Rs. 1,251.8 crores respectively, indicating a net creditor position of Rs. 485.5 crores.

This net creditor position was wholly due to the official sector, which had a net creditor position of Rs. 960.8 crores, the non-official sector showing a net debtor position to the extent of Rs. 475.3 crores.

TABLE 1.—INDIA'S INTERNATIONAL INVESTMENT POSITION (SUMMARY)

(Crores of Rupees)

(Crores of Rupees)

Period	Liabilities			Assets			Net Position
	Short-term	Long-term	Total	Short-term	Long-term	Total	
OFFICIAL SECTOR							
30th June 1948	55.5	122.6	178.1	1,208.8	730.8	1,939.6	+ 1,761.5
31st December 1953	16.0	233.6	249.6	433.8	772.8	1,206.6	+ 987.0
31st December 1955	16.6	193.3	209.9	455.8	714.9	1,170.7	+ 960.8
NON-OFFICIAL SECTOR							
30th June 1948	38.4	287.7	326.1	11.5	57.6	69.1	- 257.0
31st December 1953	35.4	441.4	476.8	11.4	66.0	77.4	- 399.4
31st December 1955	50.0	506.4	556.4	18.4	62.7	81.1	- 475.3

The country-wise details show that India was a net creditor with respect to both the United Kingdom (Rs. 408.5 crores) and Pakistan (Rs. 269.5 crores), while it was a net debtor with respect to the U.S.A. (Rs. 104.7 crores) and most of the other countries. India's position vis-à-vis Burma was changed from that of a net creditor as at the end of 1953 to that of a small net debtor mainly on account of the settlement of Burmese debt of Rs. 48 crores during 1954-55.

TABLE 2.—INDIA'S INTERNATIONAL INVESTMENT POSITION (COUNTRY-WISE)

A fuller table appears below.

(Crores of Rupees)

Country	30th June 1948			31st December 1955		
	Liabilities	Assets	Net Position	Liabilities	Assets	Net Position
U.K.	298.2	1,591.2	+1,293.0	443.6	852.1	+408.5
U.S.A.	20.2	15.3	- 4.9	140.6	35.9	-104.7
Pakistan	66.8	322.5	+ 255.7	50.7	320.2	+269.5
Burma	8.8	54.2	+ 45.4	5.5	3.9	- 1.7
I.M.F./I.B.R.D.†	14.9	11.8	- 3.2	29.3	19.8	- 10.0
Others	95.3	13.7	- 81.6	96.6	20.4	- 76.2
Total	504.2	2,008.7	+1,504.5	766.3	1,251.8	+485.5

Between 30-6-1948 and 31-12-1955, India's net creditor position was reduced by Rs. 1,019 crores as a result of a fall in assets of Rs. 787 crores and an increase in liabilities of Rs. 232 crores.

Most of this change occurred during the period prior to 1953. India's creditor position was reduced only to the extent of Rs. 72 crores between 31-12-1953 and 31-12-1955 as a result of a fall in assets of Rs. 32 crores and an increase in liabilities of Rs. 40 crores.

A large part of the decline in the net assets

of the country between 30-6-1948 and 31-12-1955 was accounted for by the official sector; its assets declined by Rs. 769 crores while its liabilities increased by Rs. 32 crores. At the same time, the net debtor position of the non-official sector increased by Rs. 218 crores; its foreign liabilities increased by Rs. 230 crores while its foreign assets showed a small rise of Rs. 12 crores.

Though India emerged as a net creditor country at the end of 1955 it is very likely that by the end of 1957 it has already become a net

debtor country as a result of the large reduction in the country's sterling assets and substantial additions to its liabilities to the U.S.A., the I.M.F. and the I.B.R.D.

The official sector comprises the Central Government, State Governments, port trusts, improvement trusts, local authorities and statutory corporations including the Reserve Bank of India.

The table on next page gives a comparative picture of the long-term official liabilities and assets as at the end of 1953 and 1955.

* Prepared in the Division of International Finance of the Reserve Bank being a summary of a Report published by the Bank.

† Published in the form of Reports in 1951 and 1955.

‡ Capital contributions in rupee securities have been omitted from both sides.

TABLE 3.—LONG-TERM LIABILITIES AND ASSETS OF THE OFFICIAL SECTOR

(Crores of Rupees)

Head	Assets*		Liabilities*	
	1953	1955	1953	1955

2. (a) Loans (excluding (b) below) ..	—	—	117.6	114.5
(b) Dollars purchased from the I. M. F. out-	—	—	47.6	6.0
standing	—	—	0.3	7.0
3. Liabilities in respect of goods purchased abroad	—	—	—	—
4. Inter-Government debt due from Burma ..	48.2	—	—	—
5. Gold and dollar subscriptions to the I.M.F. and I.B.R.D.	16.9	16.9	—	—
6. Claim on the U.K. under the 1955 pensions settlement	53.3†	48.0	—	—
7. Others	7.9	5.3	9.9*	5.4
Total	472.8	414.9	213.0	172.7

* Assets exclude Rs. 300 crores of partition debt due from Pakistan; liabilities exclude Rs. 20.6 crores due to the U.K. by way of World War I loan liability of which remains suspended. Both these items figure in Tables 1 and 2. † Claim as on 1st April 1955.

Two important changes have taken place during this period. On the assets side the Inter-Government debt of Rs. 48.2 crores due from Burma was liquidated following certain arrangements reached with Burma in 1954. The debt was in the first instance scaled down to Rs. 20 crores, of which Rs. 15.6 crores was repaid by Burma in the form of rice shipments to India; the balance of Rs. 4.4 crores was treated as India's aid to Burma under the Colombo Plan.

As regards liabilities, India repurchased its currency from the I.M.F. to the extent of Rs. 41.6 crores. The balance of Rs. 6 crores outstanding on 31-12-1955 was repurchased in April 1956.

It may be recalled that this liability was incurred in 1948-49 when India purchased from the I.M.F. \$100 million in order to ease the pressure on its reserves. In accordance with the principle of maintaining the revolving character of the I.M.F.'s resources, India commenced repurchase transactions in March 1954 and completed the repurchase in five instalments.

Another item showing a significant change in the position as compared to 1953 was the increase in the outstanding credits in respect of goods purchased from abroad, to the extent of Rs. 6.7 crores.

Data in respect of foreign liabilities of business enterprises in India comprise (a) the net position of branches of foreign-incorporated companies which is a composite of short-term and long-term obligations, (b) all the long-term obligations of Indian joint-stock companies such as shares, debentures and loans and advances.

These liabilities have been classified under three heads, viz., direct investments, portfolio investments and miscellaneous obligations.

Where foreign investments are accompanied by control and direction of the enterprises by foreign investors, such investment may be said to belong to the direct category.*

Portfolio investments comprise ordinary shares held by non-residents, other than those treated as direct-controlled, as well as preference shares and debentures held by all non-residents.

Miscellaneous obligations represent loans and advances, including inter-company/inter-branch balances, and liabilities to non-residents in respect of life and non-life insurance policies.

The combined total of direct and portfolio investments is regarded as business investments.

Total liabilities of business enterprises (vide table 4) as at the end of 1955 aggregated Rs. 522 crores of which business investments amounted to Rs. 481 crores.

The latter was predominantly in the form of branch investments and equity holdings while creditor capital amounted to only about 3 per cent of the total.

The bulk of the investments was of the direct category, portfolio obligations being less than 15 per cent of the total.

There are some striking differences with regard to the distribution of each type of business investment among the different business activities. The foreign branches have largely invested their capital in trading, utilities and transport, and plantations. Direct-controlled joint-stock companies, especially the subsidiaries, have concentrated their investments mainly in the manufacturing sector.

Britain continued to occupy the predominant position amongst creditor countries (vide table 5). Liabilities to the U.K. at the end of 1955 exceeded Rs. 400 crores or 77 per cent of the total of foreign business liabilities.

The U.S.A. accounted for some Rs. 45 crores of capital a large part of which was invested in petroleum activities.

The remaining countries taken as a whole provided Rs. 74 crores of which nearly one-half represented financial liabilities.

The long-term foreign assets of the Indian joint-stock companies as on 31-12-1955 amounted to Rs. 54 crores.

The banking and insurance companies accounted for Rs. 15 crores of this total, while other joint-stock companies had invested abroad Rs. 39 crores.

The holdings were mainly in the form of ordinary shares and immovable property (Rs. 19.2 crores). Government securities (Rs. 18.9 crores) and inter-company balances and loans and advances, etc. (Rs. 12.8 crores).

A considerable portion of the assets represented claims on the U.K. (Rs. 20.0 crores) and Pakistan (Rs. 17.6 crores); the rest of the assets

were distributed among a large number of countries.

Comparing the figures compiled under the present Survey with those under the Survey for 1953 it will be seen that foreign-held business investments in India showed an increase of Rs. 61 crores during the two years, and stood at Rs. 481 crores on 31st December 1955 (vide table 6). Since during this period some valuation changes have also taken place, the difference of Rs. 61 crores mentioned above does not correspond to the net movement of capital. Such valuation changes can affect the balance sheet values of both fixed and floating assets.

In the recent period valuations were largely confined to the tea companies. During 1954-1955, the tea companies resorted to revaluation of their fixed assets to an unusual extent and as a result, the foreign investments in this sector were written up by as much as Rs. 20 crores. The revaluation of the fixed assets in the other industries, however, appears to be of a small order to the extent of not more than Rs. 2 crores at the most.

Valuation changes in respect of the floating assets are likely to be significant only during times of substantial price movements. The years 1953 to 1955 were a period of price stability, at any rate, for raw materials and manufactured goods, which constitute the bulk of the floating assets of business concerns. It appears that the valuation changes in respect of floating stocks are unlikely to have influenced the changes in the levels of foreign business investment to any significant extent between 1953 and 1955.

TABLE 6.—FOREIGN BUSINESS INVESTMENTS

(Crores of Rupees)

	30-6-1948	31-12-1955
Manufacturing ..	72.0	163.3
Trading ..	64.4	102.3
Utilities & Transport ..	31.2	53.1
Mining ..	11.5	9.6
Financial ..		
(a) Banking ..	31.7	20.2
(b) Others ..	6.9	19.1
Plantations ..	52.3	87.2
Miscellaneous ..	17.7	25.9
Total ..	287.6	480.6

Adjusting for valuation changes, the net change in the foreign business investment would be of the order of Rs. 39 crores as against the unadjusted figure of Rs. 61 crores. Excluding from the total some Rs. 4 crores of banking capital, which is mostly in the nature of liquid and floating assets, the non-banking business investments would amount to Rs. 35 crores.

The available data do not permit an accurate estimation of the gross movements of capital in respect of non-banking business enterprises. However, a rough estimate of the cash transfers inward and outward, and net accumulation of earnings by foreign investors in India has been made; deducting this estimated figure from the total figure for the investments in the non-banking enterprises an estimate mainly of investments in kind has been obtained.

Cash transfers on account of repatriation of foreign investments are estimated at Rs. 10 crores while inward remittances for investment purposes amounted to about Rs. 3 crores giving a net outflow of funds of Rs. 7 crores. As regards the retained earnings, it would appear that there was a net inflow of foreign capital of Rs. 23 crores; the residual capital inflow in investments in kind etc. must therefore have been of Rs. 19 crores.

Table 7 compares the 1954-1955 pattern of capital inflow with the corresponding pattern relating to the period July 1948-December 1953.

TABLE 7.—PATTERN OF CAPITAL INFLOW
(Crores of Rupees)

	July 1948 to Dec 1953	1954 and 1955
Total change in business investments ..	132	61
Estimated revaluation of assets ..	-12 to 15	-22
Change in banking investments ..	16	-4
Estimated non-banking capital inflow ..	133-136	35
(a) Cash transfers (net) (excluding transfers of accumulated earnings) ..	-15 to 20	-7
(b) Retained earnings (net) ..	70	23
(c) Investments in kind, etc. (derived) ..	85	19

Table 8 presents a classification of the changes in the foreign investments, under main business activities in a form slightly different from that given earlier.

Petroleum activities appear in the table as a separate group and are excluded from the groups 'Manufacturing' and 'Trading', with a view to showing the importance of this field of investment during the two periods.

TABLE 8.—NON-BANKING BUSINESS INVESTMENTS

(Crores of Rupees)

	July 1948 to Dec. 1953	1954 and 1955
Petroleum : trading ..	+ 46.1	+ 8.1
Petroleum : manufacturing ..	+ 8.7	+ 18.7
Manufacturing ..	+ 55.1	+ 8.9
Trading ..	- 15.7	- 0.6
Utilities and Transport ..	+ 19.3	+ 2.5
Mining ..	- 3.1	+ 1.2
Financial ..	+ 7.8	+ 4.4
Plantations ..	+ 19.3	+ 15.7
Miscellaneous ..	+ 10.0	- 1.8
Valuation changes ..	- 12.0 to 15.0	- 22.0
Total ..	+ 132.5 to 136.5	+ 35.2

As in the past direct investments continued to occupy a predominant position in 1954-1955 also. Even as regards direct investments, investments in the Controlled joint stock companies were much larger than those in branches of foreign incorporated companies.

* The branches of foreign companies, the ownership and direction of which are wholly in the hands of foreign owners are the obvious instances of direct investments. The following types of Indian Joint Stock Companies are also treated as direct controlled viz., (i) subsidiaries of foreign parent companies, (ii) with a few exceptions, companies 40 per cent or more of the shares of which are owned by non-residents belonging to one country, (iii) companies managed by foreign-controlled managing agents in terms of managing agency agreements and (iv) companies 25 per cent or more of whose shares are owned by another foreign-controlled company in India. Only ordinary shares are taken into account for computing direct investments in Indian joint stock companies.

TABLE 9

	July 1948 to Dec. 1953	1954-55
Direct Investments		
(a) Branches ..	+ 73.4 to 76.4	+11.8
(b) Controlled Joint Stock Companies	+ 38.1	+24.5
Total ..	+111.5 to 114.5	+36.3
Portfolio investments ..	+ 21.1	+ 1.1
Total capital inflow ..	+132.5 to 135.5	+35.2

This trend is in contrast with the one witnessed during the earlier period when investment through the branches was much more important.

The available information shows that a large part of investments during 1954-55 was in companies established after 30-6-1948. As shown in the table below, petroleum-manufacturing companies accounted for most of the investment in the new companies during 1954-1955.

TABLE 10

(Crores of Rupees)

	New com- panies	Old com- panies	All com- panies
Petroleum : trad- ing ..	—	8.1	8.1
Petroleum : manu- facturing ..	19.5	-0.8	18.7
Manufacturing (other than petro- leum) ..	3.4	5.5	8.9
All others ..	1.0	-1.5	-0.5
Total ..	24.0	11.2	35.2

A greater part of the investments in the old companies was concentrated in the petroleum trading companies.

The manufacturing investments (other than Petroleum) in the old companies at Rs. 5.5 crores were also somewhat larger than in new companies. In other activities, there was on the whole some repatriation of funds by the old companies as compared to an investment of Rs. 1 crore in new companies.

The foregoing estimate of the foreign business investments does not take into account certain other capital movements, affecting the joint stock companies.

These represent capital receipts and payments associated with (a) the borrowings abroad by way of loans and advances and (b) the acquisition of foreign assets of various kinds by the joint-stock companies.

Such data have been obtained only for obligations with a maturity of more than a year. The inter-company advances as well as other loans and advances obtained by the companies resulted in a capital-inflow of Rs. 5 crores part of which represented advances secured by the petroleum refining companies.

Foreign assets of the companies showed hardly any significant changes between 1953 and 1954.

Since the loans and advances obtained by the companies appear to be mainly connected with the financing of fixed capital, they are

to be included while arriving at the total figure for the long-term capital obtained from abroad by the companies. Including this inflow, therefore, the foreign investments in the non-banking business enterprises in India during 1954-1955 would be of the order Rs. 40 crores.

The average annual rate of capital inflow would be Rs. 20 crores during 1954-1955, as against Rs. 25 crores during the period July 1948 to December 1953.

A country-wise breakdown of the change in business investments during the middle of 1948 to the end of 1955 shows certain interesting features.

The industrially advanced countries have, over the period, added to their investments substantially. Four industrial countries, viz., the U.K., the U.S.A., Western Germany and Switzerland increased their investments by nearly Rs. 175 crores (Rs. 135-140 crores during July 1948 to December 1953 and Rs. 36 crores during 1954-1955).

In addition, resources provided by the I.B.R.D. to private companies (representing capital provided by industrial countries) amounted to about Rs. 3 crores.

The other countries, taken as a whole, reduced their investments by Rs. 7 crores. Pakistan, Ceylon and Burma were among the countries whose investments showed a considerable reduction during this period.

TABLE 11.—CHANGES IN NON-BANKING BUSINESS INVESTMENTS (COUNTRY-WISE)

(Crores of Rupees)

Country	July 1948 and Dec. 1953	1954 and 1955
U.K. ..	+131.7	+45.0
U.S.A. ..	+ 18.9	+ 9.7
Germany ..	—	+ 2.5
Switzerland ..	+ 0.6	+ 0.6
Pakistan ..	- 4.3	+ 0.2
I.B.R.D. ..	—	+ 2.7
Other countries ..	+ 0.6	- 3.6
Less valuation changes ..	-12.0 to 15.0	-22.0
Total ..	+132.5 to 135.5	+35.2

The U.K. maintained its position as the leading investor of capital during 1954-1955; however, its investment during this period was much smaller than that during the earlier period.

Adjusting for the revaluation of assets, the increase in the U.K. investments during 1954-55 was around Rs. 23-24 crores or Rs. 11 to Rs. 12 crores a year. The average annual inflow during the earlier period at Rs. 21-22 crores, however, was almost double the size of the inflow during this period.

On the other hand, there was a considerable stepping up of the rate of investment from the U.S.A. from the average of Rs. 3.4 crores (during July 1948 to December 1953) to Rs. 4.9 crores during 1954-1955; the U.S. investment during 1954-1955 however was mainly under petroleum activities.

The German investments also showed marked increases during 1954-1955, though Germany's total investments still are not very significant.

GOVERNMENT INDUSTRIAL UNDERTAKINGS

IN the following pages we give short notes on Government industrial undertakings.

The following are under the Ministry of Commerce and Industry: Hindustan Insecticides, Bharat Electronics Ltd., Hindustan Machine Tools Ltd., Nahan Foundry Ltd., National Instruments Factory, Hindustan Antibiotics, Sindri Fertilisers and Chemicals Ltd., Hindustan Cables Ltd.

The following factory is under the Ministry of Defence: Hindustan Aircraft Ltd.

The following factory is under the Ministry of Communications: Indian Telephone Industries.

The following factories are under the Ministry of Atomic Energy: Indian Rare Earths Ltd.; Thorium Plant.

The following factories are under the Ministry of Railways: Chittaranjan Locomotive Works; Integral Coach Factory.

The following factory is under the Ministry of Steel, Mines and Fuel: Hindustan Steel Ltd.

The following factory is under the Ministry of Finance (Dept. of Economic Affairs), Govt. of India: India Government Silver Refinery Project.

The following is under the Ministry of Transport.

Hindustan Shipyard (Private) Ltd

ATOMIC REACTOR

(Trombay, Bombay 38)

The Indian Atomic Reactor went into operation on 4th August 1956 at the Atomic Energy Establishment at Trombay, though the formal inauguration by the Prime Minister took place on 20th January 1957.

The Reactor is of the swimming pool type and derives its name from the fact that the core of the Reactor—a number of fuel elements on an aluminium grid plate—is suspended in a large pool of ordinary water.

There are 30 fuel elements and they are closely positioned on an aluminium grid plate about six inches thick. These fuel elements are made of an alloy of enriched uranium and aluminium sandwiched between two aluminium sheets. The size of the core is about 18" x 18" x 24" and requires nearly 3.5 kgs. of uranium 235 to start operation, or to use more technical language to reach criticality.

There are cadmium rods in the reactor which can be moved in and out so that the power of the reactor can be maintained at any desirable level.

The water in the pool acts as a moderator to slow down neutrons to thermal energies and as a coolant to remove heat of fission. It also serves as a shield against radiation. The pool is 10 feet wide, 28 feet long and 28 feet deep. The core of the reactor can be moved to any position in the tank by means of a trolley from which the core is suspended.

The sides of the tank are made of 8½ feet thick concrete walls which act as protection against radiation to personnel working around the reactor.

The reactor is designed to operate at a maximum power level of 1,000 kW.

Channels of cast iron with diameters of 1" by 8" are provided through the concrete through which neutron beams can be obtained for experiments in neutron physics.

At another end of the pool there is what is known as a shielding corner. Here the concrete wall is replaced by a one inch thick aluminium panel. This is for testing the shielding property of any material. The testing is done by putting the material on one side of the panel and the core of the reactor on the other.

Besides the swimming pool reactor, there are other research reactors under construction in the Atomic Energy Establishment.

One of these is the Canada-India Reactor, a gift of the Canadian Government under the Colombo Plan. This was expected to go into operation early in 1958. This is designed to operate at a maximum power level of 40,000 kW and gives high neutron intensities for research purposes. It is housed in 180 feet diameter steel pressure shell rising about 140 feet above the ground. This is a heavy water moderated natural uranium reactor.

It will produce significant amounts of radio isotopes and small amounts of plutonium 239 and uranium 233.

The reactor will also make possible the study of various reactor systems for use in power reactors.

A third reactor named Zerlina is in the design stage. Here buckling of new reactor assemblies using various materials can be studied. It is a zero energy reactor and will be used in the first instance for reactor systems containing mixed lattices of uranium and thorium in heavy water.

All these research reactors can be used for training personnel and for a wide range of experiments in physics, engineering and biology—such as nuclear reactions, neutron scattering, absorption cross-sections effect of radiation at high intensities, crystallography, determination of 'danger coefficient'.

The choice of reactor-types for power production is largely dependent on the availability of material for the production of enriched uranium, for example, expensive plant is necessary. In India this will have to be imported. Consequently power production would be based on reactors using natural uranium as large uranium bearing ores are available. This means that only three moderators are possible namely graphite, heavy water and beryllium oxide. Design studies for a prototype power reactor based on beryllium-oxide and natural uranium to generate 5,000 kW of power are being done.

It is planned to set up large power stations in the country during the Second Five-Year Plan. These would probably be obtained from abroad, though substantial parts including graphite moderator and uranium would be produced in the country. Investigations are under way about the choice of suitable sites.

The Reactor is under the control of the Atomic Energy Department of the Government of India.

BHARAT ELECTRONICS (PRIVATE) LTD.

(Jalahalli P.O., Bangalore)

The establishment of a factory to produce electronic equipment was envisaged in April 1949 in the Industrial Policy Resolution of the Government of India. In pursuance of this policy leading radio manufacturers throughout the world were invited to prepare project reports for the establishment of a factory in India; and after these reports had been examined by Indian experts, the French firm Compagnie Generale de Telegraphie Sans Fil of Paris was selected as technical advisers to the Government of India.

Bharat Electronics was registered as a private limited company in April 1954 with its headquarters at Jalahalli, Bangalore. The authorised capital of the Company is Rs. 10 crores of which Rs. 5 crores has been subscribed. The entire capital is held by the Government of India.

The capital expenditure upto March 1956 was Rs. 243.48 lakhs.

The factory began production in the latter half of December 1954. The production programme included manufacture of 400 Watt HF Transmitters and HF Communication Receivers. These were required for Civil Aviation, P. & T., Railways, etc. They have already supplied a number of receivers to the railways.

The present production programme includes VHF Trans-receivers, Rawin Transmitters for the India Meteorological Department and Consoles for the All India Radio in addition to the equipments that are already in production.

About 20 Indian engineers were sent to France and put through a training course in the factories of the French consultants. On their return, some of them are holding responsible posts in BEL, while others have been engaged in training local recruits at the Technical Training Centre of the factory, so that properly trained technicians may be available when required.

The present strength of the employees is approximately 1,200. When the factory is in full production, it will employ about 5,000 persons and will produce electronic equipment worth Rs. 5 crores annually.

The actual production was valued at Rs. 1.47 lakhs in 1955-56, Rs. 20.42 lakhs in 1956-57 and Rs. 48.33 lakhs in 1957-58.

The Company is run by a Board of nine Directors.

Chairman, Board of Directors: O. Pulla Reddy, I.C.S. (Defence Secretary, Government of India)

Board of Management: A. K. Ghosh, I.C.S. (General Manager and Managing Director); K. N. Nair (Controller of Finance); C. B. Cariapa (Deputy General Manager); T. T. Joseph (Commercial Manager); S. S. Moorthy Rao (Officer on Special Duty)

CHITTARANJAN LOCOMOTIVE WORKS

(Chittaranjan, Burdwan Dt., West Bengal)

Branch Office: Hindustan Buildings, 4, Chittaranjan Avenue, Calcutta 13)

The works are under the Ministry of Railways.

Construction started on April 1, 1948 and was completed on September 30, 1952.

Production started on January 26, 1950. The first locomotive rolled out on November 1, 1950.

The total estimated cost is Rs. 14.93 crores.

The total number of workers (under Factory Act), 4,336; apprentices, 413; total, 4,749 (corrected up to August 1956).

A monthly out-turn of 14 W. G locomotives has been reached since August 1956 equivalent to 17.6 average-sized locos.

The revised target for the Works is 200 locomotives per year.

Till the end of the First Plan period Chittaranjan had manufactured 341 W. G locomotives.

Up to March 31, 1958, 663 locomotives had been put into service.

The out-turn for the financial year 1957-58 was 164 locomotives.

Given the necessary raw or basic materials, Chittaranjan today can manufacture 100 per cent of the components it was designed to manufacture.

It is expected that by 1961—the end of the Second Plan—it would be possible to manufacture all the components of a locomotive in this country. At the end of 1957 the cost of the imported components was about Rs. 50,000 per locomotive. The items imported consisted mainly of Bar frames, boiler plates, tyres and axles.

The production schedule has been as follows

Year	No. of locomotives
1951	18
1952	30
1953	54
1954	86
1955	122
1956	150
1956 (upto end of December)	150

General Manager, E. Ramachandran.

HEAVY ELECTRICALS (PRIVATE) LTD.

(Ministry of Commerce and Industry)

A factory for the manufacture of heavy electrical equipment in the country is being set up near Bhopal in Madhya Pradesh by the Government of India with the technical collaboration of Messrs Associated Electrical Industries Ltd., of U.K.

A Private Limited Company, known as Heavy Electricals (Private) Limited, with an authorized capital of Rs. 80 crores was incorporated on 29th August 1956 to control and manage this project.

The factory is scheduled to start production in 1960 and gradually attain full production as envisaged in the first phase, by 1968. The full production of the second phase is expected to be reached by 1973. The factory will manufacture a large range of heavy electrical equipment for hydro electric projects and other power schemes and electrical traction equipment for the Railways.

The items to be manufactured will include electrical generators of the water wheel driven type, synchroniser condensers, diesel generators, industrial motors, D.C. generators and motors, crane motors, power transformers, high voltage switch gears, industrial control gears and water turbines.

The capital cost of the Project anticipated in the first phase of development is about Rs. 40.5 crores inclusive of the working capital. An annual output of the factory expected on full development in this phase is Rs. 12.5 crores. The second phase of development envisaged, raising of the annual output to Rs. 21.87 crores. The additional capital expenditure involved in this phase is about Rs. 10 crores.

The man power employed in the Project at the end of the first phase is expected to number about 9,000. It will be double that figure at the end of the second phase.

HEAVY PLANT AND MACHINERY

(Ministry of Commerce and Industry)

After obtaining expert technical advice from friendly countries the Government of India have decided to set up (1) a heavy machine building plant, (2) a heavy foundry and forge plant, (3) a mining equipment plant, (4) a heavy machine tool factory, (5) a heavy structural works and (6) a heavy plate and vessel works.

The proposed heavy machine building plant expected to be located at Ranchi in Bihar will have an initial capacity of 45,000 tons of machinery per year which can be raised later to 80,000 tons. With that capacity the factory would be in a position to turn out every year two steel plants which can produce one million tons of steel each per year. The principal items to be manufactured in the initial stage will be blast furnaces, steel melting furnaces, coke ovens and by-products plants, rolling mills, cranes etc. The estimated cost of the plant during the first stage will be about Rs. 20 crores.

The foundry forge project, which will have to be located in the vicinity of the heavy machine building plant, will manufacture heavy castings and forgings, i.e. metal parts required in heavy machines. This is also likely to cost about Rs. 20 crores and it will manufacture 28,000 tons of steel castings weighing up to 100 tons per piece. It will besides, produce 30,000 tons of iron castings of the same weight per piece and over 27,000 tons of forgings per year, weighing up to 30 tons per piece. This capacity could be doubled at a later stage.

The mining machinery plant will have an annual output of 80,000 tons per year of mining machines and equipment and will cost about Rs. 13 crores. The principal items proposed to be manufactured are coal cutters, coal loaders, conveyors and conveyor drives, winders, haulages, mine locomotives, mine pumps and fans, etc.

The heavy machine tool factory, which will manufacture the machine tools required by the heavy machine building plant and other heavy

engineering works, will be able to make 3,500 to 4,500 tons of machine tools per year on a single shift basis. Its cost is estimated at Rs. 5 crores. The other two projects, i.e. heavy structural works and plate and vessel works will cost between them about Rs. 6.8 crores and turn out 10,000 to 12,000 tons of structurals and 10,000 to 12,000 tons of plates and vessels required in heavy chemical industries.

The heavy machine building plant and the mining equipment plant are proposed to be set up in collaboration with the Soviet Union while discussions for foreign collaboration for the other four projects are still going on. All these projects will be in the public sector.

Government have decided to establish a new company which will be called the Hindustan Heavy Engineering Corporation (Private) Ltd. with an authorized capital of Rs. 50 crores.

HINDUSTAN AIRCRAFT (PRIVATE) LTD.

(Hindustan Aircraft P.O., Bangalore District, Mysore)

Tel & Cable address: Aircraft, Bangalore)

The company is managed by a Board of Directors under the Ministry of Defence.

Founded in 1940 the Hindustan Aircraft, Ltd. is one of the largest aircraft manufacturing, repairing and overhauling organisations in the East. It has succeeded in establishing a sound aeronautical industry in the country, and in 1957 it was expected to take steps for the manufacture of jet engines and high speed fighter and trainer aircraft.

Aviation Activities: Production of Percival Prentice D.H. Vampire & HT 2 Trainers, Repair and Overhaul of Tigermoth Chipmunk and Dove aircraft, Overhaul and Conversion of DC 3 aircraft, Repair and Overhaul of P & W De Havilland and Bristol Engines and accessories (AA approved repair station), Manufacture of Gnat Aircraft and Orpheus Aero Engines.

In 1957 the Government concluded an agreement with the Bristol Aeroplane Company under which India obtained a licence to make the full range of Bristol Orpheus turbo jet engines. Licence negotiations have also been completed with the Holland Aircraft Company for the manufacture by HAF of Britain's latest jet fighter the Gnat. The De Havilland Enterprises have appointed HAL as their repair and service agents in India. The factory has also been approved by the Civil Aeronautical Administration of the U.S.A. for the repair and overhaul of Dakota aircraft and engines.

HAL built Vampire jet fighters today form part of the fleet of the Air Force. The factory is also building jet trainers thus helping the Service in its transformation into an 'all jet' fighting force.

Other activities: HAL has since 1947, been building all metal third-class broad gauge railway coaches and acquired a capacity for 15 coaches a month. More than 1,000 such coaches, with several new amenities, like night-lights, electric fans, sleeping accommodation and wash basins have been delivered to the Indian Railways and proved very popular with the travelling public. One of the projects recently undertaken under the second Five-Year Plan is the manufacture of light-weight integral coaches in collaboration with MAN, a leading German firm, the target being 300 coaches a year. HAL has also been manufacturing bus bodies and bus-body kits of its own design for several transport authorities in the country.

Board of Directors

Chairman, O. Pulla Reddy, I.C.S., Secretary, Ministry of Defence.

Directors, J. R. D. Tata; Air Marshal S. Mukerjee (Chief of Air Staff, Indian Air Force); R. Jayasankar (Financial Adviser, Ministry of Finance (Defence), Government of India); K. Narayanaswamy, I.A.S. (Director of Industries

and Commerce, (Mysore)); J. M. Shrinagesh, C.I.E., I.C.S. (General Manager and Managing Director).

Board of Management

Chairman, J. M. Shrinagesh, C.I.E., I.C.S. (General Manager and Managing Director).

Members, V. G. Kamath (Finance Manager), Dr. V. M. Ghatage (Chief Designer), A. Zampolino (Factory Manager), J. J. M. Dziewonaki (Production Adviser), Dr. K. W. Tank (Director of Engineering), S. L. Saksena, M.B.E. (Deputy General Manager (Railcoach)), P. M. Reddy (Deputy General Manager (Engines)).

HINDUSTAN ANTIBIOTICS (PRIVATE) LIMITED

(Pimpri, Poona District)

The Government of India Penicillin Plant now known as Hindustan Antibiotics (Private) Ltd. is located at Pimpri, nine miles from Poona. It is a private limited company of the Government of India with all the shares held by the President of India and his nominees. It is being managed by a Board of Directors with Col. J. E. Dogra as the Managing Director.

Starting in March 1952, the factory is now complete. It went into full production in August 1955. On 12th September 1955 the first batch of Indian penicillin manufactured at the Pimpri Plant and bottled at its Bottling Plant in Bombay was put on sale. On 11th December 1955, Rajkumari Amrit Kaur, then Union Minister for Health formally inaugurated the first bulk sales when 148,000 mega units of Pimpri manufactured penicillin were sold to leading pharmaceutical houses in India.

The factory is located on a 200-acre site in Pimpri, about nine miles from Poona on the Poona-Bombay Road. It was constructed on the basis of a tripartite agreement between the Government of India, the World Health Organisation (since transferred to United Nations Technical Assistance Administration) and the United Nations Children's Emergency Fund. The Indian Government provided the land, the buildings, equipment procurable locally, the electric sub-station, water supply system, sewage disposal unit and quarters, at an estimated overall cost of Rs. 1.5 crores.

The UNICEF supplied equipment to the value of \$850,000. The WHO provided technical 'know-how' and training facilities abroad to Indian scientists involving an expenditure \$350,000.

The designed capacity of the plant is 9 million mega (9,000 billion) units per year, but the plant is now producing at the rate of 15 million mega units per year as a result of the improvements in penicillin technology. A Pilot Plant, a workshop and all essential services have been arranged for. The Clinical Products Section at Pimpri is now complete and large-scale bottling operations at Pimpri commenced in March 1956. In addition, the former Indian Penicillin Committee's Bottling Plant at Bombay has been taken over and continues to bottle Pimpri made penicillin. There is also provision in the plant for further expansion by about 60 per cent in the Second Five Year Plan. In addition to penicillin manufacture of Streptomycin is under consideration.

In 1957 the production was 23.6 million mega units. In 1956 it was 14.1 million. In terms of finished product for clinical use the production was 17.9 million mega units in 1957 as compared with 5.2 million in 1956.

During the financial year 1956-57 the factory made a small profit.

The factory employs 700 workers including the staff at the bottling plant in Bombay.

Equipped with the latest scientific equipment, a model Research Laboratory built at an approximate cost of Rs. 15 lakhs has been put alongside the factory. There are plans to develop this

* The bottling plant is due to be moved to Pimpri in April 1958.

Research Laboratory into a sizable Research Centre on antibiotics offering large-scale research opportunities to Indians and qualified scientific men from all over the world. There is also a provision to establish a statistical quality control unit to ensure quality of the best Indian Penicillin product.

Mg. Director, Col. J. R. Dogra, M.D., I.M.S.

HINDUSTAN CABLES (PRIVATE) LIMITED

(P. O. Hindustan Cables,

Bupnarpur, Burdwan Dt., West Bengal)

With a view to manufacturing telephone cables in this country, the Government of India have set up the Hindustan Cables Factory at a capital cost of Rs. 125 lakhs, under the technical assistance of Messrs. Standard Telephones & Cables Ltd., London. The Company is entirely owned and financed by the Government of India and is under the over-all control of the Ministry of Commerce and Industry.

The factory started regular production on Sept. 1, 1954 and manufactured 112 miles of underground telephone cables upto the end of March 1955. 591 miles of telephone cables were manufactured during the year 1954-57, the sale value of which was about Rs. one crore.

The proposal to double the capacity of the factory is already in hand and when this expansion is completed, it will be possible to manufacture 1,000 miles of cables annually when the country's total requirement for telephone cables would be met as well as partial export of this commodity will be possible.

Keeping pace with the demand of the Indian Posts & Telegraphs Department embodied in the Second Five-Year Plan, the expansion of the factory for manufacture of co-axial cables has already been taken in hand and orders have been placed for purchase of machineries required for the manufacture of co-axial cables.

Chairman, Board of Directors, A. Nagaraja Rao.

Members, M. P. Birla; D. C. Driver; G. D. Ambar; V. Nilakantan, Mg. Director, Sindri Fertilisers and Chemicals Ltd., Sindri; C. A. Cornelius; B. R. Nijhawan; B. D. Kalelkar; V. N. Rajan, I.C.S.; B. R. Murgai; K. N. R. Pillai, Managing Director, Hindustan Cables (Private) Ltd.

HINDUSTAN HOUSING FACTORY (PRIVATE) LIMITED

(Jangpura, New Delhi)

The Hindustan Housing Factory Private Ltd. was taken over completely by the Government of India with effect from 16th August 1955.

The present Directors of the Company are:—

Chairman, K. S. Krishnaswami; Directors, A. P. V. Krishnan; O. V. Ramadorai.

General Manager, R. P. Mhatre, C.R.S.I.

Since taking over, for the period ending 31st July 1956, it made a small profit of Rs. 6,000. During this period production worth Rs. 31.0 lakhs has been carried out in the various departments.

For the year ending 31st July 1957, the factory achieved a production of Rs. 38.0 lakhs and it was anticipated that the factory would make a small profit during 1957-58.

For the year ending 31st July 1958 (1957-58) the factory had secured orders to the extent of Rs. 35 lakhs in Prestressed Concrete Department and Rs. 10 lakhs in the Woodwork and Rs. 3 lakhs in the Foam Concrete Department so far. Further orders to the extent of Rs. 10 to 15 lakhs were expected during 1957-58. The major orders are for transmission poles, street light poles, heavy industrial beams, prefab roofs, fencing poles, etc. in the Prestressed Concrete Department and softwood doors and windows for low cost houses and utility furniture in the Woodwork Department and partition and insulation blocks for cold storage in the Foam Concrete Department.

The factory was intending to establish a Seasoning Kiln & Treatment plant of timber during 1957-58 to improve the production in the Woodwork Department. 4 new tables have been constructed in the P.C. Department to cater for the increased production. The possibility of manufacture of prestressed concrete and precast concrete railway sleepers is also being investigated.

The factory is due to be reorganised in accordance with the suggestions of a group of experts by about June 1958. The authorised share capital under the new set-up will be Rs. 75 lakhs and the paid up capital Rs. 40 lakhs.

HINDUSTAN INSECTICIDES (PRIVATE) LIMITED

Industrial Area, New Delhi 15.

A site adjacent to D.C.M. Chemical Works was chosen for the factory.

The factory is managed by Government through a private limited company with a Board of Directors under the Ministry of Commerce and Industry.

The factory went into production on March 25, 1955.

The production in 1955 was 172 tons, in 1956 it was 492 tons and in 1957 623 tons. The factory has reached its rated capacity of two tons a day.

The plans are based on an agreement concluded between the Government of India, WHO and UNICEF on 19th July 1952 on no-profit basis without cost to the ultimate beneficiary.

Under the plan of operations the UNICEF was to supply all imported equipment involving an expenditure of about \$250,000, WHO to arrange and provide all technical assistance for the Factory involving an expenditure of about \$100,000 and the Government of India to arrange for the provision of land, buildings, steam, water, electricity, etc., at an expenditure of Rs. 22,45,000. The UNICEF contributions to the Plant have already been fulfilled.

Since the commencement of operations in March 1955, the production has been slowly stepped up and the present output is about two tons of Technical D.D.T. per day. The problems arising from tropical climate with high ambient temperatures and the non-availability of spares stultifying the overall production are being overcome steadily and it is hoped that things will be smooth before long. The output of the factory till the end of September 1957 was 1,100 tons of Technical D.D.T. and 1,425 tons of 50 per cent wettable D.D.T. powder formulated to WHO specification. The formulated D.D.T. is distributed to various State Governments through the Director, Malaria Institute of India for the Anti-Malaria campaign. The factory employs approximately 250 men.

Expansion: The designs for doubling the capacity of the plant having been drawn up by the factory staff in consultation with U.N.T.A. advisers, the installation was in full swing and production on the expanded unit was scheduled to commence about the middle of 1958.

The work on the installation of the Second D.D.T. Factory at Alwaye, Kerala State, as part of the Second Five Year Plan was going apace according to schedule. This factory, with the rated capacity of 1,400 tons of technical D.D.T. has begun trial production and would be completed by the middle of 1958.

A contract on a turnkey basis for the complete job of setting up and commissioning of the plant at a cost of about Rs. 36 lakhs was drawn up with Messrs. Singmaster and Breyer and Technical Enterprises Inc. of U.S.A.

The entire cost of the factory will be met by the Government of India.

When at full production the factory expects to employ about 250 men in all.

Between them these two factories will produce all the D.D.T. required by the Government for its Malaria Control Programme.

Chairman, U. L. Gokhale, I.C.S.

Managing Director, S. S. Jaggi.

HINDUSTAN MACHINE TOOLS (PRIVATE) LIMITED

(Jalahalli, Bangalore)

This is a private limited company under the Ministry of Commerce and Industry registered in Mysore on February 7, 1953.

The Registered Office of the Company and the factory are located at Jalahalli, Bangalore.

The authorised share capital of the Company is Rs. 12 crores.

The plans are based on an agreement between the Government of India and Messrs. Oerlikon Machine Tool Works, Buehrle & Co., Zurich, Switzerland, originally concluded in April 1949 and later revised by a new agreement signed in March 1957. The Swiss Company does not now hold any shares in the Hindustan Machine Tools (Private) Ltd. The shares worth Rs. 30 lakhs originally held by the Swiss Company were transferred to the Government of India.

The Company produces eight types of machine tools. It manufactures high speed lathes and under a programme of diversified production, Milling Machines of three types—Universal, Vertical and Horizontal in 2 sizes each have already started coming off its production lines. This diversified programme, will, however, include the manufacture of Radial Drills and heavier lathes. Negotiations for technical collaboration in respect of this are already in progress. Government have approved, in principle, of the establishment of a Foundry and initial planning and layout of the Foundry has since been completed.

The Company employs 2,236 skilled and semi-skilled workers and is expected to employ 3,000 by 1960-61.

Upto September 1957, the Company produced 262 lathes and 15 milling machines.

The Company was expected to produce 400 machines during the financial year 1957-58 against the original target of 131 machines. By October 1957 already 324 machines had come off the assembly lines of the factory.

The introduction of multiple shift system has resulted not only in increased production but also in a considerable reduction in the cost of production per machine and a saving of a large amount of foreign exchange.

The increased production of the factory has also boosted the total output of machine tools in India. Against an output of the value of Rs. 42.5 lakhs in the first half of 1956, the country produced machine tools valued at Rs. 1 crore during the corresponding period in 1957.

For 1957 the output was much more than 300 machines worth Rs. 1.24 crores. The production of the country as a whole was worth Rs. 2 crores.

The profit for 1956-57 was computed at Rs. 4 lakhs.

Chairman, Board of Directors: Sir Raghavan Pillai.

Managing Director: M. K. Mathuila.

Members: C. M. Poonacha; L. K. Jha, I.C.S.; S. Ratnam; B. L. Kirooskar; E. W. Isaacs.

HINDUSTAN SHIPYARD (PRIVATE) LIMITED

(Vishakapatnam 5, Andhra Pradesh)

This is located at Vishakapatnam in Andhra Pradesh. It was originally designed by the firm of Sir Alexander Gibb and Partners.

The original design envisaged the provision of eight berths but the shipyard now has four building berths to build ships ranging from 320 to 550 ft. in length, and from about 5,000 tons to about 15,000 tons deadweight capacity.

A fifth berth suitable for building small crafts has also been constructed.

It has also a sitting-out wharf 1,300 ft. long which permits sitting out of 6 large ships and 3 medium-sized ships in one year.

There are about 5,000 technicians, workers and staff.

There is a housing colony for employees on a site of 145 acres of land, provided with electricity, water supply, playgrounds, parks, school and hospital buildings, where about 2,000 families of the staff, workers and officers are accommodated.

The yard is being managed by Hindustan Shipyard (Private) Limited since the 1st of March 1958, a company in which the Government of India have a controlling interest.

The Board of Directors consists of eight Government nominees including the Chairman and the Managing Director and four nominees of Scindia Steam Navigation Co. Ltd.

The authorised capital of Rs. 10 crores is divided into 100,000 ordinary shares. Issued and paid-up capital is Rs. 4,76,25,000 in which the Government's contribution is Rs. 3,72,00,000.

Technical assistance was provided by Societe Anonyme des Ateliers et Chantiers de la Loire, Paris, a French firm of ship-builders under an agreement entered into with them.

The following table gives details about the ships built at the shipyard:

Name of ship	Date of laying keel	Date of launching	Date of completion and sailing	To whom sold
1. "Jalausha" (8,000 DWT) ..	22- 6-46	14- 3-48	15-10-48	Scindia S. N. Co. Ltd.
2. "Jalaprabha" ..	22- 8-46	20-11-48	31- 3-49	"
3. "Kutubtari" (245' DWT) ..	23- 5-47	18-12-48	19- 5-49	"
4. "Jalapraakash" (8,000 DWT) ..	27- 5-48	8- 8-49	14-12-49	"
5. "Jalapankhi" ..	7- 1-49	6-12-49	31- 3-50	"
*6. "Jalapadma" ..	26- 1-50	14- 9-50	14- 1-51	"
*7. "Jalapalaka" ..	26- 1-50	27-12-50	29- 3-51	"
*8. "Jalputra" ..	28- 9-50	26- 3-51	28- 6-51	Bharat Line Ltd.
*9. "Jagrani" ..	9- 5-51	15-12-51	4- 6-52	Great Eastern Shipping Co. Ltd.
*10. "Jalapratap" ..	9- 5-51	27- 2-52	31- 7-52	Scindia S. N. Co. Ltd.
*11. "Jalapushpa" ..	26-12-51	9- 7-52	30- 9-52	"
*12. "Bharatratna" ..	22- 7-52	26- 8-53	21- 6-54	Bharat Line Ltd.
*13. "Jalaputra" ..	22- 7-52	9-11-53	12- 8-54	Scindia S. N. Co. Ltd.
14. "Jalavithar" (7,000 DWT.) ..	1- 8-53	16- 8-54	14- 6-55	"
15. "Jalavijaya" ..	30- 9-53	26- 3-55	17-12-55	"
16. "Jalavahnu" ..	16-12-53	2-11-55	16- 5-56	"
17. "State of Kutch" ..	2- 9-54	20- 3-56	1-11-56	Eastern Shipping Corporation.

* These eight ships were ordered by Government.

The company is managed by a Board of Directors, as already mentioned, under the Ministry of Transport. Chairman, N. R. Pillai, I.C.S. *Officiating Managing Director*, C. R. Reddy, I.A.S.; *Members*, Mon. J. M. Charpentier (*Officiating Technical Director*); R. L. Gupta, I.C.S., Talsidas Kilachand; Michael John, M.P.; Lalchand Hirachand, M.P.; Shantikumar N. Morarjee, T. M. Goeladas; Nagendra Singh, I.C.S.; *Commodore* Daya Shankar; S. D. Nargolwala, I.C.S.; Dr. M. V. Krishnarao.

HINDUSTAN STEEL (PRIVATE) LIMITED

Hindustan Steel (Private) Limited was incorporated on 19th January, 1954 as a private limited company with an authorised capital of Rs. 100 crores with the object of establishing a steel plant at Rourkela in Orissa State.

With effect from the 1st April, 1957, the Bhilai and Durgapur Steel Projects were also transferred to the management of Hindustan Steel (Private) Limited.

The company is entirely owned by the Government of India and has a Board of Directors of which the Secretary, Ministry of Steel, Mines & Fuel (Department of Iron & Steel), is the Chairman.

The annual output expected at Rourkela is about one million tons of steel ingots capable of being turned into about 730,000 tons of finished plates, sheets, strips, and tinplate.

The capacity of the plant can be expanded with a few additions to 1.5 million tons. The layout provides for an ultimate expansion to two million tons.

The Plant is expected to go into production late in 1959.

This was due to expire on 15th July, 1958.

So far (end of December 1956) 12 steam ships of 8,000 DWT. each and three diesel ships of 7,000 DWT. each and one diesel ship of 8,000 DWT. have been built.

Orders to build eighteen more ships are under execution. This number includes a survey vessel for the Indian Navy and a passenger-cum-cargo vessel for the India-Andamans trade.

In 1956-57 two ships, one 7,000 tonner and one 8,000 tonner were completed and delivered.

Keels were laid during the year for the following: M. V. Jalavikram, M. V. Jalaveera, and a survey vessel for the Calcutta port.

The two followings were launched: M. V. Andamans, M. V. State of Orissa.

In Sept. 1957 'Adyar', a steam tug, was delivered to the Madras Port Trust.

A provision of Rs. one crore has been made for further development of the shipyard in the Second Plan.

Nearly 1,515 houses have been completed in the township. Electricity and water supply is available. Another 2,088 houses are under construction.

A 300-room hostel has also been completed. This is actually meant for the apprentices who will be trained in the steel works in future. In the meantime, the hostel will accommodate German personnel.

Managing Director: P. G. Bhagat; *Technical Adviser*: Dr. H. Kinar.

Bhilai Steel Project: An agreement was entered into between the Governments of India and the U.S.S.R. on 2nd February 1955, providing for technical and economic assistance in the erection of an integrated Steel Plant at Bhilai in Madhya Pradesh. The Plant is designed to produce about 750,000 tons of heavy and medium structural steel and 300,000 tons of foundry pig iron.

The capacity of the plant can be expanded with a few additions to 1.25 million tons. The layout provides for an ultimate expansion to 2.5 million tons. The plant is expected to produce iron by the end of 1958 and steel by the end of 1959.

A Project Division of the Ministry of Steel, Mines and Fuel, Government of India, under the charge of a General Manager, is looking after the construction of this Project.

The estimated cost is about Rs. 131 crores exclusive of the cost of township, ore mines, and such other ancillary expenditure. In 1957-58 about Rs. 63.33 crores were spent on the project as against an expenditure of Rs. 9 crores in 1956-57.

Durgapur Steel Project: The Steel Plant which is proposed to be set up at Durgapur in West Bengal will be the third one in the public sector (besides Bhilai and Rourkela). This will produce about 750,000 tons of light and medium sections and bars, in addition to about 350,000 tons of pig iron.

There is room in the layout for expansion of the plant to produce 2.5 million tons per year. The contract for the construction of the steel plant was signed on the 31st October, 1956 with Messrs Indian Steel Works Construction Co. Ltd., London and the work is in progress. The pilot plant furnace is expected to go into production by October 1959 and the entire project will be completed by the end of July 1961.

The estimated cost is about Rs. 138 crores.

In 1957-58 about Rs. 31.69 crores were spent as against 13.42 crores in 1956-57.

This Project also is being managed by a Chief Project Officer under the direct control of the Ministry of Steel, Mines and Fuel, Government of India.

Each of the Plants, when completed, will employ about 5,000 skilled technicians below the foreman category and about 700 supervisory staff of foreman upwards. Except for a few at the very top level, most of the technicians will be Indians.

The total cost of all the three Steel Plants in the public sector is estimated at over Rs. 400 crores.

Washeries

Government have decided to set up, besides the one in Kargali, three more coal washeries to supply washed coal to steel plants. The first of these washeries will be in Dugda in Bihar. It will have a capacity of 500 tons an hour. This will wash Jharia coals for Bhilai and Rourkela Steel Plants. The other two washeries are likely to be set up at Patherdih and Bhojudih.

These washeries will supply about 4.6 million tons of washed coal to the steel plants.

A new process of making steel by blowing oxygen known as the L-D process will be adopted for three-quarters of the steel output; the remaining will be produced in open hearths. A Semi-Continuous Strip Mill, the first of its kind in India will be put into commission in the Works. The strength of the personnel is expected to be about 8,000.

The overall cost of the steel works is estimated at Rs. 170 crores.

In 1957-58 the Government of India spent about Rs. 62.33 crores. In 1956-57 the investment was Rs. 19 crores.

Meanwhile, contracts for all sections of the steel plant have been placed with German suppliers. The deliveries of plant and construction schedules have been so co-ordinated that the first blast furnace would go into production in Oct. 1958 and the steel plant will be in operation by the end of 1959.

Contracts have been placed for the civil engineering work for the blast furnace and steel melting shop. The site for the steel melting shop and the ingot yard is being prepared.

A number of suppliers of plant and equipment have opened their offices at Rourkela.

INDIA GOVERNMENT SILVER REFINERY PROJECT

47, Strand Road, Calcutta 7.

This project is under the Ministry of Finance (Department of Economic Affairs), Government of India. It is under construction. Erection and installation of specialised plant and machinery have been undertaken. Commencement of operation of the project was expected by March/April 1958.

A sum of Rs. 88 lakhs was initially estimated to cover capital expenditure.

The number of persons employed at present is about 160. The project is expected to operate in three shifts round the clock with officers and staff numbering about 600.

The project is intended for the extraction and refining of silver from the Q.A. cut and defaced coins and recovery of copper as by-product.

Production has not yet started.

The process of refining is a new patented process, the joint authors of which are Mr. G. C. Mitter, late Master, Assay Deptt. and Silver Refinery Project and Messrs. Demag Elektrometallurgie G.m.b.H., W. Germany.

Master, Assay Deptt. and Silver Refinery Project, Benoy Kumar Bose.

INDIAN RARE EARTHS (PRIVATE) LIMITED

Udyogamandal P.O.
(Alwaye, Kerala)

This factory is owned jointly by the Government of India and the Government of Kerala.

The subscribed capital is Rs. one crore, of which the Government of India's share is 64 per cent and of the Kerala Government 36 per cent.

The factory started production in July 1952. The plant has a rated capacity to process 1,500 tons of Monasite per annum. The main product is Rare Earths Chloride. Rare Earths Carbonate could also be produced in the factory. Trisodium Phosphate is obtained as a by-product.

The chlorides and carbonates which are exported are used in the manufacture of aerial camera lenses, cinema projector carbon arc, special optical glasses and so on.

The phosphates which are a substitute for soda ash can be used in textile mills, soap factories, and for general cleaning purposes in mills and factories.

Chief Administrative Officer, G. Rajagopal Menon.

Works Manager, H. N. Sethna.

Deputy Chief Administrative Officer, K. V. N. Nayyar.

Deputy Works Manager, C. M. Mani.

INDIAN TELEPHONE INDUSTRIES (PRIVATE) LIMITED

(Duravani Nagar P.O., Bangalore Dt., Mysore State)

Railway Station: Krishnarajapuram
(Southern Railway)

City Office: No. 5, Kensington Road, Bangalore.

Tel. Address: "Phonindustry."

Telephone: 5111 (4 lines).

Branches: National Insurance Bldg., 1st floor, 27, Beaton Road, Bombay 1; 22, Chittaranjan Avenue, United India Life Assurance Bldg., Calcutta 13; 12-B, Fair Bazar, Daryaganj, Delhi; No. 2, Armenian Street, Catholic Centre, 1st floor, Madras 1; C/o The High Commission of India in U.K., India House, Aldwych, London W.C. 2.

Total Investment:

Authorized Capital	Rs. 4 Crores.
Subscribed and Paid-up Capital	4 Crores.

Bankers: State Bank of India; Central Bank of India.

Board of Directors:

B. N. Jha, I.C.S. (Chairman); R. C. Vaish; Sir V. N. Chandavarkar; J. J. Eades; D. S. Tod (Alternate Director); S. Visvanathan; S. M. Ramakrishna Rao; K. Narayanaswami; Jagdeesh Prasad (Managing Director).

Administration:

General Manager, N. K. Sen Gupta.

Manager, K. D. Vaidya.

Secretary, D. V. M. Rao.

The I.T.I. (Private) Ltd., the first industrial concern in the Public Sector after achieving independence, was originally started as a Government department in 1948 under the Ministry of Communications. On February 1, 1950 it was converted into a private limited company with the Government of India as the major share-holder.

The Company has acquired about 372 acres of land and has got its own railway siding. It is the sole agent for its associate—the Automatic Telephone & Electric Co., Ltd., Liverpool, England.

Facts and Figures

Present Production: 50,000 telephones per annum; 35,000 exchange lines per annum; 80 single channel systems; 12 3-channel systems; 3 12-channel systems.

The annual sales turnover is approximately Rs. 3 crores.

Production target (1960-61): 80,000 telephones per annum; 50,000 exchange lines per annum; 30 single channel systems; 24 3-channel systems; 5 12-channel systems; 4 4-channel systems; 12 group modulators.

Number of persons employed: 4,500.

The factory normally works a single shift, 8-45 a.m. to 5-15 p.m. with a recess of half an hour. Some sections are however at present working two or three shifts.

Amenities:

Three fully equipped canteens and two lunch sheds are provided for the benefit of the workers and staff. Two of the canteens are run by the Employees' Co-operative Society. The Society also runs a provision shop for the benefit of the residents of the Township.

Other amenities include a well-equipped dispensary and a separate first-aid centre, a well-organised sports club, a joint library and reading room, a Fine Arts Society, publication of the I.T.I. Magazine, a primary school, separate rest room for female employees, supply of free milk to employees doing hazardous work, supply of overalls to factory workers at 50 per cent of the cost, free film shows at frequent intervals, etc.

The employees themselves have organised a voluntary fund for giving financial aid to needy employees in emergencies.

The construction of residential quarters for employees has progressed considerably. Several of them have already been occupied by the families of employees of the Company. More tenements and bungalows are under construction. The construction of buildings for a fully equipped general hospital and a school is also going ahead at quick pace.

In co-operation with the Hindustan Aircraft (Private) Ltd., transport facilities have been provided for about 2,000 employees at subsidised rates.

INTEGRAL COACH FACTORY

Perambur, Madras.

The Integral Coach Factory Project at Perambur, a suburb of Madras on the Madras-Bombay line, is Asia's largest Coach Building Unit and perhaps one of the largest of its kind in the world. It is an important endeavour of the Ministry of Railways included in the first Five-Year Plan, and is a significant step

forward in the attainment of self-sufficiency in rolling stock. The factory when in full production will produce coaches worth about Rs. 4 crores per annum and will thus result in a considerable saving in foreign exchange.

The factory structures, which cover an area of 850,000 sq. ft. and concrete roadways totalling 8.5 miles in length are very modern and have been designed and constructed by Indian engineers with an eye to provide the worker ideal working conditions.

Construction started in the latter half of 1952. During the construction stage of the project covering about three years, employment was provided for 3,000 men. The factory, when in full production, will have a labour strength of over 4,000 men in the various categories. The first coach was turned out in October 1958.

The factory has been equipped with the latest machine tools, and during the fourth year of production, it is expected to reach the full production target of 350 coaches per year on single shift working.

The factory is designed to produce coach shells only. Fitting up of the interior with seats, racks, amenities, etc., will be done in the Furnishing Factory to be located near the main factory. For the present, the coach shells produced will be fitted with interior fittings, some in the coach factory itself and others in the various railway workshops.

The type of coach to be manufactured in the factory called the "Integral coach" is of a modern design developed by a Swiss firm, Messrs. Swiss Car and Elevator Manufacturing Corporation Ltd., Schlieren, Zurich. As compared to the conventional coach consisting of a wooden body secured to a steel frame, in the Integral coach the all-steel body and frame form one piece, one being welded to the other, becoming a rigid body of tubular design. This type of construction results in the forces sustained by the coach being taken by the entire body, including the skin. The ends of coaches are specially designed to prevent telescoping, a potential source of loss of life, in train accidents. Particular care has been given to ensure smooth running and affording of greater comfort to the travelling public. These coaches are also lighter in weight compared to conventional coaches and this enables a larger number of coaches being attached to a train leading to the easing of congestion.

A Technical Aid Agreement has been entered into with the above firm for successfully establishing production of this new type of coach and imparting the "know-how" to the Indian personnel. A team of Swiss engineers and technicians are already in position. Every Swiss engineer has an Indian counterpart attached to him so that right from the beginning Indians are associated in the production methods.

The Government of Madras have given assistance to the Project in agreeing to provide the total electrical energy requirements of the Factory and in constructing a 11 K.V. line from their Electricity Grid.

Technical training: A Technical School to train all the skilled workmen of the factory was established in March 1954, 18 months ahead of production.

The first batch of 70 apprentices was available on the Shop floor by about the end of 1954. Seven more batches consisting of 1,100 apprentices have now been turned out from the school of which 550 have been absorbed as skilled workmen after 12 months training on the Shop floor.

A hostel to accommodate 250 boys has already been completed and the boys have moved into the hostel from 1st August 1954.

A proper theoretical Training School was completed subsequently and has been functioning since November 1954.

Furnishing Unit: Due to the increased load thrown on the Railway Workshop it was considered necessary by the Government of India that a Furnishing Annex should be attached to

the Integral Coach Factory for furnishing the body shells. Necessary arrangements are being made to expedite bringing the furnishing unit into full production and also to have additional coach building capacity. Arrangements to commence furnishing work were made early in 1957. Development of technique and staff is taking place. Limited temporary accommodation for the work has been arranged using some second hand military sheds. 19 body shells have already been furnished in this interim furnishing unit.

Technical Assistance to Indigenous Industries: The purchases of the Integral Coach Factory have gone up from Rs. 14.71 lakhs in 1951-52 to Rs. 4.43-68 lakhs in 1957-58 and by 1960-61 it is expected that the purchases will go up further to Rs. 8.66-36 lakhs. These purchases include production tools, pneumatic tools, small tools, and hand tools, raw materials such as steel for coaches, coach components like axle boxes, wheels and axles, roller bearings, steel tubes, draft castings, M. I. castings, brake blocks, vacuum brake cylinders and reservoirs, interior fittings, stainless steel screws, bright screws and nuts, etc. 500 different firms in the country have benefited from these purchases. Several industries are developing in the country to meet Integral Coach Factory requirements. A department has been organised to give technical assistance to such firms as are anxious to make supplies to I.C.F.

Design Drawing Office: The Design Drawing Office has now been fully developed and approximately 50 Draftsmen are in position. Full advantage is being taken of the presence of Swiss designers to train as many Draftsmen as possible and, with this object, 20 Draftsmen have been placed in the Design Office for training purpose. The factory has now started designing a T.L.R. in light weight construction and the job is nearing completion. It has completed the vestibule-end for the III class coaches, designed new safety window catches for the windows and is designing balances for the windows in order to make them work more easily and eliminate the risk of accidents through falling of windows.

The Factory (Shell Side) will employ 4,000 men when in full production. The Furnishing Shift will employ 2,500 men. For the Second Shift, a similar complement of staff would also be required.

Amenities: A Colony of 400 quarters has been provided to accommodate the essential staff. All the modern amenities are included in this Colony, which has a Primary School, a Children's Park, a Recreation Club and a Co-operative Store.

For the Furnishing Annex a colony of 200 quarters has been sanctioned. This colony is being planned contiguous to the ICF Colony and suitable expansions of amenities by way of Children's School, Recreation area, Marketing area and so on are also being contemplated.

It has been the aim of this administration to provide good working conditions for workmen in the factory. Lighting and ventilation of the shops have been given special attention. Staff canteens run on a co-operative basis have been provided near the main entrance as well as in the office. Water coolers to supply cooled drinking water have been installed in the shops. Bathing places and lavatories have been provided at convenient places.

The total number of employees (permanent and temporary) on the rolls as on 31st March 1957 was 2,644 as compared with 1,663 as on 31st March 1956.

Chief Administrative Officer: K. Sadagopan; **Deputy Chief Mechanical Engineer:** K. Svarup; **Deputy Financial Adviser and Chief Accounts Officer:** B. Bhattacharya; **Deputy Chief Mechanical Engineer (Furnishing):** R. Rajagopalan; **Deputy Controller of Stores (Officiating):** A. Nageswaraiah.

NEYVELL LIGNITE CORPORATION (PRIVATE) LTD.

(Ministry of Steel, Mines and Fuel, Government of India.)

In view of the importance of developing an economic source of fuel and power for south India which is at present handicapped by an

acute shortage, a high degree of priority has been given in the Second Five Year Plan to the mining, utilisation and processing of the extensive lignite deposits which occur at Neyveli in the South Arcot District of Madras.

Preliminary investigations of these deposits were undertaken first by the Madras Government, and then by the Central Government from the 1st of January 1955, in consultation with Messrs. Powell Duffryn Technical Services Limited, a U.K. firm of technical consultants, whose services were made available to the Government of India under the Colombo Plan.

These preliminary investigations, including large-scale pumping tests, having proved the feasibility of economic mining and utilisation of the Neyveli lignite, Government have accepted, in principle, the execution of the Integrated Lignite Project at an estimated cost of Rs. 68-8 crores and have sanctioned the mining part of the Project at a cost of about Rs. 17 crores.

The Integrated Project envisages the mining of 3.5 million tons of lignite per annum to be utilised for:

- production of 200,000 kW of power in a thermal power station using lignite as fuel;
- production of fertilizers with a nitrogen content of 70,000 tons per annum, in the form of urea; and
- manufacture of 714,000 tons of raw lignite briquettes per annum to be processed in a low temperature carbonising plant to yield 380,000 tons of carbonised briquettes per annum for use as domestic and industrial fuel.

A detailed mine plan involving an estimated expenditure of Rs. 17 crores for the development and production phases of the mine submitted by the technical consultants was sanctioned by the Government. The scheme was inaugurated by the Prime Minister of India on April 20, 1957. Messrs. P.D.T.S. Ltd. have been appointed consultants for the Mining Scheme. Orders for Rs. 5.5 crores worth of conventional and specialised machinery required for removing the overburden and developing the mine for full production have been placed.

All the conventional equipment have already arrived at site and items of specialised mining machinery are beginning to arrive. The estimated cost of production of lignite has been worked out at Rs. 8 to Rs. 10 per ton which compares favourably with the price at which coal is available in south India. In accordance with the time schedule for the mining project, the mine will be in full production by the 31st of December 1960.

The Central Water and Power Commission have drawn up the Project Report for the 200 MW. thermal station, the most important constituent scheme in the Integrated Lignite Project. The Thermal Station Scheme is one of the schemes to be financed from the credit offered by the U.S.S.R. in respect of which an agreement was signed in Delhi in 1957.

The Project Report for the Fertilizer Unit has also been drawn up. The total capital cost of the scheme has been estimated at Rs. 21 crores.

Tests conducted on bulk samples of Neyveli lignite in West German laboratories have established that the lignite is of a high quality, capable of yielding satisfactory briquettes, both raw and carbonised on a commercial scale.

Further tests on a pilot plant scale are to be conducted at Neyveli with the help of pilot plant equipment, promised under the T.O.M. aid, for determining the optimum conditions under which the lignite should be briquetted and carbonised. Thereafter the question of the type of press to be used and the choice of consultants will be considered.

This component of the project is estimated to cost Rs. 10 crores and will be commissioned in accordance with the time-schedule by the 31st of December 1961.

Key officers of the Project have returned from a study tour abroad.

Construction of residential quarters for the project staff is now in progress. Detailed layout and block layout plans for the new lignite township have been completed and the construction of quarters in the new township is expected to commence shortly.

As the mining gains momentum, the labour force of Project will go up. A full time labour welfare officer has been appointed to look after the interests of the workers. An Information Officer has also been appointed.

The Corporation has opened a middle school and an elementary school for the benefit of the children of its employees. There is a dispensary at Neyveli with facilities for maternity cases. When the township is constructed, there will be a fully equipped hospital.

The ownership, management and administration of the Neyveli lignite project has been entrusted to a Government of India-owned private limited company, Neyveli Lignite Corporation (Private) Ltd., which started functioning on 6th December 1956.

Chairman, Board of Directors: M. K. Vellodi, I.C.S.

Managing Director: T. M. S. Mani, I.C.S.

MACHINE-TOOL PROTOTYPE FACTORY, AMBARNATH

The Machine-tool Prototype Factory at Ambarnath near Bombay, started in 1953, was the first installation of its kind for developing new weapons and equipment and at the same time, providing the ordnance factories and other industries with machine-tools. To overcome the shortage of skilled artisans necessary for the production of armaments, a Training School has been attached to M.T.P.F. since its inception.

NAHAN FOUNDRY LTD.

(Nahan, Birmoor District, Himachal Pradesh). This was started in 1875 and has been continuously expanded.

The authorised capital is Rs. one crore and the paid-up capital Rs. 40 lakhs. The number of persons employed is 500 at Nahan and about 150 in the agencies.

Production consists of improved type of cane crushers, bullock and power driven; centrifugal pumps in different sizes; paddy-threshers; ploughs; corn-sheller machines (a new patented machine for separating maize corn from their cobs); chaff-cutters of different types; boiling pans; cast iron sheets; flour mills, power and bullock driven; and miscellaneous items.

The company has a net-work of about 90 agencies in north India with mobile workshops which cater to the needs of the cultivator in the villages in respect of machines, and also undertake repairs at site.

It is managed as a private limited company (which took over on Jan. 1, 1953) with the President holding all the shares. The affairs are looked after by the Ministry of Commerce and Industry. It is a pioneer industry in northern India for the manufacture of cane crushers and "Sultan" is a speciality all over India.

General Manager: S. D. Joshi.

NANGAL FERTILIZER—HEAVY WATER PROJECT

(Ministry of Commerce and Industry, Government of India.)

The control and management of Nangal Fertilizer Heavy Water Project were formally transferred to Messrs. Nangal Fertilizers and Chemicals (Private) Limited, a company entirely owned by the Government of India, on April 20, 1956. The authorised capital of this company is Rs. 30 crores.

The factory which will be located at Nangal, on the right (western) bank of Sutlej, will produce nitro lime stone fertilizer with an annual capacity of about 3.95 lakh tons. It will also produce 18 to 18 tons of heavy water for the use of the Department of Atomic Energy.

Messrs. Vitro Engineering Division of New York (U.S.A.) have been engaged as Technical Consultants for the project.

The contract for electrolyzers, which constitute the first large section of the plant, has been given to an Italian firm. An order was placed in 1957 with a French firm for the supply, erection and commissioning of the fertilizer group of plants for the project. Half of the fertilizer plants are due to be erected and put into commission by the end of 1958 and the remaining half by the end of March 1960.

Tenders for the supply of electrical equipment for the factory were under examination while those for the heavy water plant have been invited and received.

A detailed programme of recruitment of engineering and technical personnel for the project has been chalked out. It has been arranged to train at the Sindri Factory, 95 apprentices for the project in different branches of engineering.

NATIONAL INSTRUMENTS (PRIVATE) LTD. (15, Wood Street, Calcutta 16).

Total investment Rs. 1,00,00,000. Value of production and repair for 1956-57 Rs. 23.04 lakhs. Number of persons employed 1,074.

This is a Government owned Company under the Ministry of Commerce and Industry.

It is one of the oldest if not the oldest factory in India engaged in the manufacture and repair of scientific and mathematical instruments in India.

It manufactures prismatic compasses, theodolites, levels and other survey instruments, prismatic binoculars, telescopes, thermometers and hydrometers of various types, excise apparatus, barometers and other meteorological instruments, profile projectors, students' microscopes, demonstration eyepieces, sextant, drafting machine and other drawing office equipment and repairs all types of scientific and aircraft instruments.

The Planning Commission had provided Rs. 180 lakhs for the first plan period to reorganize the factory, the first phase of reorganization being complete. A number of sections have been shifted to the new building at Jadavpur.

Under the Second Five-Year Plan, the manufacture of the following has been included: Special microscopes, medical diagnostic instruments, clinical thermometers and pressure & vacuum gauges.

The setting up of an Optical Glass and Ophthalmic Glass Factory in collaboration with foreign manufacturers has also been included in the second Five-Year Plan period.

Chairman, N. Subramaniam, I.C.S., Joint Secretary to the Government of India, Ministry of Commerce and Industry.

Director-in-Charge, S. D. Joshi, B.Sc. (Hons.), D.Pdy.Tech. (U.K.).

General Manager, P. C. De, B.Sc. (Eng.), C.P.E. (Glasgow).

Works Manager, P. C. Mahajan, M. Sc. (Lond.), Tech. Opt. M. Sc. (Pun.).

OPTICAL AND OPHTHALMIC GLASS FACTORY

(Ministry of Commerce and Industry).

The recommendation made by a team of Soviet experts for the establishment of an optical glass plant has been accepted in principle by the Government of India. It is proposed to execute this project from the long-term credit offered by the Soviet Union. The estimated cost of the project is Rs. 2 crores. The factory will be capable of producing 50 tons of optical glass and 250 tons of ophthalmic glass per year, which is expected to cover more or less the local requirements.

The Soviet team submitted its preliminary project report after visiting Dehra Dun, Agra, Calcutta, Trivandrum, Benaras, Allahabad and Lucknow. Preliminary preparations for the establishment of the factory were nearing completion and it was expected a beginning would be made in the year 1958.

The type of further assistance the Soviet Union will offer to India in the setting up of the factory now found feasible by the experts will

be discussed by the Government of India with the Soviet Embassy here after it had examined the report.

In their report, the Soviet experts have stated that the rich deposit of minerals necessary for the manufacture of optical glass as well as the existence in the country of a research institute for glass and glass technology departments in some Indian universities were sufficient prerequisites for the establishment of such a factory in India.

The experts feel that an output of 50 tons of optical and 250 tons of ophthalmic glass annually will be sufficient to meet the demand for such glass in India for the next five or ten years.

They have recommended Asansol area, in Bihar, as the most suitable site for the factory as the best quartz for manufacturing this type of glass is quarried in Jagdishpur area, in Bihar. They have suggested that the Indian Glass and Ceramic Research Institute should conduct experiments to find out whether Indian clays are suitable for optical glass melting.

As regards the requisite Indian personnel for the factory, the experts have recommended that 18 to 23 engineers would have to be trained abroad for a period of 12 to 18 months in technology, organisation and production. Another 35 to 40 persons would also have to be trained abroad in melting and processing of optical glass.

SINDRI FERTILIZERS AND CHEMICALS (PRIVATE) LIMITED

(Sindri, Bihar)

This is a State-owned and State-managed private limited company, in which all shares are held by the Government of India. The Company was registered on December 18, 1951.

Sir Shri Ram, a leading industrialist, is the Chairman of the Board of Directors.

Authorized share capital—Rs. 30 crores; paid up—Rs. 17 crores. A further sum of Rs. 7.5 crores was invested by the Government as a loan at 4½ per cent interest.

Higher profits, increased production and larger despatches of fertilizer and a well-planned expansion, designed to increase the factory's rated capacity by over 60 per cent, are some of the outstanding features of Sindri's progress as revealed in the fifth annual report of the Directors of Sindri Fertilizers & Chemicals (Private) Limited for 1956-57. This was mainly due to larger production and also due to larger despatches of fertilizer during the year.

According to the annual report, the gross profits of the organisation for the year amounted to Rs. 4.09 crores which showed an increase of Rs. 34,42,095 over the preceding year. After providing for depreciation, interest, reserve for repairs and renewals, dividend to shareholders etc., there was a net profit of Rs. 20,49,260 as against Rs. 18,06,048 during the previous year.

Sindri had, during the year 1955-56, repaid the loan from the Government of India to the extent of Rs. 2 crores.

Sindri has set up a record for efficient production and successful working. Sindri exceeded its production target of 330,000 tons for 1956 by about 1,725 tons. It also exceeded its production target for the financial year 1956-57 by 3,705 tons, the target being 330,000 tons. The total quantity despatched during 1956-57 was also the highest on record namely 361,082 tons as against 317,534 during 1955-56.

Total production of ammonium sulphate till September 1957 has been 16,16,609 tons equivalent to a saving of over Rs. 54 crores in foreign exchange.

Good progress has been made with Sindri's 11-crore-rupree expansion scheme. Under the expansion scheme, Sindri will produce two new types of nitrogenous fertilizers, 70 tons of urea and 400 tons of ammonium sulphate-nitrate per day. This will increase Sindri's existing production by over 60 per cent. The expansion scheme will be completed in 1958.

The factory consists of coke oven, gas, ammonia, sulphate plants; power from 30,000 KW Power House water (some 15 million gallons a day under full production conditions). Adequate

arrangements have been made to ensure this large supply of water from the Damodar river for the factory and connected activities.

A barrage has also been thrown over the Gawal, a tributary of the Damodar, impounding about 1,000 million gallons of water as a stand-by.

Then there are a bagging plant, marshalling yards and 12-mile railway track.

The factory was 100 per cent complete at the end of 1951; it started production 31st October 1951; gas plant started 13th April 1951; production of anhydrous ammonia started 25th August 1951; marshalling yards completed 30th August 1951; bagging plant commissioned 4th February 1953; bags of ammonium sulphate went out of the factory 7th February 1953.

The Coke Oven Plant built at a cost of Rs. 2.81 crores and designed to produce 600 tons of coke per day and other important by-products of industrial importance, went into production on September 1, 1954.

The cement factory built by the A.C.C., with an installed capacity of 600 tons of cement a day for the utilisation of Sindri's by-product—chalk sludge—went into production on 1st September 1955.

The township designed for 5,000 employees families or 25,000 persons is about 1,700 acres; has six groups of composite and self-sufficient colonies; all modern amenities (electricity, water supply, sanitary services, roads).

There are also a 100-bed modern hospital, four branch dispensaries, one first-aid post, two high schools for boys and girls, one middle school, three primary schools and one Kindergarten school, three post offices, three recreation centres and several shopping centres.

The Government of India, according to the annual report, sanctioned during the year 1956-57 the payment of an ad hoc monetary award to the staff. Out of a total of Rs. 16 lakhs set apart for this purpose, Rs. ten lakhs were disbursed in cash and Rs. six lakhs were earmarked for workers amenities fund.

The annual report said that a dividend of Rs. 85 lakhs at five per cent. on the invested capital of Rs. 17 crores had been declared as against Rs. 68 lakhs during the previous year. A monthly production of 32,397 tons was achieved in October 1956, establishing a record daily average of 1,045 tons.

Sindri has developed into an important training centre for young engineers and technicians. Sindri has already provided several trained technicians and engineers for other industries recently set up by the Government. Training facilities are being expanded with a view to training more technical personnel to man supervisory posts as a result of Sindri's expansion and the setting up of new fertilizer factories during the Second Five-Year Plan period.

Imports of fertilisers for 1956 and 1957 were as follows. The figures are in tons. The first figure shows the imports for 1956 and the second for 1957:

Ammonium and Sulphur Nitrate: 14,000 and 29,074; Urea: 10,000 and 59,322; Ammonium Sulphate: 1,96,000 and 3,14,742; Calcium Ammonium Nitrate: 6,243(1957); Muriate of Potash: 200 and 100.

Price—The selling price to the Central Fertilizer Pool is Rs. 280 per ton.

Board of Directors:

Chairman, Sir Shri Ram.
Members, J. J. Ghandy; S. B. Vasavada; B. C. Mukherji, I.C.S.; Dr. A. Nagaraja Rao; T. C. Puri, I.C.S.; U. L. Goeyami, I.C.S.; K. L. Ghal; Digvijaya Narain Singh, M.P.
Mg. Director, V. Nilakantan.

TRUSSIM PLANT

(Trombay, Bombay 38)

The plant went into production in August 1955.

It is expected to produce a few hundred tons of thorium and a few tons of uranium a year which is equivalent in fuel value to roughly 1,000 million tons of coal. This is about thirty times the present annual production of coal in India.

GOVERNMENT CEMENT FACTORY Churk, Mirzapur, U.P.

The Government Cement Factory was established at Churk in Mirzapur District at an initial cost of Rs. 4.5 crores. The factory went into production in September 1954. Its installed capacity is 700 tons per day. The factory employs over 2,000 persons.

In 1956-57 the cement production in the factory touched a new height of 1.96 lakh tons. The factory also supplied over 40,000 tons of cement for the construction of Rihand Dam during the same period.

The expansion programme, costing over Rs. 2 crores, is being implemented and the factory will start producing 1,400 tons of cement per day from October 1959.

GOVERNMENT PRECISION INSTRUMENTS FACTORY Lucknow, U.P.

The factory was established in 1950 at Lucknow, for the manufacture of water meters, microscopes and other precision instruments and went into production in 1952, when the turnover was nearly 300 water meters per month. The present production of water meters is 1,600 per month, including 1" inferential dry dial water meters of horizontal and vertical types and 2" and 1" dry dial water meters of horizontal type. Till March 1957, in all 53,070 water meters had been produced most of which was sold in various parts of the country. In terms of money, the factory saved valuable foreign exchange worth nearly Rs. 32 lakhs.

The total number of microscopes produced till March 1957, was 360 out of which 305 microscopes have already been sold to various institutions.

The demand for water meters has considerably increased. Since the present limited equipment and working space of the factory had put a ceiling on production, it was decided to expand it appropriately at a cost of Rs. 13 lakhs during the Second Five-Year Plan. The new building has since been constructed and some additional machinery procured at a total cost of Rs. 7.80 lakhs. Preliminary arrangements to shift the factory to the new premises had started and shifting was expected to be completed in a short time. The expanded factory will turn out 36,000 water meters of different sizes annually.

The production of microscopes, which is confined to about ten to twelve pieces a month at present, will be raised to 25 microscopes on completion of the expansion programme.

Besides the established lines of production of water meters and microscopes, manufacture of various types of pressure gauges and surgical instruments is also contemplated.

The factory, now a self-supporting economic unit, showed a net profit of Rs. 57,400 in 1955-56 as against the corresponding figure of Rs. 47,132 for the year 1954-55.

KOLAR GOLD MINING UNDERTAKINGS

Kolar Gold Fields, Mysore State.

Total investment : Rs. 164,00,000.

No. of Mines and their location : 3, all located in K.G.F.

Total annual output and average value :

Gold, 1.90 lakh fine ozs.—Rs. 488 lakhs.

Silver, 14,380 fine ozs.—Rs. 54,000.

No. of workmen : About 25,000.

Names of companies taken over : (1) The Mysore Gold Mines; (2) The Champion Reef Gold Mines; (3) The Nandydroog Mines.

During November 1956, the gold mines in Kolar Gold Fields, established in 1880, passed from the private sector to the public sector under

THE ANDHRA PAPER MILLS (Rajahmundry).

The capital investment was Rs. 25 lakhs and production capacity is 10 tons a day. The Government proposes to increase the present production capacity of the Mills from 2,000 tons to 8,000 tons of paper a year at a total capital cost of Rs. 190 lakhs during the Second Five-Year Plan period. It has also been proposed to manufacture better

STATE-OWNED OR STATE-AIDED

the provisions of the Kolar Gold Mining Undertakings (Acquisition) Act, 1956. The total compensation fixed under the Act is Rs. 164 lakhs, a major portion of which has already been paid to Messrs. John Taylor & Son, the former company.

Board of Management appointed by the Government of Mysore : The Chief Minister (Chairman); S. Muninappa (Vice-Chairman); G. Mathias, Finance Secretary; T. P. Krishnachar, Director of Geology and Mines; a representative of Messrs. John Taylor & Son who continue their association with the mines as Consultant Engineers.

THE MYSORE IRON AND STEEL WORKS (Bhadravathi, Shimoga Dist., Mysore State).

This Mysore State Government project for the establishment of the industry was worked out during the years 1914-18, and the basic industrial enterprise started operations in 1923.

The present total investment is Rs. 6.1 crores. The works produce pig iron, cast iron pipes, plate sleepers, general foundry castings, merchant steel sections, steel castings, portland cement, ferro-alloys. The turn-over amounts to over Rs. four crores per annum.

The manufacture by electric process is a noteworthy feature.

The annual production of pig iron is 90,000 tons; of cement about 78,000 tons; of ferro-silicon 5,000 tons; of steel about 30,000 tons.

The production in the General Foundry is about 2,500 tons of general castings; 600 tons of grinding bodies and 4,500 tons of plate sleepers a year.

The annual output of the Rolling Mill is about 30,000 tons of mild steel sections.

The Rod and Strip Mills produce 40 to 45 tons of rods or 30 to 35 tons of strips per day.

The Electric Steel Furnace produces annually about 4,500 tons of ingots and 600 tons of rough castings of which 200 tons are machined castings.

The output of the Structural Shop is about 100 tons a month.

In the expansion scheme of the works, a Cast Iron Spun Pipe Plant for manufacture of pipes upto 12" diameter was under installation and was expected to come into production by end of 1957.

Production of ferro-manganese in 2 Fuelled Furnaces with a capacity of 1,500 tons per year commenced during 1956-57.

The works have their plans for the Second Five-Year Plan period, to increase the steel ingot capacity from 30,000 tons to 1,00,000 tons and ferro-silicon production to 20,000 tons. A scheme for the manufacture of tool and alloy steel, stainless steel sheet and silicon steel is under consideration.

The labour employed : monthly rated about 1,800 and daily rated about 6,500.

Director and Vice-Chairman, T. Shamanna, I.A.S. General Manager, T. Krishnappa, M.Sc. (Met.). Addl. General Manager, B. Seashadri Sharma, B.Sc.

THE NATIONAL NEWSPRINT AND PAPER MILLS LIMITED

(Nepanagar, Ninar Dist., Madhya Pradesh).

The mills are situated on the main line Bombay-Itanagar, about 27 miles from Khandwa and 17 miles from Burhanpur.

The construction of the mill started in 1948, and the installation of the Paper Machine and Ground Wood Mill was completed by January 1955. The mill had a trial run on 11th January 1955 for the first time manufacturing newsprint from indigenous groundwood pulp and the imported chemical pulp.

ANDHRA PRADESH

quality of paper. A sum of Rs. 14.08 lakhs was provided in the State budget estimates for 1957-58 for the purchase of equipment required by the existing mills to increase the production.

THE GOVERNMENT CERAMIC FACTORY (Gudur, Nellore Dist.).

The Government Ceramic Factory, Gudur is at present confined only to the production of crockery and sanitary ware. It is proposed to

The Chemical Plant was put into commission and newsprint manufactured from cent per cent indigenous raw materials on 29th December 1956.

The rated capacity of the plant is 100 tons per day. Present production is 60 tons a day. The target production of 100 tons per day is likely to be reached by 1959.

The production during 1956 was 13,683 tons.

The total revenue from sales during 1956-57 was Rs. 106 lakhs.

The Project has cost about six crores of rupees. 1,100 workers are working on permanent monthly wages.

The Company is a limited concern with about 22,000 shareholders. The major portion of the investment; however, has been raised by way of loans from the Government of M.P. and the Central Government through the M.P. State Government.

At the head is a Board of Directors who are elected at the annual general meeting of the Company by the shareholders.

Chairman, Board of Directors, Sir A. Ramaswami Mudaliar.

Managing Director, Ragho Raj Singh.

Works Manager, S. R. Krishnaswami.

Secretary, B. V. Deo.

The First-Five Year Plan had an allotment of Rs. 200 lakhs for the Mills.

SIRPUR PAPER MILLS LTD.

(Sirpur-Kaghasnagar, Central Railway, Andhra Pradesh).

The managing agents are Messrs. Birla Brothers Ltd., 8, India Exchange Place, Calcutta; and the registered office is at Ali Villa, Somajiguda, Hyderabad.

Production started in 1942. The total capacity of the mill is 18,000 tons per year and actual production in 1955-56 was 14,200 tons. The mill employs about 2,100 workers. The authorized capital of the company is Rs. 8.85 crores, issued capital Rs. 2.91 crores and the paid-up capital Rs. 2.59 crores.

For the year ended 30th June 1956, the profit was Rs. 18.20 lakhs.

The Company had on hand plans to raise production (capacity to 100 tons a day by the end of 1957).

Chairman, Board of Directors, G. P. Birla.

Secretary-General, P. R. Blyani; Secretary, P. L. Bhandari; Commercial Manager, G. N. Kabra; Factory Manager, N. N. Agarwal; Technical Adviser, H. Zuckerbaecker.

THE SIRSILK LTD.

(Sirpur-Kaghasnagar, Central Railway, Andhra Pradesh).

The managing agents are Messrs. Birla Brothers (Private) Limited, 8, India Exchange Place, Calcutta; and the registered office is at Ali Villa, F-2-655, Somajiguda, Hyderabad.

The authorized capital is 1 G. Rs. 10.80 crores, issued and subscribed capital 1 G. Rs. 3.346 crores, and called and paid-up capital 1 G. Rs. 3.02 crores.

The profit and loss account for the year ended September 30, 1956 shows a gain of Rs. 23.6 thousand. The working of the year 1957 has also shown an improvement.

The capacity is five tons of yarn at present (September 1957) and the company has obtained a licence to raise the capacity to ten tons. Out of the 480 looms received, 468 were installed and were working on double shift (September 1957).

Chairman, Board of Directors, G. P. Birla.

expand the factory during the 2nd Plan period at a total cost of Rs. 12.60 lakhs in order to take up the manufacture of Electrical Insulators as additional line of production, to meet the requirements of Government Electricity Department, etc. A sum of Rs. 4.27 lakhs was provided in the State budget for 1957-58 for the expansion of the factory. After the expansion of the factory is given effect to, it is expected that the production will be trebled.

HYDERABAD TANNERIES LTD.

(Hyderabad).

The investment is Rs. 13 lakhs. The production is temporarily suspended. The issue of reorganisation is under active consideration for hitting the targeted production envisaged in the tannery.

PRAGA TOOLS CORPORATION

(Hyderabad).

The authorised capital is Rs. one crore. The Union Government has agreed to invest another

Rs. 75 lakhs to Rs. one crore for expanding the production which includes setting up of a modern foundry and a heavy forge shop.

THE SRI VENKATESWARA STRAWBOARD MILLS

(Tirupati).

This was originally a private company which the State Government has purchased. It has been

proposed to start the Sri Venkateswara Strawboard Factory at Tirupati as a State enterprise at an estimated cost of Rs. 10.35 lakhs during the Second Plan period with a production capacity of 10 tons of strawboard per day. A sum of Rs. 2.35 lakhs was provided in the State budget estimates for 1957-58 for this scheme.

ASSAM

The total investment is Rs. 90 lakhs.

When the mill is in full production about 600 persons will be employed.

The Second Five-Year Plan target for the mill is 13,000 tons of white refined sugar.

ASSAM SPUN SILK MILL

(Jagi Road, Nowgong Dist.).

The mill was expected to start functioning by the end of 1957.

The total estimated cost of the project is Rs. 54.7 lakhs.

It is estimated that about 400 skilled workers and 800 unskilled workers will be employed when the mill is in full production.

TEXTILE MILL

(Pandu)

The mill is expected to start functioning in 1958-59.

It is estimated that about Rs. 1.17 crores would be invested in the mill.

About 2,000 unskilled and 100 skilled and supervisory staff will be employed when the mill is in full production.

THANGA MILL

(Spun Silk Mill).

Jagi Road, P.O. Jagi Road,
Nowgong Dist., Assam.

The mill has not been started. Arrangements are in progress. The total investment proposed is Rs. 54.7 lakhs.

The Second Five-Year Plan target is 225,000 lbs. of spun yarn and 117,000 lbs. of Noli.

When the mill is in full production 600 unskilled and 400 skilled workers will be employed.

ASSAM CO-OPERATIVE SUGAR MILL LTD.

(P.O. Barubamungson, Golaghat).

The mill was expected to go into production during the crushing season 1957-58.

BIHAR STATE SUPERPHOSPHATE FACTORY

(Sindri).

The factory was still under erection and was expected to go into production by about the end of 1957. Some details relating to the factory are given below:

Capacity of production: Single superphosphate—15,000 tons per annum.

Installed capacity of plants: (i) 240 tons superphosphate per day; (ii) 25 tons sulphuric acid 98 per cent per day.

Total investment: Rs. 60 lakhs.

No. of workers expected to be employed: About 100.

At present State-owned, but may be made a private limited company.

The factory is capable of producing 240 tons of superphosphate per day or about 70,000 tons per annum of 300 working days, provided an additional 50-ton per day capacity sulphuric acid utilising iron pyrites is installed for which a provision has been made in the Second Five-

Year Plan. The production of the factory is expected to be mostly marketed within the State of Bihar.

The First Five-Year Plan had an allotment of Rs. 54.55 lakhs for the factory. The Second Five-Year Plan has allotted Rs. 20 lakhs for the expansion of the factory.

Works Manager, B. A. Sundara Moorthy, B.Sc., A.M.I.E. (Ind.); *Senior Works Chemist*, R. Jagannathan, M.A., A.R.I.C., A.M.I.Chem.E.; *Chief Engineer*, S. Kumar.

JAMMU & KASHMIR

persons employed is 60. The present production is valued at Rs. 2 lakhs and the Second Five-Year Plan target is Rs. 15 lakhs.

GOVERNMENT SILK WEAVING FACTORY

(Raj Bagh, Srinagar).

The factory was started in 1938-39 with 33 looms and 1,872 spindles. It is now equipped with 124 looms and an up-to-date Throwing Plant of 5,616 spindles.

Total investment: Rs. 12.34 lakhs odd. The factory employs 553 persons (479 labour and 74 establishment).

The present production is four lakh yards per annum. The target for the Second Five-Year Plan is six to seven lakh yards.

GOVERNMENT WOOLLEN MILLS

(Srinagar, Kashmir).

The mill was started on 7th December 1950. The total investment is Rs. 17,43,534-5-4. The number of persons employed is 570. Average production is 18,660 yards or 29,647½ lbs. per month. The Second Five-Year Plan target is 1,425,000 yards.

GOVERNMENT DRUG RESEARCH LABORATORY

(Canal Bank, Jammu).

The Laboratory was started in 1943. Total investment is Rs. 18 lakhs. The number of persons employed is 300. The present production is valued at Rs. 12 lakhs and the Second Five-Year Plan target is Rs. 25 lakhs.

GOVERNMENT DRUG RESEARCH LABORATORY

(Raj Bagh, Srinagar).

The Laboratory was started in 1956. Total investment is Rs. 3.9 lakhs and the number of

GOVERNMENT CERAMIC CONCERNS

(Kundara, Quilon Taluk).

The factory was started in 1940 and has been functioning under direct management of Government. The factory consists of two sections, viz. (1) The mining and refining of China Clay and (2) The manufacturing section.

China clay is mined in the vicinity by open cast system from a deposit averaging upto 60 ft. from the ground level. There are very few places in India where such superfine china clay of equally good quality is available. China clay produced at Kundara is being supplied mainly for use in textile, paper, pottery and rubber industries, throughout India.

In the manufacturing section a good variety of electrical goods, refractories, pipes, etc. are being produced.

Total investments: Present factory—Rs. 13,80,329 (at the end of 1955-56); New factory—Rs. 32,43,865 (at the end of 1955-56).

Total number of employees: Pensionable staff 80; Non-pensionable staff 23; Contingency 7; Workers about 400.

The factory produces porcelain, crockery goods, refractories, etc.

Second Five-Year Plan target: Construction of slip tank, drying yard, etc. and purchase of machinery during 1956-57 and 1957-58 so as to commence production of additional quantity of 1,000 tons of china clay annually so as to raise the yearly production to 3,500 tons in 1958-59. Some items of machinery have been received and orders have been placed for some other items. Quotations have been invited for the remaining items except Bulldozer the supply of which is being considered by the Government.

GOVERNMENT HYDROGENATION FACTORY

The work on the building was started in 1949 and completed in 1949. An expenditure of Rs. 17,63,400 has been incurred for the factory. The production capacity of the plant is 15 tons per day. Groundnut oil is the essential raw material. Due to Gulf market then prevailing for Vanaspathi, the Government of Madras decided not to start production on a commercial basis. The Kerala Government are now considering proposals for re-opening and working this factory.

GOVERNMENT OIL FACTORY

(Kozhikode).

Regular operation of this factory started from the year 1943. The capital invested by the Government comes to about Rs. 4,55,541-15-8. The Oil Chemist is in immediate charge of this Institute. The Director of Industries & Commerce has the overall control of this institution. Various types of oils as Seagold Adamine, stayit are manufactured here. Messrs. Parry & Co., Madras are the present Selling Agents for the products of this factory.

KERALA SOAP INSTITUTE

(Kozhikode).

Regular operation in this institute began in the year 1923. The institute manufactures several varieties of toilet soaps including the Kerala Sandalwood, Rose soaps etc. as also Wash-well and other varieties of bar soaps. The work of training of students in soap making is also undertaken.

The capital investment alone comes to Rs. 7,10,536-0-5.

The capacity of the factory is about 450 tons per annum. But it is now being increased.

The Oil Technologist is in immediate charge of the Institute. The Director of Industries & Commerce has an overall control. Agents have been appointed in all parts of India.

S.K.V.G.A. PHARMACY (Trichur).

S.K.V.G.A. Pharmacy, Trichur, functions as a commercial concern under the Director of Indigenous Medicines.

Main products manufactured in the pharmacy are Ayurvedic Medicines, viz. Asavams, Arishtams, Thylams, Lahyams, Ghritams, Pills and Choornams, etc., etc.

SHARK LIVER OIL FACTORY (Trivandrum).

This factory was started by the University of Travancore and was functioning from the end of 1950. Government has invested Rs. 2 lakhs in the factory. The main products manufactured in the factory are: (1) First Grade Shark Liver Oil (Shariliverpill) 5,000 units per gram; (2) Second Grade Shark Liver Oil 2,000 to 3,000 per gram; (3) Stearine and fish oil soap.

The factory has an installed capacity of 10,000 gallons and production is being increased by new methods of manufacture.

KERALA GOVERNMENT CERAMICS

This is a new factory commissioned in January 1957. The capital invested is about 35 lakhs. This is a scheme completed under the First Year Plan of the State. The production of white ware hitherto attended by the Ceramic Factory has been taken over by the new concerns. The latest type of Electric Double Tunnel Kiln has been installed in this factory, and quality goods, mainly tea sets are being produced.

PALLATHRA BRICKS & TILES LTD. (Kottayam District, Kerala).

Management: Cherian & Co. (Private) Ltd., Chingavanam P.O., Kottayam, Kerala.

Capital: Rs. 11 lakhs (Rs. 5 lakhs to be subscribed by Kerala Government).

Labour: About 350 workers.

Probable date of commencement of production: end of 1957.

Initial target: 20,000 bricks per shift of 8 hours in one unit. Only one unit is proposed to be started now.

TRAVANCORE MINERALS PRIVATE LTD.

Head Office: Quilon, Kerala State.

Works: Chavara, Quilon Dt., Kerala State.

Date when started: January 1932—successors of Travancore Minerals Company, a private limited company incorporated in England; fully nationalised in June 1949. Pioneers in beach mineral dressing.

Total investments: Rs. one crore.

Present production: Bauxite average subject to climatic conditions: Ilmenite—600 tons and two tons rutile per day. Also monasite.

The present constitution of the Company consists of a Board of three Directors, one representing the Government of India, one the Kerala State, and the Chairman being nominated by the Government of India.

This new set-up commenced functioning in May 1957. The Company is being administered by a Chief Administrative Officer, Lt.-Col. J. N. Zutshi, formerly of the Defence Department, Government of India. A reorganisation of the industry has recently been undertaken by the present Board of Directors.

Second Five-Year Plan target: No scheme for the expansion of the production schedules of ilmenite and monasite is included in the Second Five-Year Plan. A scheme for the production of rutile with the latest type machinery is however included in the Plan with a physical target of 7,000 tons at an estimated expenditure of Rs. 12.86 lakhs. A sum of Rs. 1,70,000 has been provided in the current year's budget and a High Tension Electro Static Separator from Florida, U.S.A., has arrived. Employment of the required staff is being considered.

TRAVANCORE PLYWOOD INDUSTRIES

This is a factory started as a Public Company with Government support. Finally in 1947, Government purchased all the shares of the

company and became sole proprietor. The Capital investment in buildings and machinery is about Rs. six lakhs. The factory is now mainly producing plywood for tea chests. The installed capacity of the machinery for the production of plywood is 3 million s.f.t. of 4 m.m. plywood a year. The soft wood logs required for the manufacture of plywood are being delivered to the factory by the Forest Department. The tea chest panels now produced in the factory find ready sales. Commercial plywood also is in good demand.

TRAVANCORE RUBBER WORKS (Chackal, Trivandrum 7).

The factory was started on 17th August 1935 as Travancore Govt. Rubber Factory (later leased to the Travancore Cables & Rubbers Ltd. from January 1937 to March 1938). Subsequently the factory was working on partnership basis between the Travancore Government and Sir Chinubhai Ranchodlal Madhwal from 10-2-1940 to 8-10-1949. The concern was finally taken over by the Govt. of Travancore-Cochin on 9-10-1949.

The capital investment by the Government is Rs. 4,80,875-5-5. The factory consumes about half to three quarter ton of raw rubber per day and the production capacity is about two tons of goods worth Rs. 4,000 to Rs. 5,000 per day.

The factory employs about 250 persons: Staff about 45. Workers about 205 (30 on monthly wages and about 175 on daily wages).

The production capacity of the factory is 25,00,000 lbs. per year.

The main products manufactured in the factory are cycle tyres and tubes and various types of rubber sheeting, hoses, tubings, rings, bushes, gharry and sponge and latex cushions, ebomite rods, blocks, sheets, latex and sponge toys, etc.

Under the Second Five-Year Plan, a cycle rim plant is under construction and a scheme of modernisation and expansion of the whole factory has also been taken up. Increased output of up-to-date finished goods and increased profits are expected by the mechanisation and modernisation.

MYSORE

THE GOVERNMENT CENTRAL INDUSTRIAL WORKSHOP

(Post Office Road, Bangalore).

Established: 1897.

Capital invested: Rs. 5,90,554 (fixed).

No. of persons employed: 192.

Annual outturn: Rs. 4-5 lakhs (1956-57).

The process of shifting the factory to new premises and amalgamating the mechanical department of the Government Electric Factory with it is under way. The scheme is estimated to cost Rs. 9-5 lakhs. The shifting was expected to be completed by the middle of 1958. A production target of Rs. 16 lakhs per annum is expected to be reached by the end of the Second Five-Year Plan.

GOVERNMENT ELECTRIC FACTORY (Mysore Road, Bangalore).

Established: 1934.

Capital invested: Rs. 60 lakhs.

No. of persons employed: 1,000.

Annual outturn: Rs. 70 lakhs.

A scheme is under way to expand the factory during the Second Five-Year Plan and a sum of Rs. 125 lakhs has been granted by the Centre under the Central Aid Scheme. Negotiation for collaboration of the factory with a famous engineering firm, Messrs. A. E. G., Germany, has been concluded. The expansion scheme envisages (1) production of transformers of capacities up to 10,000 KVA and of voltage rating up to 66,000 volts, recording an annual output of 300,000 KVA, (2) restarting the manufacture of electric motors with a capacity up

to 250 hp and the ultimate annual output of 60,000 hp and (3) manufacture of switch-gear like the iron clad switches, a variety of fuse cartridges, group operated isolators, oil circuit breakers, etc. up to a rupturing capacity of 250,000 KVA and voltage rating up to 33 KV.

GOVERNMENT PORCELAIN FACTORY

(Malleswaram, Bangalore).

Established: 1932.

Capital invested: Rs. 70,70,600.

No. of persons employed: 415.

Annual outturn: Electro-porcelain: 300 tons; Crockery: 24 tons.

The Government Porcelain Factory is the only State-owned industry of the type in India. In order to meet the growing demand for insulators, bushings, etc., an expansion scheme estimated to cost about Rs. 84 lakhs is under way in technical collaboration of Messrs. Nippon Gaiishi Kaisha Ltd., Nagoya, Japan. This scheme envisages an output of 2,500 tons of production per annum. Since this scheme could not be completed within the end of the First Five-Year Plan, it had to be included in the Second Five-Year Plan.

GOVERNMENT SANDALWOOD OIL FACTORY

(Mysore South & Shimoga Town).

Established: 1918.

Capital: Rs. 9,68,385.

Number of persons employed: About 100.

Annual outturn: 1,40,000 lbs. of sandalwood oil.

A programme of replacing the existing equipment and machinery by up-to-date and modern ones is in hand. Details are being worked out.

It is also proposed to develop the factory at Shimoga into a full-fledged and self-contained unit.

GOVERNMENT SOAP FACTORY (Rajajinagar, Bangalore).

Established: 1918.

Capital invested: Rs. 10,45,060.

No. of persons employed: 233.

Annual outturn: Rs. 32 lakhs.

The factory shifted to its new premises at Rajajinagar, Bangalore's industrial suburb, in March 1957; is expected to produce 1,500 tons of soap per year which can be further increased to 3,000 tons. A glycerine recovery plant and a rectification plant are also being erected in the new premises. This will have an output of 75 tons of chemically pure glycerine a year.

MYSORE GOVERNMENT SILK WEAVING FACTORY (Mysore).

Established: 1932.

Capital invested: Rs. 15,20,975.

Number of persons employed: 193.

Annual outturn: Rs. 10,00,000.

MYSORE IMPLEMENTS FACTORY (Hassan).

Established: 1939.

Capital invested: Rs. 10,87,000.

No. of persons employed: 284.

Annual outturn: Production Rs. 7,90,000 (1956-57). Sales Rs. 8,06,000.

A scheme for mechanisation and development of the factory with a capital cost of Rs. 14 lakhs is being executed.

RESEARCH

RESearch in pure science is carried out mainly in the universities and in some research institutes. The Council of Scientific & Industrial Research (C.S.I.R.) and the Department of Atomic Energy provide facilities for fundamental or basic research in their laboratories and institutes, and also sponsor such research in universities and research institutions all over the country.

Research in applied science and for industrial development is done mainly under the auspices of the C.S.I.R., the Co-operative Research Associations, and the laboratories attached to a few industrial concerns.

Research in engineering subjects is undertaken in the Indian Institute of Science, Bangalore, Central and State Hydraulic Engineering Research Stations, Indian Institute of Technology, Kharagpur, and in a few engineering colleges, such as the College of Engineering and Technology, Jadavpur.

The Council of Scientific & Industrial Research, also sponsors engineering research in various institutions through its research committees.

Medical research is mainly in the charge of the Indian Council of Medical Research.

Agricultural research is looked after by the Indian Agricultural Research Institute, Delhi, and the various Central Committees for agricultural commodities like the Indian Central Cotton Committee, Indian Central Jute Committee, etc. and the research institutes functioning under the Ministry of Food and Agriculture. (See article on agriculture.)

The Indian Veterinary Research Institute, Ipatnagar (U.P.) is concerned with veterinary diseases. The National Dairy Research Institute at Karnal in the Punjab works on dairy research.

Research for defence purposes is undertaken in the Defence Science Laboratory at New Delhi. Some amount of work is carried out also in ordnance laboratories at Kanpur and elsewhere.

Research in the humanities—literature, language, the arts, etc.—is done at individual institutions scattered throughout the country.

It may be mentioned here that the Central Government has a Scientific Liaison Officer in the U.K. He keeps in touch with scientific developments in Europe, arranges for the training of Indians at research centres in Europe, and helps to promote personal contacts between Indian and foreign scientists.

The Indian National Documentation Centre at New Delhi helps to keep Indian scientists in touch with research work done in foreign countries.

Allotment for C.S.I.R. alone for research and development under the Second Five-Year Plan is Rs. 35.36 crores.

SCIENTIFIC SOCIETIES

The National Institute of Sciences, New Delhi, is the premier scientific society recognized by the Government of India. It enjoys the same status in India as the Royal Society of London in U.K. or the National Academy of Sciences, Washington in U.S.A.

Two all-embracing science societies are:

The Indian Science Congress Association, Calcutta, under whose auspices Indian and foreign scientists meet every year to exchange ideas; and

The Indian Association for the Cultivation of Science, Calcutta.

Two all-India academies are:

The Indian Academy of Sciences, Bangalore; and

The National Academy of Sciences (India), Allahabad.

Other scientific societies are: (for notes on these societies, where they are available, see under appropriate State): Architectural Society of India, Bombay; Aeronautical Society of India, New Delhi; Agricultural and Horticultural Society of India, Calcutta; Agri-Horticultural Society, Madras; Anatomical Society of India, Calcutta; Anthropological Society, Bombay; Asiatic Society of Bengal, Calcutta; Association of Microbiologists of India, Calcutta; Banaras Mathematical Society (Bharat Ganita Parishad), Lucknow; Biological Society of Assam, Gauhati; Bombay Natural History Society, Bombay; Bombay Sanitary Association, Bombay; Botanical Society of Bengal, Calcutta; British Medical Association, Bombay Branch, Bombay; Calcutta Geographical Society, Calcutta; Calcutta Mathematical Society, Calcutta; Calcutta Statistical Association, Calcutta; Christian Science Society, Calcutta; Concrete Association of India, Bombay; Congress of Theoretical & Applied Mechanics, Kharagpur; Engineering Association of India, Calcutta; Geological Institute, Calcutta; Geological, Mining and Metallurgical Society of India, Calcutta; Gujarat Research Society, Bombay; Helminthological Society of India, Calcutta; Horticultural Society of India, Calcutta; Indian Anthropological Institute, Calcutta; Indian Botanical Society, Calcutta; Indian Ceramic Society, Banaras; Indian Chemical Society, Calcutta; Indian Council of Geographers, Calcutta; Indian Dairy Science Association, Bangalore; Indian Ecological Society, Calcutta; Indian Institute of Architects, Bombay; Indian Institute of Chemical Engineers, Calcutta; Indian Institute of Metals, Calcutta; Indian Mathematical Society, Madras; Indian Medical Association, Bombay; Indian Meteorological Society, New Delhi; Indian National Society of Soil Mechanics & Foundation Engineering, New Delhi; Indian Pharmaceutical Congress Association, Calcutta; Indian Physical Society, Calcutta; Indian Physiological Society, Calcutta; Indian Phytopathological Society, Calcutta; Indian Roads and Transport Development Association, Bombay; Indian Science News Association, Calcutta; Indian Society for Agricultural Statistics, New Delhi; Indian Society of Engineers, Calcutta; Indian Society of Genetics and Plant Breeding, New Delhi; Indian Society for Quality Control, Calcutta; Indian Society of Soil Science, Calcutta; Institute of Engineers, Calcutta; Institute of Chemists, Calcutta; Institution of Military Engineers, New Delhi; Institution of Surveyors, New Delhi; Institution of Telecommunication Engineers (India), New Delhi; International Society of Plant Morphologists, Delhi; Maharashtra Association for the Cultivation of Science, Poona; Mechanical Engineers' Association (India), Bombay; Mining, Geological and Metallurgical Institute of India, Calcutta; Mysore Geologists Association, Bangalore; National Horse Breeding and Show Society of India, New Delhi; Oil Technologists' Association, Kanpur; Palaeobotanical Society of India, Lucknow; Physiological Society of India, Calcutta; Psychoanalytical Society, Calcutta; Rajasthan Academy of Sciences, Pilani; Royal Agri-horticultural Society of India, Calcutta; Society of Biological Chemists, Bangalore; Sugar Technologists' Association, Kanpur; Tropical Diet Research Society, Calcutta; Vilnasa Parishad, Allahabad; Zoological Society of Bengal, Calcutta; Zoological Society of India, Calcutta.

COUNCIL OF SCIENTIFIC RESEARCH

The major part of applied research in India is now carried on under the auspices of the Council of Scientific and Industrial Research (Ministry of Education and Scientific Research).

The Council of Scientific & Industrial Research was established in 1942 by the Government of India as an autonomous body registered under the Registration of Societies Act XXI of 1960. The functions of the Council include: the promotion, guidance and co-ordination of scientific

and industrial research in India; the establishment, maintenance and management of laboratories and institutes to further scientific research; and the collection and dissemination of scientific information. Research work under the Council is carried on in its own laboratories and extra-murally in universities and other institutions under a grants-in-aid scheme.

The Council is administered by a Governing Body with the Prime Minister as President, the Minister for Education and Scientific Research as Vice-President and representatives of science, industry and certain Government departments as members. The Board of Scientific & Industrial Research advises the Governing Body on research and development proposals and also as to the lines on which scientific and industrial research ought to be conducted and the channels into which it should be guided for ensuring co-ordinated development of science and industry in the country. The Board initiates, guides and supervises research projects and examines and co-ordinates schemes of research.

The Board consists of representatives of science, engineering, industry and appropriate departments of State Governments and of the Government of India. It functions in two working parties (i) scientific and technical subjects; and (ii) engineering subjects. The Board is advised by a number of Research Committees, which keep a watch on the progress of research schemes falling within their scope, formulate long-range research projects on specific subjects and recommend to the Board necessary grants-in-aid and block grants for research work in universities and other institutions scattered in the country. The number of Research Committees at present is 25 as follows:

Aeronautics; Applied Mechanics; Atmospheric; Biochemical; Biological; Biophysics; Building; Cellulose; Chemical; Geological & Mineralogical; Electrical & Wind Power (including Wind Power Sub-Committee); Essential Oils; Metals; Mining; Pharmaceuticals & Drugs (with Medicinal Plants Sub-Committee); Physical; Plastics; Public Health Engineering; Radio; Internal Combustion Engines & Gas Turbines; Road; Science Instruments; Soil Mechanics & Foundation Engineering; Vanaspathi; Vegetable Oils.

The budget grant for 1957-58 was Rs. 5 crores.

In 1956-57 Rs. 25,60,000 were granted by the Council to 278 scientists for research in various institutions.

NATIONAL LABORATORIES

There are 16 national laboratories functioning under the Council.

The National Physical Laboratory in New Delhi and the National Chemical Laboratory at Poona stand on a special footing.

The former is equipped for the maintenance of and research in fundamental and derived standards. It also undertakes research in industrial standards of performance and practice.

The National Chemical Laboratory is concerned with investigations embracing all the chief applications of chemistry. In the areas not covered by the activities of other institutions this Laboratory has a special responsibility.

The National Metallurgical Laboratory, Jamshedpur;

The Central Fuel Research Institute, Jalandhar;

The Central Glass & Ceramic Research Institute, Calcutta;

The Central Food Technological Research Institute, Mysore;

The Central Drug Research Institute, Lucknow;

The Central Leather Research Institute, Madras;

The Central Building Research Institute, Roorkee;

The Central Road Research Institute, New Delhi;

The Central Salt Research Institute, Bhavnagar;

The National Botanic Gardens, Lucknow;

The Electronics Engineering Research Institute, Pilani;

The Indian Institute for Biochemistry & Experimental Medicine, Calcutta;

The Central Mining Research Station, Dhanbad,

The Central Electro-Chemical Research Institute at Karaikudi.

These institutes are concerned with problems of specific industries which are rapidly developing in the country.

The Council has set up laboratories for the investigation of problems of particular regions.

A Regional Research Laboratory has been set up at Hyderabad. The Council is now planning to establish similar laboratories in other parts of the country.

The following laboratories are in the process of establishment:

Central Mechanical Engineering Research Institute at Calcutta;

Research Station for the utilization of Sambhar bitterns.

A Committee presided over by the British scientist Sir Alfred Egerton reported on the working of the national laboratories in 1953.

The Council of Scientific and Industrial Research encourages the formation of co-operative research associations for the purpose of conducting research for industry by industry. Where recognition is given Government may make a money grant. Examples of industries which have set up such associations are:

Ahmedabad Textiles (Ahmedabad Textile Industry's Research Association); the Silk and Art Silk Mills' Association, Bombay; Bombay Textiles (Bombay Textile Industry's Research Association); Coimbatore Textiles (The Southern India Textile Research Association); and Jute Mills, Calcutta (Indian Jute Mills Research Association).

The Shri Ram Institute for Industrial Research, Delhi, undertakes on a 'not-for-profit' basis, research in and investigation of projects sponsored by industrial concerns, groups of companies, individuals and government agencies.

RESEARCH SCHEMES

In 1957 there were about 250 research schemes in progress sponsored by the Council. As a result of help from the Council schools of research have come into existence at some Indian universities, e.g. a school in geophysics at Andhra University, one in dye-stuffs at Bombay and another in nuclear and ionospheric research at Calcutta.

The schemes cover research in such subjects as radio, instrumentation, dye-stuffs, coal tar products, vegetable and essential oils, processing of food stuffs and leather, plastics, ceramics, cellulose, insecticides and antibiotics.

About biological sciences, the Council has appointed a Committee to report on what measures might be taken to encourage research in them. There is special investigation of plant material with the view to the production of antibiotics.

Research in cloud physics with a view to producing artificial rain is carried out at a research unit at the National Physical Laboratory at New Delhi in co-operation with the Indian Meteorological Department and the Ministry of Defence.

The investigations in connection with the International Geographical Year were also conducted under the auspices of the council.

There is much investigation into ores, metals and alloys for the purpose of up-grading ores, discoveries of new processes of smelting, and of metal coating to resist corrosion. The aim is to

eliminate the use of elements that are scarce in this country. Experiments are conducted at Jamshedpur for the production of iron by using non-coking coals, a process that will save better grade coal reserves.

Four research centres are likely to be established for research in essential oils. Perfumery material, now largely imported, is sought to be produced by the cultivation of the Johore Patchouli plant and the linalee tree. Experiments in this connection are being conducted at the Indian Institute of Science, Bangalore and in Madras.

A survey of cellulose raw material has shown that bagasse, eela reeds and bamboo could be used with success in the manufacture of rayon. It is also clear that news-print can be produced on a commercial scale by the use of mixed bamboo fibre and bagasse.

In the tanning of leather an effort is made to substitute indigenous vegetable tanstuffs (babul, divi-divi) for wattle bark which is imported. A number of foreign tanning processes have been adapted to conditions in this country. An effort is made to manufacture glazed kid in India as well as to standardize buffalo hides.

In geology there are investigations to determine the age of rocks by examining their radio content. The Andhra University is conducting research in oceanography—temperature, salinity, mineral content of sea water.

In the matter of food the main research is in relation to the nutritional values of certain food-stuffs including palm gur and the preservation of neera.

Of general interest are experiments in low-cost housing and the production of an experimental National Calendar for five years 1954-55 to 1958-59 by the Calendar Reform Committee of the Council. This calendar has now been used for certain official purposes from March 22, 1957.

To try out new inventions with a view to their commercial possibilities a National Research Development Corporation has been set up.

This started functioning in Dec. 1953 and upto the end of March 1957, 388 inventions were reported for development. The number reported in 1956-57 was 134.

ATOMIC ENERGY

The Department of Atomic Energy was constituted by the Government of India in 1954 with Bombay as its headquarters.

The Department is under the Prime Minister. The present Secretary of the Department is Dr. J. H. Bhabha.

The Department has an executive branch called the Atomic Energy Establishment. The Chief executive official of the Establishment is designated Controller.

The Atomic Energy Commission is a much older body. It was set up in August 1948 under The Atomic Energy Act, 1948 with the object of developing atomic energy for peaceful purposes. It had three members then: Dr. J. H. Bhabha, the late Sir S. S. Bhatnagar and Dr. K. S. Krishnan. At the time of writing (Feb. 1958) the commission was in the process of reformation and Mr. Bhabha had been named Chairman. The Atomic Energy Department could therefore be regarded as the body actively in charge of affairs connected with atomic energy.

The Department normally discharges four duties. It conducts surveys for the discovery of minerals useful in the production of atomic energy. It processes the minerals on a large industrial scale. It undertakes research in atomic energy. It promotes fundamental research in nuclear physics. And it trains scientific personnel.

A Board of Research and Cosmic Ray Committee help the Department in the discharge of some of its functions.

Research on atomic energy for peaceful purposes is conducted in the laboratories of the Department of the Tata Institute of Fundamental Research, Indian Cancer Research Centre, Bombay, and also at the universities.

The Department of Atomic Energy also looks after the Indian Rare Earths Ltd., located at Alwaye in Kerala State for processing monazite. It is a joint enterprise of the Governments of India and of Kerala.

A factory has been set up in Bombay for extracting uranium and thorium from the waste thrown up by the Alwaye works. Some of the rare earth salts produced by this plant will be used by the gas mantle industry.

The first atomic reactor designed and built by Indian scientists and engineers has been in operation since Aug. 4, 1956. This reactor combines experimental facilities for pure research as well as shielding studies for advanced power reactors. It will train personnel for bigger and more complicated reactors that are to follow and also produce isotopes useful in agriculture, industry and medicine.

The Department of Atomic Energy finances cosmic ray research at various universities, and especially at the following institutions: Institute of Nuclear Physics, Calcutta; Bose Institute, Calcutta; Physical Research Laboratory, Ahmedabad.

SCIENCE RESEARCH BODIES

There is a whole host of research organizations (besides the ones mentioned above) engaged in scientific research of one sort or another.

The Geological Survey of India at Calcutta maps out the mineral resources of the country. The Indian Bureau of Mines, the Mineral Information Bureau at Delhi, the National Metallurgical Laboratory at Jamshedpur and the Indian School of Mines at Dhanbad also help in the prospecting and working of minerals.

The Botanical and Zoological Surveys both at Calcutta conduct systematic surveys of the animal and plant resources of the country.

The Birbal Sahni Institute at Lucknow carries on research in plant fossils.

The Meteorological Departments of the Government of India at Delhi and Poona are concerned with meteorological, climatological, hydro-meteorological and snow surveys.

The Bose Research Institute in Calcutta conducts research in physics, chemistry, zoology and plant breeding.

Research in radio physics and electronics is in progress at the Indian Institute of Radio Physics and Electronics in Calcutta, while research in cosmic rays and theoretical physics is carried on at the Physics Research Laboratory in Ahmedabad.

The Indian Association for the Cultivation of Science at Calcutta is engaged in research in many fields relating to physics and chemistry both in their theoretical and applied aspects.

The Forest Research Institute at Dehra Dun does research in the improvement and utilization of forest produce and more especially in timber for constructional purposes.

ENGINEERING RESEARCH

The Indian Standards Institution at New Delhi lays down specifications for materials, tools and products.

About fifteen engineering institutions provide facilities for research:

All India Institute of Hygiene and Public Health, Calcutta: sanitary engineering.

Annamalai University, Annamalai Nagar (Madras State): structural and agricultural engineering, public health.

Baroda University, Baroda: civil, mechanical and telecommunication engineering.

Bengal Engineering College, Sibpur, Calcutta: mechanical; civil and electrical engineering (esp. gas turbines and jet propulsion).

Bihar College of Engineering, Patna: Civil and electrical engineering.

College of Engineering and Technology, Jadavpur, Calcutta: mechanical, electrical and civil engineering.

College of Engineering, Poona: structural and electrical engineering.

Government College of Technology, Coimbatore: heat engineering, hydraulic engineering, soil mechanics.

Indian Institute of Technology, Kharagpur: mechanical engineering.

Madras Institute of Technology, Madras: aeronautical and automobile engineering and soil mechanics.

Morvi Technical Institute, Morvi: wind power engineering.

University College of Science and Technology, University of Calcutta: heat and illumination engineering.

University of Roorkee, Roorkee: Civil, mechanical and electrical engineering.

Victoria Technical Institute, Bombay: Mechanical and electrical engineering.

A number of Ministries and Departments of the Government of India have development and research sections:

The Indian Agricultural Research Institute, New Delhi has a Division of Agricultural Engineering which is concerned with agricultural equipment.

The Ministry of Communications has a Research and Development Directorate in the Directorate-General of Civil Aviation which sees to the specifications, certification and manufacture of aircraft and aircraft material.

The Technological Development Wing of the Ministry of Heavy Industries offers advice on engineering equipment in general and more especially on machine tools and internal combustion engines.

The Central Board of Irrigation and Power conducts eleven research stations the chief of which are in Poona, Amritsar and Pondicherry (Madras State). The one at Khadakvasla near Poona is the most important. It conducts research in hydraulic engineering, soil mechanics, concrete materials and navigation.

The All India Radio has a research unit of its own in New Delhi.

The Railway Board has centres in Lucknow, Lonavla and Chittaranjan to investigate problems connected with railways.

Questions connected with roads, bridges, ports, harbours are taken up for investigation by the Roads Organization under the Ministry of Transport.

MEDICAL RESEARCH

Medical Research is conducted chiefly under the auspices of the Indian Council of Medical Research, New Delhi. The Council also grants research fellowships. There is a Scientific Advisory Board which deals with technical questions and publishes reports of research carried on at the centres under its charge.

The Council spent over Rs. 38 lakhs on research in 1956-57. In 1957-58 the expenditure was expected to exceed Rs. 50 lakhs.

The outstanding research institutions in medicine are:

The School of Tropical Medicine, Calcutta: diseases peculiar to tropical climate.

The All India Institute of Hygiene and Public Health, Calcutta: preventive and social medicine.

The Indian Cancer Research Centre, Bombay: cancer.

The Vallabhbhai Patel Chest Institute, Delhi: Tuberculosis.

The Central Leprosy Research Institute, Madras: leprosy.

The Haffkine Institute, Bombay: Plague, malaria, virus diseases, nutrition. It also manufactures vaccine and sera.

The Central Research Institute, Kasauli: microbiology, bio-chemistry, serology.

The Pasteur Institute, Conoor: Rabies, influenza, tropical eosinophilia, anti-venom serum, serological reactions.

The King Institute of Preventive Medicine, Guindy, Madras: vaccines, specially against small pox and therapeutic sera.

The Bengal Immunity Research Institute, Calcutta (Private): prevention, control and cure of disease, and anti-malarial drugs.

The Central Drug Research Laboratory, Calcutta: biological and chemical assays of drugs. It also gives technical advice to drug manufacturing firms.

The Drug Research Laboratory, Jammu: research in medicinal plants. Has two farms. Promotes standardization of indigenous drugs.

The Virus Research Centre, Poona: Virus-caused diseases.

The Indian Council of Medical Health initiates research in a large number of specific questions at medical colleges and hospitals in the country including the institutions mentioned above.

The questions are too technical to be mentioned here. But in general they relate to, in the 1957-58 series, besides clinical research covering a large area, haematology, cardio-vascular diseases and hypertension, liver diseases, cholera, leprosy, malaria, tuberculosis, venereal diseases, dental health, environmental sanitation and hygiene, industrial health, maternal and child health, mental health, nutrition, protein foods, human lactation, protein metabolism, energy metabolism, metabolism, nutritive value of certain food stuffs, food technology, growth and physical development of Indian infants, leishmaniasis, fluorosis, physiology and pharmacology, physiology of human reproduction, virus diseases.

RESEARCH IN HUMANITIES

Anjuman-i-Islam Urdu Research Institute, Hornby Road, Bombay 1; Anthropological Society of Bombay, C/o K. B. Cama Oriental Research Institute, 136 Apollo Street, Bombay; Bangiya Sahitya Parishad, 243-1 Upper Circular Road, Calcutta; Bhandarkar Oriental Research

Institute, Poona; Bharatiya Itihasa Samashodhaka Mandal, Sadashive Path, Poona; Bharatiya Vidya Bhawan, Chowpatty, Bombay; B. J. Institute of Learning and Research, Bhadra, Ahmedabad; B. M. Institute of Child Development, Pharmacy College, Navrangpura, Ahmedabad; Bureau of Psychology, Allahabad; D. A. Memorial Institute, C/o Bharatiya Itihasa Samashodhaka Mandal, Poona; Deccan College of Post-Graduate and Research Institute, Poona; Department of Anthropology, Indian Museum, 27 Chowringhee Road, Calcutta; Department of Archaeology, Ministry of Education, New Delhi; Department of Historical and Antiquarian Studies, Gauhati; Dharmakosha Mandal (Vedic Research Institute), C/o Prajna Pathshala, Wai, Dt. North Satara, Bombay; Gangadhar Jha Research Institute, Allahabad; Gokhale Institute of Politics and Economics, Poona; Gujarat Research Society, Bombay; Hindi Vidya Pith, Deoghar, Bihar; Indian Institute of Education, 11 Horniman Circle, Bombay; Indian Institute of Philosophy, Amalner, East Khandesh, Bombay; Kannada Research Institute, Dharwar; Karnatak Research Society, Dharwar; K. P. Jayaswal Research Institute, Patna; K. B. Cama Oriental Institute, 186 Apollo Street, Bombay; Kuppaswami Sastri Research Institute, Mysore, Madras; Mandir Vidya Pith, Bhagalpur, Bihar; Marathi Samashodhan Mandal, Mumbai Marathi Granth-sangrahalaya, Thakurdwar, Bombay; Mithila Institute of Post-Graduate Studies and Research in Sanskrit Learning, Darbhanga, Bihar; Nalanda Pali Institute, P.O. Nalanda, Patna; National Archives of India, Ministry of Education, New Delhi; Oriental Research Institute, Mysore; Rajasthan Vihara Vidya Peeth, Udaipur; Rajwade Samashodhan Mandal, Dhule, Bombay; Soindia Research Institute, Ujjain; Shri G. K. Institute of Rural Education, Gargoti, Kolhapur Dt., Bombay; Sheth Bholabhai Jeshingbhai Institute of Learning and Research, Bhadra, Ahmedabad; Shri Farbes Gujarati Sabha, Bombay; Tata Institute of Social Sciences, Chembur, Bombay; The Asiatic Society, 1 Park Street, Calcutta; Vachana Mantapa (Kannada Research Institute), Belgaum; Venkateswara Research Institute, Tirupati; Vaidika Samashodhana Mandal, Tilak Memorial, Poona; Vaisali Prakrit Institute, Muzaffarpur; Vishveshwarapand Vedic Research Institute, Hoshiarpur, Punjab.

INDIAN NATIONAL DOCUMENTATION CENTRE

The Indian National Documentation Centre fulfils an important role in research. This body was set up in 1962 with technical help from UNESCO, and is housed in the same building as the National Physical Laboratory at Hillside Road in New Delhi and is in the charge of the Director of the Laboratory.

The Documentation Centre receives and retains scientific periodicals required by research bodies in India.

It maintains an index of all journals received.

It supplies photostats and translations of articles required by research workers.

It supplies the rest of the world with information about scientific research done in India. It undertakes to answer queries on scientific questions.

The Centre has a catalogue of scientific journals and research institutions.

CIVIL AVIATION

ALLOTMENT under the Second Five-Year Plan, Rs. 48 crores.

Compensation to former air companies Rs. 6.16 crores.

Part of the compensation has been paid in cash, and the balance has been paid in the form of bonds redeemable at the end of five years.

The budget estimates for 1957-58 for the Civil Aviation Department were: Revenue Expenditure: Rs. 3.65 crores; Capital Expenditure: Rs. 2.67 crores; Revenue from landing, etc., at civil aerodromes: Rs. 81 lakhs.

India's air transport services were nationalised by an Act of Parliament called the Air Corporations Act, 1953 which received the President's assent on May 28, 1953. The Act came into force on August 1, 1953.

The internal air services and services to neighbouring countries are now managed by a corporation called Indian Airlines Corporation, and the external services by Air-India International Corporation. According to the Act the number of members of a Corporation cannot be less than five and not more than nine. Each of the Corporations has a general manager. In the case of Indian Airlines Corporation the Chairman exercises the functions of the General Manager also.

The Central Government has authority to give the Corporations directions about opening a new transport service, closing an existing service, or other changes in schedule. At the end of a financial year the Corporations must present a report to the Central Government which will be laid before Parliament.

Private agencies can use aircraft for purposes of instruction, rescue or relief, air survey, fire fighting, crop dusting, locust control or for providing joy rides.

An Air Transport Council has been established for discussing certain points of common interest to different departments.

An Advisory Committee for each Corporation was appointed in Feb. 1958.

A Labour Relations Committee for each Corporation consisting of representatives of the Corporation and of employees, was formed early in 1956. The Committee has been formed in such a way that the representatives of employees are not less than the representatives of the Corporation. This Committee will give advice to the Corporation on matters of labour.

In addition to the two Corporations, there were 12 flying clubs and six transport companies, the latter holding permits for non-scheduled services on June 30, 1957.

In February 1958 three major private airline operators formed one company for carrying on non-scheduled operations in India and abroad. These were Indanair Company (Private) Ltd., Bombay, Jamair Company (Private) Ltd., Calcutta, and Darbhanga Aviation, Calcutta.

The companies had a combined asset of over Rs. 30 lakhs with 15 aircraft, mostly Dakotas. They signed an agreement to operate as Kalinga Airways (Private) Ltd., New Delhi.

They will operate charter services, will lift freight from India and will also take over aircraft no longer required by the I.A.C.

On August 1, 1953 when the Indian Airlines Corporation started functioning, it took over all the services operated by the internal airlines in the country on that date.

The names of the then existing air companies taken over by the Indian Airlines Corporation as mentioned in the Act are:

The Air India Ltd.; The Air Services of India Ltd.; The Airways (India) Ltd.; The Bharat Airways Ltd.; The Deccan Airways Ltd.; The Himalayan Aviation Ltd.; The Indian National Airways Ltd.; The Kalinga Airlines.

The Air-India International Corporation took over the Air-India International Ltd.

* Now sold (April 1968).

INDIAN AIR LINES CORPORATION

(Thapar House, Janpath, New Delhi.)

INDIAN AIRLINES CORPORATION was formed on 1st August, 1953, as a State Corporation under the provisions of the Air Corporations Act, 1953.

The present fleet consists of 6 DC-4, 62 DC-3, 12 Vickers' Vikings and 8 DH Herons (Total: 88) operating a network of 22,700 route miles throughout India, Afghanistan, East and West Pakistan, Nepal, Burma and Ceylon.

In addition 10 Vickers' Viscounts are on order. The delivery of the first Viscount was taken on August 15, 1957 in England. Five more Viscounts were scheduled to be delivered by the end of 1957. The balance of five were to come by May, 1958.

The members of the Indian Airlines Corporation (Thapar House, New Delhi) are:

Shankar Prasad, I.C.S. (Chairman), J. B. D. Tata, M. L. Khaitan, Michael John, Air Marshal S. Mukerji, Commandant General M. J. B. Maneckji, S. Ratnam; B. R. Patel; Air Commodore P. C. Lal.

Secretary: Vacant.

The operations of the Corporation have been divided into three Areas, namely Delhi, Bombay and Calcutta. Each Area is under the charge of an Area Manager who is responsible to the Chairman for the proper administration and co-ordination between different departments in the Area. The Headquarters Office of the Corporation has, besides the Chairman, Departmental Heads.

The total number of staff employed by the Corporation is about 9,000 (out of which 274 are aircraft Captains).

The crew strength of the Indian Airlines Corporation is 221 Commanders and 113 Co-pilots.

The loss incurred by I.A.C. in 1956-57 was Rs. 108.79 lakhs as against Rs. 119.40 lakhs in 1955-56.

Capital: Rs. 9,66,49,671 (from Govt. of India: Rs. 7,03,15,000).

Revenue: Rs. 861.35 lakhs (night air mail service: Rs. 138 lakhs).

The following is the list of officers working at the Headquarters and areas of the Indian Airlines Corporation:—

Headquarters

Chairman, Shankar Prasad, I.C.S.
Financial Controller, J. S. Parakh.
Chief Traffic Manager, J. M. Gupta.
Engineering Manager, T. D. Kumar.
Chief Public Relations Officer, Someshwar Dayal.
Controller of Stores, C. L. Kejriwal.

Delhi Area

Area Manager, Jagdish Prasad.
Traffic Manager, H. B. Daruwalla.
Chief Engineer, B. S. Bahadur.
Operations Manager, Capt. Hulgol.
Chief Accounts Officer, R. S. Sandill.

Bombay Area

Area Manager, Capt. G. O. Arya.
Traffic Manager, S. C. Mukherji.
Chief Engineer, H. M. Kelawalla.
Operations Manager, D. A. Samant.
Chief Accounts Officer, M. V. Row.

Calcutta Area

Area Manager, J. M. Engineer.
Traffic Manager, V. N. Nayar.
Chief Engineer, Dr. H. M. Wadia.
Operations Manager, B. C. Patwardhan.
Chief Accounts Officer, S. C. Roy.

AIR-INDIA INTERNATIONAL

The members of the Air-India International Corporation (New India Assurance Bldg., Bombay 1) are:

J. R. D. Tata (Chairman), Shankar Prasad, I.C.S., K. C. Mahindra, Michael John, Air Marshal S. Mukerji, B. R. Patel, I.C.S. (Vice-Chairman), S. Ratnam; Commandant-Gen. M. J. B. Maneckji; Air Commodore P. C. Lal.

Principal Executives:

General Manager .. B. R. Patel, I.C.S.
Technical Director .. A. C. Gaudar.
Commercial Director .. S. K. Kooke.
Financial Controller .. N. J. Pavri.
Controller of Stores & Purchases .. A. M. Kelkar.
Chief Administrative Officer .. B. Doraiswamy, I.A.S.

Secretary .. R. N. Gundill.
Personnel Manager, .. A. S. Banavalikar.
Personnel: 3,846.

Unduplicated route mileage: 21,252.

Fleet: Three 749 Constellations.*

Two 1049-C Super Constellations.

Three 1049-E Super Constellations.

Three 1049-G Super Constellations.

One DC-3C Freighter.

Three 707 Boeing Aircraft on order.

The three Boeing 707 Inter-Continental Jet Airliners will be delivered early in 1960. The Inter-Continental Jet Airliners will not only reduce the present flying time by half, but will also offer greater seating capacity.

Plans are under way to enlarge and strengthen the run-ways at Palam, Santa Cruz and Dum Dum at a cost of Rs. 14 crores.

The Corporation has steadily stepped up its frequencies on the India/UK, India/Tokyo and India/Nairobi routes. Air-India International now operates a daily service to U.K., twice a week to Tokyo, thrice a week to Nairobi and once a week to Sydney via Madras, Singapore and Darwin.

Traffic Headquarters: 4th Floor, Bank of India Building, Mahatma Gandhi Road, Fort, Bombay-1. Cable: AIRINDIA.

Net profit for the year ending March 31, 1957: Rs. 38.43 lakhs.

Revenue: Rs. 964.88 lakhs.

FACTS AND FIGURES, I.A.C. (1956-57)

Some basic facts about the Indian Airlines Corporation for 1957 are as follows:

Service	Route Miles	Hours Flown	Miles Flown	Passengers Carried	Freight Carried lbs.	Mail Carried lbs.
Scheduled Services (Including N.A.S.)	—	113180-35	17,603,346	499,321	89,117,523	11,628,383
Night Airmail Services	—	9491-50	1,661,554	44,693	2,674,235	8,861,912
Non-Scheduled Rev. Services	—	10970-55	1,598,557	71,785	23,315,223	68,106

AIRCRAFT

There were 527 aircraft of different types stationed in India on 1st Sept. 1957 of which 381 held current Certificates of Airworthiness.

As already mentioned, of the 527 aircraft 12 were owned by Air-India International and 88 by Indian Airlines Corporation.

AERODROMES

There were 84 aerodromes maintained and operated by the Civil Aviation Department in Sept. 1957.

The following aerodromes (3) are classed as International Aerodromes:

Bombay Airport (Santa Cruz); Calcutta Airport (Dum Dum); Delhi Airport (Palam).

The following aerodromes (8) are classed as Major Aerodromes:

Agartala (Tripura); Ahmedabad; Begumpet (Hyderabad); Delhi (Safdarjung); Gauhati; Madras (St Thomas Mt.); Nagpur; Tiruchirappalli.

The following aerodromes (38) are classed as Intermediate Aerodromes:

Allahabad, Amritsar, Aurangabad (Bombay); Bagdogra (West Bengal); Balurghat (West Bengal); Banaras; Baroda; Belgum; Bhavnagar; Bhopal; Bhuj (Kutch); Bombay (Juhu)*; Bhandigarh, Coimbatore, Cooch-Bihar, Cuttack (Bhubaneswar)*, Gaya, Gorakhpur (Kumil)*, Indore, Jaipur, Junagadh (Keshod)*, Kailashar (Tripura), Kamalpur (Tripura), Khowal (Fipura), Kumbhirgram (Assam), Lucknow (Amaus)*, Mangalore (Bajpe)*, Mohanbari (Assam); North Lakhimpur (Lilabari)*, Patna (N.E.F.A.), Patna, Portbandar (Bombay), Rajkot; Rupai (Assam), Tezpur (Assam), Tivandrum, Vijayawada, Vishakapatnam.

The following aerodromes (35) are classed as Minor Aerodromes:

Akola; Asansol; Bareilly; Belonia (Assam); Bhespur; Chakulia (Bihar); Cuddappah (Andhra); Donakonda (Andhra); Jhansi; Jharsuguda (Orissa); Jubbulpore; Kanpur (Civil) (Uttar Pradesh); Khandwa; Kolhapur; Kotah (Rajasthan); Lalitpur (U.P.); Madura; Manipur Road (Assam); Muzaffarpur (Bihar)*; Mysore; Palampur (Deesa) (Bombay); Panagarh (W. Bengal); Panna (M.P.); Raipur; Rajahmundry; Ramnagar; Ranchi; Ratna (M.P.); Saharanpur (U.P.); Sheila (Assam); Sholapur; Tanjore; Udaipur; Vellore; Warangal.

The new aerodromes at Kandla and Udaipur (Dabok) are expected to be ready by the end of 1957. The work in connection with the construction of new aerodromes at Baxaul, Joghani (Bihar), Haldwani (U.P.), Tulihal (Manipur) and Malka (West Bengal), was in various stages of progress in Nov. 1957.

Eight new aerodromes are to be constructed during the Second Plan; at Calcutta, Hubli, Bihlong, Nowgong, Ratnagiri, Bhagalpur, Sehala (W. Bengal), Koshikode.

AIR TRAINING

There were 12 flying clubs centrally subsidized and two satellite centres at the end of 1956—Delhi, Bombay, Madras, Barrackpore, Patna, Bhubaneswar, Nagpur, Jullundur, Jaipur, Lucknow (with satellites at Allahabad and Kanpur), Bangalore, Indore.

These flying clubs trained 131 'A' and 16 'B' pilots in 1956. On 31st Dec. 1956 there were 335 trainees for 'A' Licence and 6 for 'B' undergoing training.

The number of aircraft on charge on July 1, 1957 was 125, 28 belonged to the Government and 97 to the clubs.

The number of pilots employed was 43, aircraft maintenance engineers 41, mechanics 152.

The aircraft flew 1,744 10 hours in June 1957.

There were three Government Gliding Centres at Poona, Allahabad and Bangalore and one centrally subsidized Gliding Club at Delhi in

operation at the close of 1956. These centres and the Club trained 87 Gliding Pilots during the year ending 30th June 1957.

The number of gliders on charge on July 1, 1957 was 28, all of which belonged to the Government of India.

The total subsidy granted to flying and gliding clubs in 1956-57 was Rs. 16,90,230. Under the free flying scholarship scheme 50 scholarships were awarded to trainees at flying clubs during 1956-57. Training was imparted upto 50 hours free of cost to the trainees. Another 50 scholarships were awarded during 1957-58.

The Civil Aviation Training Centre at Allahabad opened in 1948 trains commercial pilots, II class navigators, aircraft maintenance engineers, aerodrome control officers and operators, fire operators, radio operators and technicians.

Facilities for training in flying, aircraft engineering, communications and air traffic control available at the Civil Aviation Training Centre, Allahabad comprise the following four wings, viz:—

(1) Flying School; (2) Aerodrome Training School; (3) Engineering School; (4) Communications School.

In addition a Repair and Overhaul Organisation is also attached to the Centre for carrying out repairs and overhaul of the Centre's aircraft.

At the end of 1956, 107 trainees were under training at the Centre.

The Centre has acquired the reputation of being the best of its kind in the East.

The Government of India have set up a school of aviation medicine in the premises of the Hindustan Aircraft Ltd., Bangalore.

TELECOMMUNICATIONS

The aeronautical telecommunication service of the Civil Aviation Department came into existence in 1946. At the end of 1956 there were 72 stations.

The aeronautical communication stations provide facilities for air/ground communication, radio aid to navigation, point to point communications and Met broadcasts for the benefit of aviators.

The facilities include up-to-date radio navigational aids and communication facilities, electronic aids, such as very high frequency automatic visual direction finder, standard instrument landing system, airfield control radar, radar responder equipment of the Eureka Mark VII type, long range high frequency radiotelephone air/ground channels, radio-tele-typewriter fixed telecommunication circuits and multi-channel automatic speech recorders.

For purposes of organization, India has been divided into four regions (Bombay, Calcutta, Delhi, Madras), each under the charge of a Controller of Communication, who is responsible for the maintenance and operation of the communication stations in his region.

The communication organization has the following ancillary units:—

The Radio Construction Unit; The Radio Development Unit; The Radio Stores Depot.

Research and development for civil aviation is undertaken by The Research and Development Organization of the Civil Aviation Department.

The work of the R. & D. Organization is in New Delhi at a research and test laboratory, known as the Technical Centre, opened in 1949. The Centre is being staffed and equipped in gradual stages in order to realize the objectives of the Organization.

The principal objectives of the Research and Development Organization are as follows:—

1. Participation in design and development work on gliders, sailplanes and light trainer aircraft.

2. Operational research with particular reference to Indian conditions and the development of safety devices.

3. Research on problems of airworthiness and safety in operation; examination of prototype civil aircraft for airworthiness and for their type certification.

4. Structural testing and research relating to major modifications, repair and construction of aircraft.

5. Development of aircraft materials of indigenous origin; preparation of standard specifications for these materials in co-operation with the Indian Standards Institution.

6. Study of current developments in aviation technology with special reference to new types of civil aircraft and engines and new operational techniques.

7. Encouragement and promotion of fundamental research and advanced scientific and engineering training in aeronautics, and advice on advanced education in aeronautical engineering.

8. Co-operation with international scientific bodies, in initiating research on various aeronautical subjects.

The need for aircraft manufacturing was keenly felt immediately on the outbreak of the war and the Hindustan Aircraft Company was established in the year 1940. Aircraft, aero-materials, accessories and parts are now being manufactured in the country.

India is a member of the International Civil Aviation Organization and has been elected to its Council.

AIR AGREEMENTS

India has entered into bilateral air agreements with the following 14 countries on the dates shown against each:—

France	16-7-1947
Sweden	21-5-1948
Pakistan	23-6-1948
Ceylon	21-12-1948
Switzerland	24-6-1949
Australia	11-7-1949
The Philippines	20-10-1949
Netherlands	24-6-1951
U.K.	1-12-1951
Afghanistan	26-1-1952
Egypt	14-6-1952
Iraq	27-7-1955
Japan	26-11-1955
U.S.A.	3-2-1956
Thailand	12-6-1956
Lebanon	13-3-1958

The Agreement with Sweden is not operative at present.

Arrangements under temporary authorizations for the operation of scheduled air services exist with Italy, Burma, Norway, Denmark, Iran, Sweden, Nepal, Indonesia and West Germany.

An air agreement with the U.S.S.R. was under negotiation in Feb. 1958.

NATIONALIZATION

Authorized capital of the companies taken over	Rs. 21,40,71,429
Paid-up Capital	Rs. 6,97,33,549
Total staff	9,500

Govt. loan to Deccan Airways at 4½ per cent interest .. Rs. 10.5 lakhs

"The Indian Airlines were nationalised on 1st Aug. 1953. Two Corporations viz Indian Airlines Corporation and Air-India-International Corporation were formed—one for operating the internal services and services to the neighbouring countries, and the other for operating long-range international services.

The compensation payable to the Air Companies taken over by the two Corporations was of the order of Rs. 618 lakhs. Part of the compensation was paid to the companies in cash and the balance in the form of bonds redeemable at the end of five years.

Fares at present obtaining in India, even for day services, are among the lowest in the world.

* Name of aerodrome or location.

JANUARY TO JUNE 1957—A REVIEW

The Air-India International and the Indian Airlines Corporation between them carried 309,048 passengers and flew 11,587,929 miles during the half year ending on June 30, 1957.

Air-India International alone flew on its scheduled services 8,081,556 miles carrying 41,582 passengers, 1,773,024 lbs. of cargo and 732,836 lbs. of mail during the first half of 1957, as against 2,933,400 miles flown, 39,074 passengers and 1,593,575 lbs. of cargo and 672,110 lbs. of mail carried during the preceding six months.

During the period under review, Indian Airlines Corporation flew 8,506,373 miles, carrying 267,466 passengers, 49,612,080 lbs. of cargo and 5,748,104 lbs. of mail. The respective figures for the preceding six months were 8,929,211 miles, 242,602 passengers, 47,077,105 lbs. of cargo and 5,021,985 lbs. of mail.

During this period, the Night Airmail Services carried 31,967 passengers, 1,406,529 lbs. of cargo and 2,113,967 lbs. of mail.

On non-scheduled services operated by Indian air-carriers, 3,146,580 miles were flown and 74,728 passengers and 56,826,083 lbs. of cargo were carried during the half year ending June 30, 1957.

The number of aircraft holding current Certificates of Registration at the end of June 1957,

was 553, of which 199 held current Certificates of Airworthiness.

The number of persons holding current Pilot's 'A' licences increased from 528 at the end of December, 1956, to 715 at the end of June, 1957. There was, however, no change in the number of 'B' pilots holding current licences which stood at 586.

The number of Aircraft Maintenance Engineers holding Indian licences increased from 870 in December, 1956, to 908 in June 1957.

During the period under review, the number of Aeronautical Tele-Communication stations, communication facilities and Radio Navigational Aids increased from 72, 408 and 134 to 73, 432, and 137, respectively.

There were sixteen major accidents to Indian registered aircraft during the period under review. In addition, three Gliders were also involved in accidents.

None of the accidents related to aircraft engaged in scheduled operations.

Four of the accidents proved fatal and resulted in the loss of eight lives (five crew and three others). There was no fatal accident involving a glider. Eleven of the aircraft involved in major accidents were engaged on instructional flights,

two in non-scheduled freighter service, one in non-scheduled passenger flight and the remaining two on private flights.

At the Civil Aviation Training Centre, Allahabad, 21 trainees completed the Dakota Conversion Course, two All-through Flying Course, eight Second Class Navigator's Course, ten Aerodrome Officers' Refresher Course, 46 Aerodrome Operators' Course, 25 Crash Fire Rescue Course, 26 Radio Technicians Advanced Refresher Course, 18 Specialist Course and 17 Radio Operators long-range course. Three Nepalese nationals were provided training at the Centre under the Colombo Plan. At the end of June, 1957, there were 182 trainees undergoing training in the various courses at the Centre.

One hundred and forty-one trainees obtained Pilots 'A' licences and 28 pilots 'B' licences through the twelve Flying Clubs in the country during the period under review. The clubs logged a total of 12,809 hours of flying.

In addition, the three departmentally run Gliding Centres at Poona, Allahabad and Bangalore and the Delhi Gliding Club trained 31 Glider pilots and logged 719 hours of flying.

In order to promote air-mindedness among the youth of the country, it was decided to award 50 Free Flying Training Scholarships during the first half of 1957.

PORTS

ALLOTMENT under First Five-Year Plan... major ports: Rs. 43.35 crores; minor: Rs. 2.41 crores.

Allotment under the Second Plan: major ports: Rs. 43.5 crores; minor ports: Rs. 5.36 crores.

There are six major ports in India.

For the rest, the ports declared open under the Ports Act are as follows. The figures in brackets give the number of working ports.

Andhra 13 (6); Orissa 9 (3); Madras 20 (14); Kerala 23 (11); Mysore 23 (10); Bombay 138 (approx. 111); Total 228 (approx. 150).

The following are classed as major ports: Bombay, Calcutta, Cochin, Madras, Kandla, Vishakhapatnam and Karwar. They are directly under the Central Government. The rest are classed as Minor Ports and are under the administrative control of State Governments.

Technically a Major Port (as defined by the Ports Technical Committee) is one which is capable of taking in ocean-going steamers with a registered tonnage of 4,000 or more and berth them along wharves.

Mr. S. Nanjundiah, officer in charge of Vishakhapatnam Port, who made a special survey of minor ports for the Government of India suggested the following further classification of Minor Ports: Intermediate Ports, Minor Ports and Sub-Ports. Ports which have handled one lakh tons or more of cargo should be Intermediate Ports; ports which have handled cargo of less than one lakh but more than 1,500 tons should be Minor Ports; the remaining ports should be Sub-Ports or Petty Ports.

INTERMEDIATE AND MINOR PORTS

According to this classification of Mr. Nanjundiah the Intermediate Ports will be as follows:

In Andhra: Kakinada, Masulipatnam.

In Madras: Cuddalore, Nagapattinam, Tuticorin.

In Kerala: Kozhikode, Alleppey.

In Bombay: Okha, Broach, Ratnagiri, Bhavnagar, Veraval, Porbunder, Bedi, Navalakhli, Mandvi.

In Mysore: Karwar.

The Minor Ports will be as follows:—

In Orissa: Chandball, Puri, Gopalpur.

In Andhra: Bhimilpatnam.

In Madras: Calingsapatnam, Porto Novo, Pamban, Dhannakkudi.

In Kerala: Quilon, Cannanore, Tellicherry, Badagara, Ponnani, Kasargod.

In Mysore: Malpe, Hungarkatta, Coondapur, Tadri, Ankola, Honavar, Bhatkal, Kumta, Belikeri.

In Bombay: Gogha, Dholera, Kavi, Surat, Bulsar, Bhimora, Navsari, Dahann, Umbergaon, Rameta, Vasawa, Ravandanda, Bankot, Dhabhol, Devghad, Jaigad, Mora, Achra, Venguria, Vijaydurg, Jaitapur, Malvan, Dwarka, Kodinar, Cambay, Nanganon, Rajpuri, Harnal, Dehej, Kalyan, Panvel, Karanja, Murud, Sadashivghad, Mahuva, Talaja, Vitor, Jaffarabad, Silka, Sahaya, Jodiyra, Nawabunder, Mangrol, Mundra.

With a view to advising the Govt. on matters of general policy relating to port management and development including their effects on industry, commerce, shipping, railways, etc. so as to ensure integrated consideration of all port matters, in August, 1950, the Govt. of India constituted the National Harbour Board under chairmanship of the Minister of Transport. The Board is represented by the Central Ministries concerned, the maritime State Govts., Major Port Authorities and a representative each of the following non-official bodies:—Trade & Industry, Sailing Vessels Industry, Shipping and Labour.

As most of the minor ports were in a deteriorating condition during the British regime, the Board at its very first meeting in 1950, recommended the appointment of an officer to carry out a survey of the minor ports and to recommend

measures to improve them. In pursuance thereof the Govt. appointed Mr. S. Nanjundiah, Port Administrative Officer, Visakhapatnam Port, as Officer on Special Duty, who after an on the spot study of the various minor ports, recommended certain essential improvements costing in all about Rs. 2.5 crores.

The maritime State Govts. accepted the necessity for effecting improvements on the lines recommended by Mr. Nanjundiah and included development schemes relating to minor ports in their respective jurisdictions in the First Five-Year Plan. As the State Govts. did not find it possible to finance all the works from their Port Funds, and as the Govt. of India was interested in ensuring the co-ordinated development of these ports, it was decided to give central assistance to the State Govts. in the form of loans on concessional terms to the extent of Rs. 1 crore for this purpose. As some of the works were not completed during the First Plan period, the actual amount of loan utilised was only Rs. 67.24 lakhs.

A more careful study was undertaken of the requirements of minor ports in the Second Plan period and a provision of Rs. 5.36 crores has been made in the Plan for this purpose. The Central assistance started in the First Plan period is also being continued under the Second Plan. Okha, Bhavnagar, Navlakhi, Mangalore, Nagapattinam, Cuddalore, Kakinada, Masulipatnam, Quilon, Badagara and Paradip are some of the more important ports covered by the programme of development. The construction of a new pier at Pondicherry estimated to cost Rs. 36.75 lakhs has also been undertaken by the Central Government.

PORT DEVELOPMENT

Among the recommendations of the Nanjundiah report (May 1951), are the following: 1. The existing Minor Ports should be classified into Intermediate, Minor and Sub-Ports. 2. An early decision should be taken about the construction and use of small size steam ships for the coastal trade. 3. Country craft industry must be fostered. Ports should provide facilities for their laying up, repairs, etc. 4. A certain measure of uniformity in Port dues may be brought about.

Among the recommendations of the West Coast Major Port Development Committee (April 1948) are the following: 1. There is an immediate need for a major port in the area covered by Kathiawad and Kutch. 2. This major port should be at Kandla. 3. The existing ports in Kathiawad should be placed under one Port Commission.

Among the recommendations of the same Committee (July 1949) about a major port between Marmugao and Cochin are the following: 1. A deep-sea port for ships of large size and tonnage at all seasons of the year is necessary. 2. The port should be at Malpe. 3. A rail link should be provided from Malpe to the industrialized region centred on Bhadravati in Mysore. 4. The broad-gauge railway linking Madras and Mangalore should be extended to Malpe.

The Kandla port was expected to be completed by the beginning of 1957.†

FIVE-YEAR PLANS

Major Ports, First Plan: The Development programme in the First Plan, besides the various works designed to replace obsolete equipment, improve worn-out facilities, housing etc. included the following additions:—

Calcutta: Remodelling of 4 berths in the King George's Docks (2 for general cargo, one for black oil and one mechanical ore berth); A heavy lift yard with a 200 ton crane; River training works designed to improve navigation depths, purchase of tugs, launches, dredgers and other harbour craft; A new suction dredger with dredging capacity of 5,000 tons per hour.

Bombay: Reconstruction of 12 transit sheds destroyed in the 1944 explosions; New Marine Oil Terminal with 8 berths; 34 electric wharf cranes in Alexandra Docks.

Madras: 8 additional berths (1 for coal, 1 for ores and 1 passenger-cum-general cargo).

Vishakhapatnam: A new oil terminal with 2 berths and widening and deepening of the entrance channel.

Cochin: 4 new berths;

Kandla: A new major port to be developed. The abovementioned works could not be completed during the First Plan period with the result that there was a carry over of Rs. 97 crores to the Second Plan.

Second Plan: Besides the completion of the above projects, the Second Plan comprises, among others, the following works:—

Calcutta: A new general cargo berth at King George's Docks; A new tea warehouse; A new bucket dredger, 100 ton floating crane, salvage tug and despatch vessel and other floating craft totalling Rs. 4.8 crores; Remodelling of the Port Commissioners' Railway.

Bombay: Provision of 54 more electric cranes in Alexandra Dock; A new grab dredger; Dredging of the main harbour channel; A new 125 ton floating crane.

Madras: A new wet dock for 6 berths; A new dredger; Mechanical handling of coal and ore.

Vishakhapatnam: 2 new berths (later revised to 5)—3 for general cargo and 2 for ores.

Kandla: 2 additional berths for ore traffic.

Cochin: 1 floating crane; 1 dredger.

The total estimated cost of the development works in the Second Plan was Rs. 79.9 crores, of which central assistance will be restricted to Rs. 43.5 crores. Rising costs and certain alterations and additions which have been found necessary will increase the total cost of the schemes to Rs. 95 crores.

The more important schemes already completed or nearing completion are the construction of four berths and allied works at Kandla, the Marine Oil Terminals at Bombay and Vishakhapatnam, reconstruction of 12 transit sheds in Bombay, installation of 34 electric wharf cranes in Alexandra Docks, Bombay, an oil tanker berth with pipeline connections in Cochin and the erection of a coal loading plant and construction of a heavy lift yard with a 200 ton crane in Calcutta.

The actual traffic handled by the Major Ports during 1956-57 was 27.6 million tons.

LIGHTHOUSES

Lighthouses are divided into general and local according to the utility of a particular lighthouse to navigation. The superintendence and management of general lighthouses is vested in the Union Government while the local lighthouses are managed by local lighthouse authorities such as State Governments, Port Trusts, etc.

A statutory body—the Central Advisory Committee for Lighthouses has been appointed under the Indian Lighthouses Act, which advises the Union Government on matters connected with the erection, additions, alterations, improvements etc. of lighthouses. The Chairman of the Committee is the Secretary to the Government of India, Ministry of Transport or the officer deputed by him to act as Chairman on his behalf. The members are: The Director-General of Shipping, Bombay (ex-officio); Nautical Adviser to the Government of India (ex-officio); A representative of the Ministry of Finance, Government of India; A Deputy Secretary to the Government of India, Ministry of Transport (ex-officio); G. T. Kamdar, representative of the Federation of Indian Chambers

* Both the recommendations have now been put through.

† Now almost completed.

of Commerce and Industry; J. B. Galloway, representative of Associated Chambers of Commerce; T. M. Goudas, nominated by Government to represent Indian Shipping Interests; B. P. Singh Roy, representative of Indian National Steamship Owners' Association; Jaidu Manikyal Rao, Government nominee representing Indian Sailing Vessels' interest; Director-General of Lighthouses and Lightships, New Delhi (*ex-officio*), Member Secretary.

There are 183 lighthouses, 9 lightvessels, 101 lightbuoys, 282 unlighted buoys, 190 beacons, 299 land marks and 713 other marks, making a total of 1,777 aids to navigation strewn over the coastline of approximated 4,340 miles including Andaman Island. 35 lighthouses were erected/improved during the First Five-Year plan period. The Second Five-Year Plan envisages the improvement of aids to navigation at an estimated cost of Rs. 400 lakhs. A summary of the programme under the Second Five-Year Plan is given below:—Construction of lighthouses, towers, buildings and jetties, 100 nos.; Purchase and installation of optical equipment apparatus and machinery, 100 nos.; Establishment of M.F. and V.H.F. Radio Station, 35 nos.; Establishment of Decca Navigator Stations, 8 nos.; Purchase and installation of harbour and ship borne Radars, 15 nos.; Installation of sound signals, 50 nos.; Purchase and installation of electric power generator equipment and machinery, 75 nos.; Purchase and establishment of lightships, 10 nos.; Purchase of ships, tenders, lifeboats, motor launches, etc., 35 nos.; Purchase and establishment of buoys and other floating aids, 150 nos.

During the year 1956-57, 11 new lighthouses and 21 lightbuoys have been established and improvements were effected to 9 lighthouses. Of these, the new lighthouse at Dolphin's Nose (Andhra State) with a beam intensity of over 5,000,000 candles and range of 35 miles, started functioning with effect from the 15th June 1957. This is one of the most powerful lighthouses in the world. Electric power to this lighthouse is being supplied by five generators installed at the station. The new lighthouse at Pentakotta (Andhra State), with a range of 10 miles started functioning with effect from 1st June 1957. The lighthouses at Bhatkal (Mysore State) and Puri (Orissa State) have been improved. A new lighthouse with a beam intensity of 2,17,000 candles and a range of 20 miles, installed on a new lighthouse tower, started functioning at Bhatkal with effect from 11th June 1956. A new lighthouse with electric source and having a range of 14 miles, was put into service at Puri with effect from 1st December 1956.

Some of the new and important lighthouses, the construction of which is now in progress are those at Uttan, Deograh, Tolkeswar, Rajapur, Tarapore, Gogha, Tapli, Mandvi, Diu Head and Jaffarabad in Bombay State, Vakalapudi in Andhra State, Alleppey and Kollthottam in Kerala State and False Point in Orissa State.

The Department of Lighthouses & Lightships, is maintained on a self-supporting basis and its revenue is derived from the light dues levied on ships visiting Indian ports. The entire revenue is utilized for the maintenance and development of lighthouses and any balance left is accumulated in a reserve fund known as the General Reserve Fund for financing the projects in future. The balance in the General Reserve Fund stood at Rs. 94 lakhs on 1st April 1957. The present rate of lightdues is four annas per ton on steamships and one anna per ton on sailing ships.

This Department is also responsible for the administration of the Fairways Act.

The Quilon lighthouse, has a beam intensity of 1,000,000 candles and a range of 15 to 20 miles. The 200,000 candle earlier nineteenth century lighthouse at Quilon has been stepped up to 1,000,000 candles by making use of a new electricity process evolved by the Union Lightship Department. By utilizing the process, a saving of about Rs. 3 lakhs is expected to be effected.

BOMBAY

The Port of Bombay is over 25 square miles in extent.

The Bombay Port Trust, which was constituted by Government in 1878, is administered by a Chairman appointed by Government and a Board of 24 Trustees, 10 of whom are nominated by Government, 2 elected by the Bombay Chamber of Commerce, 6 by the Indian Merchants' Chamber, 1 by the Maharashtra Chamber of Commerce, 2 by the Municipal Corporation, 1 by the Millowners' Association, 1 by the Indian National Steamship Owners' Association, Bombay, and 1 by the East India Cotton Association Limited, Bombay.

The entire administration is subject to the provisions of the Bombay Port Trust Act, 1879.

The main channel, which is approximately 1½ miles in width, has silted recently and the controlling depth is now 28 feet.

Anchorage in the harbour with a depth of up to 34 feet below chart datum can be obtained.

Mean range at springs is 12 feet.

Passenger Facilities.—Trans-oceanic passenger traffic is mostly dealt with at the Ballard Pier Station. Coastal and Harbour Passenger traffic is dealt with at the New Ferry Wharf.

The total number of overseas passengers embarking and disembarking at Bombay in 1956-57 was 146,546 while the number of passengers carried by the coastal services was 767,903.

Wet Docks.—There are three wet docks, the main features of which are as follows:—

Number of Berths (excluding Harbour Walls).

Prince's Dock ..	12
Victoria Dock ..	18
Alexandra Dock ..	17

The three Docks together have a water area of 104½ acres and about 4½ lineal miles of quayage; extensive open storage and shed and warehouse accommodation for the reception and storage of goods, exists.

Dry Docks.—The dimensions of the two Dry Docks are as follows:—

Dry Docks	Length—(1) Caisson in Inner Groove, (2) Caisson in Outer Groove.	Width at entrance.	Normal minimum depth of water over sill.
Merewether Dock.	(1) 500'-0" (2) 525'-0"	65'-6"	22'-0"
Hughes Dock.	1000'-0" (divisible into two compartments of varying lengths)	100'-0"	33'-0"

The Bunders.—Besides the wet docks described above, there are along the harbour front a number of 'bunders' or open wharves and basins where the traffic carried by sailing vessels is handled. These bunders, which provide an aggregate quayage of 41,000 lineal feet, are equipped with cranes and other facilities for loading, unloading and storing cargo. The extensive **TIMBER PONDS** at Sewri, covering an area of over 60 acres, form an important feature of the bunders. The total cargo handled at the bunders amounted to about 6.58 million tons during 1956-57.

Ballard Pier.—Is a 1,500 ft. extension of the harbour wall on the west side of the Alexandra Dock entrance lock and is the arrival and departure berth for the foreign mail steamers and other large passenger liners. The station building comprises three platforms for tourist and other trains, a handsome concourse with waiting and refreshment rooms and a spacious baggage and customs hall.

Bulk Oil Facilities.—Till recently the dangerous petroleum imported at Bombay was

all handled at the Pir Pau Oil Berth. Non-dangerous petroleum was also handled at the Alexandra Dock Harbour Wall Berths. With the installation of two Oil refineries at Bombay, these facilities became inadequate and a New Marine Oil Terminal equipped with all modern facilities for the speedy discharge and loading of oil is under construction within the Bombay Harbour. The new terminal is expected to meet the requirements of the bulk oil trade at this port for many years to come.

The Depots.—The more important depots are:

Grain Depot. containing over a million square feet of shed accommodation and about 90,000 square feet of plinth area, is designed primarily for the storage of grain and seeds in bags.

Cotton Depot. is one of the largest and most up-to-date Depots of its kind in existence, and covers an area of 432,500 square yards of reclaimed land on which the Port Trust has erected 178 fireproof ferro-concrete godowns equipped with sprinkler protection, 16 open sheds on plinths and 225 open plinths.

It has 16 covered platforms and 4 open plinths for Railway reception and despatch, and a Railway Yard with 8 miles of track. There are within the Depot a Fire Brigade Salvage Corps Station, Dispensary, Canteen, Grain Shop and other facilities for the Trade.

Manganese Ore Depot. provides open storage accommodation of about 70,000 sq. yds. in 32 plots each fully equipped with Railway Sidings. The Depot has a weighbridge.

There are also special depots for coal, charcoal, iron, timber and other building materials, etc. several of which not only have railway facilities but also wharf fronts.

In addition, there are several large warehouses and godowns in the vicinity of the docks available for renting out for storage of grain, tobacco and other trade purposes, the largest of these godowns is the **RYAN GRAIN MARKET** providing storage accommodation of 225,000 sq. feet.

Port Trust Railway

The Port maintains its own railway system which handles more than 59 per cent of the railborne goods traffic of Bombay. The traffic to and from the trunk railways during the year 1956-57 amounted to 3,474,000 tons, and its local station-to-station traffic is about 3,47,900 tons. The principal commodities carried are cotton, grain and seeds, oil-cake, manganese ore, sugar, kerosene and other bulk oils, coal, charcoal and china clay.

Though only 7.755 miles in actual length, it comprises over 134 miles of main lines and sidings all directly linked with the inter-railway exchange yard at Wadala, the various storage depots and the docks and wharves.

REVENUE AND EXPENDITURE FOR THE YEAR 1956-57

Revenue ..	Rs. 11,27,20,998	Total of general and pilotage accounts only.
Expenditure ..	8,87,32,636	

Statistics showing the number of vessels (exclusive of ferry steamers) which entered the docks and went alongside Harbour Walls or Pir Pau Oil Pier during the period 1952-53 to 1956-57 are given in the table below:

Year	Number	Net registered Tonnage
1952-53 ..	2,561	8,446,533
1953-54 ..	2,663	8,720,375
1954-55 ..	2,534	8,875,811
1955-56 ..	2,528	9,342,179
1956-57 ..	2,667	9,556,633

The number of passengers excluding those handled by country craft and harbour ferries was 914,449.

Board of Trustees (1957-58)

Nominated by Government: Chairman, L. T. Gholap, I.C.S., K. D. Billimoria, I.P., A. V. Venkateswaran, M. N. Chakravarti, M. Ganapati.

V. L. Gidwani, I.C.S., Brig. M. M. Badshah, Commodore B. S. Soman, I.N., S. V. Kailasapathy, H. N. Trivedi, G. H. Kale.

Elected by the Bombay Chamber of Commerce: S. M. Scott; E. A. Jenkins.

Elected by the Indian Merchants' Chamber, Bombay: B. D. Soman, Devji Rattansey, Ambalal Kilachand, Gordhandas Jadavji, Mathradas Haridas, C. H. Bhabha.

Elected by the East India Cotton Association Ltd., Bombay: Madanmohan R. Rula.

Elected by the Indian National Steamship Owners' Association, Bombay: H. M. Desai.

Elected by the Maharashtra Chamber of Commerce, Bombay: K. V. Apte.

Elected by the Municipal Corporation of Greater Bombay: Dr. S. G. Patel, E. S. Pandey.

Elected by the Millowners' Association, Bombay: Sir Vithal Chandavarkar, Kt.

PRINCIPAL OFFICERS

Secretary, E. H. Simcoe.

Chief Accountant, I. B. Das Gupta.

Chief Engineer, S. B. Dalal.

Deputy Chief Engineer, K. G. Sarma.

Docks Manager, V. Vas.

Add. Docks Manager, A. M. Shalkh.

Railway Manager, J. N. Adagga.

Deputy Conservator, W. E. Brown.

Harbour Master, H. Lloyd Jones.

Estate Manager, N. D. Baria.

Controller of Stores, P. V. Thadani.

Chief Medical Officer, Dr. N. V. Nene.

Chief Labour Officer, Batuk H. Mehta.

Legal Adviser, S. D. Nariman.

STATISTICS SHOWING CARGO HANDLED AT THE DOCKS AND BUNDERS DURING THE PERIOD 1952-53 to 1956-57

Year	Imports			Exports			Total		
	Tons			Tons			Tons		
1952-53	4,965,000	1,943,000	6,908,000
1953-54	4,775,000	1,951,000	6,727,000
1954-55	5,630,000	1,954,000	7,584,000
1955-56	6,707,000	3,599,000	10,306,000
1956-57	8,239,000	3,740,000	11,979,000

CALCUTTA

The Port of Calcutta is situated on the left bank of the River Hooghly which is formed by the uniting of the three off-takes from the parent river Ganges. The port is about 80 miles from the mouth of the river and 126 miles from

the Western Channel Light Vessel at Sandheads. The Port is administered by a Port Commission with jurisdiction under the Calcutta Port Act from Budge Budge to Konnagar.

The chief exports from Calcutta are coal, tea, jute, gunnies, bone and bone-meal, skins, hemp,

iron and steel manufactures, lac oil other than petroleum, scrap, ores, pig iron, hides and mica. The principal imports are salt, foodgrains and flour, machinery, petroleum, iron and steel, metals other than iron and steel, lubricating oil, cement, rubber, chemical products, soda, sugar, timber, tobacco, paint, varnish, etc.

STATISTICS SHOWING CARGO HANDLED BY CALCUTTA, THE NUMBER OF PASSENGERS EMBARKED AND DISEMBARKED AND THE RECEIPTS AND EXPENDITURE, DURING THE PERIOD 1953-54 to 1956-57:

Year	Imports Tonnage	Exports Tonnage	Total Tonnage	Passengers Embarked	Passengers Disembarked	Revenue Income Rs. in lakhs	Expenditure Rs. in lakhs
1953-54	2,723,062	5,336,037	8,059,099	15,710	16,299	818	900
1954-55	3,240,436	4,573,377	7,813,813	11,854	11,673	883	921
1955-56	3,409,062	4,621,673	8,030,735	13,523	18,638	997	934
1956-57	4,352,958	4,516,252	8,869,210	17,534	15,437	1,487	960

The number of vessels that entered the port during the year was 1,383 (1956-57).

The largest vessel to enter the Port was 16,736 tons gross tonnage but speaking generally the ideal ship for the Port is a ship of under 550 feet in length, broad in beam and loading to a maximum of about 25 feet.

Berths and Anchorages.—Anchorages are available at Saugor Roads, Haldia, Kalpi Diamond Harbour, Royapur, Clubaria, Buj Bui and Garden Reach of which Royapur, Clubaria, Buj Bui and Garden Reach are available only for deep laden vessels outward bound or in emergency. The other anchorages are used by ships on passage to and from the Port.

In the port ships lie to moorings when in the stream or alongside jetties with cables forward and aft. The largest man-of-war so far accepted in the Port has been 10,000 tons cruiser class and one berth is available for this class of ship.

Accommodation (Kidderpore Docks).—These consist of Nos. 1 and 2 Docks and Turning Basin. Dock No. 1 is 2,700 feet in length by 600 feet wide, with a depth of 30 feet of water and has twelve berths serving single-storey cargo sheds. Dock No. 2 has a length of 4,500 feet by 400 feet and also provides a depth of 30 feet of water. It has eight general berths serving

single and double storeyed sheds and six coal berths including three mechanical loading berths.

King George's Dock.—This Dock comprises a lock entrance 700 feet long by 90 feet wide, four general cargo berths, a heavy-lift yard berth with one 200 ton crane, and a semi-mechanical ore berth. Provision has been made in the Five Year plans for the construction of three additional general cargo berths, one by converting the existing oil berth at 'B' berth and two more at 'D' and 'H' berths and also for the conversion of existing 'C' berth into an oil-cum-laying up berth and for the conversion of 'E' berth as a laying up berth.

Dry Docks.—Five dry docks, owned by the Port Commissioners, are available for the use of shipping, three in Kidderpore Docks and two in King George's Dock.

Jetties.—The Garden Reach Jetties consist of a coaling jetty for ships up to 400 feet in length and three jetties for ships up to 600 feet. One jetty which was burnt down by fire in 1951 is being restored with the provision of a single storeyed shed. The transit sheds are double storeyed. Calcutta jetties are situated on the river side below Howrah Bridge. There are nine jetties with a total length of 4,735 feet, but only five of them viz. Nos. 2, 3, 7, 8 and 9 are available for ocean-going steamers.

Wharves.—Petroleum Wharves at Budge Budge are situated some 14 miles below the entrances to the docks.

Warehouses.—The Commissioners provide extensive warehouse accommodation consisting of two Tea Warehouses with extension having a storage area of 416,000 sq. ft., a grain and seeds depot at Kantapukur comprising 37 sheds with a storage area of about 1,053,188 sq. ft., two sheds at Jhinjerapuri with a storage area of 70,200 sq. ft., A and B Sheds at Kidderpore, and the Fairlie, Clive, Canning and Strand Warehouses situated close to the Calcutta Jetties with a total floor area of about 292,200 sq. ft. Provision has been made for the construction of another six-storeyed warehouse for tea at Lybian Depot with 600,000 sq. ft. of covered accommodation.

Coal.—There are at present six coaling berths at Kidderpore Dock No. 2 and one at Garden Reach Jetty.

Overall Capacity of Port.—Calcutta with the existing facilities has handled a sea-borne traffic of nearly 11 million tons a year without congestion or delay.

The total number of cargo boats licensed in the Port is 6,968, of which about 2,108 are steel lighters with a carrying capacity of about 130,825 tons.

The Port Trust Railway.—Communication between the various points in the Docks and Jetties including all the Commissioners' warehouses is maintained by the Commissioners' Railway which has 206 miles of permanent way and connects with the two main railway systems serving Calcutta. Goods can therefore be reloaded from any point on the Commissioners' premises to any part of India.

Commissioners

R. K. Mitra, I.C.S., *Chairman*; D. P. Anand; Comdr. B. K. Gupta; A. Mitra, I.C.S.; B. C. Malik; S. Sarangapani; B. K. Sen; Brig. M. C. Mehta; Dr. S. B. Dutt; J. N. Mukherjee; S. C. Gupta; A. N. Isha; M. L. Shah; Lai Chand Kanoi; Matadin Khaitan; W. R. B. Sample; N. Stenhouse; P. L. Sarangi; Biwanath Mukherjee; Jitendriya Bonnerjee; I. N. Wankawala; Kali Mukherjee; A. C. Banerjee.

ADMINISTRATIVE STAFF

Secretary.—P. O. Mitter; *Traffic Manager.*—L. M. Hogan; *Chief Accountant.*—T. Eastment; *Chief Engineer.*—T. M. Malkani, B.Sc. (Hons.) (Lond.), M.Inst.C.E., M.I.E. (Ind.), A.C.G.I., D.I.C.; *Controller of Stores.*—S. C. Das; *Chief Mechanical Engineer.*—S. K. Mitra; *Deputy Conservator.*—Comdr. G. J. Mohan, I.N. (Retd.); *Harbour Master.*—H. B. Kelly; *Port Pilotage Officer.*—P. G. McFarlane; (*Offg. River Surveyor.*)—T. M. Ashton; *Medical Officer.*—Dr. K. Nundy, M.B.; *River Consulting Engineers and London Agents.*—Messrs. Rendel Palmer & Tritton. *Docks Manager.*—A. P. McMahon.

COCHIN

The Port of Cochin, one of the six major ports of India is a natural harbour lying on the direct route to Australia and the Far East from Europe. It is open for deep-water traffic in the worst monsoons and provides a splendid anchorage at all times of the year. Any ship passing through the Suez Canal can enter the port even in the roughest weather.

The Port consists of an extensive area of 120 sq. miles of sheltered navigable backwaters behind an opening, 440 yards wide.

The Cochin Harbour Railway is connected with the Broad Gauge System of the Southern Railway. The construction of a metre gauge railway connecting Cochin with Quilon in the south is nearing completion.

The part of the railway line connecting Cochin and Kottayam is now open to traffic. The work in connection with the extension of the metre gauge system to the Cochin Harbour Terminus will be taken up shortly.

The entrance channel of the harbour is 450 ft. wide and about 4 miles long, buoyed on both sides according to regulations. The activities of the port are mainly centred in Willingdon Island which has been reclaimed from the backwaters by dredged soil from the inner channels.

Inside the harbour there are thirteen stream berths, one coal berth, four wharf berths and two tanker berths. Of the thirteen stream berths, one is a swinging berth capable of accommodating vessels upto 650 ft. overall in length and 28 ft. draft. Twelve are fore and aft berths in the Mattancherry channel. The tanker berths are in the Ernakulam channel which are provided with dolphins and connecting jetty and pipe line to the Ernakulam shore to facilitate the pumping of oils direct from vessels to the oil installations at Ernakulam.

The Boat Train Pier Jetty at the north end of Willingdon Island has now been converted into an oil berth with additional dolphins and a jetty for carrying the pipelines, and pumping oils from and to the oil installations on shore. Facilities have also been provided to supply bunkers from the shore installations direct to vessels working at the Deep Water Wharf.

The deep water wharf which is 2,200 ft. long with a reinforced concrete frontage can accommodate at a time 4 vessels of 450 ft. in length.

A new deep water wharf on the eastern side of Willingdon Island, facing the Ernakulam Channel, to accommodate 4 vessels at a time with transit sheds, warehouses, broad and metre gauge railway sidings, cranes, offices, etc. is under construction. The work on the construction of a second coal berth on the western side of Willingdon Island facing the Mattancherry channel has been started.

The principal imports are food grains, mineral oils, coal, cashewnuts, hardware and chemicals.

The principal exports are coir and coir products, tea, rubber, cashew kernels, coconuts and spices.

Statistics showing the growth of the Port from 1952-53 to 1956-57.

Year	Imports	Exports	Total
	Tons	Tons	Tons
1952-53	1,224,851	326,443	1,551,294
1953-54	1,233,501	323,681	1,557,182
1954-55	1,197,956	353,663	1,551,619
1955-56	1,220,836	387,851	1,608,687
1956-57	1,308,014	418,991	1,727,005

The total number of passengers embarked and disembarked in 1956-57 was 1,409. Receipts and Expenditure in the same period were Rs. 98.51 lakhs and Rs. 88.00 lakhs respectively.

The administration of the Port is in the hands of an Administrative Officer working directly under the Ministry of Transport of the Government of India. He is assisted by an Advisory Committee consisting of the representatives of the Government of India, the Government of the State of Kerala, and the local Chambers of Commerce and Municipalities.

Administrative Officer.—M. S. Venkataraman, B.A.; *Chief Engineer.*—C. V. Venkateswaran, B.E.; *Deputy Conservator.*—B. M. Cholkar; *Traffic Manager.*—Topen Bhose, B.A.; *Chief Accountant.*—A. N. Aiyaswami, M.A.; *Secretary & Statistical Officer.*—J. Cyril Raj, M.A.; *Senior Medical Officer.*—Dr. V. K. Menon, M.B.B.S.; *Port Health Officer.*—Dr. K. Bhaskaran, M.B.B.S., D.P.H.

KANDLA

The major port of Kandla which is nearing completion consists of the following important units:—

An Oil Berth capable of taking Oil Tankers of about 16,000 tons deadweight capacity alongside it with two pipe lines 18" x 12" laid from the Oil Berth to the Oil Installations over a distance of 6 miles, for carrying black and white oils respectively.

A tidal basin 500' x 300' for lighters and sailing vessels with a provision of heavy lift gantry crane capable of lifting 60 ton lifts with two mooring berths opposite to it. The lighter wharf has alongside it 7 electric level luffing cranes of 3 tons, 6 tons and 10 tons capacity. There are spacious transit sheds and open stacking areas, on both the lighter and sailing vessel wharves.

A Floating Dock Berth with provision for mooring alongside it an R.C.C. Floating Dry Dock, with the necessary workshop facilities for repairing small crafts like tugs, dredgers, lighters etc.

Two passenger Landing Stages for passenger ferries with necessary facilities for passengers to move by railway trains from a railway station near the landing stages.

A Cargo Jetty 2,700' long with a provision for four 600' long deep water steamers with electric level luffing cranes, on the quay, of 3 tons, 6 tons and 10 tons capacity.

Three large transit sheds each 450' x 140' with large open stacking areas around them and electrical lifts, chutes and other mobile mechanical handling equipment. Transit sheds are both road and railway served.

Four double storied warehouses each 500' x 120' with electrical lifts, chutes and other mobile mechanical handling equipment inside. Warehouses are connected to the transit sheds by wide bridges to enable the cargo to be removed in trolleys from the transit sheds to warehouses and vice versa with convenience. Warehouses are also both road and railway served.

All structures mentioned above except the installation of quay cranes and some finishing items, have been completed and are under operation.

All the items of harbour works at Kandla have already been pressed into service. The oil jetty was completed in November 1955; the bunder (lighter basin) was opened for traffic on June 29, 1955, the passenger berth catering for the launch traffic between Navlakhi and Kandla was declared open on October 1, 1956 and the floating dock berth completed in December 1956.

Mr. Jagjivan Ram, Minister for Railways inaugurated on March 3, 1957, two cargo jetty berths at Kandla to usher in the final phase of the Rs. 14.1 crore major port project on the West Coast. The remaining two berths, have since been completed in most respects.

The Government of India have also sanctioned the construction of two additional berths, as a part of the Second Five Year Plan schemes of the Port. Work on these has already commenced.

Kandla port, the first major port to be constructed since independence, will serve a hinterland of 275,000 square miles with a population of 60 millions.

With the opening of the Bhildi-Baniwara track Kandla is now connected also with Rajasthan and southern Punjab. A national highway to connect it with Ahmedabad is expected to be completed by 1959.

Estimated cost of the project: a little over Rs. 14 crores. Amount spent on this project till 30th Nov. 1957: Rs. 12.2 crores.

Statistics of revenue and expenditure of Kandla Port during 1956-57:

Revenue : Rs. 29,51,765.
Expenditure : Rs. 16,85,703.

Large open stacking areas with necessary railway sidings and extensive lands for industries, workshops, etc. will soon become available.

The initial traffic of the port on completion of the works is likely to be 1,000,000 tons of cargo annually, of which 500,000 tons will be oils. The present tonnage that could be handled is 700,000 tons.

The traffic at the Port of Kandla during the year 1956-57 is as under:—

(a) Total imports during the year ..	327,829 tons.
(b) Total exports during the year ..	145,657 tons.
(c) No. of passengers embarked and disembarked ..	168,180 persons.
(d) The total volume of the cargo trade during the year ..	473,486 tons.

The Major Port of Kandla and the Kandla Port Project are under the administrative control of the Government of India in the Ministry of Transport. The Development Commissioner, Kandla is the head of these Organizations. He is assisted by a Port Advisory Committee consisting of four non-official and three official members, to advise him on all matters relating to the Port and the Port construction.

Principal Officers.—*Development Commissioner.* P. N. Saxena; *Financial Adviser & Chief Accounts Officer.* V. N. Singh; *Superintending Engineer (Harbour).* M. Ramabrahman; *Superintending Engineer (General).* E. R. Sakhrani; *Deputy Conservator.* Capt. D. V. Singh; *Traffic Manager.* R. Srinivasan; *Secretary to the Development Commissioner and Town Development.* Shivakumar Dhindaw.

MADRAS

The Madras Harbour is an artificial one formed by two arms projecting from a low, sandy coast.

The affairs of the Port are administered by a Board of Trustees which function under the Madras Port Trust Act. The Chairman is the Chief Executive Officer of the Board.

The Port is about 3/5 mile square (excluding boat basin, etc.) with an area of approximately 200 acres. Width at entrance 400 ft.; depth of water at entrance at high water 37 ft. and at low water 34 ft. Practically the whole of the enclosed harbour has a depth of 30 ft. at I.S.L.W. There are no navigational difficulties and the Port is approached direct from the open sea.

There is accommodation for 18 vessels inside the harbour, 9 at Mooring and 9 at Quays. The depth at moorings ranges from 28 ft. to 31 ft. 6 in. and at quays from 26 ft. to 30 ft. Pilotage is compulsory.

The Income and Expenditure for the year 1956-57 were Rs. 2,45,18,436 and Rs. 2,56,71,218 respectively.

Number of passengers embarked during 1956-57 was 29,119 and of passengers disembarked 33,125.

The chief imports are coal and coke, foodgrains, mineral oils, metals, timber, textiles, machinery, hardware, hides and skins, paper including old newspapers, dyeing and tanning substances, chemical manures, sugar, asphalt, chemicals, cotton, etc.

Ores, piecegoods, hides and skins (raw and tanned), onions, raw tobacco, twist and yarn, mica, etc. form the principal exports.

The export of groundnut oil is also an important item and three oil tanks have been erected for storing the oil.

Statistics showing the growth of the Port from 1951-52 to 1956-57.

* Where no information is available the columns have been left blank.

Imports and exports negligible. Development projects with regard to improvements at Chandebaili will commence from 1957 financial year. Revival of sea-borne trade at Gopalpur is under the consideration of the Government. Schemes are being finalised for establishing a port at Paradip on the mouth of the river Mahanadi.

Trustees of the Port: Appointed by Government.—G. Venkateswara Ayyar, I.C.S., Chairman; A. C. Whitaker, Collector of Customs; T. A. Joseph, General Manager, Southern Railway; T. K. Palanippam, M.A., I.A.S., Director of Industries and Commerce; D. Balasundaram, I.A.S., Commissioner, Corporation of Madras; Capt. S. K. Kumaria, Principal Officer, Mercantile Marine Department, Madras; Maj. Genl. Ghyanshayam Singh, The G.O.C., Madras Area; C. Govindarajulu, Representative of Labour.

Elected by Commercial Bodies, etc.—(Representing Corporation of Madras): P. N. Lakshminipathy; (Representing Madras Chamber of Commerce, Madras): J. R. Galloway and E. J. M. Leigh; (Representing Southern India Chamber of Commerce): P. Maruthi Pillai, A. Nagappa Chettiar, B. N. Patel, Lakshmi Govindam and K. R. Sundaram Aiyer; (Representing the Andhra Chamber of Commerce): J. V. Somayajulu and Ch. Ramabrahmam; (Representing the Indian National Steamship Owners' Association, Bombay): M. M. Syed Mohamed.

VISHAKAPATNAM

Vishakapatnam Harbour was created in order to supply an outlet for a large area of fertile country adjacent to the east coast of India, and for Madhya Pradesh with considerable mineral resources and no alternative access to the outside world. In 1933, the harbour was first opened for ocean-going vessels, and ships drawing up to 28 ft. 6 in. and having a length up to 550 ft. can now enter and leave the harbour at all times of the year. Under favourable states of tide, however, ships drawing 30 ft. can enter or leave the harbour by prior arrangements.

The harbour now provides the following facilities:

The inner harbour consists of a turning basin, four quay berths each 500 feet long and equipped with portal electric cranes, transit sheds, and railway lines, both behind and on

the quay-side of the transit sheds and three concrete jetty and wharf berths for coal and oil. Besides, there are four mooring berths which are served by a fleet of lighters owned and operated by the port authorities and shallow water channels with timber jetties for lightering work. The quay berths No. 1 and 2 are specially equipped and reserved for the expeditious handling of manganese and iron ore: on an average, approximately 3,000 tons are loaded in a day.

A 1,200 ft. long quay berth, capable of accommodating two oil tankers simultaneously has been constructed to provide the necessary Port and Harbour facilities for the Calcutta Oil Refinery at Vishakhapatnam which is in full operation.

A Dry Dock 366 ft. by 60 ft. with a depth of 14 ft. below low water has been in use at the Port for the docking of vessels, but ordinarily only small craft not exceeding 300 ft. in length can be docked.

The Port has a Floating Crane capable of dealing with heavy lifts up to 50-ton capacity.

Income and Expenditure of the Port for the year 1956-57.

	Receipts.	Expenditure.
	Rs.	Rs.
Port Fund ..	96,54,650	79,28,973
Pilotage Fund ..	1,78,394	1,87,579

† Expenditure figures included in the figures given for Kutch group of ports under Saurashtra and Kutch Ports.

BROACH PORT

The following are figures for the year 1956-57:
Number of passengers embarked and disembarked: Nil.

Imports: 30,349 tons; Value of imports: Rs. 77,29,834.

Exports: 15,560 tons; Value of exports: Rs. 66,36,475.

Total income: Rs. 9,335.16 nP. (Customs import duty Rs. 245.50 nP.; Landing and wharfage fee Rs. 30.50 nP.; Port dues Rs. 6,703.91 nP.)

Customs Miscellaneous recoveries Rs. 1,853.50 nP. Light dues Rs. 501.75 nP.

Total expenditure: Rs. 12,230 (Pay and allowances Rs. 10,500; Overtime allowances Rs. 1,530; Travelling allowance Rs. 200).

MANGALORE PORT

Lat.: 13° 51' 40" North; Long.: 74° 49' 55" East on the west coast of India between Calicut and Goa.

Authority: Mangalore Port Trust Board.

Accommodation: Open roadstead. Steamers anchor in 4 to 6 fathoms due west of entrance and are loaded and discharged by lighters. Approximately 50 lighters suitable for landing and shipping cargo with average capacity of 35 tons each are available at the port. Bar opposite Railway Bridge. Depth on bar: 7-9 ft. Low water Spring Tide: at quay 7 feet L.W.O.S.T. During South-west monsoon (Mid May to Mid September) no communication with shore. Dry-Dock for Port Trust Craft, 110 feet by 30 feet, depth on sill 4 ft.

Equipment: One 5 ton, one 2 ton and one 1 ton hand cranes. Craneage fee Rs. 1.15 nP. per ton. No repair facilities except minor repairs to ships gear on shore. No bunkers.

Lighthouse and Signal Station opposite Bar.

One Steam Tug and one Motor Launch available for towage on hire.

Revenue & Expenditure: The particulars of Revenue receipts and expenditure of funds administered by the Mangalore Port Trust Board during the year 1956-57, were as follows:

	Receipts. Rs.	Expenditure. Rs.
1. Mangalore Port Trust Fund	2,80,938	2,41,065
2. Mangalore Port Fund	51,435	30,337
3. Mangalore Pilotage Fund	4,695	4,067

Passengers embarked and disembarked during 1956-57: 5,728 passengers embarked and 5,884 passengers disembarked.

Tonnage of Trade handled (1956-57):

- (i) Imports: The Imports during the year amounted to 91,672 (approx.) tons.
- (ii) Exports: The Exports during the year amounted to 1,06,452 (approx.) tons.
- (iii) The total approximate weight of cargo handled at the Port during the year was 2,68,124 tons.

Names of officials: Chairman, Y. C. Hombalish, Collector of South Kanara; Vice-Chairman, V. S. Kudva; Conservator of Port, The Mangalore Port Trust Board.

RAILWAYS

THE total route mileage of all the railways in India on March 31, 1957 was 34,744.05. The total electrified route mileage was 244.24.

The total route mileage is made up of the following:

Govt railways—31,290.41
Non-Govt railways—453.24

The total capital at charge on March 31, 1957 was Rs 1,07,23 crores. On other than Government railways the capital at charge was Rs 45.21 crores.

There are three kinds of gauge, broad (5 ft. 6 in.), metre (3 ft. 3½ in.) and narrow (2 ft. 6 in.). There is also a light gauge usually laid on the mountains (2 ft.). An example of this last is the Darjeeling-Himalayan.

The total route mileage by gauge was as follows:

Broad gauge 16,168.68
Metre gauge 15,347.40
Narrow gauge 3,157.97

The fares (pice per mile) on March 31 1958 were as follows—

Air conditioned	1—300 (miles)	34
	301 and over	32
Second class	1—150 (miles)	18
	151—300 "	16
	301 and over "	15
Inter (Mail & Expr.)	1—150 (miles)	11
(Ordinary)		9
(Mail & Expr.)	151—300 "	10½
(Ordinary)		9
(Mail & Expr.)	301 and over "	9½
(Ordinary)		8½
Third (Mail & Expr.)	1—150 (miles)	6½
(Ordinary)*		5½
(Mail & Expr.)	151—300 "	6
(Ordinary)		5
(Mail & Expr.)	301 and over "	5½
(Ordinary)		4½

* For under 50 miles 5

ZONAL ADMINISTRATION

The entire Government railway system is now grouped into eight administrations: the Southern Railway, the Western Railway, the Central Railway, the Northern Railway, the Eastern Railway, the South-Eastern Railway, the North-Eastern Railway and the North-East Frontier Railway.

The headquarters of the Southern Railway are at Madras, of the Western Railway at Bombay, of the Central Railway also at Bombay, of the Northern Railway at Delhi, of the Eastern Railway at Calcutta, of the South-Eastern Railway also at Calcutta, of the North-Eastern at Gorakhpur and the North-East Frontier Railway at Pandu.

The highest administrative authority for the railways is the Railway Board.

The Indian Railway Conference Association, New Delhi, is a sort of clearing house for all railways.

The railways are now organized on a Divisional basis.

There are a number of Committees which have been associated with the Railway Administration. Standing Finance Committee, Central Advisory Council, Railway Rates Tribunal, Indian Railway Fuel Committee.

There are also a number of standardization Committees such as for bridges, structure, track, signalling and inter-locking, building, locomotive, carriage and wagon, electrical, specifications.

There are also Railway Users' Consultative Committees at the zonal, regional and national level.

There are Railway Service Commissions in Bombay, Calcutta, Allahabad and Madras.

There is a training college for railway officers and staff at Baroda.

STATISTICS

The principal statistics for the year 1956-57 are given below. The first column shows the position for all railways, the second only for Government railways.

	All Railways	Government Railways
Capital at charge (Rs. crores)	1,07,23	1,03,02
Route mileage (March 31, 1956)	34,744.05	34,290.41
Gross earnings (Rs. crores)	350.55	318.89
Total working expenses (Rs. crores)	240.13	278.76
Operating ratio (per cent)	79.91	79.90
No. of passengers originating (million)	1,322.54	1,359.68
Passenger miles (million)	42,194.47	41,874.13
Earnings from carriage of passengers (Rs. crores)	117.39	116.32
Average earnings per passenger mile (pice)	5.34	5.33
Freight tons originating (million)	125.38	124.07
Freight ton miles (million)	40,224.69	40,185.74
Earnings from carriage of goods (Rs. crores)	201.69	200.54
Average earnings per freight ton mile (pice)	11.4	11.5
Total train miles (million)	217.40	215.59
Gross earnings per train mile (Rs.)	17.0	16.1
Working expenses per train mile (Rs.)	13.8	13.8
Net earnings per train mile (Rs.)	3.24	3.26
Net earnings per mean mile worked (Rs.)	20.234	0.414

Other statistical information about Indian Railways for 1956-57 is given below—

New Lines opened to Traffic	95.82
Lines under Construction	491.94
Total No. of Locomotives (March 31, 1956)	9,719
No. of Steam Locomotives	9,563
No. of Diesel Electric Locomotives	77
No. of Electric Locomotives	79
No. of Passenger Carriages (March 31, 1957)	17,804
Total No. of Seats (March 31, 1957)	11,44,401
No. of 1st Class seats	66,130

No. of 2nd Class Seats	71,771
No. of 3rd Class Seats	1,004,966
No. of Goods Vehicles (March 31, 1957)	229,854
Total carrying Capacity in tons	4,613,907
Total No. of Passengers Carried (Crores)	138.25
No. of A.C. Passengers	10,200
No. of 1st Class Passengers (Million)	21.07
No. of 2nd Class Passengers (Million)	18.14
No. of 3rd Class Passengers (Million)	1,313.23

Total Passenger Miles (Crores)	4,219.45
Average Miles per Passenger	30.5
Total Earnings from Passengers (Rs. in Crores)	117.39
Earnings from A.C. Passengers (Millions)	9.33
Earnings from 1st Class Passengers (Rs. in Million)	64.45
Earnings from 2nd Class Passengers (Rs. in Crores)	6.17
Earnings from 3rd Class Passengers (Rs. in Crores)	103.85
Goods Carried (Million tons)	125.38
Net ton Miles (Crores)	4,022.47
Average Miles a Ton of Goods was Carried	320.8
Earnings from Goods Carried (Rs. in Crores)	201.09
Average rate Charged for one Ton one Mile (Pice) (1956)	10.8
Average receipts per freight ton mile	11.4 pice
Earnings per passenger per mile	5.33 pice
Capital at charge Chittaranjan Works (Rs. lakhs)	19.93 (1956-57)
Capital at charge, Integral Coach Factory (Rs. lakhs)	12.14 (1956-57)
Capital at charge Locomotive component works Banarus (Rs. lakhs)	1.54
Capital at charge Metre gauge Coach Factory Barilly (Rs. lakhs)	11

STAFF

The total strength of Staff (March 31, 1957)	1,08,1,617
Position on Government Railways	
Class I and II Staff	3,670
Class III Staff	3,90,759
Class IV other than Workshop and artisan	405,300
Class IV Workshop artisan	15,614
The total cost of all Staff (Rs. in Crores)	175.74
The total cost of Class I and Class II (Rs. in Crores)	3.44
The total cost of Class III staff rising to above Rs. 250 per month (Rs. in crores)	8.81
The total cost of Class III staff, rising to not more than Rs. 250 per month other than workshop and artisan (Rs. in crores)	32.31
The total cost of workshop staff plus artisan staff, Class III (Rs. in crores)	23.81
The total cost of Class IV staff other than workshop and artisan (Rs. in Crores)	49.98
Class IV, workshop and artisan (Rs. in crores)	16.97
Total cost of workshop and artisan staff (Class III or IV) (Rs. in crores)	40.80
Man-days lost due to Sickness	9,912,218
Man-days lost due to Strikes or Lock-outs	220,563
Total Man-days lost	10,171,781
Total No. of Female Employees (March 31, 1957)	8,823
Class I and II Officers	2
Class III Staff:	
Clerks	1,502
Steno-graphers	79
Nurses	530
Teachers	233
Others	684
Class IV Staff	8,444

ACCIDENTS

Accidents 1956-57:

	Killed	Injured
Passengers ..	645	3,621
Railway Servants ..	253	26,292
Other Persons ..	4,156	2,428
TOTAL ..	5,054	32,341

1. No. of Collisions in which Passenger Trains were involved	23
2. No. of Derailment to Passenger Trains	207
3. No. of Train wrecks	6
4. Attempted Train wrecks	78
5. Flooding	278
6. Failure of bridges, tunnels	3
7. Trains running into road traffic at level crossings	123
8. Broken rails	53
9. Failure of axles	7
Total of all accidents	9,343

CENTRAL RAILWAY, 1956-57

(Victoria Terminus, Bombay 1)

RAILWAY BUDGET

(Rupees in Crores)

	Actuals 1956-57	Revised Estimate 1957-58	Budget Estimate 1958-59
Gross Traffic Receipts	347.57	384.40	407.48
Working Expenses	233.94	259.16	268.35
Net Miscellaneous Expenditure ..	9.92	14.01	16.99
Appropriation to Depreciation Reserve Fund	45.00	45.00	45.00
Payment to Worked Lines	33	33	22
Total	239.19	318.50	330.56
Net Railway Revenues	58.33	65.90	76.92
Dividend to General Revenues ..	38.16	44.24	49.58
Net Surplus	20.22	21.66	27.34

Some individual items on the expenditure side are given below :

(In crores of rupees)

	Budget Estimate 1958-59
Demand No. 4.—Administration ..	32.73
Demand No. 5.—Repairs and Maintenance	104.30
Demand No. 6.—Operating Staff ..	63.81
Demand No. 7.—Operation (Fuel) ..	57.21
Demand No. 8.—Operation other than Staff and Fuel	18.84
Demand No. 9.—Misc. Expenses ..	26.35
Demand No. 10.—Labour Welfare ..	7.89
TOTAL	311.13
Credits or recoveries	— 42.78
TOTAL	268.35

Other categories of expenditure in Rs. lakhs :
Rolling stock : 57.95; track renewals : 34.77;
traffic facilities : 5.94; staff quarters : 8.03;
amenities for staff : 3.11; passenger and other
railway users' amenities : 2.50; new lines : 14.08.

Some individual items on the receipts side are given below :

(In crores of rupees)

	Budget Estimate 1958-59
Passenger Earnings—
Upper	14.06
Third	110.67
Other Coaching Earnings	24.65
Goods Earnings	250.50
Other Sundry Earnings	8.45

Total Earnings 408.33
Suspended 0.85

Gross Traffic Receipts .. 407.48

The programme of new acquisition under rolling-stock for 1958-59 is given below. The first figure in brackets shows the number to be acquired from abroad and the second figure the number to be acquired indigenously :

Steam locomotives : 255 (23,232); boilers (steam) : 10 (all indigenously); Carriages : 2,355 (all indigenously); wagons in terms of four-wheelers : 18,994 (all indigenously).

Two items that can also be mentioned here (1956-57 actuals): Operating ratio : 80.3 per cent. Ratio of net revenue to Capital-at-charge : 5.4 per cent.

BUDGET SPEECH

Below we give points from the budget speech :

The Minister said that an examination of the Railway Freight Structure Committee's recommendations regarding revision of the rates structure "is now in the final stages, and decisions thereon are expected to be taken and implemented in the near future".

Operational efficiency during the current year had touched new high levels.

Vigorous measures continued to be taken to increase efficiency of operation and better utilisation of rolling stock.

The figure of net ton miles per wagon day, universally accepted as a reliable index of operational efficiency, had increased from an average of 570 miles in 1956-57 to 680 miles on B.G. and from 210 miles to 228 miles on M.G., for the period from April 1957 to November 1957.

It was expected that in 1958-59 the railways would be called upon to carry about 12 million tons of additional traffic, raising the total traffic to 145 million tons as against the total Plan provision of 182 million tons. Most of the additional traffic would be on account of the expansion of the steel industry and the additional coal raisings.

Giving a picture of the large-scale development works now in hand, the Minister disclosed that at present a labour force of 150,000 was engaged on a number of railway projects in different parts of the country.

The construction of over 500 miles of new lines is in progress. Work is also proceeding on 800 miles of doubling, of which 385 miles are on the South-Eastern, 115 miles on the Southern, 135 miles on the Western, 100 miles on the Northern and 45 miles on the Central Railways.

The budget discloses that the total expenditure for the works, machinery and rolling stock programme has been placed at Rs. 260 crores, as against the revised estimate of Rs. 235 crores in the current year's budget.

The major items of expenditure during the new year will be : rolling stock Rs. 88 crores (out of which Rs. 60-17 crores will be spent within the country and Rs. 27.78 crores on imports, including customs, freight, handling and other charges); the construction of new lines and restoration of dismantled lines Rs. 20 crores; track renewals Rs. 33 crores; and other open line works about Rs. 100 crores.

While the Ministry's total receipts have increased by only Rs. 6.50 crores during the year, the total ordinary working expenses have gone up by Rs. 15.31 crores. The biggest slice of the increase, Rs. 4.5 crores, representing 29 per cent of the total increase, is accounted for by the interim increase of Rs. 5 in the dearness allowance to staff sanctioned by Government on the recommendation of the Pay Commission.

Other reasons for increased expenditure are : the enhancement of the price of coal, higher repairs and maintenance bill of the railways, etc.

NEW LINES

Two important new lines have been included in the next year's programme : the 100-mile Robertganj-Garia Road line on the Northern Railway costing Rs. 17 crores and the 40-mile long Muri-Ranchi connection on the Eastern Railway costing Rs. 5.9 crores.

The Northern Railway line is required as an alternative route from the Barkakana coal fields to north India to reduce the ever-increasing pressure via Moghalsara and also for opening up of the Rihand Dam area in Uttar Pradesh.

The Eastern Railway line is part of the Chandrapura-Muri-Ranchi-Boudamunda project intended to serve the steel plants at Bourkeela and Bhilai. The first phase of this project, the Chandrapura-Muri link is already in progress.

A Rs. 7.80-crore scheme doubling the 68-mile line between Drug and Kamplae (S.E.R.), doubling of Vizianagram-Gopalapatnam section (S.E.R.) at a cost of Rs. 3.50 crores; and doubling of the Anuppur-Katni section costing Rs. 6.7 crores.

The highest priority will be given during the year to the electrification of the sections from Anasol to Tatanagar (S.E.R.) and Bourkeela and Rajkharwan to Barajamda (S.E.R.).

It is expected that the electrification of these important trunk routes will be completed before the end of the Second Plan period, well in time before the full load of traffic develops.

Electrification of the line from Howrah to Moghalsara is also included in the programme.

In all, for all electrification projects on Indian railways, the 1958-59 provision in the budget is Rs. 16.29 crores.

Conversion of the Gudivada-Bhimavaram section (S.R.) from metre gauge to broad gauge costing Rs. 2.25 crores. Work on electrification of Madras-Bangalore-Tambaram-Villupuram section was slowed down as there were difficulties

of foreign exchange required by the Madras Electricity Grid to run the transmission lines. The latest development is that electric power will be available and the work will now progress on the A.C. single phase 25 K.V. system. However, some technical studies will have to be undertaken.

Extension of electrification on the Bombay-Delhi main line from Igatpuri to Khusaval on the busy Ghat section has become an operating necessity, but there are difficulties in regard to obtaining power supply immediately. In the meantime, the civil engineering portion of the work, which takes a long time to complete, will be taken in hand.

The budget makes provision for the doubling of Khagaria-Katareah section (N.-E.R.) between Katihar and Barauni at a cost of Rs. 1.88 crores.

The creation of the eighth railway zone, the North-East Frontier Railway, was necessitated by many considerations—strategic, administrative and operational.

Measures are in hand to strengthen the Assam Rail Link and there was no serious breach in the Link and no hold-up of traffic during the 1957 monsoon. Rs. 3.5 crores had been allotted for these works most of which will be completed before the 1958 monsoon. The remaining works will also be completed during the working season of 1958-59.

A preliminary engineering survey is being concurrently carried out for alternative alignment, taking off from the Mal-Domohani section and joining again at Alipurduar.

The preliminary measures for the construction of the bridge across the Brahmaputra are sufficiently advanced and work is expected to commence on the sub-structures in the 1958 working season.

A considerable improvement in the suburban passenger services in the Bombay area has taken place. During 1956-57, the railways introduced 65 new trains and extended the runs of 33 trains. During 1957-58 up to December 1, 1957, they had introduced 86 new trains and extended the runs of 16 trains.

From April 1, 1959, the Integral Coach Factory at Pambur will start double shift working in order to make more intensive use of the available plant and also to reduce the cost of production. This will result in the production of 180 more coaches per year by the end of the Second Plan period, in addition to the existing target of 350 coaches per annum.

SELF-SUFFICIENCY

Capacity for production of rolling-stock within the country had shown a further improvement during the current year.

The import of general service wagons was discontinued quite a long time ago and that of steam locomotives has now been stopped except for a few required for narrow gauge lines.

Out of the total provision of Rs. 87.95 crores for rolling stock during 1958-59, Rs. 60.17 crores will be spent within the country and the balance on imports from abroad, including customs, freight, handling charges, etc.

Chittaranjan produced 156 locomotives in 1956-57 and is expected to produce 168 locomotives in the current year and an equal number next year. TELCO delivered 75 locomotives last year, while the number expected in the current year and the next year was 90 and 100 respectively.

The output of the Integral Coach Factory was expected to increase from 89 unfurnished coaches last year to 180 this year and 295 next year. The full production of 380 coaches under single shift working was expected to be achieved in 1959-60. It is proposed to introduce double shift working from April 1, 1959, resulting in the production of 180 more coaches by the end of the Second Plan.

Work on a permanent furnishing unit attached to the Integral Coach Factory at a cost of Rs. 3.89 crores had also been taken in hand.

It was proposed to continue with the programme of providing passenger amenities in spite of other pressing demands, consistent with economy in the use of cement, iron and steel.

MISCELLANEOUS

The problem of overcrowding, the Minister remarked, was still far from being solved. He referred to the difficulties of finance, limited capacity for building coaching stock, and shortage of line capacity and said: "I am afraid these difficulties will continue to be as formidable as ever."

Regarding departmental catering, the Minister stated: "I have no doubt that, by and large, departmental catering has been well-received by the public."

The number of cases of alarm chain pulling continued to be very high.

During the past 12 months the number was as high as 40,000, of which only less than one-tenth could be justified.

Ticketless travelling was another evil which could not be effectively checked without public support.

The problem of corruption on the railways was being tackled vigorously. Measures like special watchers at important stations, raids for locating corrupt practices and watching of placement and delivery of wagons had been intensified. Here, again, the Minister said, it was the awakening of the social conscience of the users as well as the railwaymen that could effectively liquidate corruption.

Claims for compensation which during the past few years had been showing a persistent tendency to increase appear now to be on the decline, indicating that the activities of the claims prevention organisation created in 1955 and the reorganisation of the Railway Protection Force were bearing fruit.

WELFARE

Referring to staff welfare, the Minister said that in addition to 81 hospitals and 434 dispensaries at the end of 1956-57, 3 more hospitals and 11 dispensaries had been added and a further addition of 9 hospitals and 59 dispensaries was planned for the next three years. The number of beds had increased from 3,543 to 3,936 and would ultimately be 5,230. In addition to 646 T.B. beds reserved at the end of 1956-57, 273 more had been sanctioned, and it was expected to increase the total to 1,350.

About 1,400 quarters were built last year and 16,000 were expected to be built during 1957-58, while provision had been made for another 15,000 in 1958-59.

In all, during the Second Plan period, 64,500 new quarters would have been constructed. In addition, improvements to existing quarters had been undertaken on a large scale and these will continue next year also.

1957-58 was another year of fruitful co-operation between labour and management. Periodical meetings between the Railway Board and the National Federation of Indian Railwaymen were resumed in July 1957 and agreements were reached on a number of points brought up by the Federation.

The *ad hoc* Tribunal had resumed work, and was expected to complete its work shortly.

Differences within the National Federation of Indian Railwaymen seemed to have widened and the All India Railwaymen's Federation was revived during the year. Government had consistently emphasised the need for unity and had appealed to them to have only one Federation.

It was heartening that in November last they had agreed to implement by July 31, 1958 the Unity Agreement reached by them in March 1956. The Minister said that he understood that the progress so far made in this direction was satisfactory.

1956-57—A REVIEW SECOND PLAN

The year under review (1956-57) was the first year of the Second Five Year Plan, compared to 1955-56, the last year of the first Plan, goods traffic during 1956-57 on Government railways showed an increase of as much as 10 per cent—from 113 million tons to 124 million tons.

The actual expenditure during the year was Rs. 179.09 crores. It may be mentioned that out of the total Plan allotment of Rs. 1,125 crores, the railways themselves are expected to find one-third—Rs. 225 crores—from the railway Depreciation Fund and Rs. 150 crores from current railway revenues. The balance of Rs. 750 crores is to be made available from the general revenues.

Goods traffic touched a new height of 125 million tons and 40,225 million ton miles, breaking the previous year's record of 115 million tons and 36,472 (revised) million ton miles.

The number of originating passengers rose from 1,297 million in 1955-56 to 1,383 million in 1956-57. Passenger miles increased from 39,083 million to 42,194 million.

Revenue loadings (wagons loaded for the public etc., excluding those on account of the railways' own service needs) averaged 12,168 per day on broad gauge and 7,819 on metre gauge, as against 11,374 and 7,263 on broad and metre gauges respectively during the previous year, marking an increase of 6.89 per cent on broad gauge and 7.36 per cent on metre gauge.

Taking into account non-revenue loadings also, an average of 14,275 broad gauge and 8,670 metre gauge wagons were loaded every day, as against the corresponding figures of 13,407 and 8,026 during the previous year—registering increases of 6.19 and 7.72 per cent respectively.

OPERATIONAL EFFICIENCY

Another indication of the improvement effected during 1956-57 is afforded by the net ton miles per wagon day index, which rose from the previous year's figure of 541 to 570 on broad gauge and from 203 to 210 on metre gauge, an increase of 5.36 and 8.45 per cent respectively.

Passenger train miles increased during the year by 2.70 per cent to 118.75 million, as compared with an increase of 8.01 per cent in passenger miles. Goods train miles totalled 86.64 million, representing an increase of 4.85 per cent over the previous year's figure, the comparable increase in ton miles being 10.4 per cent.

The report also brings out the fact that each wagon was loaded daily an average of 47.7 miles on broad gauge and 28.7 miles on metre gauge, as against 46.3 and 28.5 miles respectively during 1955-56.

Special attention continued to be paid to the provision of amenities for passenger and other railway users at stations and in trains. Works undertaken with the object of making rail travel more comfortable and safe were particularly watched and progressed with care.

Vestibuled de luxe trains between Delhi and Howrah, Delhi and Bombay and Delhi and Madras were introduced during the year and more new stock with improved amenities for upper as well as lower class passengers specially on the long distance trains was placed in service.

During the year, 1,361 new coaching vehicles were placed on line—565 broad gauge, 704 metre gauge and 32 narrow gauge. Of these, 910 were lower class coaches built to improved specifications, 371 being broad gauge, 507 metre gauge and 32 narrow gauge.

Also, 322 broad gauge, 254 metre gauge and 3 narrow gauge new locomotives were placed on the line.

A total of 1,306 third class coaches were fitted with fans during the year.

During the year, departmental catering was introduced on all the Zonal Railways on which it did not exist.

During the year under report, sleeping accommodation for third class passengers was provided on seven pairs of trains, including four pairs of Janata trains. Arrangements were also made for

reservation facilities for third class seating accommodation a week in advance of the date of the journey, from starting stations, from intermediate stations from where sectional craches run and also from certain other selected intermediate stations subject to a mileage limit generally of not less than 200 miles on broad gauge and 150 miles on metre gauge.

A length of 115.89 miles was opened, of which 95.82 miles represented new lines and 20.07 miles represented restoration of lines disantled.

589.45 miles of lines were still under construction, including the Khandwa-Bingoli link (187.23 miles), Quilon-Ernakulam (59.32 miles), Indore-Dewas-Ujjain (49.23 miles), Renikwa-Bhilai (43.61 miles), Etah-Barhan (36.27 miles) and certain lines in the steel plant areas.

STORES PURCHASES

Railway purchases during 1956-57 showed a significant increase over the previous years.

The total purchases showed a rise of about 36 per cent to Rs. 171.37 crores during the year, of which the value of indigenous materials amounted to Rs. 125.82 crores, stores worth 19.85 crores were imported direct while Rs. 25.70 crores worth of foreign stores were purchased through agents in India.

While most of the increase was on indigenous purchases, it was not possible to reduce imports primarily because of increased purchases having to be made for workshop machinery, permanent way material, specialized rolling stock, hardware and electrical equipment not available in the country.

There was a substantial increase in the purchase of Khali. The total value of purchases of Khali during the year amounted to Rs. 53.99 lakhs as against Rs. 34.50 lakhs during the previous year. Similarly purchases from cottage and small scale industries recorded an improvement of 18 per cent over the previous year, to Rs. 3.78 crores.

The value of railway equipment and stores ordered by the railways during the year amounted to Rs. 248.25 crores, of which Rs. 71.92 crores worth of stores were ordered directly by the railways.

Equipment and stores valued at Rs. 81.01 crores were ordered by the Railway Board, while orders for stores valued at Rs. 68.18 crores were placed through the Ministry of Works, Housing and Supply. The balance of the stores were placed through other Ministries.

The supply position of timber particularly that of teak both from within the country and from imports continued to cause anxiety.

The cement supply position was also not satisfactory. The total allotment stood at roughly 60 per cent of the railways' demands. The steel supply position was equally critical and the lack of steel requirements continued to mount. It was, therefore, decided that in order to ensure fulfilment of the Plan, the Railway Board would take over procurement by import of track materials with effect from April 1, 1957.

The railways settled 492,962 claims during the year, as compared with 435,694 during 1955-56. The number of claims which remained outstanding at the end of the year stood at 56,891 as against 73,609 at the end of the previous year.

The net amount paid on account of goods or parcels lost or damaged was Rs. 3.33 crores against Rs. 2.56 crores during 1955-56.

No. of passengers detected travelling without tickets: 7,373,340.

Amount of fare and excess realized: Rs. 1,59,02,951.

STAFF MATTERS

The Indian railways are the largest single employers in the country. The total staff on Government railways—permanent, temporary, open line and construction—was 1,054,343 on March 31, 1957, as against 1,024,828 (revised figure) on March 31, 1956. The increase is due principally to the setting up of an organization to cope with various developmental works and projects in connection with the railways' second Five Year Plan.

Salaries including allowance, provident fund and gratuity paid to the staff of the Government railways during 1956-57 totalled Rs. 155.74 crores as against Rs. 148.22 (revised figure) crores during the previous year. The increase was due to the increase in the number of staff, annual increments, contributions to provident fund, special contribution to provident fund, gratuities, etc.

During the year, 9,645 quarters of different types for various categories of staff were constructed.

The medical organization of the railways continued to look after the health of, and provide medical aid to railway servants and their families. In all, 81 well-equipped and adequately staffed hospitals and 434 dispensaries with 3,543 beds provided medical attention and treatment to railway employees and their families. In addition, the maternity and child welfare centres continue their activities, including personal visits by health visitors and supply of milk in certain cases to undernourished children and expectant mothers.

During the year were added 8 new health units, 153 additional indoor beds and 3 mobile vans for the benefit of railway staff working in places away from dispensaries and where train services were not frequent.

Relations between railway administrations and labour were generally satisfactory.

The permanent negotiating machinery set up in 1952 with a view to maintaining contact with labour and resolving disputes and differences which may arise between staff and the administration continued to function satisfactorily during the year under review.

The National Railway Users' Consultative Council met twice during the year and made recommendations on a variety of subjects.

At the railway level, the Railway Users' Consultative Committee representing local interests, held in all 103 meetings.

FIRST FIVE-YEAR PLAN

The target set and the total spent during the First Five-Year Plan is given below:

		Rs. crores	
	Targets	1951-56	Expenditure
Rolling stock and machinery ..	297.96	242.08	
Track and Bridges ..	70.47	68.03	
Other structural engineering works (Perambur Coach Factory, Chittaranjan, collieries, port, etc.) ..	69.99	68.10	
New lines, dismantling, electrification ..	34.18	33.85	
Passenger amenities ..	15.00	15.34	
Miscellaneous items ..	2.40	—1.17	
	400.00	423.73	

The rolling stock acquired during the plan came to 1,686 locomotives, 61,254 wagons, 4,768 coaches. In spite of the large procurement the proportion of over-aged locomotives and wagons was higher at the end than at the beginning of the plan on the broad gauge, though it was lower on the metre gauge. In the position of the coaches there was however, an improvement.

Track renewal was in arrears to the extent of 7,000 miles for rails and 7,000 miles for sleepers.

Dismantled lines with a total mileage of 429.87 were restored and new lines with a total mileage of 379.98 opened for traffic. In addition about 453 miles of new lines were under construction. About 46 miles of narrow gauge lines were converted into metre gauge, and the conversion of 52 miles of metre into broad gauge was in progress.

Electrification of the Howrah-Burdwan main line and of the Tarnakeswar branch was also started during the period. The Ganga Bridge project was also taken in hand at a cost of Rs. 16.20 crores and is expected to be completed and open for traffic in 1959.

The most important project completed during the Plan was the Chittaranjan Locomotive Works which during the period produced 341 locomotives. The Integral Coach Factory at Perambur the construction of which was taken in hand in July 1953 at a cost of Rs. 7.35 crores went into production in 1955-56 and had turned out 12 coaches during that year.*

The drive towards self-sufficiency which was one of the main objectives of the Plan had a great measure of success in that indigenous production increased from 3,707 wagons, 673 coaches and 27 locomotives in 1951-52 to 14,314 wagons, 1,221 coaches and 179 locomotives in 1955-56. A start had also been made with the development of indigenous capacity for manufacturing electrical multiple unit coaching stock by placing such orders with an Indian firm †

As a result of certain measures taken there has also been a general improvement in operational efficiency. On the broad gauge, for instance, number of tons originating increased from 70.70 millions in 1950-51 to 87 in 1955-56, wagon miles per day from 38.7 to 46.3, engine miles per engine day from 107 to 111, net ton miles per wagon day from 434 to 541, percentage of engine under repair (fell) from 18.95 to 16.8, number of wagons per goods train (rose) from 47 to 49, net weight in tons per goods train from 479 to 528, train miles per running track mile per day fell from 17.0 to 11.7.

Traffic receipts rose from about Rs. 247 crores in 1950-51 to Rs. 316 crores in 1955-56. Ordinary working expenses rose from about Rs. 165 crores to about Rs. 212.95 crores. The dividend on capital rose from about Rs. 324 crores in 1950-51 to over 36 crores in 1955-56, reflecting the increase in the capital at charge from Rs. 827 crores to Rs. 969 crores. The depreciation reserve fund fell from Rs. 124 crores to Rs. 103 crores. The Railway Reserve Fund rose from Rs. 14.4 crores to Rs. 46.9 crores.

Of the Rs. 423.73 crores spent on the First Plan, Rs. 284 crores were provided by the railways from their own resources, which was Rs. 36 crores short of the original figure of Rs. 320 crores planned to be found for them.

* On April 12, 1957, the Factory turned out the 100th coach.

† It is expected that at the end of the Second Plan the Railways would be self-sufficient in locomotives and wagons.

ROADS

THE position of extra-municipal roads metalled and unmetalled as on March 31, 1956 (latest available) was as follows (in miles):—

Metalled				Unmetalled	Total
Bituminous	Concrete	Water-bound macadam	Total surfaced		
28,877	2,363	90,377	121,617	195,051	316,665

The mileage of the national highways is 13,800. The four great trunk roads are 5,000 miles long.

The four great trunk roads, stretching diagonally across the country form the framework with which most of the important subsidiary roads are linked. The most famous is the ancient marching route—known as the Grand Trunk Road—which stretches right across the northern part of the country from Delhi to Calcutta; the other three connect Calcutta with Madras, Madras with Bombay and Bombay with Delhi, and the four of them together account for about 5,000 out of the 121,617 miles of surfaced roads in the country.

The national roads are not "all weather" roads according to modern standards. The Madras-Calcutta Road in particular is far from being bridged throughout its entire length. The missing bridges will not be complete till 1967.

As regards subsidiary roads, the best and most numerous are in South India. The worst served regions are Rajasthan and parts of the Punjab on the one hand, and Orissa and West Bengal on the other, the former owing to its aridity and sparse population, and the latter because of the numerous unbridged and mostly unbridgable waterways which traverse it. In addition there are numerous other parts of the country, such as the lower Himalayas, which suffer from a dearth of communications owing to difficult terrain.

Besides surfaced roads, there is a very large mileage of "kutchas" roads amounting to approximately 195,051 miles, some of which are good for motor traffic during the dry weather. Of the total length of kutchas roads, 38,139 miles or nearly 20 per cent were constructed under the Community Project and National Extension Schemes during the First Five Year Plan ending March 1956.

The road mileage per 100,000 persons is 82, and per square mile 0.25.

The department in the Central Government which deals with the overall direction of the roads plan and co-ordination of State planning is the Roads Wing under the Ministry of Transport and Communications. The chief official is the Consulting Engineer (Road Development) who is also Joint Secretary to the Ministry of Transport and Communications.

The Roads Wing gives technical advice and arranges for the allocation of Central Road Fund reserves among the States.

An Inter-State Transport Commission has been set up to develop, coordinate and regulate operation of motor vehicles in area or route common to two or more States. Mr. Nagendra Singh, Joint Secretary in the Ministry of Transport is their first chairman.

DEVELOPMENT COMMITTEE

The Road Development Committee of 1928 recommended the creation of a Road Development Fund out of a two-anna share per gallon of the proceeds of the import and excise duties on motor spirit, whose unexpended balances should not lapse at the end of the financial year. The share was later raised to two and a half annas per gallon.

The resolution dealing with the disposal of the Road Development Account at present in force in India was passed by the Indian Parliament in 1950. It says that the special tax on

petrol introduced in 1929 shall continue to be levied for road development, the proceeds of which, after retaining a reserve of 20 per cent for administration, research and special grants-in-aid, shall be allocated for expenditure in the different States in the ratio of the petrol consumption in the various areas. These sums may be spent on the construction, reconstruction or substantial improvement of roads and bridges including the cost of preparation of road schemes—but not for ordinary road upkeep or maintenance—on interest and amortization charges on road loans sanctioned hitherto by the Government of India and also on administration of State Boards of Communications and establishment connected with the control of motor transport.

Up to the end of March 1955 total receipts in the Central Road Fund since its inception were about Rs. 534 crores and those in the Central Road Fund Reserve since its inception were about Rs. 10 crores.

In the beginning of 1955 the annual revenue accruing to the Fund amounted to roughly Rs. 54 crores including credits to the Special Reserve of about Rs. 1 crore per annum. For the first 15 years after its inauguration the Central Road Fund was the main source of revenue for the construction of new roads or the improvement and modernisation of existing ones. However in the beginning of 1958 this Fund represented hardly 7 per cent of the total tax revenue from motor transport, 10 per cent of the total expenditure on original road works provided for in the Second Five Year Plan and 7 per cent of the gross expenditure on roads inclusive of the maintenance cost of the road system.

On the administrative side roads except for the small mileage of National Highways described later are a State subject and may be divided into two main classes, State Roads under the Public Works Department and Local Roads in charge of local bodies.

India's road system is grossly inadequate for the country's needs and a comparison with other advanced countries will show how great is the leeway that has to be made.

For example, the road mileages per 100 square miles of area are 304 in the United Kingdom, 300 in France, 100 in the U.S.A., 80 in Italy and 38 in Ceylon. India's road mileage for the same area is 25, representing less than one-twelfth of the U.K. and two-thirds of Ceylon.

NAGPUR PLAN

Following persistent representations from the Indian Roads and Transport Development Association of Bombay, the need for a more adequate programme of road development than could be carried out from the Central Road Fund was accepted by the Government of India in 1943.

In December 1943 the Chief Engineers of the various States met in conference at Nagpur and evolved a road plan based on the minimum needs of the country. Adopting as their objective the very modest proposition that no village in a well-developed agricultural area

should remain more than 5 miles from a metalled road, the Chief Engineers recommended the increase of Indian Union's road mileage from 220,000 to 331,000 of which 123,000 miles would be metalled.

The net increase in road mileage under this Plan, now known as the Nagpur Plan works out at 50 per cent.

While the Government of India as well as the State Governments endorsed these recommendations in general terms, there was no general acceptance of a time-limit for the implementation of the plan.

However, five-year programmes for commencement from April 1947 and representing varying proportions of the Nagpur scheme were prepared by the States for their respective areas as part of their post-war reconstruction programmes.

These Programmes, exclusive of National Highways were estimated to cost nearly Rs. 120 crores over a five-year period, and were intended to embrace the construction or improvement of 20,000 miles of roads as under:

State & District Roads.

Mileage improvement	23,993
Mileage, new construction	17,509

Village Roads.

New construction & improvement ..	30,093
-----------------------------------	--------

Progress in the implementation of this post-war reconstruction Plan was however most disappointing. Owing first to shortage of material and later of funds Uttar Pradesh, the Punjab, Orissa and many other States had to abandon large portions of their plans, consequently development works on the scale required by the Nagpur Plan could not be undertaken till the First Five Year Plan of 1951.

During the eight years ending March 1951, India's road mileage increased by just 28,509 miles or roughly 13 per cent. Thus at the beginning of the First Five Year Plan, India had 248,509 miles of roads, of which 97,546 miles were metalled and the remaining 150,963 miles unmetalled.

FIRST FIVE YEAR PLAN

A provision of Rs. 156 crores was made for road development during the First Five Year Plan period ending March 1956. Physical achievements during the 5-year period consist of 24,071 miles of new metalled roads, and 44,088 miles of new unmetalled roads, making 68,159 miles of new roads in all. In addition 17,311 miles of existing roads were also improved to better standards. Of the new roads, 23,993 miles were constructed by Public Works Departments or Local Boards, while 44,259 miles were constructed by Community Project and A.E.S. Administrations.

At the beginning of the Five Year Plan, the mileages remaining to be constructed, in order to reach the targets of the Nagpur Road Plan, were 25,454 miles of metalled roads and 57,037 miles unmetalled roads, making a total of 82,491 miles in all.

SECOND FIVE YEAR PLAN

The provision for road development in the Second Five Year Plan is Rs. 269 crores, against Rs. 156 crores in the First Plan. Details are as under: -

(Rs. in Crores)

	2nd 5-Year Plan April 1956 to March 1961	1st 5-Year Plan April 1951 to March 1956
National Highways ..	55	27.00
State Roads financed by the Union Govern- ment	9	4.24
Central Aid for roads of inter-State or econom- ic importance ..	18	10.00
State Roads	162	89.75
Central Road Fund ..	25	25.00
Total ..	269	155.99

During the Second Plan it is expected that 22,000 miles of metalled roads and 40,000 miles of unmetalled roads will be added to the road system, thereby completing the Nagpur Plan in terms of total mileage, taking India as a whole but the actual position will be that a few areas will have road systems slightly larger than the minimum size laid down in the Nagpur Plan while many other areas will still be short of the

Nagpur targets. Moreover at the end of the Second Plan there will be hundreds of unbridged river crossings whose number, on National Highways alone, will be 56.

NATIONAL HIGHWAYS

The Central Government, as part of their contribution towards post-war development accepted liability for the construction and maintenance of the National Highways with effect from 1st April 1947.

On 1st April, 1947 the total length of the roads provisionally accepted as national highways was 13,400 miles. Consequent on partition and the integration of the former princely states with the Indian Union the total length of these roads increased to about 13,800 miles. On the 1st of April 1947 the selected national highway routes had approximately 1,600 miles of missing road links and thousands of missing culverts and bridges out of which about 150 were bridges on large rivers. In addition, about 9,000 miles of these roads had low-grade surface.

Up to the beginning of the First Five Year Plan, i.e. up to the end of 1950-51 about 110 miles of missing links and 3 large bridges were constructed and about 1,000 miles of existing roads improved. A total expenditure of Rs. 623.49 lakhs was incurred on the development of National Highways from 1947-48 to 1950-51.

During the 5 years ending March 1956, 636 miles of missing links and a large number of culverts and bridges including 30 major bridges were constructed, about 4,000 miles of existing sections improved and provided with one lane asphalted carriageway, and about 400 miles of the improved sections made fit for two-lane traffic.

At the end of the First Plan, work was in progress on the construction of 614 miles of missing links and hundreds of culverts and bridges, including 42 major bridges, the improvement and asphalted of nearly 3,000 miles and the provision of two-lane carriageway on about 300 miles of National Highways.

About 1,200 miles of missing links and new diversions (including 614 miles in progress at the end of the First Plan period) were proposed to be taken in hand under the Second Plan. Out of these 1,200 miles, about 900 miles are expected to be constructed during the Second Plan period. The balance of work will be carried over to the Third Plan period. With the construction of 900 miles of new lengths in the national highways system, the actual length of National Highways will rise from 12,000 miles as at the end of the First Plan period to 13,800 miles by the end of the Second Plan period. That is to say, all missing road links in the national highway system are expected to be constructed by the end of the Second Plan period.

Besides the construction of the missing links, it is proposed to take in hand during the Second Plan period the construction of 118 major bridges (including 42 bridges in progress at the end of the First Plan), the improvement and asphalted of 4,700 miles of existing sections (including 3,000 miles in progress at the end of the First Plan) and the widening of 3,300 miles (including 300 miles in progress at the end of the First Plan) of the improved sections of National Highways to two-lane carriageway. It is expected that during the Second Plan period, 60 major bridges will be completed and 1,500 miles of improved sections widened to two-lane carriageway. Work on the improvement and asphalted of 4,700 miles of existing sections of National Highways is expected to be completed during the Second Plan period.

REVENUE FROM MOTOR TRANSPORT
In 1955-56 the expenditure on roads, it is estimated, amounted to Rs. 73 crores made up of Rs. 52 crores on construction works and

Rs. 21 crores on road maintenance. The Governments at the Centre and in the States realized in the year an equal amount of revenue from motor transport, as under :—

	Revenue, approx. 1955-56 (Rs. in Crores)
Central Government.	
Motor Spirit and Diesel Oil Duties	32.26
Tyre Excise and Import Duties	5.65
Vehicle Parts Imports Duties	10.26
	48.17
State Revenue.	
Vehicle Taxes and Petrol Sales Taxes, etc.	25.25
	73.42

MOTOR VEHICLES

The number of motor vehicles in use in India in March 1956 was 418,067. In terms of the population of the country, this represents 89 vehicles per lakh of inhabitants. Corresponding figures for some of the other countries are: Ceylon, 803; Spain, 808; Great Britain, 9,595 and France, 9,079. These figures show how inadequate is the volume of motor transports in India.

The 418,067 vehicles operating in India in March 1956 were distributed among the various States as shown in the table on next page.

* Prior to reorganization

NATIONALISED TRANSPORT

Programmes for nationalisation of road transport have occupied a prominent place in the plans of State Governments from 1946 onwards. In April 1951 nationalised bus services had a total fleet of about 8,000 vehicles. By the end of the first Five Year Plan, i.e., in March 1956, the total number of such vehicles increased to approximately 11,000 representing about 27 per cent of the passenger services in the country and 2 per cent of freight transport.

Nationalised bus services are estimated to cover in 1956 the whole of Bombay State and Himachal Pradesh as they existed prior to the States' re-organisation.

No nationalisation has taken place in the areas covered by the old States of PEPsU, Ajmer, Bhopal, Coorg, Tripura and Vindhya Pradesh but in the remaining parts of the country the extent to which services have been nationalised varies from one State to another, some having started only experimental nationalisation while

in others anything up to half of the bus services are under State ownership.

Uttar Pradesh, which, next to Bombay, has the largest nationalised fleet, operates buses on half the mileage of metalled roads of the State, spread over, more or less uniformly, from one end of the State to the other. Nationalised buses in U.P. represent a little over one-third of the total number of buses in operation. Next in importance is the area covered by the old Hyderabad State where roughly half the bus routes were operated by the nationalised services. In Travancore-Cochin, now part of Kerala, arterial routes covering a mileage of 700, out of 4,500 miles of motorable roads in Travancore and Cochin were operated by State buses. In Madras, nationalisation is confined to the limits of Madras City. Likewise West Bengal has nationalised transport in and around the city of Calcutta in addition to the Cooch Behar area. In Bihar, State services operate in areas around Patna, Jamsheerpur, Gaya, Ranchi, Monghyr and Bhagalpur. In Orissa they are operated around Puri, Bhubaneswar, Balasore, Berhampur and

Koraput. Similarly in Punjab, Jullundur, Amritsar and Anand are centres of nationalised services. In addition to the City of Delhi, nationalisation has also taken place in parts of Assam, the old Madhya Pradesh, Madhya Bharat and Mysore.

Freight transport is operated by certain State Transport organisations such as those in Assam, Bombay, Uttar Pradesh, Jammu & Kashmir and Himachal Pradesh. While these freight lorries as a rule operate on charter basis or on scheduled parcel services without monopoly, the State Transport in Assam has a monopoly of the truck traffic on 68 miles of roads.

Expansion of nationalisation during the Second Plan period ending March 1961 will be confined to passenger services. The allocations in the Second Plan will permit of the number of nationalised vehicles being increased from 11,000 to 16,000. Of the additional 5,000 vehicles, 781 are expected to go to Bombay, 753 to West Bengal, 460 to Travancore-Cochin (now Kerala), 430 to Bihar, 334 to Delhi, 278 to Orissa, 237 to Assam and 101 to Uttar Pradesh.

NUMBER OF NATIONALISED VEHICLES, 1954

The following table gives details regarding the number of nationalised vehicles in the States as in 1954.

States*	Buses	Goods Trucks	Taxis	Total
PART 'A'				
Assam	143	92	14	249
Bihar	275	—	—	275
Bombay	3,813	835	—	4,648
Madhya Pradesh	280	—	—	280
Madras	382	—	—	382
Orissa	127	—	—	127
Punjab	235	6	—	241
Uttar Pradesh	1,538	218	50	1,806
West Bengal	316	—	—	316
PART 'B'				
Hyderabad	775	—	—	775
Jammu and Kashmir	52	369	29	450
Madhya Bharat	268	—	—	268
Mysore	196	—	—	196
Rajasthan	14	1	1	16
Saurashtra	78	—	—	78
Travancore-Cochin	452	—	—	452
PART 'C'				
Bilaspur	3	7	—	10
Delhi	304	—	—	304
Himachal Pradesh	229	82	—	311
Kutch	77	—	—	77
Manipur	19	32	—	51
Nationalised vehicles in 21 Administrations	9,556	1,642	94	11,292
Non-nationalised vehicles in the same Administrations	26,426	85,825	13,492	1,25,743
Total, nationalised and non-nationalised vehicles in the same Administrations, estimated excluding miscellaneous vehicles	35,982	87,467	13,586	1,37,035
Percentage of nationalised to total	26.55	1.88	0.69	8.24

* Pre-reorganization.

INLAND WATER-WAYS

IN pre-railway days inland navigation played an important role in the transport system of the country. The decline began with the construction of railways in 1855. While the railways received every assistance the water transport was allowed to languish.

Part of the reason for the decline was that large volumes of water were drained off for irrigation thus helping to depress the level of the water. This happened more particularly on the Ganga.

Inland water transport has remained essentially within the sphere of State control. To some extent this is inevitable. Short distance waterway cannot be usefully controlled by a Central authority.

But the position of water-ways traversing more than one State or connecting economically important regions with major ports appears to be different. The State Governments may not have the necessary resources for development. Whether inland water transport can compete with other quicker modes of transport is doubtful. But there are regions such as Assam, for example, where the economy depends to a great extent on water transport. There are also areas where water transport can help relieve congestion in rail transport.

It has come to be recognised that the most rational way to deal with a river is to treat it as a unit from the source to the mouth irrespective of administrative boundaries. Also the utilisation of the water resources of a river should, as far as possible, be on a multi-purpose basis.

Some canals constructed for irrigation have included provision for navigation.

The present constitution, therefore, provides for control by the Central Government of navigation on inter-State rivers and national water-ways. Besides, the Central Water and Power Commission has assisted in the co-ordinated multi-purpose development of the water resources of the country.

The Inland Steam Vessels Act of 1947 was amended in 1951 so that now there is compulsory registration of all inland steam vessels.

Government set up the Ganga-Brahmaputra Water Transport Board in 1952 which co-ordinates and stimulates the navigational activities of the States of U.P., Bihar, West Bengal and Assam.

The whole problem of the development of inland water transport is now under examination by an Enquiry Committee under the chairmanship of Mr. B. K. Gokhale, I.C.S. (Retd.).

Looking back on the state of navigation on the main rivers about a hundred years ago, it is noticed that large steamers plied on the Brahmaputra upto Dibrugarh; on the Ganga as far as Gurmukteshwar, over 700 miles above Patna; and Kanpur, en route, presented the appearance of a large port; on the Yamuna as far as Agra; and on the Ghagra, only 30 years ago, a regular service was maintained upto Ayodhya, 200 miles upstream of its confluence with the River Ganga.

Today long stretches of rivers formerly navigable have become shallow and are not used for navigation. Navigation can be restored only by deepening the channel or by using craft specially designed for shallow waters.

PRESENT POSITION

At present steamers ply regularly on the Brahmaputra river upto Dooanmukh but on the Ganga as far as Patna only with feeder services upto Buxar on the Ganga and Barhaj on the Ghagra.

There are other parts of the country where canal navigation is still active. In Andhra and Madras States for instance, the Godavari Canals, including the Dummaguda Canal, the Kistna Canals, the Buckingham Canal and the Venkateswaram Canals are important highways for water-borne traffic.

The Godavari and Kistna Delta canals in Andhra are indeed an important means of transport in that region and afford a cheap and ready mode of access to all markets.

The Buckingham Canal in Madras has played an important part in the trade of the country traversed by it, and in particular during the last war when the traffic was heavy it afforded appreciable relief to the railways.

On the west coast in Kerala the backwaters form the chief means of communication and transport.

In Orissa, too, there are some 200 miles of navigable canals in use.

Then there are the important water-ways of West Bengal, comprising besides the delta river system, also the canals around Calcutta.

The records of imports and exports into and from Calcutta show the extent to which the largest seaport in India depends upon its waterway communications. Post-partition figures show that 12 per cent of the trade of the port arrives and leaves by water-ways.

By far the greater proportion of the water-borne traffic of the country is carried by the unorganised country-boats. Reliable figures are not available as to the total ton-miles of traffic thus moved.

It has been estimated, however, that this would amount to only about one per cent of the total railway traffic of the country.

The approximate length of navigable water-ways at present in India is as follows:—Uttar Pradesh, 745 miles; Bihar, 715 miles; West Bengal, 777 miles; Assam, 920 miles; Orissa, 287 miles; Madras and Andhra, 1,700 miles; Total, 5,144 miles.

The above mileages are approximate and take into account only the main water-ways navigable by steamers and large country-boats. They do not include the numerous tidal creeks on the coasts which are not connected to an inland water-ways system.

Out of 5,144 miles of navigable water-ways 1,762 miles are navigated by steamers, details of which are given below:—

	Miles
River Ganga—Patna to Lalgaola (Border)	315
Patna to Buxar (Feeder service)	100
River Ghagra—Confluence Ganga, Ghagra to Barhaj	97
River Hooghly—Calcutta to Sundarbans (Border)	150
River Brahmaputra—Dibrugarh to Dhubri (Border)	400
(Feeder services on tributaries)	375
(Feeder service in Surma Valley)	85
River Purnagirathi—Calcutta to Ganga River (during rains only)	180
River Brahmaputra—Dibrugarh to Sadiya (during rains only)	60
Total	1,762

FUTURE

1. **Uttar Pradesh:** (a) Revival of navigation of the Ganga river, Patna-Buxar-Allahabad. (b) Revival of navigation on the Ghagra river upto Bahram Ghat.

2. **Bihar:** (a) Navigation on the Kosi river is included in the programme of the Kosi Dam Project. (b) Development of navigation on the Gandak river. (c) Development of navigation on the Son river, feasible with the construction of the Rihand Dam.

3. **West Bengal:** (a) The construction of a navigation canal from Durgapur to the Hooghly river to connect the coal-fields in West Bengal and Bihar with the port of Calcutta, is included in the programme of the Damodar Valley Project. (b) Reuscitation of the Bhagirathi route affording a direct and much shorter navigation connection from the port of Calcutta to Bihar and U.P.

Work on (a) is in progress.

4. **Orissa:** (a) Reuscitation of the Orissa coast canal to restore the connection between the Hooghly and Dhamra rivers. (b) The

Mahanadi Valley Project makes provision for the development of navigation on the Mahanadi river upto Hirakud dam, about 300 miles from the sea.

5. **Assam:** The various tributaries of the Brahmaputra offer considerable scope for development of navigation.

6. **Madhya Pradesh:** Provision for navigation of the Narmada river is aimed at in the investigations in progress on the Narmada Valley projects.

7. **Bombay:** The construction of dams on the Narinada and Tapi rivers will provide navigational facilities on these rivers. The Kakrapar dam will help provide navigation in the surrounding area.

8. **Andhra:** Development of the Kistna, and Godavari rivers could also provide navigational facilities.

A priority list has been drawn up in accordance with which it is proposed to develop navigation. In the first stage it is proposed to extend navigation on the Ganga river above Patna as far as Allahabad.

An Inland Water Transport expert, Mr. J. J. Surle of Holland who visited India, inspected the waterways of the Ganga, Ghagra and Brahmaputra rivers, suggested a shallow-craft push two pilot projects comprising a fleet of two 250 B.H.P. tugs and eight 100-ton barges. On the basis of his recommendations, further surveys were undertaken at the instance of the Ganga-Brahmaputra Water Transport Board by the Central Water and Power Commission on the Ganga and Ghagra rivers. He also prepared the designs. Orders for the craft have been placed and on their procurement the project will be started. The cost of the craft is about Rs. 20 lakhs. This is being met out of a special grant given by the Government of India.

Mr. Surle had also recommended two other projects viz., a project for the development of shallow draught navigation with smaller craft on the feeder rivers of the Brahmaputra and of a diesel operated ferry vessel on the Brahmaputra. These have been included in the scheme of financial assistance agreed to by the Planning Commission during the Second Five-Year Plan period.

Surveys are now in progress for drawing up specifications of the craft required for the Assam Feeder river project. The specifications for the diesel ferry vessel across the Brahmaputra have been finalised.

In addition to these two projects, it is proposed to execute development works to the extent of Rs. 150-22 lakhs in the Ganga-Brahmaputra region as a part of the Second Plan. These include dredging of important waterways, provision of aids to navigation such as radio telephony and automatic beacons, and the development of inland port facilities at selected places such as Gauhati, Pandu, Dhubri, Karimganj, Patna and Manihari.

Survey work at Pandu is finished. A scheme has been prepared for building a modern port there for inland craft. The scheme is likely to be implemented in stages.

Arrangements are also being made to provide automatic beacons on the Sundarbans during 1957.

The Ganga-Brahmaputra Water Transport Board has to meet a recurring expenditure of about Rs. 50 lakhs during the five-year period.

For South India, the following schemes have been selected for investigation and provision as shown against each has been made in the Second Five-Year Plan:—

Development of the Buckingham Canal including the linking up of the canal with the Madras Harbour	Rs. 115 lakhs.
Development of West Coast Canals	Rs. 45 lakhs.
Investigations relating to the first project are in progress.	

OVERSEAS COMMUNICATIONS SERVICE

Allotment under the First Five-Year Plan . . .
Rs. one crore.

Allotment under the Second Five-Year Plan
. . . Rs. 2 crores.

Overseas Communications Service is a State activity working directly under the Ministry of Communications and Transport on commercial lines, with the Head Office at Bombay. Its functions are provision, operation and development of all facilities for communication between India and the outside world.

The chief administrative head of the Service is the Director General, Overseas Communications Service.

The Service has two main branches, viz. Traffic and Engineering. The Traffic branch is under the control of the Dy. Director General (Traffic) and the engineering branch is under the control of the Chief Engineer.

The Overseas Communications Service has four gateway centres for handling international communications. The Bombay Centre has its transmitting station at Kirtree, receiving station at Dhond and the Central Traffic Office at Bombay. The transmitting and receiving stations as well as the Central Traffic Office are inter-linked by wired wireless circuits.

Calcutta centre has its transmitting and receiving stations at Halisahar and Hatikanda about 30 and 36 miles respectively from the main Traffic Office at Dalhousie Square, Calcutta.

Delhi Centre is still worked on a temporary basis but it will have soon its main transmitting station at Kalkaji and receiving station at Chaitrapur connected to the Traffic Office at Connaught Circus, New Delhi.

Madras is a cable station but it will soon have a radio centre with its transmitting station at Korattur and receiving station at Padilanelur connected to the Central Traffic Office in the General Post Office buildings, Madras.

The following radio services are now operated by India :—

	Date of Inauguration
1. India-United Kingdom Wireless Telegraph Service	23-7-27
2. India-United Kingdom Radio-Telephone Service	1-5-33
3. India-Australia Wireless Telegraph Service	14-1-42
4. India-China Wireless Telegraph Service	25-2-42
5. India-United States of America Wireless Telegraph Service (via Mackay)	15-8-44
6. Delhi-London Wireless Telegraph Service	29-8-44
7. India-United Kingdom Radio-Photo Service	29-4-48
8. India-United States Radio-Photo Service	29-4-48
9. India-Afghanistan Wireless Telegraph Service	12-1-50
10. India-Japan Wireless Telegraph Service	17-8-50
11. India-Indonesia Radio-Telephone Service	2-10-50
12. India-Indonesia Wireless Telegraph Service	1-2-51
13. India-Thailand Wireless Telegraph Service	15-2-51
14. India-Russia Wireless Telegraph Service	18-4-51
15. India-Egypt Radio-Telephone Service	2-7-51
16. India-United States of America Wireless Telegraph Service (via RCA)	2-7-51
17. India-Iran Radio-Telephone Service	1-8-52

	Date of Inauguration
18. India-Japan Radio-Telephone Service	14-8-52
19. Calcutta-London Wireless Telegraph Service	12-3-53
20. India-East Africa Radio-Telephone Service	18-8-53
21. India-Hongkong Radio-Telephone Service	23-12-53
22. India-Switzerland Radio-Telephone Service	1-3-54
23. India-Bahrain Radio-Telephone Service	15-5-54
24. India-Malaya Radio-Telephone Service	16-6-54
25. India-Aden Radio-Telephone Service	15-10-54
26. India-Saigon Wireless Telegraph Service	18-10-54
27. India-China Radio-Photo Service	19-10-54
28. Delhi-Peking Wireless Telegraph Service	3-1-55
29. India-China Radio-Telephone Service	2-3-55
30. Delhi-London Radio-Photo Service	2-3-55
31. India-Burma Radio-Telephone Service	24-3-55
32. India-Russia Radio-Telephone Service	4-6-55
33. India-Russia Radio-Photo Service	8-6-55
34. India-Poland Wireless Telegraph Service	21-6-55
35. India-Poland Radio-Telephone Service	22-6-55
36. India-Yugoslavia Wireless Telegraph Service	30-6-55
37. India-Burma Wireless Telegraph Service	15-8-55
38. Calcutta-London Radio-Telephone Service	30-12-55
39. Calcutta-Saigon Radio-Telephone Service	12-1-56
40. India-Japan Radio-Photo Service	25-1-56
41. India-Iran Wireless Telegraph Service	16-2-56
42. India-Australia Radio-Telephone Service	19-7-56
43. India-Hanoi Wireless Telegraph Service	2-9-56
44. India-France Wireless Telegraph Service	25-10-56
45. India-France Radio-Telephone Service	25-10-56
46. Delhi-London Radio-Telephone Service	26-10-56
47. India-Egypt Wireless Telegraph Service	5-11-56
48. India-Ethiopia Radio Telephone Service	25-11-56
49. India-Saudi Arabia Radio Telephone Service	30-2-57

DIRECT RADIO-TELEGRAPH SERVICES

The following links are in operation :

(a) Bombay-London; (b) Delhi-London; (c) Bombay-Shanghai; (d) Bombay-New York; (e) Bombay-Melbourne; (f) Bombay-Tokyo; (g) Delhi-Moscow; (h) Bombay-Kabul; (i) Bombay-Djakarta; (j) Bombay-Bangkok; (k) Calcutta-London; (l) Bombay-Saigon; (m) Delhi-Peking; (n) Bombay-Warsaw; (o) Bombay-Belgrade; (p) Calcutta-Bangkok; (q) Bombay-Teheran; (r) Bombay-Hanoi; (s) Delhi-Paris; (t) Bombay-Ethiopia; (u) Bombay-Saudi Arabia; (v) With Italy.

Services to other countries are provided through the international trunk routes via London.

DIRECT RADIO-TELEPHONE SERVICES

India today operates twenty direct services :

(a) Bombay-London; through London calls are extended to the following countries : Australia, Barbados, Bahrain, Belgium, Bermuda, Canada, Cuba, Czechoslovakia, Denmark, Finland, France, Gibraltar, Hungary, Iceland, Israel, Italy, Luxembourg, Mexico, Netherlands, Northern Rhodesia, Norway, Saar, Spain, South Africa, Eire, South Rhodesia, South-West Africa, Sweden, U.S.A., Vatican City, East and West Germany, Brazil, Argentina, Yugoslavia, Japan and Austria.

This service is also available to the following ships at sea via London :—

British Registered :—Queen Elizabeth, Queen Mary, Caronia, Queen of Bermuda, Mauretania, Saxonia, Ivernia, Empress of Britain, Nevada, Reina del Mar, Pretoria Castle, Oxfordshire, Corinthia, Orion, Capetown Castle and Stirling Castle, Oracles, Oronsay, Orsova, Sylvania.

U.S.A. Registered :—America, Constitution, United States and Independence.

Dutch Registered :—Nieuw Amsterdam, Rijndam, Oslof-Jord and Maasdam.

Greek Registered :—Olympia Elir.

Panamanian Registered :—Eastview.

Israeli Registered :—Israel and Zion.

(b) Bombay-Djakarta; (c) Bombay-Cairo; (d) Bombay-Teheran; (e) Bombay-Tokyo; (f) Bombay-Nairobi; (g) Bombay-Hongkong; (h) Bombay-Berne; (i) Bombay-Bahrain; (j) Bombay-Singapore; (k) Bombay-Aden; (l) Bombay-Shanghai; (m) Bombay-Bangkok; (n) Bombay-Moscow; (o) Bombay-Warsaw; (p) Bombay-Belgrade; (q) Calcutta-Saigon; (r) Calcutta-Sydney; (s) Delhi-Paris; (t) Delhi-London; (u) Delhi-Jedda and Bombay-Ethiopia.

These Radiophone facilities are also used for inter-continental interviews, discussions and programme material for purposes of re-broadcast both in India and abroad.

OVERSEAS RADIO-PHOTO SERVICE

This service enables signalling by radio a manuscript, photograph, drawing—in fact anything that is in black and white on paper and reproduction as a photo replica of the original.

The following circuits are now in operation : (a) Bombay-London, is also extended to : Australia, South Africa, Canada, Egypt, Finland, Norway, Sweden, Belgium, Portugal, Greece, Denmark, Germany, Italy, Czechoslovakia.

(b) Bombay-New York, and via New York to San Francisco. The service is regularly used by the business interests for the exchange of balance sheets, specifications and drawings of machinery, etc.

(c) Delhi-Shanghai 19-10-54
(d) Delhi-London 2-3-55
(e) Delhi-Moscow 8-6-55
(f) Bombay-Tokyo 25-1-56
(g) Delhi-France 3-12-56
(h) Delhi-Poland 27-3-57

OVERSEAS SUBMARINE CABLE SERVICE

The cable chains are :—

(a) Bombay—Aden—Alexandria—Malta—Gibraltar—London.

(b) Bombay—Aden—Mombasa—Zanzibar—Seychelles.

(c) Madras—Penang—Singapore—East Asia.

These submarine cables provide many complementary services thus providing telegraph service to other parts of the world.

MULTI-ADDRESS BROADCASTS

Overseas Communications Service handles news transmissions on behalf of the Government of India to consular posts abroad. The transmissions from New Delhi are picked up by the following

ing consular posts in Asia, Europe, Australia and America: Khatmandu, Rangoon, Singapore, Djakarta, Bagdad, Teheran, Ankara, Paris, Cairo, London, Brussels, Rome, Berne, Prague, Moscow, The Hague, Bonn, Tokyo, Canberra, Peking, and Nairobi.

The transmissions from Bombay are picked up by Buenos Aires and Rio De Janeiro.

Transmissions are also made on behalf of certain Press Agencies to different areas.

FIVE-YEAR PLANS

The First Five-Year Plan allocated one crore of rupees for development.

The plan covered modernising and expanding the existing Bombay and Delhi radio centres and opening similar centres at Calcutta and Madras.

The Second Five-Year Plan has, with an allocation of two crores of rupees, the following long range objectives in view:—

(1) to provide expanding facilities of direct communications with more foreign centres commensurate with the growing needs of the country;

(2) to provide improved grade and standard of service—greater mechanisation and improved modern techniques;

(3) to provide more powerful service for Multi-Address Broadcasts for Government and Press; and

(4) to provide leased channels to private agencies and teleprinter-call service to big business houses and for the press.

The table below shows the revised estimates for 1956-57 and the budget estimates for 1957-58 on the expense side.

BUDGETS

The revenue for the year 1957-58 was estimated at 154.06 lakhs.

The profit of the O.C.S. for the year 1956-57 was 49.16 lakhs, i.e., 30.33 per cent of Government capital.

	Revised Estimate 1956-57	Budget Estimate 1957-58
	Rs.	Rs.
Pay of officers	5,15,000	5,98,100
Pay of establishments	18,60,000	24,62,600
Allowances, honoraria	17,70,000	20,99,300
Other charges	12,14,000	14,14,300
Interest on capital (Charged)	5,57,000	6,73,000
Depreciation (Voted)	9,97,000	10,70,700
Payments to other Government Departments, etc.	34,80,000	37,50,000
Charges in England	91,000	91,000
Total	1,04,84,000	1,21,59,000
Capital Budget	30,18,900	36,00,000

BROADCASTING

In 1957 three new developments have to be noted.

An all entertainment programme called *Vividha Bharati* (All-India Variety Programme) broadcast simultaneously from Bombay and Madras on two 100 K/W short-wave transmitters was started on October 3, 1957.

In July, the 30th anniversary of AIR was observed with a variety programme provided to listeners from all stations.

Conflicting views on the introduction of television (in Bombay and Delhi) were expressed by the Prime Minister and the Minister for Information and Broadcasting. This ultimately resulted in the abandonment of the project.

Equipment already secured is however being used for training the staff in the techniques of TV, with a long-range view.

With 100 K/W short-wave transmitters working in Bombay and Madras, the pressure on transmission on the External Services in Delhi was reduced when some items were diverted to State capitals.

Broadcasting in India began as a private venture in 1927, in Bombay and Calcutta. In 1930, the Government of India were approached to take over the concern as private resources were found to be inadequate. At first, it was the department of Industries and Labour that looked after the new function of entertaining. Subsequently, the Home department took over the responsibility and under the new regime, a special Ministry for Information and Broadcasting was created to look after the growing work.

The head of AIR is the Director-General, All-India Radio, whose office is located in Broadcasting House, Parliament Street, New Delhi.

Other officers at headquarters are: Chief Engineer, Deputy Directors-General, Deputy Chief Engineer, Director of Programmes, Director of Programme Planning, Director of Listener Research, Deputy Director of Administration and Assistant Directors of Administration.

AIR stations transmit for about five to ten hours a day.

This is generally split up into three transmissions, morning, afternoon and evening.

Programmes are planned by Station Directors with the assistance of the Programme Executives and Programme Assistants. Details are worked out well in advance of their scheduled dates and are published in the journals of All-India Radio.

Broadcasting House.—Probably the largest centre of broadcasting activity in the East, Broadcasting House, New Delhi, was completed in 1943. Architecturally, it is one of Delhi's newest and most striking sights. It represents from the point of view of equipment, the latest practice in radio engineering.

Research and Maintenance Departments.—These two departments are located in New Delhi.

The Research Department deals with all technical problems, concerning reception and transmission. Special studies are undertaken on ionospheric data and forecasting transmission conditions, field strengths of short and medium wave stations, atmospheric noise levels prevalent in various parts of India, studio and recording characteristics and development of cheap receivers.

The Department also maintains a field station at Todapur near Delhi where the frequencies of All-India Radio Stations are constantly checked.

The Maintenance Department handles problems which arise in the upkeep and day-to-day operation of the engineering equipment used by All-India Radio in addition to maintaining Central Stores Depot.

Publications.—AIR has programme journals for home services as also for External Services.

Akashvani (English), *Awar* (Urdu), *Sarang* (Hindi), *Belar Jugat* (Bengali), *Fani Telugu*, *Vanoti* (Tamil), and *Nabborani* (Gujarati) are for home services.

Only the *Akashvani* is issued weekly, while the rest are fortnightly publications, with a large list of regular subscribers.

For the External Services, *India Calling*, with two versions, the Eastern and the Western, is supplemented by Arabic, Burmese, Chinese and Persian editions.

Four more editions in French, Indonesian, Pushtu and Tibetan are planned (Dec. 1957). These are issued free of cost to those who ask for them.

As the copyright of all the material that is broadcast—talks and discussions—is vested in the Government of India, it was decided to make use of the vast reading matter by issuing *AIR Selections* (English) and *Prasarika* (Hindi), periodically.

The experiment proved a success and a scheme for publishing AIR Selections quarterly in 8 more languages—publication of *Prasarika* in those languages—has been put into operation.

Monitoring.—The Monitoring Service (Simla) keeps a round-the-clock watch on transmissions from all the main broadcasting systems of the world, monitors news and commentaries and selected talks transmitted from those stations in English, in Indian languages and in some foreign languages, from 30 different countries.

Listener Research.—The primary purpose of Listener Research is to determine the listening habits and programme preferences of radio listeners by ascertaining from time to time their reactions to items broadcast.

Although Listener Research in this country is still in its infancy, a good deal of information on trends of listening has already been collected and more light is constantly being shed on this absorbing subject.

For this purpose, contact with listeners is maintained through their letters, press reactions, field surveys and questionnaire studies of listeners' preferences and reactions to programme broadcast.

Advisory Committees, established at the Broadcasting Stations in consultation with the State Governments, keep the Director-General, All-India Radio, in touch with local public opinion in programme construction and advise him on such matters.

PROGRAMMES

Women's Programmes.—These are in the regional language and are broadcast from almost all the stations. They consist of music, features and talks.

Children's Programmes.—Wherever possible the children are divided into two or three age groups. The programme is conducted or compered by an elderly character known to the children. Another elderly person usually a woman is used to assist the comper.

These are generally broadcast twice a week. Fables, stories from classics and musical items, form the content of the programmes, and listeners are encouraged to participate.

The programmes are conducted from all the stations, the time varying from 30 minutes to an hour.

In the rural broadcasts there is a children's day once a week.

School Broadcasts.—The school broadcasts are meant to supplement the regular curriculum of the school.

The students are divided into two or three age groups, and the talks, dialogues, features or musical items are in the mother-tongue, English, Hindi or Sanskrit.

History, geography and general sciences are the subjects generally covered.

The hours vary from station to station.

There are Educational Committees to advise the Station Director in the composition of the programme for the academic term, and these are announced in pamphlets for each term.

Occasionally students from a particular class are taken to the radio station to give a performance.

The idea is that students should listen to the broadcasts while at school in the company of their teachers.

Industrial Broadcasts.—Stations in such industrial towns like Bombay, Calcutta, Lucknow, Madras, Ahmedabad put out suitable programmes in the language of the local working class.

The programme contains dialogues, features and news reviews, all relating to workers and their organisations.

For recreation devotional music and popular songs are used.

Labour Welfare Centres are encouraged to participate in the programme.

Rural Broadcasts.—While the provision of programmes is a central responsibility, the supply of listening sets to the rural population is the responsibility of State Governments.

Supplementary or spare time occupations are suggested, and information is given on items like improved seed, new implements, sowing, crop and cattle pests and their remedies, and market rates of current agricultural produce.

Weather bulletins during the monsoon are a regular feature of the composite programme.

The Union Government has put into operation a scheme for popularising community listening by subsidising State Governments for the purchase of receiving sets. The goal is to provide each village with a population of 1,000 or above, with at least one set.

The subsidy is 50 per cent of the cost of sets and its immediate acceptance is reflected in the rapid rise in the number of community receiving sets.

Before the scheme was introduced, there were (March 1954) about 6,000 sets in rural areas all over India. In October 1956 their number was estimated at well over 20,000. The distribution of these sets is given in the table below.

As part of the scheme, Government has standardised the community receiver set with the help of the radio industry and the Indian Standard Institution. It has been possible to produce such sets for Rs. 120 each and with larger bulk orders the price may go down still further.

Community Listening Sets Oct. 1956

School Licences	State†	Community Licences
594	Andhra	1,614
39	Assam*	189
1,043	Bihar	1,042
778	Bombay	1,333
38	Saurashtra	294

399	West Bengal	1,289
7,829		19,466

Note: Assam includes Manipur, Tripura and NEFA. The Central Circle includes Madhya Pradesh, Vindhya Pradesh areas. Punjab includes PEPSU, Bikaner, Kashmir and Himachal Pradesh areas. Rajasthan includes Madhya Bharat, Ajmer and Bhopal areas.

* These States are unaffected by the reorganisation of States in Nov. 1956.

** The number of school licences are given in the table below.

† Before the reorganisation in November 1956.

Broadcasts in Naga Dialects.—The special conditions prevailing in the north-eastern frontier area make it essential to undertake broadcasting in the tribal languages.

Gauhati station in that region has had to be provided with short wave transmitters. Already items in Garo and Khasi—Jaintia dialects are being put out. Other dialects prevalent in the Naga Hills and the adjoining regions, about 15 in number, are also to be employed for broadcast from Gauhati.

Many of the dialects have no script and literature of their own.

PILOT UNESCO PROJECT

All-India Radio conducted a unique experiment in Bombay with the co-operation of many institutions and expert knowledge from the various departments. The project is financed by UNESCO to the tune of \$19,000 (about Rs. 80,000).

The project covered Community Project Areas in Kolhapur, Karjat, Mandangad, Ahmednagar, Nasik, Poona, Satara and Thana, comprising in all 150 listening centres.

A series of 20 programmes of 45 minutes each was broadcast from Poona and relayed on Bombay B. As the entire area happens to be Marathi speaking, the programme was in Marathi and contained dramatised stories, panel discussions, talks and interviews, recorded or live programme by members of forums, and five minutes summary of the consequences of the discussion held by the forum.

Participation by the members of the forums was an ingredient of programme.

Farm Forums.—Encouraged by the results of the Unesco pilot project carried out in 150 villages AIR has now decided to continue the scheme, in the same area with the co-operation from the Government of Bombay.

The duration of the rural programmes has already been extended to one hour in all places, and a proposal to try this project in other regions is under consideration.

Hindi Lessons.—For popularising Hindi in non-Hindi-speaking regions, All-India Radio devotes 15 minutes a day, five days per week, to impart instruction through the regional languages. These lessons planned on the classroom model, by the direct method, are helpful to those who want to learn Hindi by themselves without going to any school or having to attend any classes. The planning of these lessons is entirely different from the way in which the BBC for instance "teaches English by radio".

Anniversary Programmes.—Anniversaries of national leaders like Tilak, Gokhale, Dadabhai Nauroji, Srinivasa Sastry, Motilal Nehru, Sarojini Naidu, Vallabhbhai Patel and of great musicians like Tansen, Bharati, Bhattacharya, Vishnu Digambar and Abdul Karim Khan will be celebrated on a national scale.

National Programmes.—The Saturday National Programmes lasting ninety minutes have been quite popular. It is generally so planned that Northern and Southern (Karnatic) music alternate every Saturday. Arrangements are being made to have this item originate at other places. At present most of the Saturday concerts originate from Delhi and all stations relay them. A greater variety will be available when concerts take place in Bombay, Nagpur, Madras, Bangalore or Trichy.

Talks.—Important topics of a national character are dealt with by an accepted authority in a nation-wide broadcast on Wednesdays at 5.30 p.m.

Plays, Operas.—On alternate Thursdays, a national programme of plays or operas is arranged in such a way that all stations have the same item, in their respective languages, prepared from one single script. The literature of one region is thus made available to all the other parts of the country at the same time.

Development Projects, Factories.—In order to make the country plan-minded, a feature on some of the bigger national projects like Bhakra-Nangal, is arranged once a month, and it is put out on the air simultaneously from all the stations, the script with actual effects having been supplied from Delhi.

Gandhi Prayers & Memoirs.—Mahatma Gandhi had his own way of saying prayers and those prayers are broadcast from all stations on Friday mornings. Also the reminiscences of men and women who had known him, immediately after the prayers. The material used by one station is supplied to all the others. In this way a huge pile of biographical material is being collected.

Film Music.—AIR is now in a position to play film music which is quite popular. In the new Variety Programme, (Vividha Bharati) nearly two hours are devoted to film music daily, and Radio Kashmir has on an average an hour of film music every day.

The necessary contracts with film producers have been signed and the listeners get what they ask.

Inter-Linking of Stations.—The inter-linking of the regional stations is being tried as this makes it easy to maintain a uniformity of programmes, and also provide common listening when a first-rate performance is scheduled. Thus on Wednesdays, musical concerts are arranged from one of the stations in the Western Region and other stations relay it. Common programmes like Book Reviews, the Gandhi Memoirs are planned on a linguistic basis.

Madras and Trichy, for example form a unit for Tamil programmes, and Madras, Vijayawada and Hyderabad for Telugu. For music however, all these stations as also Trichur, Kozhikode, Trivandrum, Bangalore and Dharwar form a larger unit.

Prasar Geet & Sugam Sangit.—In order to provide all stations with standardised light and popular music, All-India Radio organised its own units in different regions for the production of songs. A processing plant capable of producing many discs for its own use in the first instance and for selling them to outside agencies on the lines of the BBC's Transcription Service, has been set up by All-India Radio.

Transcription Service.—The plant produced 165 matrices and 5,000 discs as against 45 matrices and 2,100 discs in 1950. The discs of Sugam Sangit and Prasar Geet are being supplied to all stations. Indian missions abroad required about 740 discs of important items.

Experiments in the production of long-playing records are being carried out.

Voice Recordings.—AIR already has a unique collection of Mahatma Gandhi's prayer speeches (51 hrs.). Similar recordings of the Prime Minister's speeches are also preserved. The Voices of Tagore, Sarojini Naidu, Srinivasa Sastry, C.F. Andrews, and Nandha Lal D. Kavi have been acquired for preservation.

The Monitoring Service at Simla had a very good collection of Netaji Subhash Bose's speeches over Berlin and other radio stations. But they are not recoverable now as at the time of transfer of power, someone had "shaved" the discs off. Some outside broadcasting agencies have, however, supplied AIR with records of Netaji's voice.

In the field of music, recordings of *Aftab-e-Mausiki* Ustad Fayyaz Khan (of Baroda) extending to over 20 hours, have been obtained.

Improvement of Programmes.—In addition to the regular grant for broadcasting made by Parliament, a lump sum is provided every year, to be spent at the discretion of the Minister. It is generally utilised in making certain

direct appointments of expert staff without having to go through the Union Public Service Commission. For 1954-55 and 1955-56, such grant amounted to Rs. 6 lakhs and Rs. 10 lakhs respectively.

Competitions.—In its ceaseless effort to find new talent, All-India Radio holds many competitions every year. They are for music, light and classical, vocal and instrumental, northern and southern (Karnatak) styles. The first round of these is held station-wise and the All-India round takes place in Delhi.

The competition for plays is language-wise. There are two main classes: one open to general public and the other restricted to college students.

Prizes in cash are awarded to the first three numbers. Judging from the number of entries in each variety, the competitions are quite popular and the effort is generally successful.

Patel Lectures.—This is an annual feature. The first series of lectures was given by Mr. C. Rajagopalachari in 1955 on the good administrator. The second series was delivered by Dr. K. S. Krishnan in 1956.

The third series was delivered by Dr. J. B. S. Haldane in 1957.

Other Features.—Some other features are Tamil by radio from Delhi, Lucknow and Allahabad; radio news-reels called Dhevani Chitra featuring events and news of a regional character from Bombay, Poona, Nagpur, Ahmedabad, Baroda and Rajkot. There are also local weather bulletins at the end of the day's transmission.

NEWS SERVICES

The News Services Division now broadcasts 76 bulletins in 28 Indian and foreign languages. 30 of these bulletins are broadcast in the External Service while 46 bulletins are broadcast in the Home Services, the total transmission time being 14 hours and 34 minutes.

The languages used in the Home Services are:

Assamese, Bengali, English, Gujarati, Hindi, Kanarese, Kashmiri, Malayalam, Marathi, Oriya, Punjabi, Sanskrit, Tamil, Telugu, Urdu, Konkani and about 20 other dialects.

All the news bulletins are prepared in the News Service Division and broadcast from the transmitters at Delhi set apart for news.

Each regional station relays the bulletins suitable for its listening areas.

News Reels.—Radio news reels of 10 mts. each on the line of the BBC's radio news reels, have been introduced from Delhi in English and Hindi as a weekly event in the first instance.

Regional News.—Centralised news from Delhi does not meet the requirements of the listeners adequately. In an effort to broadcast only news of All-India importance from Delhi, items of local interest are dropped. The State legislatures and other local institutions require to be covered for news. Some of the larger stations, capitals of States, now devote ten minutes a day for covering regional news in languages other than English. The timings however are late in the afternoon.

Except Punjab and Kashmir all stations now broadcast regional news.

A few minutes are set apart at each station for local announcements. This period accommodates news of purely local interest.

External Services.—That the External Services serve a useful purpose can be seen from the fact that nearly 10,000 copies of *India Calling* (English) are distributed amongst listeners.

Sixteen languages are used in these broadcasts and the daily time taken by them is (in mts.):—Arabic 90; Burmese 55; Chinese 75; English 380; French 45; Indonesian 45; Persian 75; Portuguese 30; Punjabi 60; Swahili 35; Tibetan 30.

Among the Indian languages are: Gujarati 55; Hindi 145; Konkani 30; Tamil 60.

Thus daily 20 hrs. and 10 mts. are required for these broadcasts, arranged at times suitable to the region to which they are directed, keeping the Indian population there in touch with the mother country.

In relation to time these broadcasts are composed of 25 per cent news, 33 Indian music, 3 Western music, 12 talks-discussions, 3 drama, 3 programme publicity, 21 Koran and other religious items.

AIR STATIONS

At present (1937 December) there are 30 broadcasting stations.

* Also on short wave. Medium wave remains unchanged throughout, but short wave varies according to the season and the part of the day.

† Only short wave for the time being.

LICENCES

Broadcast receiver licences are issued at all head and sub-post offices at a fee of fifteen rupees per year, and cover the use of receiving sets throughout India.

Broadcast Receiver Licences are issued to Municipalities or other public bodies for the reproduction of broadcast programmes in public places by the Postmaster-General of the State.

A licence issued for this purpose covers the use of one or many wireless receivers and any number of loudspeakers at one place only but does not cover any wiring outside the premises of the licensee.

A separate Broadcast Receiver Licence is, however, necessary in the case of clubs, institutions, messes, etc., for reproducing broadcast programmes at dances, concerts, bazaars, etc., to which the public are admitted.

Types of radio licences, the authorities issuing such licences and the fee payable in each case respectively:

(1) Commercial Broadcast Receiver Licence; P.M.G. of the Circle; Rs. 50; (2) Possession Licence for dealers and non-dealers; P.M.G. of the Circle; Rs. 15; (3) Demonstration Licence; P.M.G. of the Circle; Rs. 15; (4) Community Broadcast Receiver; P.M.G. of the Circle; Rs. 10; (5) Broadcast Receiver Licence (Domestic); Post Offices; Rs. 15; (6) Broadcast Receiver Licence for schools; Post Offices; Rs. 3; (7) Broadcast Receiver Licence for institutions for the blind; Post Offices; Rs. 3; (8) Broadcast Receiver Licence for crystal sets; Post Offices; Rs. 3.

The growth of domestic broadcast receiver licences at the end of each year is given below:

Year	Licences	Year	Licences	Year	Licences
1938	64,480	1944	193,585	1950	507,324
1939	92,772	1945	202,829	1951	635,026
1940	119,417	1946	232,368	1952	694,560*
1941	147,121	1947	247,100	1953	769,505*
1942	165,675	1948	286,046	1954	835,246
1943	176,061	1949	369,278	1955	890,671
				1956	900,202

* A mistake in calculation was noticed by Director-General, All-India Radio and the figures were corrected in a press-note as 473,750 and 587,169 for 1952 and 1953 respectively. In subsequent years, this correction does not seem to have been effected. The figures therefore are "official".

The following table shows the number and the value of radio sets imported into India over a number of years:—

Year	Number	Value in Rs. lakhs
1940-41 ..	38,855	35.32
1941-42 ..	52,416	41.73
1942-43 ..	18,939	32.10
1943-44 ..	5,384	6.53
1944-45 ..	895	1.51
1945-46 ..	5,982	7.04
1946-47 ..	107,114	169.58
1947-48 ..	192,172	288.40
1948-49 ..	42,202	76.59
1949-50 ..	43,355	71.66

DEVELOPMENT PLAN

The broadcasting network of All-India Radio includes 30 radio stations. The expansion which has taken place during the First Plan ensures that each language has been provided with at least one transmitting station and that fairly effective coverage is available to almost all the regions. The aim during the Second Plan is to extend the services now available for all the languages to as wide an area as it is at present possible to reach. For areas in which terrain conditions are difficult short-wave transmitters are to be installed.

Although the drive for economy has slowed down the pace of expansion of All-India Radio, the following projects are nearly complete and will add considerably to the coverage of target areas.

Five transmitters for Delhi: four a.w. and one m.w.; a.w.: 1 — 100 K w; 2 each of 20 K w; 1 — 10 K w; 1 — 100 K w m.w.

Four a.w. transmitters of 10 K/w each—at Bhopal, Gauhati, Hyderabad and Lucknow.

Two m.w. transmitters: one of 50 K/w for Tirichy and the other of 20 K/w for Bombay.

Permanent buildings for studio are to be provided wherever there are temporary arrangements at present.

To promote rural listening, community receivers are to be located in villages with a population of 1,000 and above. About 72,000 sets of this type are expected to be installed during the period of the Second Plan.

Permanent receiving centres will soon be provided at Ahmedabad, Calcutta, Cuttack, Dharwar, Gauhati, Jammu, Rajkot and Simla, although priority will be decided on regional requirements.

For studio concerts and special programmes in the presence of large invited audiences, special facilities are to be provided at Bombay and Delhi.

Following Delhi's example of using F.M. for transmission from studio to transmitters, in addition to the usual telephone wires, the establishment of an F.M. centre for Bombay has been put into operation to improve the quality of transmission and reception.

THE PRESS

ACCORDING to the report published by the Registrar of Newspapers for India (Annual Report, Ministry of Information and Broadcasting) there were a total number of 6,570 newspapers in the country on 31st December 1956.

Bombay has the highest number of newspapers (1,271) followed by West Bengal (1,129), Uttar Pradesh (756), Madras (717) and Delhi (560). The number of newspapers published in these four States and Delhi constitutes two-thirds of the total number of newspapers published in the country. The number of newspapers in the remaining States varies between 34 (Assam) and 426 (Punjab) while that in the remaining Union Territories ranges between 4 (Himachal Pradesh) and 17 (Manipur).

The highest number (70) of newspapers which came into existence during the period was in Bombay while the highest number (25) of those which ceased publication was in the Punjab.

The table no. 1 shows the number of newspapers in existence in each State on December 31, 1956:

TABLE 1

States	No. of Newspapers
Andhra Pradesh	254
Assam	34
Bihar	286
Bombay	1,271

TABLE 3. LANGUAGE-WISE DISTRIBUTION (DECEMBER 31, 1956)

Table 3 given below shows that the largest number of newspapers is published in Hindi (19 per cent.), followed by English (17 per cent.), Bengali (10 per cent.), Urdu (9 per cent.), Gujarati (7 per cent.), Marathi and Tamil (6 per cent. each). The share of newspapers in other languages is below 5 per cent. each. Hindi newspapers are reported to be published from all States except Assam and Orissa.

State/Union Territory	English	Hindi	Assamese	Bengali	Gujarati	Kannada	Malayalam	Marathi	Oriya

*Based on information received from 2,367 newspapers.

COMMON OWNERSHIP

Common ownership of more than one newspaper has been studied under three categories, namely,

- Chains* i.e. publication of more than one newspaper under common ownership from more than one centre.
- Groups* i.e. publication of more than one newspaper under common ownership from the same centre.
- Multiple Units* i.e. publication of more than one newspaper of the same title, language and periodicity under same ownership at different centres.

There are in all nine chains comprising 62 newspapers, of which 37 are dailies, 15 weeklies, seven fortnightlys, two monthlies and one quarterly. The total circulation commanded by these newspapers is approximately 18 lakh. The

Express Newspapers Limited is the largest chain covering 13 newspapers. The Hindustan Times-Leader-Searchlight Chain (or combine) controls 12 newspapers. Included in the category of chains are the six editions of the 'American Reporter' issued by the United States Information Service.

Among the Chains are :

Bennett Coleman & Co. Ltd., Bombay, Express Newspapers (Private) Ltd., Madras, The Hindustan Times Ltd., Delhi, Ananda Bazar Patrika (Private) Ltd., Calcutta, Amrita Bazar Patrika (Private) Ltd., Calcutta, Sandesh Ltd., Ahmedabad, Loksatya and Janasatta Daily, Baroda, United States Information Service, Delhi.

Among the Groups are :

The Bombay Chronicle (Private) Ltd., Bombay; The Indian National Press (Private) Ltd.,

Kasturi & Sons (Private) Ltd.; Associated Journals Ltd., Lucknow; Messrs. Kirloskar Ltd., Bombay; Kesari Maharatta Trust, Bombay; Prajatantra Prachar Samiti, Cuttack; Chandamama Publications, Madras; Tass News Agency, Delhi; The Pioneer Ltd., Lucknow; Newspapers and Publications (Private) Ltd., Patna; Shri Narakesari Prakashan Ltd., Nagpur.

Among the multiple units are :

The Statesman, Calcutta; Vishwamitra, Bombay; Daily Pratap—Veer Arjun, Delhi, Milap, Delhi; Messrs. National Journals, Agra; Nav Bharat, Jabalpur; The Lokmanya, Nagpur; Dainik Jagran, Kanpur.

Some religious societies issue newspapers. These societies are The Salvation Army; Ambala Church Council of the United Church of Northern India; Shri Ramakrishna Math.

TABLE 7

The following table shows the language-wise distribution of illustrated newspapers.

Language	Total number of newspapers examined	Number of Illustrated Papers carrying		
		Pictures and photographs	Cartoons	Comic strips

Partnership ..	12	3.13	85	5	2.96	15
Individuals ..	16	1.75	55	19	3.64	45
Trusts and Societies ..	7	3.99	66	4	1.47	34
Others ..	1	.01	18	4	.51	82
Total ..	59	35.60	58	68	29.65	42

A break-down of the costs of production for 1951 of English and language papers is given below. The number of English papers taken into

account is 9, with a total circulation of 4,02,000 and the number of language papers 21, with a total circulation of 4,22,000.

	English Papers		Language Papers	
	Rs. thousands	Per cent of total	Rs. thousands	Per cent of total
Services ..	32.30	10	11.47	6
Editorial ..	33.21	10	13.77	7
Materials ..	1,05.43	32	90.68	45
Composing, Printing ..	57.55	18	30.96	15
Distribution ..	29.03	9	18.50	9
Management ..	28.49	9	10.59	5
Overheads ..	25.83	8	16.44	8
Depreciation ..	12.37	4	9.78	5
Total ..	3,24.29	100	2,02.19	100

The average revenue per copy per annum in 1951 in Rs. was as follows:

English: 47; Hindi: 14; Bengali: 14; Gujarati: 26; Kannada: 13; Malayalam: 5; Marathi: 11; Tamil: 14; Telugu: 13; Urdu: 16.

The gross advertisement revenue for 1951 was as follows. The second column gives the figures for 15 English papers with a total circulation of 5,45,000. The third column gives the figures for 18 Indian language papers with a total circulation of 5,67,000.

	English papers Rs. thousands	Language papers Rs. thousands
Gross advertisement revenue	2,65.23	87.23

PRESS LAWS

In general the laws which affect the Press in India today are Press and Registration of Books Act, 1867; the Indian Official Secrets Act No. XIX of 1923; Sections 124-A, 153-A, 171-G, 226, 292, 293, 294-A, 295-A, 489-A, 489-502 and 505 of the Indian Penal Code; Sections 99-A-99-G and 108 of the Criminal Procedure Code; Sections 81, 84 and 87 of the Indian Evidence Act No. I of 1872; Sections 19 and 181-A of the Sea Customs Act No. VIII of 1878; Sections 5 and 7 of the Land Customs Act No. XIX of 1924; Sections

19, 20, 26, 27-A-27-D) of the Indian Post Office Act No. VI of 1898; Section 5 of the Indian Telegraph Act No. XIII of 1885; Sections 40, 52 and 53(1)(b) of the Patents and Designs Act No. II of 1911; the Police (Incitement to Disaffection) Act, 1922; Section 69 of the Trade Marks Act No. V of 1940; the Press (Special Powers) Act No. XXXIX of 1947; the Contempt of Courts Act, 1952 (Act XXII of 1952); Article 19 (1) (a) and (g) and Clause (2) and (6) of the same Article of the Constitution of India. The amendment to Article 19 (1) (a) reads: "Nothing in Sub-clause (A) of Clause 1 (the Citizen's Right to Freedom of Speech and Expression) shall affect the operation of any existing law or prevent the State from making any law in so far as such law imposes reasonable restrictions on the exercise of the right conferred by the said sub-clause in the interest of the security of the State, friendly relations with foreign States, public order, decency, morality, or in relation to contempt of court, defamation or incitement to an offence (This amendment is retrospective in operation); the Tax on Newspapers (Sales and Advertisements) Repeal Act No. XXVIII of 1961; the Press (Objectionable Matter) Act No. LVI of 1951 as amended by Act 13 of 1954; 8.7 of the Collection of Statistics Act (XXXII of 1953); the Press and Registration of Books (Amendment) Act No. 55 of 1955.

The Delivery of Books (Public Libraries) Act 27 of 1954.

The Drugs and Magic Remedies (Objectionable Advertisements) Act 21 of 1954. This Act controls the advertisement of drugs in certain cases and prohibits the advertisement for certain purposes of remedies alleged to possess magic qualities.

The Criminal Procedure Amendment Act contains a section (198B) which empowers the Government to prosecute a newspaper for defamation of public servants.

The Working Journalists (Industrial Disputes) Act (No. 1 of 1955). The Act extends the provisions of the Industrial Disputes Act, 1947 to working journalists.

The Parliamentary Proceedings (Protection of Publication) Act (No. 24 of 1956). It protects the publication of a substantial/ true report of any proceedings of either house of Parliament.

Section 11 of the Prize Competitions Act (Act 42 of 1955) contains rules regarding printing and publishing tickets, coupons, etc. in connection with prize competitions.

The Working Journalists Conditions of Service and Miscellaneous Provisions Act (Act 45 of 1955) regulates conditions of service of working journalists (See below).

The Punjab Special Powers (Press) Act was passed on 5th September 1955. It empowers the authorities to control the irresponsible activities of the press indulging in and fostering communal disharmony, dissemination of 'violent' news and pernicious propaganda of a communal nature.

The Newspaper (Price and Page) Act 45 of 1956.

The Young Persons (Harmful Publications) Act No. 93 of 1956.

The Delivery of Books (Public Libraries) Amendment Act No. 99 of 1956.

The Copyright Act 14 of 1957.

A rolling trophy of the value of Rs. 4,000 and a cash prize of Rs. 500 were instituted in Oct. 1954 for the best political piece in journalism in any year.

Press Council Bill No. XII of 1956 was published on July 31, 1956. The Bill seeks to establish a Press Council for the purpose of preserving the liberty of the press and of improving the standards of newspapers in India.

INFORMATION SERVICES

Indian Information Service

Indian Government publicity work is carried out chiefly through the following units of the Ministry of Information and Broadcasting:

1. All-India Radio, 2. Press Information Bureau, 3. Publications Division, 4. Films Division, 5. Directorate of Advertising and Visual Publicity, 6. Research and Reference Division, 7. Five-Year Plan Publicity including Field Publicity Unit.

Officers of the Bureau are attached to Central Ministries for publicity purposes.

There are regional offices of the Bureau in Bombay, Calcutta, Madras, Bangalore, Ernakulam, Lucknow, Jullundur, Gauhati, Cuttack, Nagpur, Patna and Varanasi.

There is also a Defence Wing for publicity for the Armed Forces.

The Bureau's news, feature and reference services are provided in the following languages: English, Hindi, Urdu, Gujarathi, Marathi, Tamil, Bengali, Telugu, Malayalam, Assamese, Oriya, Punjabi and Kannada.

Photographs and ebonded blocks are also issued to the press.

DIRECTORATE OF ADVERTISING AND VISUAL PUBLICITY

The Directorate of Advertising & Visual Publicity functions as the central organization for the Press advertising and display publicity campaigns of the various Ministries of the Government of India (excepting Railways) and their attached and subordinate offices.

The media used for visual publicity are posters, broadsheets, folders, pamphlets, leaflets, calendars etc., and in the field of out-door publicity, neon-signs, hoardings and display boards, cinema slides, advertising films, etc.

The Directorate has an Exhibition Division which, through its central and regional wings, organises exhibitions depicting progress of the Five-Year Plans and other themes of national importance.

PRESS COMMISSION REPORT

The appointment of the Commission was announced in a communique issued by the Government of India on September, 23, 1952.

The members of the Commission were: the late G. S. Rajadhyaksha (*Chairman*), Dr. C. P. Ramaswami Aiyar, late Acharya Narendra Deva, Dr. Zakir Hussain, Dr. V. K. R. V. Rao, P. H. Patwardhan, T. N. Singh, Jaipal Singh, J. Natarajan, A. B. Bhat, M. Chalapati Rao.

Mr. A. D. Mani took the place of Mr. Natarajan in March 1953.

The Commission held its first meeting in New Delhi on October 11 and October 12, 1952.

It submitted its report to the Government of India on July 17, 1954 (signed on July 14).

The following are some of the more important findings of the report (generally speaking, the findings apply to conditions which prevailed in 1951 or 1952):

The daily press in India comprises more than 330 newspapers with a total circulation of nearly 26 lakhs.

Capital invested in the newspaper industry is estimated at about Rs. 7 crores and capital raised in the form of loans is about Rs. 6 crores.

The annual revenue of the daily press is about Rs. 11 crores of which Rs. 5 crores come from advertisements.

The salaries and wages paid in the industry is over Rs. 4 crores of which about Rs. 85 lakhs go to journalists.

The number of newspapers in the country should be greatly increased and more newspapers should come up in the district towns.

A minimum price should be fixed at which papers of a particular size can be sold.

The price-page schedule should prescribe not only the maximum number of pages that could be sold at a particular price, but also the minimum number that must be offered.

The quantum of advertisement in a week's issue of a newspaper should not exceed 40 per cent of the total area.

The publication of newspapers and periodicals should be made a Central responsibility.

To ensure that the schedule is not circumvented by indirect means of price-cutting provisions should be made:

(1) Narrowing down the range of commission that should be paid to news agents, say, between 25 and 33 1/3 per cent.

(2) Banning the publication of entry forms for prize competitions in newspapers and periodicals, which is considered an unjournalistic activity.

Every paper should be constituted as a separate unit so that its profits and losses are definitely ascertainable and both the proprietor and the employees know where they stand.

In the case of multiple editions, each unit should be separated from the others in the matter of accounts. Where a chain consists of a number of groups, each group should be separated from the other.

A strict code of advertising which all members would be compelled to follow and which would be binding also on the associations of advertising agencies and advertisers should be adopted.

The Act for the regulation of the press as an industry should include a section which makes it an offence, punishable with fine or with imprisonment, the issue of fraudulent advertisements for publication.

The appointment of a Press Registrar for the country for the compilation of facts and figures relating to the industry is commended. It should be made incumbent on each newspaper and periodical to file certain returns with the Registrar.

The Registrar should bring out an annual report on the working of the press on its organisational side, including working conditions in the industry, and concentration of ownership.

The present demand for newsprint is estimated at 60,000 tons a year.

A State Trading Corporation entrusted with a monopoly of imports, should also take over the entire output of the Indian mills on a fair basis, and sell it, along with imported newsprint, at equated prices.

NEWS AGENCIES

However objective a news agency strives to be, there are certain drawbacks which arise from a monopoly and which could be obviated only by a competitive service available freely to all users. In the public interest steps should be taken to see that there is more than one news agency functioning efficiently.

News agencies should not be State-owned or State-controlled, and any assistance from the State should have no strings attached, and the State should not have any voice in the control of the agency either editorially or administratively.

In the interests of greater efficiency and smoother operation, certain changes may be brought about in the management of the news agencies.

In the case of P.T.I., a public corporation should be set up, based on the existing organisation but controlled by a board of trustees whose chairman would be appointed by the Chief Justice of India.

In the case of U.P.I. the management is to be by a board of trustees. In both cases, the board should include a trustee to represent the employees.

GOVERNMENT ADVERTISEMENTS

The Government should place advertisements having regard to the following considerations: (1) circulation of the paper and the rates charged by that paper; and (2) readership designed to be reached for the purpose of the particular advertisement.

The Government should assess the rates not with reference to the total circulation of the paper but with reference to the circulation in the area which they intend to reach.

The Government would be justified in claiming special consideration in respect of the rates charged.

There should be a telescopic rate subject to an overall ceiling, which should be treated as the maximum.

The Government should take the lead in breaking up the practice of charging combined rates for multiple unit publications.

The liberty and freedom to place advertisements wherever one likes, cannot be conceded to the Government which is a trustee of public funds.

Advertisements cannot be claimed as a matter of right.

NEWSPAPER CONTROL

The newspaper is essentially a public utility and whatever may be the precise form of ownership, the exercise of ownership rights may have to be subject to some measures of restraint and regulation.

In connection with instances where the policy of a paper is dictated by the proprietors to suit their personal interests, there should be a periodical publication in the paper of a complete statement of the names of the proprietors and responsible executives on the newspaper, so that the public could judge the extent to which the views expressed in the paper may have to be rejected as being possibly biased.

Exercise, by the individual owner, of the right of control does carry with it the very real danger of misuse of the press for personal or purely commercial purposes. The remedy lies in the diffusion of effective control, or diffusion of ownership among a large number of persons.

One method of providing diffusion of control without making any change in the ownership of the paper would be to transfer the management to a public trust.

Voluntary agreements of owners to limit their own sovereignty in the public interest should be welcomed.

The lack of effective control by those who share the ownership would be avoided if shares are gradually distributed among the employees who function in the undertaking itself and are in constant touch with all its activities.

There already exists, in the Indian newspaper industry, a considerable degree of concentration, and there is a danger that this tendency might further develop in the future. It would not be desirable, in the interest of freedom of choice, that this tendency should be accentuated.

EDITOR'S STATUS

There has been a general decline in the status and independence of the editor.

When a proprietor chooses his editor, he should also delegate to him a measure of individual authority which would enable him to carry out the policy and to resist any attempt to divert the policy in anti-social directions.

The appointment of an editor should invariably be attended with the execution of a contract of employment or letter of appointment laying down the general policy of the paper in as precise terms as possible. The contract should also make a provision for the determination of editorial policy on such matters as have not been covered specifically by the contract and for the settlement of any differences arising therefrom.

If a difference of opinion arises on a question of policy within the general statement of policy embodied in the contract of appointment and such difference is considered by either party to be so vital as to necessitate severance of employment, the liability for damages and the extent thereof, up to the limit specified in the contract, should be determined by some outside authority.

In the matter of presentation of news, there should be no question of favouring a particular policy or trimming the news to suit that policy, and it should be the responsibility of the editor to decide finally what items of news should go in a paper, and the owner should not be in a position to order a blacking out of any item of news unless, of course, its publication would offend against the law.

The period of notice in the case of editors should not be less than three months during the first three years of service and not less than six months thereafter.

In addition, the editor, should be entitled to compensation for involuntary unemployment, the measure of such compensation, if any, being determined by an independent authority.

WORKING JOURNALIST

On appointment the working journalist should receive either a letter of appointment or a contract as the employee may prefer. It should specify the period of notice for the termination of service.

The minimum periods of notice are in the case of minor journalists such as joint editors, assistant editors, leader writers, news editors and chief sub-editors, two months for service not exceeding three years, three months where the service exceeds three years but not five years, and four months where the service is more than five years.

Similarly, in the case of other working journalists the notice period suggested is one month for service not exceeding two years, two months where it exceeds two years but not five years, three months where it is more than five years but less than ten years and four months in the case of people with longer service.

The minimum wage that is recommended is as follows:

In Class III centres, consisting of towns with a population of less than 100,000, the basic wage of Rs. 125 is to be supplemented by a dearness or cost of living allowance of Rs. 25 making a total of Rs. 150.

In Class II centres, with a population of over 100,000 but less than 700,000, the dearness allowance is to be Rs. 50 making a total of Rs. 175.

In Class I-B centres, having a population of over 700,000, the basic wage of Rs. 125 is to be supplemented by a dearness allowance of Rs. 50 and a city allowance of Rs. 25 making a total of Rs. 200.

In Class I-A metropolitan centres, Bombay, Calcutta, Madras and Delhi the basic wage and dearness allowance will remain unaltered but the city allowance will be Rs. 50 making a total of Rs. 225.

If there is a substantial rise in the cost of living the dearness allowance should be increased to the appropriate extent.

A scheme which combines provision for a provident fund and a gratuity is the best way of providing retirement benefits.

The employee should contribute 1/12th of his emoluments and the employer should contribute an equal amount towards a provident fund created under the Employees' Provident Fund Act (XIX of 1952).

The amount thus accumulated for a period of three years should be utilised for purchasing a single premium policy of life assurance which would ensure some provision for the employee's family in the case of his sudden death.

On the termination of service by retirement, resignation, death or for any reason other than misconduct, gratuity should be paid to a working journalist who has put in continuous service for three years or more on the basis of 15 days' pay for every year of service, or part thereof in excess of six months, calculated on the average emoluments during the last year of service.

The gross profits of a newspaper should be ascertained in the normal way.

After making provision for payment of taxes, for depreciation at the rates allowable under the Income-Tax Act and after a return on the invested capital at the rate of four per cent or half per cent more than the bank rate whichever is higher, the balance should be divided into three equal parts, one of which should be available for the payment of bonus. An equal amount should be reserved for ploughing back into the industry and as a provision for meeting future losses. The balance should be available for distribution to shareholders.

WORKING CONDITIONS

The total number of holidays for newspapers should not exceed ten in number, to be distributed according to local requirements.

Journalists must have casual leave, in addition, for 15 days in a year, and earned leave for one month for every 11 months of service.

Further, they should be entitled to sick leave at the rate of 20 days per every year of completed service, on half salary, with option to convert it into half the period on full salary.

The provisions regarding notice period, bonus, minimum wages, leave, provident fund and gratuity should be embodied in the legislation proposed for the regulation of the newspaper industry.

These recommendations should apply to employees of daily, bi-weekly and tri-weekly newspapers and also to employees of news agencies in the first instance.

There should be no disparity in respect of minimum wage between employees of English newspapers and those of Indian language papers.

Other matters such as classification of employees, hours of work, shift working, suspension or dismissal for misconduct, etc., are to be dealt with under standing orders when the new legislation governing industrial relations comes into force.

Working journalists may find it necessary to organise themselves as trade unions under the Indian Trade Union Act of 1926.

Such unions should, however, keep themselves aloof from any political bodies or movements in the country.

The definition of the word "employee" in the proposed legislation should be wide enough to include within its purview the working journalists as well as employees on the managerial side, or alternatively a provision may be inserted in the proposed Newspapers and Periodicals Act making the new industrial relations legislation applicable to newspaper employees.

PRESS COUNCIL

An All-India Press Council should be set up by statute. Its objects among others, will be:—

(1) To safeguard the freedom of the press and help the press to maintain its independence.

(2) By censuring objectionable types of journalistic conduct, and by all other possible

means, to build up a code in accordance with the highest professional standards.

(3) To study developments in the press which may tend towards concentration or monopoly and, if necessary, to suggest remedies therefor.

(4) To publish reports, at least once a year, recording its work and reviewing the performance of the press, its development, and the factors affecting them.

(5) To improve the methods of recruitment, education and training for the profession, by the creation of suitable agencies for the purpose such as a Press Institute.

The Press Council should have 25 members excluding the chairman who should be a person who is or has been a judge of a High Court and should be nominated by the Chief Justice of India.

Out of these, 13 or more should be working journalists, and the others should be drawn from newspaper proprietors, universities, literary bodies, etc.

A cess of Rs. 10 per ton should be levied on the consumption of newspaper and expenditure on the Council and its ancillaries be met from the funds thus collected.

PRESS LAWS

The principal changes brought about by the Constitution (first amendment) Act of 1951 were to permit legislative restrictions of a reasonable character (1) on incitement to offence, (2) in the interest of the security of the State, and (3) in the interest of friendly relations with foreign States.

The Commission are unanimous that the first is necessary.

Four members would prefer that the second should be replaced by a reference to "prevention of disorder".

The majority of the Commission are in favour of retention of the words "in the interests of friendly relations with foreign States".

Press Objectionable Matter Act: The Act should hold the editor also responsible along with the publisher and the keeper of the press.

The majority feel that the continuance of the Act after February 1956 would depend upon the performance of the press during the next two years and on the extent to which the Press Council is able to exercise a restraining influence on the erring section of the press.

Section 124A: This section is *ultra vires* of the Constitution even under the amended Article 19 (2) and opposed to the concept of the freedom of the press. The section should therefore be repealed.

Expressions which incite persons to alter, by violence, the system of Government with or without foreign aid should, however be punishable, and this may be done by the insertion of a new Section 121B.

Section 153-A: The possibility of this section being held void does exist even after the amendment of Article 19 (2) and it should be placed outside the possibility of a challenge by restricting its operations to those cases where there is intention to cause disturbance of public peace or knowledge of likelihood of violence ensuing.

An explanation may be added to this section to the effect that it does not amount to an offence under this section to advocate a change in the social or economic order provided that such advocacy is not intended or likely to lead to disorder or to the commission of offences.

Section 295-A: Even if this may be protected by the words "public order and morality" in Article 19 (2) of the Constitution it should be brought indisputably within the provisions of the Constitution by limiting its operations to those cases where there is intention to cause violence or knowledge of likelihood of violence ensuing.

Section 99A and 99B : These should be amended suitably in the light of the changes suggested above.

Section 144 : The Commission support the view of the Press Law Inquiry Committee that it was not the intention of the framers of the code that this section should be applied to the press.

The Commission consider it desirable that both Parliament and State legislatures should define by legislation, as contemplated in Articles 105 and 194 of the Constitution, the precise powers, privileges and immunities they possess in regard to contempt and the procedure for enforcing them.

They recommend that exception 4 to Section 499 of the Indian Penal Code be amended by inserting the words "or of Parliament or State legislature" to give effect to the principle that publication of a substantially correct report of the proceedings in a legislature is privileged on the same principle as an accurate report of the proceedings in a court of justice is privileged, and that the advantage of publicity to the community at large outweighs any private injury resulting from the publication.

The Commission do not approve of the suggestion that when a public servant is defamed, that should constitute a cognizable offence.

To meet the possibility that there may be cases where serious allegations are made the Commission suggest that a third proviso may be added to Section 198 of the Criminal Procedure Code to the effect that where a public servant has been aggrieved by allegations the magistrate with jurisdiction may take cognizance of the offence upon a complaint made in writing by some other public servant to whom the aggrieved person is subordinate.

The Commission is unanimous in recommending an amendment to the law of defamation on the lines of the English Defamation Act of 1952 which gives protection to a person in respect of unintentional defamation.

WORKING JOURNALISTS ACT

The Minister for Information and Broadcasting announced on December 22, 1954 that Government accepted the following recommendations of the Press Commission :

1. Institution of a Press Council.
2. Maintenance of separate accounts of each unit of a chain of newspapers.
3. Institution of an Advertising Council to enforce a code of advertising.
4. Manufacture of printing machinery in India.
5. The principle of extending to working journalists the provision of the Industrial Disputes Act.
6. The appointment of an accreditation committee at the Centre and the States to advise on accreditation.
7. Periodical publication in every newspaper of a complete statement of proprietors and responsible executives—appropriate action would be taken on this.

Mr. M. L. Bhardwaj has been appointed Registrar of Newspapers of India.

Journalists were brought within the purview of the Industrial Disputes Act by an Ordinance which came into force in March 1955.

The Working Journalists (Conditions of Service) and Miscellaneous Provisions Act, 1955 received the President's assent on 20th December 1955. The Act is meant to regulate certain conditions of service of working journalists and other persons employed in newspaper establishments. The Act extends to the whole of India except Jammu and Kashmir.

Some of the more important provisions are summarized below in non-legal language :

Newspaper may include any class of periodical containing public news or comments on public news as may from time to time be notified by the Central Government.

'Working journalist' is one whose principal avocation is that of a journalist. It includes editor, leader-writer, news-editor, sub-editor,

feature-writer, copy-taster, reporter, correspondent, cartoonist, news-photographer, proof-reader. It excludes persons employed in managerial, administrative or supervisory capacity.

The provisions of the Industrial Disputes Act, 1947 will apply to working journalists as they apply to workmen except that the period of notice, in relation to retrenchment should be six months in the case of an editor and three months in the case of any other working journalist.

Any working journalist who has had three years' service before or after the commencement of the Act, and his services are terminated for any reason whatsoever (except disciplinary action) or he retires on reaching the age of superannuation or voluntarily resigns—should be paid without prejudice to rights or benefits accruing from the Industrial Disputes Act gratuity equivalent to fifteen days' average pay for every completed year of service or part in excess of six months.

In the case of newspaper offices employing not more than six working journalists the gratuity will be less : three days' average pay for every year of service for those with service which does not exceed five years ; five days' average pay for service which does not exceed ten years ; seven days' average pay if the service exceeds ten years.

No working journalist should be made to work more than 144 hours during any period of four consecutive weeks exclusive of the time for meals.

He should have a day's rest in a week, which should include the period 10 P.M. to 6 A.M.

He should have earned leave on full wages for a period not less than one-eleventh of the period spent on duty, and leave on medical certificate on half wages for not less than one-eighteenth of the period of service.

In exercise of the powers vested in it by the Act, the Government of India constituted a Wage Board* for Working Journalists under the Chairmanship of Mr. H. V. Divatia. Besides the Chairman, the Board consisted of six members, three representing the employees and three the working journalists. The six members were G. Narasimham, A. R. Bhatt, K. P. Kesava Menon, R. Venkataraman, C. Raghavan and G. N. Acharya. The function of the Board was to inquire into the wage structure of Indian journalists and fix the scale of remuneration.

The Board had its headquarters at Bombay. Government notification said :

In fixing the wages the Board should take note of cost of living, the prevalent rates of wages for comparable employments, circumstances relating to the newspaper industry in different regions and other relevant circumstances. The Board may fix wages for time-work and for piece work. The decision of the Board will take effect at the time specified, or if no time is specified on the day the decision is published in the gazette.

The decision of the Board is binding on all employers, and the wages paid to the working journalists shall not be less than those specified.

The Government may in consultation with the Board fix interim wages which would be binding on employers.

The Employees Provident Fund Act will apply to every newspaper establishment employing twenty or more persons.

The Industrial Employment (Standing Orders) Act 1946, has been made applicable to working journalists.

If, in general, an employee has a contract with more favourable terms these terms will prevail.

An offence under this Act is not cognisable and a complaint must be made within six months of the commission of the offence complained of.

The Central Government can make rules as to gratuity, hours of work, holidays, earned leave,

leave on medical certificate, casual leave, or any other leave admissible, the procedure to be followed by the Wage Board.

The rules will be laid before both Houses of Parliament.

WAGE BOARD AWARD

The decisions of the Wage Board for Working Journalists, were gazetted on May 11, 1957.*

The Board has classified newspaper establishments into five categories according to their revenue.

Weeklies and periodicals published by newspaper establishments which do not publish dailies, have been classified on the basis of circulation.

Full-time working journalists have been grouped into four categories for the purpose of determining emoluments.

Retrospective effect was to be given to the Board's decisions from the date of the constitution of the Board namely May 2, 1956, in respect of newspaper establishments belonging to classes 'A' (gross revenue of over Rs. 25 lakhs), 'B' (gross revenue of over Rs. 12½ lakhs to Rs. 25 lakhs), 'C' (gross revenue of over Rs. 5 lakhs to Rs. 12½ lakhs).

In respect of newspaper establishments in classes 'D' (gross revenue of over Rs. 2½ lakhs to Rs. 5 lakhs), 'E' (gross revenue of Rs. 2½ lakhs and below), the Board's decisions were to be operative from November 1, 1956.

Minimum basic wages for a proof reader in the several classifications range between Rs. 90 and Rs. 125, for a Sub-editor between Rs. 90 and Rs. 175, for an Assistant Editor between Rs. 150 and Rs. 500 and for an Editor between Rs. 150 and Rs. 1,000.

The Board has prescribed a dearness allowance ranging between Rs. 30 and Rs. 200, which is linked to the All-India cost of living index.

In areas with a population of more than one lakh, every working journalist will get in addition a location allowance ranging from Rs. 7.50 NP to Rs. 50.

By March 10, 1958 it was found that fifty-nine newspapers had implemented the decisions fully and another fifty-nine had implemented the decisions partially. The position State-wise is as follows. The first figure shows the number of papers which had implemented fully and the second partially :

Kerala : none, 0 ; Orissa : 5, none ; Andhra : 3, 41 ; U.P. : 5, none ; Bombay : 17, 3 ; Bihar : 2, 2 ; Punjab : 5, 1 ; Madhya Pradesh : 2, none ; Assam : 5, none ; Rajasthan : 3, none ; Madras : 3, none ; Delhi : 0, 5.

The following newspaper establishments—namely Express Newspapers Private Ltd., Press Trust of India, Hindustan Times Publications, Janinabhooni Group of Newspapers run by Samashtra Trust and Indian National Press Ltd. publishing the Free Press Journal and other newspapers challenged the Board's decisions in the Supreme Court.

The Supreme Court delivered its judgement on March 19, 1958. It upheld the validity of the Working Journalists Act except for a single provision but set aside the decisions of the Wage Board on the ground that the Board did not take into account adequately the capacity of the industry in fixing the rates of wages.

The Court held that the decisions, which were published by the Government of India on May 11, 1957, had been arrived at contrary to the mandatory provisions of Section 9(1) of the Working Journalists Act, which required the Wage Board to have regard to the capacity of the industry in fixing rates of wages, and were, therefore, illegal and void.

The Court also came to the conclusion that Section 5(1) (A) (III) of the Act, which entitled a working journalist to payment of gratuity on his resignation any time after three years, was unreasonable and, therefore, violated the fundamental right to freedom of trade guaranteed under Articles 19(1) (G) of the Constitution.

* The Board signed the report carrying their decisions in Bombay on 24th April 1957.

 44. Delhi—Amritsar—Kabul (bi-weekly).
 45. Srinagar—Pothohar—Srinagar (Non-scheduled—daily).

Passenger Services within Nepal:

1. Kathmandu—Pokhara—Bhairawa (four days in a week).
 2. Kathmandu—Biratnagar—Kathmandu (three days in a week).
 3. Kathmandu—Simra—Kathmandu (daily except Saturdays).

* These services may at times make a landing at Agartala.

BOOKING AND RESERVATION OFFICES

Agartala (Khoah Mahal Bldg., Central Road, Passenger Booking; Freight Booking).
 Agra (Imperial Hotel).
 Ahmedabad (Old Bombay Garage, Dr. Tankaria Road, Aerodrome Office, Ahmedabad).
 Amritsar (Brij Bhawan, Gandhi Gate).
 Aurangabad (Printravel Hotel, Station Road).
 Bagdogra (Siliguri) (Hilcart Road, Siliguri).
 Bangalore (12-A, Mahatma Gandhi Road, Bangalore Cantt.; Airport Office; H. A. L.).
 Belgaum (Hotel Green Camp.).
 Banaras (Clarks Hotel, Banaras Cantt.; Babatpur Airport).
 Bhairawa (P.O. Nautarwa, Distt. Gorakhpur (U.P.)).
 Bhavnagar (Diwanpura Road).
 Bhopal (Delite Hotel).
 Bhubaneswar (Unit No. 6, Type 6, Quarter 6, New Capital).
 Bhubi (Holi Chakia, Near City Palace).
 Bombay (Airport Santa Cruz. Army & Navy Building (24 Hrs. Service), Mahatma Gandhi Road, Fort).
 Calcutta (4, Chittaranjan Avenue (Passenger Bookings), 7, Jagmohan Mallik Lane (Freight Bookings); Airport, Dum Dum: Booking Counter, Dum Dum, Traffic, Dum Dum).
 Chandigarh (Hotel Aroma; Sector 22).
 Chittagong (319 Quaid-e-Azam Jinnah Road, Patenga Airport).
 Cochin ("Louis Hall", Broadway, Ernakulam. Airport: Willingdon Island).
 Coimbatore (India House, Trichy Road; Airport Palermudu).
 Colombo (City Booking Office: 27, Main Street, Galleface Building, Fort; Airport Traffic Office: Colombo Airport, Ratmalana).
 Dacca (Noor Chambers, 43 Jinnah Avenue, Ramna, Airport).
 Darjeeling (Laden La Road).
 Delhi (Malhotra Building, Queensway, New Delhi. Airport: Safdarjung; Airport Palam).
 Dibrugarh (Hansaria House).
 (Mohanbari) (P.O. Rehbari).
 Digbol (Biswanath Singh & Co.).
 Gauhati (Mookerjee Lodge, Pan Bazar).
 Hyderabad (Bahar Bagh Road (24 hours service); Begumpet Airport).
 Imphal (Mahatma Gandhi Avenue).
 Jaipur (2-B, New Colony).
 Jammu (Standard Hotel, Residency Road).
 Jamnagar (Indra Mahal, Bhid-Bhanjan Road; Airport Office).
 Jorhat (Gar Ali).
 Kabul (Deh Afghan Shaba Md. Khanwad Road).
 Karachi (Karachi House, McLeod Road; Airport Office, Drigh Road Airport).
 Kathmandu (8/42 Judith Sadak Airport).
 Keshod (Near Railway Station).
 Lahore (11, Dayal Singh Mansions, The Mall).
 Lilabari (North Lakbimpor, Assam).
 Lucknow (Carlton Hotel).
 Madras (5 and 6, Mount Road; Airport Office; Traffic Officer (Passenger Enquiries); Traffic Officer, Airport).
 Mangalore (Sri Bang Bhawan, K. B. Rao Road; Airport).
 Muzaffarpur (Muzaffarpur), Ghirnepokher Road).
 Nagpur (Kamptee Road (24 Hours Service), Booking Office; Airport Sonawon Traffic Office).
 Pathankot (Hiralal Buildings, Railway Road).
 Patna (Exhibition Road; Airport).
 Porbandar (Harish Talkies Buildings, opp. Caltex Petrol Pump).
 Rajkot (Hir Mahal, Coronation Gardens, Adjoining Lal Stores; Airport).
 Rangoon (Inland Water Transport Board Building, 50, Phayre Street, South).

Shillong (A. C. Sen & Co., Peak Hotel, Shillong).
 Silchar (Club Road).
 Srinagar (Residency Road; Airport).
 Tezpur (Bhabani Kutir, Opp. Academy School).
 Tinsukia (Asiatic Trading Co.).
 Tiruchirappalli (Ashok Bhawan, Junction Road; Airport, Govt. Civil Aerodrome, Pudu Kottah Road, Tiruchirappalli).
 Trivandrum (Trivandrum Air Centre, Main Road; Airport Office, Trivandrum).
 Vishakapatnam (20/133, Thompson Road; Airport).

PAKISTAN INTERNATIONAL AIRLINES CORPN.

Head Office: Khuhro Road, Karachi, Pakistan.

Offices in India: Metro Hotel, New Delhi; 36, Chowringhee Road, Calcutta.

Airlines Hotel, Churchgate, Bombay.

The Company's round the world service, twice a week, is as follows: CALCUTTA—KARACHI—ATHENS—ROME—ZURICH—DUSSELDORF—COPENHAGEN—STOCKHOLM—COPENHAGEN—ANCHORAGE—TOKYO—MANILA—BANGKOK—CALCUTTA.

TRANS WORLD AIRLINES

Booking Office: Taj Mahal Hotel, Bombay.

Administrative Office: "Adelphi", 3, Queen's Road, Bombay.
 T.W.A. Routes: Manila—Bangkok—Ceylon—India—Middle East—Europe—U.S.A. via Ireland or through the Iberian connection to U.K. and Germany.

ELECTRIC POWER DEVELOPMENT

(By courtesy of the Central Water and Power Commission, Power Wing).

IT is estimated that well over 80 per cent of India's power requirements are at present obtained from animal dung, wood, agricultural waste, etc. and from living energy (animal and human effort).

About industrial energy, about 80 per cent comes from coal; petroleum products account for about 14 per cent and the balance comes from hydro-electricity.

The aggregate generating capacity of the country in electric power has grown as follows (kW):—

1900	1,130
1905	11,750
1910	31,347
1915	107,286
1920	130,000
1925	327,152
1930	577,140
1935	859,402
1940	1,181,524
1945	1,249,454
1950	1,712,515
1951	1,835,426
1952	2,061,755
1953	2,305,190
1954	2,493,998
1955	2,691,517
1956	2,886,141

The total installed capacity at the end of 1956 was 2,886,141 kW, of which 1,061,441 kW was water power and 1,824,700 kW thermal.

The per capita consumption of electric power in India is ridiculously low. In 1956 it was 20.70 kW hours as against 3,536 in Canada, 2,884 in Sweden, 2,616 in the U.S.A., 5,559 in Norway and 2,272 in Switzerland (1953). The latest estimates place the hydro-electric power potential of India at 35 million kW, but only a little more than one million kW has been tapped so far.

The production and sale of electric power from 1948 to 1956 was as follows (in million kWh):

	Generated	Sold
1948	4,580	3,720
1949	4,910	4,000
1950	5,110	4,180
1951	5,860	4,790
1952	6,120	5,000
1953	6,700	5,600
1954	7,520	6,250
1955	8,592	7,111
1956	9,662	7,959

An analysis of electric power consumption in million kWh is given below. The figure in brackets shows the percentage:

	1955	1956
Domestic or Residential light and small power ..	850,426 (12.0)	934,122 (11.7)
Commercial light and small power ..	514,423 (7.2)	545,451 (6.8)
Industrial Power ..	4,697,789 (66.0)	5,323,424 (66.9)
Traction ..	403,392 (5.7)	404,925 (5.1)
Public lighting ..	105,631 (1.5)	117,767 (1.5)
Irrigation ..	254,803 (3.6)	316,189 (4.0)
Water Works ..	254,647 (4.0)	317,076 (4.0)
TOTAL ..	7,111,011 (100.0)	7,959,345 (100.0)

The following statement shows the number of electrified towns and villages at the end of 1956:

Population	Number of towns	Number with electric supply	Percentage of towns with electric supply to total
Over 100,000	73	73	100.0
50,000 to 100,000	112	112	100.0
20,000 to 50,000	401	345	86.03
10,000 to 20,000	856	7,064	1.42
5,000 to 10,000	3,101		
Below 5,000	550,565	8,494	1.51
TOTAL	561,108		

It may be pointed out that in 1956 six large cities—Bombay, Calcutta, Ahmedabad, Kanpur, Madras and Delhi accounted for 48.3 per cent of the country's installed capacity and 60.4 per cent of the generated energy.

Out of the 560,000 villages in India only about 7,000 were provided with electric power in March 1956.

The total number of consumers at the end of 1956 was 2,825,802 (Domestic 2,150,659; Commercial 469,845; Industrial 108,756; Public lighting 3,694; Irrigation 62,848).

The State-wise analysis for 1956 is as follows:

State (existing before reorganization in Nov. 1956)	No. of stations*	Installed capacity (kW)	Energy generated (mln kWh)	Energy sold (mln kWh)	Capacity in Industrial Plants (kW)	Capacity in railway plants (kW)†	Annual per capita consumption (kWh)
Andhra	14	90,696	167,618	120,955	4,525	(b)	5.55
Assam	9	5,280	11,269	9,286	—	2,154	0.91
Bihar	31	204,799	603,245	354,091	288,343	10,596	8.28
Bombay	137	669,378	2,793,847	2,429,389	62,684	5,516	63.59
Madhya Pradesh	36	99,000	269,987	221,736	19,555	1,396	9.82
Madras	10	251,228	1,089,193	815,555	22,648	128	21.03
Orissa	21	33,772	21,145	15,201	19,692	36	0.98
Punjab	32	167,357	439,855	244,471	8,814	568	18.21
Uttar Pradesh	66	308,740	743,481	577,978	31,943	9,175	8.72
West Bengal	28	538,365	1,778,591	1,753,763	141,155	13,110	66.40
Hyderabad	12	44,921	76,552	65,082	54,902	—	3.28
Kashmir	8	12,875	23,971	18,418	—	15	3.93
Madhya Bharat	32	32,591	55,208	40,363	13,039	—	4.78
Mysore	4	178,276	810,435	614,367	6,250	85	63.72
PEPSU	12	6,000	0,970	21,959	11,275	198	5.92
Rajasthan	36	38,536	77,029	54,112	18,039	82	3.33
Saurashtra	32	36,430	79,004	65,823	32,197	—	27.30
Travancore-Cochin	7	90,141	349,731	269,161	1,823	—	122.91
Delhi	4	55,191	232,217	227,755	5,157	2,150	3.57
Others (Centrally administered)	31	21,459	37,905	31,880	—	—	—
TOTAL	668	2,886,141	9,662,133	7,959,345	759,650	45,209	20.70

* Figures for 1954.

† Figures for 1955. (b) included under Madras.

INSTALLED CAPACITY

Some individual industries have power-stations of their own. The number of installations and the installed capacity are as follows (end of 1956):

	No.	Capacity (kW)
Aluminium (Primary) ..	5	16,628
Aluminium (Secondary) ..	6	225
Cement (Primary) ..	25	98,692
Cement (Secondary) ..	24	10,671
Chemicals ..	34	19,871
Collieries ..	158	58,810
Copper (Primary) ..	1	9,250
Copper (Secondary) ..	1	—
Cotton Textiles ..	335	112,237
Fertilisers ..	3	80,000
Gold ..	1	3,900
Iron & Steel (Primary) ..	5	172,000
Iron & Steel (Secondary) ..	19	675
Jute ..	82	42,577
Paper ..	21	73,566
Silk ..	29	1,480
Soap ..	13	1,126
Sugar ..	103	43,254
Tanneries ..	9	288
Wool ..	16	5,203
TOTAL†	890	759,650

† Does not take into account the figures for railways.

The generating capacity by ownership is as follows:

	1954	1955	1956
State owned (Public Sector) ..	1,269,489	1,517,476	1,693,533
Companies (Private Sector) ..	1,234,507	1,177,341	1,202,608
TOTAL ..	2,493,996	2,694,817	2,886,141

The number of installations at the end of 1956 was distributed as follows:

	No.
State Government ..	161
State Electricity Board ..	89
Power Corporation ..	1
Municipality ..	21
Companies ..	179
TOTAL ..	451

Tentative information about installed capacity in kW for 1956 by source is given below :—

State (existing before reorganization in Nov. 1956).	Steam	Hydro	Oil	Total
Andhra	23,750	61,000	15,946	90,696
Assam	622	550	4,108	5,280
Bihar	185,045	4,000	15,754	204,799
Bombay	338,210	279,914	51,254	669,378
Madhya Pradesh	91,262	..	7,738	99,000
Madras	84,000	165,150	2,078	251,228
Orissa	5,776	24,005	3,991	33,772
Punjab	7,300	145,750	14,507	167,557
Uttar Pradesh	179,860	90,390	32,490	308,740
W. Bengal	528,351	4,760	5,254	538,365
Hyderabad	22,250	15,000	7,671	44,921
Kashmir	1,500	10,608	769	12,875
Madhya Bharat	23,748	..	8,843	32,591
Mysore	178,200	76	178,276
PEPSU	526	240	6,140	6,906
Rajasthan	24,000	..	14,536	38,536
Saurashtra	18,000	..	18,430	36,430
Travancore-Cochin	85,500	4,641	90,141
Delhi	52,400	..	2,791	55,191
Others (Centrally administered)	9,812	376	11,271	21,459
TOTAL	1,598,412	1,061,441	224,288	2,884,141

Note : Of the States mentioned above the following are unaffected by re-organization : Assam, Orissa, U.P., Kashmir, Delhi. The following are affected only to a small extent : Bihar, W. Bengal. To get the figures for the new Punjab one has only to add the figures for the old Punjab and PEPSU.

FIVE-YEAR PLANS

At the beginning of the First Plan the total installed capacity in the country was 1.8 mln. kW. This was raised to about 2.9 mln. kW. in 1956.

During the Plan period a total of Rs. 206.71 crores was spent on the four multi-purpose projects—Bhakra, Harike, D.V.C., Hirakud. The Plan provision was Rs. 246.03 crores. The total expenditure on the new major projects was Rs. 18.11 crores—Koyna, Rihand, Kosi, Nagarjuna Sagar, Chambal.

The total expenditure on the power projects during the Plan period was Rs. 152.89 crores as against the Plan provision of Rs. 178.63 crores.

The total number of power schemes undertaken during the first Plan was 344. The following principal power schemes were put into commission during the Plan period. The power generated is also shown :

Bokaro (Bihar) : 1,50,000 kW ; Chola Kalyan (Bombay) : 54,000 kW ; Jog (Mysore) : 72,000 kW ; Khaperkheda (M.P.) : 30,000 kW ; Machkund (Andhra-Orissa) : 34,000 kW ; Madras city plant extension : 30,000 kW ; Moyar (Madras) : 36,000 kW ; Nangal (Punjab) : 48,000 kW ; Pathri (U.P.) : 13,600 kW ; Sarda (U.P.) : 27,000 kW ; Sengulam (Kerala) : 48,000 kW.

The total provision for power in the Second Plan is Rs. 427 crores. The target is 6.9 mln. kW.

The programme included in the Second Five-Year Plan is an ambitious one. Out of Rs. 427 crores for the entire power programme in the country, as much as Rs. 75 crores has been set apart for extending electricity to villages. Over 10,000 villages—about one and a half times the number existing at the beginning of the Plan—are programmed to derive the benefit.

Even with this achievement, however, only a little over 3 per cent of the villages would have been covered in 1961.

It is estimated that the average cost of electrification of a village based on present day costs is between Rs. 60,000 and 70,000.

The total cost of reaching all the villages may be put at Rs. 3,000 crores at present day price levels.

POWER PROJECTS

Statistical information about four major multi-purpose projects under the Central Government are given below (power in thousand kilowatts)

Name	Date of completion	Installed capacity	Firm power
Nangal (Punjab) : Ganguwal	1955	96 + 48	72 + 48
Nangal : Kotla	1956		
Bhakra	1961		
Damodar (Bihar, W. Bengal) :		450	212
Bokaro thermal	1953	150	—
Maithon	1957	60	—
Panchet Hill	1958	40	—
Tilaiya	1958	4	—
Damodar (total)	—	254	174
Hirakud (Orissa) :			
Power House No. 1	1957	123	85
Chambal (Gandhinagar) (Rajasthan, Madhya Pradesh)	1962	92	69

In the Tungbhadra Project (Andhra, Mysore) the Dam Power House was completed in December 1956, and the Harni Power House in April 1957. Total installed capacity will be 63,000 kW.

The Koyna Project (Bombay) Power House will have four units of 60,000 kW each. The project is expected to be completed in 1961-62.

The Rihand Project (U.P.) will have a power house with five units of 60,000 kW each. The project is expected to be completed in June 1961.

The Chambal Project Stage I (Rajasthan, Madhya Pradesh) will generate 75,000 kW of power and is expected to be completed in 1962.

The Nagarjuna Sagar Project (Andhra) will generate at 60 per cent load factor 75,000 kW.

The Central Government have enacted legislation, the Electricity (Supply) Act, 1948, to

provide for the rationalisation of the production and supply of electricity in the country.

The Act provides for the formation of State Electricity Boards in the States which will be charged with the general duty of promoting the co-ordinated development of the generation, supply and distribution of electricity within the State in the most efficient and economical manner.

The State Electricity Boards are required to rationalise supply and distribution of energy, prepare and carry out new schemes, acquire existing stations and equipment, give bulk supplies of power to existing licensees, designate wherever necessary existing stations as controlled stations and direct licensees to achieve the maximum economy and efficiency in the operation of their undertaking.

So far Madhya Pradesh, Delhi, W. Bengal, Kerala, Madras, Rajasthan, Mysore and Bombay States have set up such Boards (Feb. 1956).

The Act also provides for the creation of a Central Electricity Authority for development of a sound, adequate and uniform national policy and to advise the State Electricity Boards on all major power development schemes that may be taken up by them.

The Authority was constituted in 1950. It is to act as arbitrator in disputes between a State Government or State Electricity Board and licensee or other persons.

It has to carry out investigations and collect data concerning the generation, distribution and utilisation of power and the development of power resources and publish them from time to time.

CHURCHES IN INDIA

CATHOLIC CHURCH

India is divided into Dioceses and Prefectures Apostolic, which are grouped in 16 Ecclesiastical Provinces or Archdioceses, as follows:—Archdiocese of: 1. Agra with the Dioceses of Meerut, Allahabad, Indore, Jhansi, Lucknow, Almorat and the Prefecture Apostolic of Gorakhpur; 2. Bangalore with the Dioceses of Bellary, Mangalore, Mysore, Ootacamund; 3. Bombay with the Dioceses of Ahmedabad, Belgaum, Poona; 4. Calcutta with the Dioceses of Dibrugarh, Jalpaiguri, Krishnagar, Patna, Shillong and the Prefecture Apostolic of Bhaupur, Hailong, Malda, and Sikkim; 5. Changanacherry (Syro-Malabar) with the Dioceses of Kottayam and Palai; 6. Delhi and Simla with the Prefectures Apostolic of Jammu-Kashmir and Jullundur; 7. Ernakulam (Syro-Malabar) with the Dioceses of Kothamangalam, Tellicherry and Trichur; 8. Goa and Daman; 9. Hyderabad with Dioceses of Guntur, Nellore, Vijayawada, Visakhapatnam and Warangal; 10. Madras-Mylapore with the Dioceses of Coimbatore and Vellore; 11. Madurai with the Dioceses of Tiruchirappalli and Tuticorin; 12. Nagpur with the Dioceses of Amravati, Jabalpur, and Raigarh-Amhikapur; 13. Pondicherry and Cuddalore with the Dioceses of Kumbakonam, Salem, and Tanjore; 14. Ranchi with the Dioceses of Cuttack and Sambalpur; 15. Travancrum (Syro-Malankara) with the Diocese of Tiruvalla; 16. Varanasi with the Dioceses of Alleppey, Calicut, Cochin, Kottar, Quilon, Travancrum (Latin), and Vijayapuram.

In all there are 16 Archdioceses (Metropolitan Sees), 49 Dioceses (Suffragan Sees) and 7 Prefectures Apostolic. HOME MISSIONARY SOCIETY OF INDIA, 22, Stephens Road, Fraser Town, Bangalore 5.

INDIA INDUSTRIAL MISSION, Coimbatore, Calcutta 2.

METHODIST CHURCH IN SOUTHERN ASIA, Robinson Memorial, Sankli Road, Byculla, Bombay.

SALVATION ARMY

The work of the Salvation Army in India and Ceylon was commenced in 1882 by the late Commissioner Booth-Tucker and was for many years under his control, with Headquarters in India. For some time now, the areas occupied have been divided for administrative purposes into 6 Territories, each under a Territorial Commander; and one smaller Command. The headquarters for Pakistan are at Lahore.

North-Eastern Territory, with Headquarters at Calcutta.

Western Territory, with Headquarters at Bombay.

Madras and Telugu Territory, with Headquarters at Madras.

Southern Territory, with Headquarters at Trivandrum, in Kerala.

Ceylon Territory, with Headquarters at Colombo.

Burma Command, with Headquarters at Rangoon.

The Audit and Editorial office is at Poona.

The Commanders are directly responsible to the International Headquarters in London.

North-Eastern Territory.—The area in this Territory is the Salvation Army work in the Punjab (India), Uttar Pradesh, Orissa, Bengal and Assam.

Evangelistic work, especially among the "depressed classes", is extensively carried on in all these areas.

Medical work is carried on in two Hospitals, one of which is in Dhariwal, Punjab and the other in Moradabad, Uttar Pradesh; and also in several dispensaries.

There are boarding and day schools, a men's Industrial Home in Calcutta, a Young Women's Hostel, and orphanages for both girls and boys.

Village centres at which the S. A. works 2,015

Officers and Employees. 697

Social Institutions 8

Boarding and day schools 10

Territorial Headquarters: 37, Dharamtala Street, Calcutta 13.

Territorial Commander:—Colonel Joseph Dayha.

Madras and Telugu Territory.—Embraces Madras City, the central and northern districts, of Madras, Andhra Pradesh and Madhya Pradesh. 365 fully commissioned officers and 255 workers are fully occupied in evangelical, educational and village uplift work carried on in just over 400 villages, a high school with hostels for boys and girls, a Training Institute for men and women selected for officer-ship; agricultural settlement of 2,500 men, women and children in many work at Chirala, the others on the land. A Leprosy Hospital, General Hospital, a Social Services Department where wastepaper sorting, etc. is carried on, and a Women's and Children's Home in Madras complete the list of institutions where work is going forward.

Territorial Headquarters:—The Salvation Army, 1C, Ritherdon Road, P.O. Box 453, Vepery, Madras 7.

Territorial Commander.—Colonel Ernest Stanley Hannam.

General Secretary:—Brigadier P. Bhushanam

Southern India Territory.—The Territorial Headquarters is in Trivandrum in Kerala State.

In 1,147 Corps and Centres of work, the majority of officers labour among the village population. The Army has a membership in South India of 95,913.

This territory is divided for administrative purposes into 15 divisions and Districts, 6 among the Tamil-speaking people and 9 among those who speak Malayalam.

The Catherine Booth Hospital at Nagercoil, is now a fully equipped, modern institution of many departments, dealing with all types of medical and surgical cases. The Hospital is equipped with X-Ray, radium, iron lung and excellent nursing facilities. Branch Hospitals carry the service to some of the most remote regions. 81,255 patients were treated during 1956 in the Catherine Booth Hospital and

its several branches and 874 major operations and 2,945 minor operations were performed. The Evangeline Booth Leper Hospital at Puthencruz in north Travancore, accommodates 167 patients. These institutions carry on work in accordance with the highest traditions of Christian service.

Workers in the Territory consist of 1,052 officers, 371 employees. There are, 312 Officer Corps and 98 societies, 37 primary day schools, 2 boarding schools, 1 middle school, 1 high school, 1 training garrison, 634 outposts, 1 women's industry.

Territorial Headquarters:—Kowdiyar, Trivandrum 3.

Territorial Commander:—Lieut.-Commissioner Ivar Palmer.

Chief Secretary:—Lt. Colonel Prabhakar S. Das.

Western India Territory.—This territory comprises Corps 240; Outposts 761; Social Institutions 14; Day Schools 85; Boarding Schools 2; Training Colleges 2.

Besides the evangelical operations there are in this Territory, two large Hospitals, the Emery Hospital at Anand, and the Evangeline Booth Hospital at Ahmednagar and a number of dispensaries. Patients treated at both Hospitals during 1957 were—Out-patients 12,688, In-patients 3,685; Major Operations performed 804, Minor Operations performed 1,936. Both Hospitals are well-equipped and have a Nurses' Training School attached.

Social work in Bombay includes the King George V Memorial Infirmary, and Lady Dhanbai Jehangir Home for Destitutes, Industrial and Rescue Home for Women at Matunga and King Edward Industrial Home for Men at Byculla. A well-equipped Red Shield House, is situated on Merewether Road, Fort, Bombay. Accommodation for visitors to Bombay may be secured there.

Territorial Headquarters:—P.O. Box 4510, Morland Road, Byculla, Bombay 8.

Territorial Commander:—Lt. Commissioner Theo. H. Hulbrook.

Chief Secretary:—Lieut.-Colonel D. A. Sanjivli.

NATIONAL CHRISTIAN COUNCIL OF INDIA

Chiefly to help to co-ordinate the activities of member Churches and Regional Councils and to assist them to co-operate with one another where such co-operation is desirable.

President:—The Most Rev. A. N. Mukerjee, 51, Chowringhee Road, Calcutta-16.

Vice-Presidents:—Dr. D. G. Moses, Hishop College, Nagpur and Rt. Rev. J. E. L. Newbigin, C.S.I., Tallakulam P.O., Madurai, S. India.

Treasurer:—J. S. S. Malelu, Central Bank of India, Bombay 1.

Secretaries:—-E. C. Bhaty, M.A., Ph.D.; Korula Jacob, M.A., M.Ed.; the Rev. W. Scopes, M.A.; the Rev. J. G. P. Naumann; The Rev. H. R. Ferger.

Address:—The National Christian Council, (Christian Council Lodge, Nagpur 1 (Bombay State)).

SCHEDULED CASTES, TRIBES AND BACKWARD CLASSES

For population of Scheduled Castes and Scheduled Tribes see under Population.

These classes include 779 Scheduled Castes, 245 Scheduled Tribes and 194 nomadic tribes besides a number of unspecified groups.

The Scheduled Tribes live in remote forest regions, chiefly in Bombay, Madhya Pradesh, Bihar, Orissa, West Bengal and Assam.

The percentage of the population of the Scheduled Castes and the Scheduled Tribes to the population as a whole is given below:

Andhra: 14.13, 3.68; Assam: 4.69, 19.48; Bihar: 12.67, 10.00; Bombay: 10.75, 7.76; Kashmir: 3.54, no Scheduled Tribes; Kerala: 8.91, 0.99; M.P.: 15.01, 15.58; Madras: 17.95, 0.45; Mysore: 13.31, 0.41; Orissa: 17.95, 20.55; Punjab: 21.64, 0.02; Rajasthan: 15.67, 11.11; Uttar Pradesh: 20.72, No Scheduled Tribes; West Bengal: 18.04, 5.06.

Delhi: 15.40, No Scheduled Tribes; Himachal Pradesh: 28.84, 2.52; Jaccadives: No Scheduled Castes, 46.11; Manipur: 4.90, 33.63; Tripura: 7.29, 30.09.

All India: 15.32, 6.23.

The Constitution provides for special safeguards for the Scheduled Castes, Scheduled Tribes and Backward Classes.

The President has defined by means of an order who the Scheduled Castes and Tribes are.

As regards Backward Classes a Commission was appointed to enquire into their condition.

The Commission consisted of:

Kakasaheb Kalelkar (*Chairman*), N. S. Kajrolikar, (Bombay), Bheeka Bhal, (Rajasthan), Shival Singh Chaurasia (U.P.), Rajeshwar Patel, (Bihar), Abdul Quayum Ansari, M.L.A. (Bihar), P. G. Shah (Bombay), Harappa (Mysore), Atma Singh Namdhari, (West Bengal), Arunangshu Dey (West Bengal: *member-secretary*).

The functions of the Commission were to determine the criteria on the basis of which any particular section can be described as socially or educationally backward, to prepare a list of such Backward Classes for the whole of India, to examine the condition and difficulties of such classes and make specific recommendations (including financial) for their removal.

The Commission listed 2,399 different classes comprising more than 11 crores of people as socially and educationally backward. The Home Minister in commenting on this stated that this reduced the investigation to an absurdity when

the bulk of the country's millions could be counted as coming within the category of backward classes. The criteria fixed by the commission were neither clear-cut nor reliable.

With regard to the recommendation for the reservation of seats in Central and State services, a substantial minority in the Commission itself was opposed to such reservation. Yet another recommendation was that 70 per cent of the seats in technical and technological institutions of higher learning should be reserved for backward classes.

For the Scheduled Castes the safeguards take the form, broadly speaking, of reservation of seats in the lower Houses of the legislature and of vacancies in Government services. For the Scheduled Tribes there is a sort of autonomy in parts of Assam, Tribal Councils to watch their interests in some States, while in other States Ministers have been appointed to take charge of Tribal affairs. There are also special grants to be used exclusively for uplift work.

NEFA is an administrative area under the Central Government, populated almost wholly by Scheduled Tribes.

A Naga Administrative Unit under Central Administration also came into being in December 1957.

All the special provisions mentioned above may come up for review by a Commission appointed by the President at any time within ten years after the commencement of the new Constitution. Meanwhile there is an official with the Central Government who is to report to the President from time to time on the working of these provisions.

Total expenditure on welfare of the Scheduled Tribes and Areas for 1956-57: Rs. 7.13 crores.

Total expenditure on the welfare of Scheduled Castes: Rs. 4.35 crores.

For the welfare of ex-Criminal Tribes: Rs. 54.76 lakhs.

For the welfare of other backward classes: Rs. 81.79 lakhs.

Total: Rs. 12.85 crores.

Associations, organisations generally recognized as representative of Scheduled Castes are:

All India Harijan Sevak Sangh (Kingsway, Delhi).

Harijan Ashram, Allahabad.

Indian Conference of Social Work, Bombay.

Bharatiya Depressed Classes League (18 Windsor Place, New Delhi).

Republican Party of India (formerly All-India Scheduled Castes Federation).

The following sums were made available to certain non-official bodies during 1956-57 by the Home Ministry for work in connection with the eradication of untouchability:

Harijan Sevak Sangh, Delhi: Rs. 3,59,400; Bharatiya Depressed Classes League, Delhi: Rs. 2,32,000; Iswar Saran Ashram, Allahabad: Rs. 90,000; Central Social Welfare Board, Delhi: Rs. 19,000; Bharat Dalit Sevak Sangh, Delhi: Rs. 48,000.

For work among other backward classes: Bharatiya Adanjati Sevak Sangh, Delhi: Rs. 1,00,000; Servants of India Society, Delhi: Rs. 35,425; India Red Cross Society, Delhi: Rs. 25,000; All India Backward Classes Federation, Delhi: Rs. 12,500.

Total: Rs. 9,22,225.

In addition to this there was at the disposal of the Ministry of Information and Broadcasting a sum of Rs. 4,50,000 for the production and display of films in connection with the campaign for the eradication of untouchability.

LEGISLATION IN FORCE

The Untouchability (Offences) Act came into force on June 1, 1955.

It makes the practice of untouchability and enforcement of any disability arising therefrom a cognizable offence punishable with imprisonment or fine or both.

It is meant to apply to the whole of India except Jammu and Kashmir and to all communities and not Hindus alone.

Below is a list of legislative measures in force in States (before re-organization) for removing social disabilities among Hindus:

Bihar: The Bihar Harijan (Removal of Civil Disabilities) Act, 1949, and the Amendment Act, 1951.

Bombay: The Bombay Harijan (Removal of Civil Disabilities) Act, 1947; The Bombay Harijan Temple Entry Act, 1947.

Madhya Pradesh: The C. P. and Berar Scheduled Castes (Removal of Civil Disabilities) Act, 1947; The C. P. and Berar Temple Entry Authorization Act, 1947.

Madras: The Removal of Civil Disabilities Act, 1958; The Madras Temple Entry Authorization Act, and the Amending Act, 1949.

Orissa: The Orissa (Removal of Civil Disabilities) Act, 1946—not cognizable; The Orissa Temple Entry Authorization Act, 1946.

Punjab: The East Punjab (Removal of Religious and Social Disabilities) Act, 1947.

Uttar Pradesh: The U.P. (Removal of Social Disabilities) Act, 1947—not cognizable.

West Bengal: The West Bengal Hindu (Social Disabilities Removal Act), 1948.

Hyderabad¹: The Hyderabad Harijan Temple Entry Regulation No. LV of 1358F (1948-49); The Harijan (Removal of Social Disabilities) Regulation No. LVI of 1358F (1948-49).

Madhya Bharat²: Harijan Disabilities (Removal) Act, 1949, and the Amendment Act, 1950.

Mysore: The Removal of Disabilities Act, 1943; the Amendment Act of 1948 and 1949; The Mysore Temple Entry Authorization Act, 1948, and Amendment Act, 1949.

Saurashtra³: The Removal of Social Disabilities Ordinance, 1948.

Kerala: The Travancore-Cochin Temple Entry (Removal of Disabilities) Act, 1950. The United State of Travancore and Cochin (Removal of Social Disabilities) Act, 1950.

Ajmer⁴: The U.P. (Removal of Social Disabilities) Act, 1947, extended to the State—not cognizable.

Ropal⁵: The U.P. (Removal of Social Disabilities) Act, 1947, extended to the State in June 1951—not cognizable.

Bilaspur⁶: The U.P. (Removal of Social Disabilities) Act, 1947, extended to the State in June 1951—not cognizable.

Coorg⁷: The Coorg Scheduled Castes (Removal of Civil and Social Disabilities) Act, 1949; The Coorg Temple Entry Authorization Act, 1949—not cognizable.

Delhi: The Bombay Harijan (Removal of Social Disabilities) Act, 1947, extended to the State.

Himachal Pradesh: The U.P. (Removal of Social Disabilities) Act, 1947, extended to the State in May 1951—not cognizable.

Kutch⁸: The Bombay Harijan (Removal of Social Disabilities) Act, 1947, extended to the State in May 1951.

Tripura: The West Bengal Hindu (Social Disabilities Removal) Act, 1948, extended to the State in May 1951.

Finchya Pradesh⁹: The U.P. (Removal of Social Disabilities) Act, 1947 extended to the State—not cognizable.

Such of the above Acts as are not shown as 'not cognizable' are cognizable.

SAFEGUARDS

The Constitution of India has laid down certain safeguards for Scheduled Castes, Scheduled Tribes and Backward Classes, the weaker sections of the people.

In a chapter on Fundamental Rights, under Articles 15, 16 and 17, it has been stated that the State shall not discriminate between any citizens on ground of religion, race, caste, sex or place of birth. This does not prevent the State, however, from framing rules for the reservation of seats in the legislature or of appointments in the public services in favour of any class which is not adequately represented.

Similarly, under Article 19, the right to freedom is circumscribed by authorising the State to place reasonable restrictions for the protection of the interests of Scheduled Tribes.

Under the directive principles of policy, under part 4, Article 46 of the Constitution, it is said that the State should promote the educational, economic and political interests of the weaker section of the people and in particular the Scheduled Castes and Scheduled Tribes and protect them from social injustice and all forms of exploitation.

Under Article 17 untouchability is abolished and its practice in any form forbidden.

Article 25 empowers the State to throw open Hindu religious institutions of a public character.

Article 29 provides that no citizen can be denied admission into any educational institution maintained by the State or aided by it on grounds of religion, race, caste or language.

It has been laid down under Article 164, that in the States of Bihar, Madhya Pradesh and Orissa, there should be a Minister in charge of Tribal Welfare who may, in addition, be in charge of the welfare of Scheduled Castes and Scheduled Tribes or any other work of allied nature.

The Vith and VIIth Schedules of the Constitution under Article 244 also provide for the administration and control of Schedule areas and Scheduled Tribes and of Tribal areas in Assam by providing Tribe Advisory Councils for Tribal areas.

The following two belonging to the Scheduled Castes are in the Union Government:

Mr. Jagjivan Ram (Minister for Railways), Dr. Mono Mohan Das (Deputy Minister for Education).

Mr. J. N. Hazarika (Parliamentary Secretary to the Minister for External Affairs) belongs to the Scheduled Tribes.

For the promotion of the welfare of Scheduled Tribes and Schedule areas, provision has been made under Article 275 for grants-in-aid to be paid out of the Consolidated Fund of India for such schemes of development as may be undertaken by the States with the approval of the Government of India for raising the administration of the Schedule areas of the State to the same level as that of the other areas of the State.

Special provision for grants-in-aid has been made in the case of Assam.

Tribes Advisory Councils have been set up in Bihar, Madhya Pradesh, Madras, Punjab, Rajasthan, Bombay, Andhra, W. Bengal and Orissa.

In the Tribal areas in Assam, District or Regional Councils have to be set up for each autonomous region. Three-fourths of the members have to be elected on a basis of adult franchise.

There are special departments to look after the welfare of Scheduled Castes and Tribes and Backward classes in nearly every State.

REPRESENTATION IN LEGISLATURES

Seats are reserved in the Lok Sabha under Articles 330 and 332 for Scheduled Castes and for Scheduled Tribes including the Tribal areas and autonomous districts of Assam.

The number of seats reserved in any State bears the same proportion to the total number of seats allotted to that State in the Lok Sabha as the population of Scheduled Castes and Scheduled Tribes in the State or the part of the State bears to the total population of the State.

Similarly in the Legislative Assembly of every State seats are reserved.

The reservation of seats in the Lok Sabha and Legislative Assemblies will cease to have effect on the expiration of a period of ten years from the commencement of the Constitution.

The representation of the Anglo-Indian community in the Lok Sabha and in the Legislative Assemblies of the States by nomination will also cease after ten years.

Under these provisions 76 seats in the Lok Sabha and 470 in the States Legislatures have been reserved for the Scheduled Castes, and 31 seats in the Lok Sabha and 221 in the State Legislatures for the Tribes.

The claims of members of Scheduled Castes and Scheduled Tribes should be taken into consideration according to Article 335 in the making of appointments to services and posts in connection with the affairs of the Union or of a State consistently with the maintenance of the efficiency of the administration.

The following States have a certain percentage of jobs reserved for Scheduled Castes and Tribes.

the percentage having some relation to the population. In the brackets is shown whether the reservation is for Castes or Tribes or both:

Andhra (C and T), Assam (T), Bihar (C and T), Bombay (C and T), Madras (C and T), Punjab (C and T), Mysore (C and T), Rajasthan (C and T), Kerala (C and T).

In order to investigate all matters regarding these safeguards for Scheduled Castes, Scheduled Tribes, Backward Classes and Anglo-Indians, provision has been made in the Constitution under Article 338 for the appointment of a special officer for Scheduled Castes and Scheduled Tribes who is required to report to the President upon the working of these safeguards at such intervals as the President may direct and the President will cause all such reports to be laid before each House of Parliament.

Articles 339 and 340 provide for the appointment of a Commission by the President any time within the expiration of ten years from the commencement of the Constitution to report on the administration of Schedule areas and the welfare of Scheduled Tribes.

Now for the purpose of preparing a list of Scheduled Castes and Scheduled Tribes it has been laid down under Articles 339, 341 and 342 that the President, in consultation with the Governor or other head of the State, by public notification should specify the castes, races or tribes to be deemed as Scheduled Castes and specify the Scheduled Tribes to be deemed as Scheduled Tribes.

Parliament alone may, by law, include or exclude from this list Scheduled Tribes and Scheduled Castes. The notification of such lists by the President cannot be varied by any subsequent notifications.

This was done through the following orders: The Constitution (Scheduled Castes) Order, 1950; the Constitution (Scheduled Castes) (Part C States) Order, 1951; the Constitution (Scheduled Tribes) Order, 1950; the Constitution (Scheduled Tribes) (Part C States) Order, 1951.

SERVICES, SCHOLARSHIPS

The particulars about the cases under the Untouchability Offences Act, 1955 during the period 1st January 1955 to 30th Nov. 1956: Total No. registered: 380; Challenged: 327; Convicted: 45; Acquitted: 36; Compounded: 65; Still pending 1st.

In the information given above the figures for Bihar are incomplete.

In the L.C.S. and I.A.S. there were on the 1st of January 1955, 17 Scheduled Castes and one Scheduled Tribes officers against a total of 1,125. In the I.P.S. there were seven Scheduled Castes and three Scheduled Tribes officials as against a total of 648.

The figures for the total number of employees of the Scheduled Castes and Tribes in the service of the Government of India in 1955 was as follows. The first figures relate to the scheduled Castes and the second to the Tribes

Class I, 10; 3.
Class II, 65; 18
Class III, 9,950; 2,029
Class IV, 8,350; 1,832

In the States the employment figures are in most cases either not available or very incomplete.

The Government of India awarded in 1956-57 (approximate figures) 39,200 scholarships.—Scheduled Castes 21,325, Scheduled Tribes 3,505, other backward classes 14,230.

Total expenditure incurred Rs. 187.6 lakhs—Scheduled Castes Rs. 88.24 lakhs, Scheduled Tribes Rs. 15.68 lakhs, other Backward Classes, Rs. 83.68 lakhs.

Total No. of applications received from Scheduled Castes was 22,310, from Scheduled Tribes 3,846, from other backward classes 37,964.

In addition 12 scholarships were awarded for study abroad.

The following states have agreed to grant full exemption from payment of fees to Scheduled Castes and Tribes at all stages of education :

Andhra, Madhya Pradesh, Madras, U.P., Kashmir, Mysore, Rajasthan, Delhi, Kerala, Manipur, Tripura, and the PEPHU area of the Punjab and the Saurashtra and Kutch areas of Bombay.

The following States have agreed to grant partial exemption :

Assam, Bihar, Bombay, Orissa, Punjab, W. Bengal, Himachal Pradesh.

The following States have agreed to grant full exemption to other backward class students :

Kashmir, Rajasthan, Delhi and the Bhopal and Vindhya Pradesh areas of Madhya Pradesh.

The following States have agreed to grant partial exemption :

Andhra, Bombay, M. P., Madras, Punjab, U. P., Tripura.

REPORT 1956-57

Expenditure during 1956-57 on welfare schemes : Rs. 12.85 crores. Of this expenditure in the State sector : Rs. 10.75 crores, and in the Central : Rs. 2.1 crores. Expenditure on Scheduled Tribes : Rs. 7.13 crores; on Scheduled Castes : Rs. 4.35 crores; on ex-Criminal Tribes : Rs. 0.54 crores; on other backward classes : Rs. 0.82 crores.

On the whole of this group Bihar spent Rs. 2.41 crores, Bombay Rs. 1.65 crores, Assam Rs. 1.39 crores, U. P. Rs. 1.11 crores.

In his report for 1956-57 the Commissioner for the Scheduled Castes and Scheduled Tribes has expressed the view that the efforts made for the solution of the problem of untouchability have not shown remarkable results, though the problem has been tackled in the right manner.

The report has suggested that thorough surveys should be made to assess correctly and authentically how far the practice of untouchability has disappeared with regard to main matters like access to public places, access to hotels and hair-cutting saloons, entry into places of worship and segregation in respect of houses.

It has also suggested that this work could be largely entrusted to local committees of officials and non-officials which should be set up by the various State Governments.

The report has also suggested that it might be advisable to do away with the term "backward classes" and the maintenance of lists of such castes and communities.

It also expresses the hope that in course of time all State Governments would follow the practice adopted in certain States of calling their Backward Classes Departments as Social Welfare Departments. A suggestion has also been made that any Ministry that may be created for backward classes at the Centre should be called the "Ministry for Social Welfare."

The report says that social disabilities resulting from the practice of untouchability found in a very few backward areas of the country like stopping Harijans from riding on horse-back at marriage ceremonies, putting on gold and silver ornaments, using sugar at marriage feasts and using common cremation and burial grounds will also have to be wiped out as early as possible.

In the view of the Commissioner, the arguments that are generally advanced that untouchability cannot disappear till the caste system disappears or till the economic conditions of the Scheduled Castes are considerably improved, should not be allowed to stand in the way of intensive propaganda for the removal of untouchability.

Referring to the progress of welfare schemes for the Scheduled Castes and Scheduled Tribes under the Five-Year Plans, the report says that it is found from the first six monthly progress reports relating to 1956-57 that many States have reported very unsatisfactory, and sometimes nil, progress in the implementation of the schemes.

On the whole, it adds, the tempo in the first year of the Second Plan has received a set-back in comparison with that of the last two years of the First Plan. It is mainly, says the report, on account of the States having been engrossed in reorganisation and election work.

With regard to the education of the Scheduled Castes and Scheduled Tribes, the report says that marked progress has been noticed in all the States, not only during the first Five-Year Plan period but also during the first year of the Second Plan period.

The report is of the view that it is not easy to get all elementary schools for the Scheduled Castes and Scheduled Tribes converted into full-fledged basic schools.

It adds that the starting of ashram schools is an experiment which has been found successful in Bombay.

Dealing with the economic condition of the Scheduled Castes and Scheduled Tribes, the report says reasonable progress is generally being made in the economic advancement of the Scheduled Castes and Scheduled Tribes. "But," it adds, "so far as scavengers and sweepers are concerned, much remains to be done. There is no uniformity in the scale of pay fixed for them by the municipalities and their working conditions also differ from town to town. It is desirable that some Scheduled Caste young men should be trained for technical jobs and other vocations so that the stigma of untouchability may disappear and the deep rooted belief that they are born and brought up to become scavengers, is given the go by.

"If there are vacancies in some of the municipalities for scavenging work, it would be desirable to advertise these posts and preference given to non-Scheduled Caste candidates provided it does not involve unemployment amongst the

Scheduled Caste people. Waste lands and bhoo-dan lands if allotted to the Scheduled Castes in spite of the opposition of village panchayats can bring about the economic advancement of the Scheduled Castes and backward classes. Cottage and village industries like cane work, leather work and weaving should receive all encouragement."

States and Union Territories have been requested by the Central Government to make adequate provision in their 1958-59 plans for scheme for giving building sites to Harijans.

The Government of India, which has taken this step at the recommendation of the Central Advisory Board for Harijan Welfare, has also given Rs. 61.99 lakhs as subsidy during 1956-57 for housing for Scheduled Castes.

The Government has accepted the Board's recommendation that arrangements for giving legal assistance to Harijans be made in every State. Accordingly, the State Governments and administrations of Union Territories have been requested to make provision for this scheme in the next year's plans.

The Board's recommendation that the landless Harijans be preferred in the allotment of waste land has also been communicated to the States and Union Territories for appropriate action.

As regards elimination of the practice of carrying night-soil in baskets and buckets by scavengers, the Centre has sanctioned a grant-in-aid of Rs. 6.62 lakhs to the municipalities and other local bodies for the purchase of handcarts or wheel-barrow. These will be supplied to scavengers employed by such bodies.

Five members of the Harijan Welfare Board were preparing a scheme to put an end to this practice.

FIRST FIVE-YEAR PLAN

The following table shows the total Government expenditure (in Rs.) on welfare schemes for Scheduled Tribes, Scheduled Castes, ex-Criminal Tribes and other Backward Classes during the First Plan period 1951-56. The figures for 1955-56 included in the total are estimates.

State *	Scheduled Tribes	Scheduled Castes	Ex-Criminal Tribes	Other Backward Classes
Andhra	81,06,342	5,56,176	7,40,865	—
Assam	8,05,62,592†	7,48,137	—	6,57,344
Bihar	3,26,62,000	79,82,893	1,39,580	41,94,895
Bombay	1,28,20,832	1,51,20,851	17,07,750	69,96,876
M.P.	2,35,49,337	21,43,895	—	19,56,847
Madras	10,53,698	3,47,50,139	—	3,14,555

Manipur	27,79,000	1,02,780	—	—
Tripura	17,10,701	53,091	—	—
V.P.	24,16,149	14,95,750	1,38,459	—
Total	23,96,15,408	14,85,40,370	99,78,558	2,64,19,423

* Pre-reorganization.

† Including Rs. 2 crores paid under Article 275(1) of the Constitution.

SECOND PLAN

Total provision : Rs. 91.00 crores.

For Central Schemes : Rs. 32.24 crores.

For State Schemes : Rs. 58.46 crores.

The distribution of this among the various categories is :

Scheduled Tribes : Rs. 48.34 crores

Scheduled Castes : Rs. 25.63 crores.

Ex-Criminal Tribes : Rs. 3.10 crores.

Other Backward Classes : Rs. 6.58 crores.

The balance of Rs. 7.05 crores is earmarked for certain Central sponsored programmes.

THE LAWS OF 1956

PARLIAMENT passed 104 Acts during the year 1956. In addition, two amendments of the constitution were made.

Out of these 104 Acts some do not make any substantial changes in law. The date in the brackets is the date on which the corresponding bill received the assent of the President.

1. The Representation of People (Amendment) Act (March 1, 1956).

This Act repeals the Representation of the People (Amendment) Ordinance of 1955. It adds two new parts to the Act, viz., Part II A and Part II B which deal with officers in connection with elections and the electoral roll for Parliamentary constituencies.

2. The University Grants Commission Act (March 3, 1956).

This Act establishes a University Grants Commission as a corporate body which is authorised to inquire into the financial needs of the universities and to allocate and disburse grants to universities for any general or specified purpose. The Commission has the power to recommend to a university the measures necessary for reform. The Commission will also advise the Central Government on problems connected with the re-ordination of facilities for work and the maintenance of standards in universities. The Act also restricts the use of the word "University" and the power to confer degrees, etc. The Commission is to consist of nine members to be appointed by the Central Government.

3. The Bar Council (Validation of State Laws) Act (March 14, 1956).

4. The Appropriation Act (March 20, 1956).

5. The Voluntary Surrender of Salaries (Exemption from Taxation) Amendment Act (March 21, 1956).

6. The Sales Tax Laws Validating Act (March 21, 1956).

This Act replaces the Sales Tax Laws Validating Ordinance of 1955 and legalises the levy and collection of sales tax by States between 1st April 1954 and 6th September 1955. This was necessary in view of the judgment of the Supreme Court in a Sales Tax case.

7. The Capital Issues (Continuance of Control) Amendment Act (March 21, 1956).

This Act continues in force the provisions of the Capital Issues (Continuance of Control) Act, 1947.

8. The Life Insurance (Emergency Provisions) Act (March 21, 1956).

This Act takes over the management of life insurance business in the public interest pending nationalisation thereof. It vests the management of all life insurance in India including the business managed by foreign insurers, in the Government, and provides for the appointment of custodians to manage the business on behalf of Government. It also provides for the payment on a reasonable basis, of compensation to the persons entitled thereto in respect of the Government taking over the management of the business.

The Act also provides penalties for offences committed.

9. The Control of Shipping (Continuance) Act (March 21, 1956).

This Act extends the life of the Control of Shipping Act for another period of two years ending on 31st March 1958.

10. The Appropriation (Votes on Account) Act (March 22, 1956).

11. The Appropriation (Railways) Act (March 23, 1956).

12. The Appropriation (Railways) No. 2 Act (March 23, 1956).

13. The Appropriation (Railways) No. 3 Act (March 23, 1956).

14. The Appropriation (Railways) No. 4 Act (March 23, 1956).

15. The Appropriation (Railways) No. 5 Act (March 23, 1956).

16. The Indian Registration (Amendment) Act (April 6, 1956).

This Act removes the necessity of recording the caste in a deed of registration.

17. The Finance Act (April 27, 1956).

The Act gives effect to the financial proposals of the Central Government for the financial year 1956-57. It introduces many amendments in the Income-Tax Act.

18. The Appropriation (No. 2) Act (April 28, 1956).

19. The Travancore-Cochin Appropriation (Votes on Account) Act (May 10, 1956).

20. The St. John Ambulance Association (India) Transfer of Funds Act (May 17, 1956).

This Act provides for the transfer of a portion of funds of the St. John Ambulance Association (India) to the St. John Ambulance Association (Pakistan).

21. The Indian Red Cross Society (Amendment) Act (May 21, 1956).

This Act authorises the Indian Red Cross Society to partition its corpus and allied funds with the Pakistan Red Cross Society. The Act also enables the Indian Red Cross Society to exercise necessary control over the branches in the country.

22. The Travancore-Cochin Appropriation Act (May 21, 1956).

23. The Parliamentary Proceedings (Protection of Publication) Act (May 26, 1956).

The Act lays down "no person shall be liable to any proceedings, civil, in any court in respect of the publications in a newspaper of a substantially true report of any proceeding of either House of Parliament unless the publication is proved to have been made with malice. But the publication must be for the public good."

24. The All India Institute of Medical Sciences Act (June 2, 1956).

This Act provides for establishment of an institution under the name of the All India Institute of Medical Sciences at New Delhi with a view to improving medical education. The Institute will develop patterns of teaching in under-graduate and post-graduate medical education. It will have the power to grant medical degrees, diplomas and other academic distinctions which would be recognised medical degrees for the purpose of the Indian Medical Council Act, 1955.

25. The Indian Income Tax (Amendment) Act (June 2, 1956).

26. The Representation of the People (Second Amendment) Act (June 6, 1956).

This Act amends the Representation of the People Act, 1951. It contains a new chapter which deals with appeals, and another which deals with corrupt practices.

27. The Agriculture Produce (Development and Warehousing) Corporation Act (June 10, 1956).

28. The Travancore-Cochin State Legislature (Delegation of Powers) Act (June 13, 1956).

The Act authorises the President of India to legislate for the State of Travancore-Cochin during the period of the Proclamation.

29. The Hindu Succession Act (June 17, 1956).

This Act amends and codifies the Hindu Law of Succession.

There are two classes of heirs under the Act. The daughter becomes a simultaneous heir along with the son. So also the son's daughter.

The limited estate of Hindu women is abolished. All property which a Hindu woman gets becomes her absolute property. The undivided interest in the coparcenary property of a

deceased Hindu will also devolve on his heirs according to the rules laid down in the Act under certain circumstances.

A Hindu is also given the right to make a will of the undivided interest in the coparcenary property. This Act introduces a uniform law of succession for all Hindus in India and removes the inequality that existed between a man and a woman regarding rights to property.

30. The Life Insurance Corporation Act (June 18, 1956).

This Act provides for the nationalisation of life insurance business in India by transferring all such business to a Corporation established for the purpose, and provides for the regulation and control of the business of the Corporation.

The Act also aims at spreading insurance in rural areas. The Corporation is established with the share capital entirely provided by the Central Government.

Section 3 provides for the establishment of the Corporation.

Section 4 lays down the constitution of the Corporation.

Section 5 says that the original capital of the Corporation shall be 5 crores of rupees provided by the Central Government.

Section 6 lays down the functions of the Corporation. They include the carrying on of life insurance business in and outside India, carrying on capital redemption business and the investment of the funds of the Corporation.

Section 7 provides for the transfer of the existing life insurance business to the Corporation.

Section 11 provides for the transfer of the existing whole time employees of insurers to the Corporation.

Section 12 provides for the payment of compensation to an insurer where business is transferred. The principles of compensation are laid down in the first schedule.

Section 13 provides for the constitution of Tribunals for the purpose of this Act.

Chapter V deals with the management, while Chapter VI with the Finance, Accounts and Audit.

Section 29 lays down that the report of the Auditors and Actuaries of the Corporation should be laid before both Houses of Parliament.

Section 30 says that the Corporation should have the exclusive privilege of carrying on life insurance business.

Section 35 lays down rules regarding the repatriation of assets and liabilities in case of foreign insurers in certain cases.

Section 38 provides for the termination of the contracts of chief agents and special agents.

Section 37 says that the policies of the Corporation are guaranteed by the Central Government.

There are three schedules to the Act. The first schedule lays down the principles for determining compensation, the second for determining the value and liabilities in certain cases and the third the principles for the determination of compensation payable to the chief agents.

31. The Constitution (Sixth Amendment) Act (Sept. 11, 1956).

This Act gives effect to the recommendations of the Taxation Enquiry Commission as regards the constitutional provisions relating to Sales Tax.

Section 2 adds a new entry 92A, in the Union List placing taxes on inter-State sales and purchases within the exclusive legislative and executive power of the Union and makes the entry 8-4 of the State List subject to the provisions of the entry 92A.

Section 3 adds these taxes to the list given in clause (1) of article 269. A provision is also made in article 269 expressly empowering Parliament to formulate by law the principles for determining when a sale or purchase of goods takes place in the course of inter-State trade or commerce.

Section 4 omits clause (1) of article 286 and the explanation which gave rise to a great deal of legal controversy.

32. The Hindu Minority and Guardianship Act (Aug. 25, 1956).

This is one of the instalments of the Hindu Code. This Act amends and modifies certain parts of the law relating to minority and guardianship, among Hindus. This Act abolishes the class of *de facto* guardians.

Section 8 defines the powers of the natural guardian of a Hindu minor.

Section 9 defines the powers of a testamentary guardian.

Section 12 lays down that a guardian is not to be appointed for a minor's undivided interest in joint family property.

33. The Inter State Water Disputes Act (Aug. 28, 1956).

This Act provides for the adjudication of disputes relating to the waters of inter-State rivers and river valleys. It provides for the constitution of a Tribunal for resolving disputes and adjudicate in water disputes.

34. The Multi-Unit Co-operative Societies (Amendment) Act (August 28, 1956).

35. The Indian Lac Cess (Amendment) Act (August 28, 1956).

36. The Industrial Disputes (Amendment and Miscellaneous Provisions) Act (August 28, 1956)

This Act amends the Industrial Disputes Act, 1947 and the Industrial Employment (Standing Order) Act, 1946. It also repeals the Industrial Disputes (Appellate Tribunal) Act, 1950.

The Act has provided for the voluntary reference of disputes to arbitration by the parties themselves, by written agreement.

The Act has 4 schedules. The First Schedule mentions the Industries which may be declared to be of public utility service under the Act. The Second Schedule mentions the matters within the jurisdiction of Labour Courts. The Third Schedule mentions the matters within the jurisdiction of Industrial Tribunals and the Fourth Schedule lays down conditions of service, etc., change of which notice is to be given.

37. The States Reorganisation Act (August 31, 1956).

The Act abolishes the constitutional distinction between Part A, Part B and Part C States. Instead, it establishes only two categories for the component units of the Union to be called States and Union Territories. It abolishes the institution of the Rajpramukh. The boundaries of the various States have been defined.

The Act provides for the setting up of five Zonal Councils which will be advisory bodies competent to discuss matters of common interest, particularly in the field of economic and social planning.

(For details see the article 'The States Reorganisation Act, 1956'.)

38. The Reserve Bank of India (Amendment) Act (Sept. 1, 1956).

39. The Code of Criminal Procedure (Amendment) Act (Sept. 1, 1956).

40. The Bihar and West Bengal (Transfer of Territories) Act (Sept. 1, 1956).

This Act gives effect to the recommendations of the States Reorganisation Commission, regarding the transfer of certain areas from Bihar to Bengal. All consequential provisions are made by the Act.

(See separate article under this heading.)

41. The Industrial Disputes (Amendment) Act (Sept. 4, 1956).

42. The Constitution (Seventh Amendment) Act (Oct. 19, 1956).

This Act amends the Constitution with a view to implementing the schemes of States reorganisation.

43. The Securities Contracts (Regulation) Act (Sept. 4, 1956).

This Act prevents undesirable transactions in securities by regulating the business of dealing therein and by prohibiting options.

44. The Appropriation (No. 3) Act (Sept. 7, 1956).

45. The Appropriation (No. 4) Act (Sept. 7, 1956).

46. The Travancore-Cochin Appropriation (No. 2) Act (Sept. 9, 1956).

47. The Indian Coconut Committee (Amendment) Act (Sept. 11, 1956).

48. The National Highways Act (Sept. 11, 1956).

This Act vests all national highways in the Union and the Government of India is authorised to levy fees for services or benefits rendered on national highways.

49. The River Boards Act (Sept. 12, 1957).

This Act provides for the establishment of River Boards for the regulation and development of inter-State rivers and river valleys.

50. The Indian Cotton Cess (Amendment) Act (Sept. 14, 1956).

51. The Indian Institute of Technology (Kharagpur) Act (Sept. 15, 1956)

This Act declares the Indian Institute of Technology to be an institution of national importance and provides for its incorporation. The Institute will have a board, an academic council, a finance committee, etc. The Board shall be the supreme governing body. The Institute is empowered to hold examinations and grant degrees.

52. The Government Premises (Eviction Amendment) Act (Sept. 15, 1957).

53. The Lok Sahayak Sena Act (Sept. 15, 1957).

The Act establishes a National Volunteer Force with a view to inculcating among the members of the public a sense of discipline. It provides for the imparting of military training, the establishment of training camps and the exercise of disciplinary control over the trainees while in the camps.

54. The Indian Post Office (Amendment) Act (Sept. 15, 1957).

55. The Supreme Court (Number of Judges) Act (Sept. 16, 1957).

The number of Judges of the Supreme Court will be ten exclusive of the Chief Justice.

56. The State Financial Corporation (Amendment) Act (Sept. 16, 1956).

57. The Public Debt (Amendment) Act (Sept. 16, 1956).

58. The Central Excises and Salt (Amendment) Act (Sept. 16, 1956).

59. The Indian Railways (Amendment) Act (Sept. 16, 1956).

60. The Representation of the People (Third Amendment) Act (Sept. 25, 1956).

61. The Khadi and Village Industries Commission Act (Sept. 25, 1956).

This Act establishes a Commission for the development of Khadi and village industries.

62. The Jammu and Kashmir (Extension of Laws) Act (Sept. 25, 1956).

This Act provides for the extension of certain laws to the State of Jammu and Kashmir (Sept. 25, 1956).

63. The Scheduled Castes and Scheduled Tribes Orders (Amendment) Act (Sept. 25, 1956).

This Act provides for the inclusion in and the exclusion from the lists of Scheduled Castes and of Scheduled Tribes of castes and tribes. This was necessary as the Backward Class Commission has recommended such inclusion and exclusion.

The alteration of the lists involves a change in the population figures of Scheduled Castes and Scheduled Tribes and consequently a change in the number of reserved seats in Parliament and the State Legislative Assemblies. Necessary provision for that has been made. Schedule I mentions the Scheduled Castes recognised in various States. Schedule III mentions the Scheduled Tribes in various States.

64. The Indian Tariff (Amendment) Act (Nov. 30, 1956).

65. The Abducted Persons (Recovery and Restoration) Continuance Act (Nov. 30, 1956).

66. The Code of Civil Procedure (Amendment) Act (Dec. 2, 1956).

This Act amends the code of Civil Procedure with a view to avoiding delay in legal proceedings.

67. The States Reorganisation (Amendment) Act (Dec. 9, 1956).

68. The Union Territories (Laws) Amendment Act (Dec. 9, 1956).

69. The Terminal Tax on Railway Passengers Act (Dec. 12, 1956).

This Act provides for the levy of a terminal tax on passengers carried by railways from or to certain places of pilgrimage or where fairs, melas or exhibitions are held.

70. The Ancient and Historical Monuments and Archaeological Sites and Remains (Declaration of National Importance) Amendment Act (Dec. 15, 1956).

71. The Industries (Development and Regulation) Amendment Act (Dec. 15, 1956).

72. The Representation of the People (Fourth Amendment) Act (Dec. 15, 1956).

73. The Hindu Marriage (Amendment) Act (Dec. 20, 1956).

74. The Central Sales Tax Act (Dec. 21, 1956).

This Act formulates the principles for determining when a sale or purchase of goods take place in the course of inter-State trade or commerce or outside a State or in the course of import into or export from India, to provide for the levy, collection and distribution of taxes on sale of goods in the course of inter-State trade or commerce and to declare certain goods to be of special importance in inter-State trade or commerce and specify the restrictions and conditions to which State laws imposing taxes on sale or purchase of such goods of special importance shall be subject.

75. The Kerala State Legislature (Delegation of Powers) Act (Dec. 21, 1956).

76. The Finance (No. 2) Act (Dec. 21, 1956).

77. The Finance (No. 3) Act (Dec. 21, 1956)

78. The Hindu Adoption and Maintenance Act (Dec. 21, 1956).

This Act amends and codifies the law relating to adoption and maintenance among Hindus. The Act provides for the adoption of boys as well as girls. A woman may adopt a son or a daughter to herself. No person is divested of any property which has vested in him, by reason only of the fact that subsequent to such vesting, an adoption has been made. The law relating to maintenance has not been much changed.

Section 5 lays down that adoption will be regulated by the provisions laid down in Chapter II. It contains rules regarding the capacity to take in adoption, persons capable of giving in adoption, persons who may be adopted, etc. It also lays down that adoption will not affect the right of adoptive parents to dispose of their properties.

Chapter III deals with maintenance, and rules regarding the maintenance of wife, of widowed daughter-in-law, children and parents and dependants.

79. The Manipur (Village Authorities in Hill Areas) Act (Dec. 22, 1956).

80. The Union Duties of Excise (Distribution) Amendment Act (Dec. 24, 1956).

81. The Appropriation (No. 5) Act (Dec. 24, 1956).

82. The Appropriation (Railways) No. 6 Act (Dec. 24, 1956).

83. The Appropriation (Railways) No. 7 Act (Dec. 24, 1956).

84. The Territorial Army Act (Dec. 28, 1956).

85. The Road Transport Corporations (Amendment) Act (Dec. 28, 1956).

86. The Representation of the People (Miscellaneous Provisions) Act (Dec. 28, 1956).

87. The Standards of Weights and Measures Act (Dec. 28, 1956).

This Act lays down meter as the primary unit of length and the kilogram as the primary unit of mass. It lays down standards not only for mass and length but also for time, temperature, electric current and luminous intensity. The actual implementation and enforcement of these standards is the responsibility of State Governments.

88. The Faridabad Development Corporation Act (Dec. 28, 1956).

This Act provides for the establishment and regulation of a Trading Corporation for the purpose of carrying on and promoting trade and industry in the town of Faridabad, assisting in the rehabilitation of displaced persons settled therein.

89. The Displaced Persons (Compensation and Rehabilitation) Amendment Act (Dec. 27, 1956).

90. The Administration of Evacuee Property (Amendment) Act (Dec. 28, 1956).

91. The Young Persons (Harmful Publications) Act (Dec. 28, 1956).

The object of this Act is to prohibit the production in India of pictorial and other publications containing stories of the glorification of crime, violence and vice known as 'horror crimes'. This is sought to be done because the dissemination of such stories is likely to encourage anti-social tendencies among the children.

92. The Employers Provident Funds (Amendment) Act (Dec. 29, 1956).

93. The Banking Companies (Amendment) Act (Dec. 28, 1956).

94. The Central Excise and Salt (Second Amendment) Act (Dec. 22, 1956).

95. The Delhi Tenants (Temporary Protective) Act (Dec. 29, 1956).

96. The Delhi (Control of Building Operations) Continuance Act (Dec. 29, 1956).

97. The Delivery of Books (Public Libraries) Amendment Act (Dec. 29, 1956).

The Act brings newspapers within the purview of the original Act so that the newspapers may also be available in the public libraries for reference and records.

98. The Slum Areas (Improvement and Clearance) Act (Dec. 29, 1956).

99. The Motor Vehicles (Amendment) Act (Dec. 30, 1956).

100. The Electric (Supply) Amendment Act (Dec. 30, 1956).

101. The Indian Medical Council Act (Dec. 30, 1956).

This Act provides for the reconstitution of the Medical Council of India and the maintenance of a Medical Register for India.

102. The Territorial Councils Act (Dec. 30, 1956).

This Act provides for the establishment of Territorial Councils in certain Union Territories.

103. The Suppression of Immoral Traffic in Women and Girls Act (Dec. 30, 1956).

This Act provides in pursuance of the International Convention signed in New York, for the suppression of immoral traffic in women and girls.

Legislation on the subject of immoral traffic did exist in a few States but the law was not uniform. This Act secures uniformity and is sufficiently deterrent for the purpose of suppression.

The Act provides that no person or authority other than the State Governments shall establish or maintain any protective home except under a license issued by the State Governments.

Section 3 lays down punishment for keeping a brothel and allowing premises to be used as brothels.

Section 4 provides punishment for living on the earnings of prostitution.

Section 5 lays down punishment for procuring, inducing or taking a woman or a girl for the sake of prostitution.

Section 14 provides that offences under this Act are cognizable.

104. The Women's and Children's Institution (Licensing) Act (Dec. 30, 1956).

This Act provides for the licensing of institutions for women and children. The Act aims at regulating and licensing orphanages and other institutions, caring for women and children under 18 years of age and providing for proper custody, care and training for their inmates. This Act does not apply to Hostels or Boarding Houses attached to or controlled or recognised by educational institutions.

THE STATES REORGANIZATION ACT 1956

Below we give some main provisions of the States Reorganization Act. The numbers of the Articles are retained, but the articles are sometimes shortened or summarized or put in different words.

TERRITORIAL CHANGES

3. (1) As from the appointed day, there shall be added to the State of Andhra the territories comprised in—

(a) the districts of Hyderabad, Medak, Nizamabad, Karimnagar, Warangal, Khammam, Nalgonda and Mahbubnagar;

(b) Alampur and Gadwal taluks of Raichur district, and Kodangal taluk of Gulbarga district;

(c) Tandur taluk of Gulbarga district;

(d) Zahirabad taluk (except Nirna circle), Nyalkal circle of Bidar taluk and Narayanekhd taluk of Bidar district;

(e) Bichkonda and Jukkal circles of Deglur taluk of Nanded district;

(f) Mudhol, Bhiansa and Kuber circles of Mudhol taluk of Nanded district; and

(g) Adilabad district except Islapur circle of Boath taluk, Kinwat taluk and Rajura taluk; and thereupon the State of Andhra shall be known as the State of Andhra Pradesh.

(2) The territories referred to in clauses (b), (c), (d), (e) and (f) of sub-section (1) shall be included in, and become part of, Mahbubnagar, Hyderabad, Medak, Nizamabad and Adilabad districts, respectively, in the State of Andhra Pradesh.

4. There shall be added to the State of Madras the territories comprised in the Agastheeswaram, Thovala, Kalkulam and Vilavancode taluks of Trivandrum district and the Shenottath taluk (excluding Pullyara Hill pakhuthy) of Quilon district; (b) the territories comprised in the Agastheeswaram, Thovala, Kalkulam and Vilavancode taluks shall form a separate district to be known as Kanya Kumari district in the State of Madras, and (c) the territories comprised in the Shenottath taluk shall be included in, and become part of, Tirunelveli district in the State of Madras.

5. (1) There shall be formed a new Part A State to be known as the State of Kerala comprising the following territories:—

(a) the territories of the existing State of Travancore-Cochin, excluding the territories transferred to the State of Madras by section 4, and

(b) the territories comprised in—

(i) Malabar district, excluding the Islands of Laccadive and Minicoy, and

(ii) Kasaragod taluk of South Kanara district.

(2) The territories specified in clause (b) of sub-section (1) shall form a separate district to be known as Malabar district in the State of Kerala.

6. The Laccadive, Minicoy and Amindivi Islands shall cease to form part of the State of Madras and shall become a new Part C State.

7. (1) There shall be formed a new Part A State to be known as the State of Mysore comprising the following territories:—

(a) the territories of the existing State of Mysore;

(b) Belgaum district except Chandgad taluk and Bijapur, Dharwar and Kanara districts, in the existing State of Bombay;

(c) Gulbarga district except Kodangal and Tandur taluks, Raichur district except Alampur and Gadwal taluks, and Bidar, Bhalki, Humnabad and Santpur (Aurad) taluks of Bidar district, in the existing State of Hyderabad;

(d) South Kanara district except Kasaragod taluk and Amindivi Islands, and Kollegal taluk of Coimbatore district, in the State of Madras; and

(e) the territories of the existing State of Coorg;

(2) The territories comprised in the existing State of Coorg shall form a separate district to be known as Coorg district, and the said Kollegal taluk shall be included in and become part of, Mysore district.

8. (1) There shall be formed a new Part A State to be known as the State of Bombay comprising the following territories, namely:—

(a) the territories of the existing State of Bombay, excluding—

(i) Bijapur, Dharwar and Kanara districts and Belgaum district except Chandgad taluka, and

(ii) Abu Road taluka of Banaskantha district;

(b) Aurangabad, Parbhani, Bhilrand Osmanabad districts; Ahmadpur, Nilanga and Udgir taluks of Bidar district; Nanded district (except Bichkonda and Jukkal circles of Deglur taluk, and Mudhol, Bahansa and Kuber circles of Mudhol taluk); and Islapur circle of Boath taluk, Kinwat taluk and Rajura taluk of Adilabad district, in the existing State of Hyderabad;

(c) Buldana, Akola, Amravati, Yeotmal, Wardha, Nagpur, Bhandara and Chanda districts in the existing State of Madhya Pradesh;

(d) the territories of the existing State of Saurashtra; and

(e) the territories of the existing State of Kutch;

(2) The said Chandgad taluka shall be included in, and become part of, Kolhapur district; the said Ahmadpur, Nilanga and Udgir taluks shall be included in, and become part of, Osmanabad district, the said Islapur Circle of Boath taluk, Kinwat taluk and Rajura taluk shall be included in, and become part of, Nanded district; and the territories comprised in the existing State of Kutch shall form a separate district to be known as Kutch district, in the new State of Bombay.

9. (1) There shall be formed a new Part A State to be known as the State of Madhya Pradesh comprising the following territories:—

(a) the territories of the existing State of Madhya Pradesh, except the districts mentioned in clause (c) of sub-section (1) of section 5.

(b) the territories of the existing State of Madhya Bharat, except Sunel tappa of Bhanpura tahsil of Mandasaur district;

(c) Sironj sub-division of Kotah district in the existing State of Rajasthan;

(d) the territories of the existing State of Bhopal, and

(e) the territories of the existing State of Vindhya Pradesh.

(2) The said Sironj sub-division shall be included in, and become part of, Bilasa district in the new State of Madhya Pradesh.

10. (1) There shall be formed a new Part A State to be known as the State of Rajasthan comprising the following territories, namely:—

(a) the territories of the existing State of Rajasthan, except Sironj sub-division of Kotah district;

(b) the territories of the existing State of Ajmer;

(c) Abu Road taluka of Banaskantha district in the existing State of Bombay, and

(d) Sunel tappa of Bhanpura tahsil of Mandasaur district in the existing State of Madhya Bharat.

(2) The territories comprised in the existing State of Ajmer shall form a separate district to be known as Ajmer district, and the territories referred to in clauses (c) and (d) of sub-section (1) shall be included in, and become part of, Sirohi and Jhalawar districts, respectively, in the new State of Rajasthan.

11. There shall be formed a new Part A State to be known as the State of Punjab comprising the following territories:—

(a) the territories of the existing State of Punjab; and

(b) the territories of the existing State of Patiala and East Punjab States Union.

In the First Schedule to the Constitution the Part A States will be:

Andhra Pradesh, Assam, Bihar, Bombay, Kerala, Madhya Pradesh, Madras, Mysore, Orissa, Punjab, Rajasthan, Uttar Pradesh, West Bengal.

The Part B State will be:

Jammu and Kashmir.

The Part C Territories will be:

Delhi, Himachal Pradesh, Manipur, Tripura, the Laccadive, Minicoy, and Amindivi Islands.

13. The power of the State Governments to alter the name, extent and boundaries of any district or division in the State is not affected by any provisions of this Act.

ZONAL DIVISION

15. There shall be a Zonal Council for each of the following five zones namely:—

(a) the Northern Zone comprising the States of Punjab, Rajasthan and Jammu and Kashmir and the Part C States of Delhi and Himachal Pradesh;

(b) the Central Zone, comprising the States of Uttar Pradesh and Madhya Pradesh;

(c) the Eastern Zone, comprising the States of Bihar, West Bengal, Orissa and Assam, and the Part C States of Manipur and Tripura;

(d) the Western Zone, comprising the States of Bombay and Mysore; and

(e) the Southern Zone, comprising the States of Andhra Pradesh, Madras and Kerala.

16. (1) The Zonal Council for each zone shall consist of the following members:—

(a) a Union Minister to be nominated by the President;

(b) The Chief Ministers of each of the States included in the zone and two other Ministers of each such State to be nominated by the State Government in the case of Kashmir and by the Governor in any other case, and if there is no Council of Ministers in any such State three members from that State to be nominated by the President.

(c) Where any Part C State is included in the zone not more than two members from each such State to be nominated by the President.

(d) In the case of the Eastern Zone, the person for the time being holding the office of the Adviser to the Governor of Assam for Tribal Areas.

(2) The Union Minister nominated under clause (a) of sub-section (1) to a Zonal Council shall be its Chairman.

(3) The Chief Ministers of the States included in each zone shall act as Vice-Chairman of the Zonal Council for that zone by rotation, each holding office for a period of one year at a time.

If there is no Council of Ministers in the State concerned, such member from that State as the President may nominate shall act as Vice-Chairman.

(4) The Zonal Council for each zone shall have the following persons as Advisers to assist the Council in the performance of its duties:

(a) one person nominated by the Planning Commission;

(b) the persons for the time being holding the offices of Chief Secretaries in the States included in the zone; and

(c) the persons for the time being holding the offices of Development Commissioners in the States or any other officers nominated by the Governments of the States included in the zone.

(5) Every adviser to a Zonal Council shall have the right to take part in the discussions of the Council or of any Committee thereof of which he may be named a member but shall not have a right to vote at a meeting of the Council or of any such Committee.

17. (1) Each Zonal Council shall meet at such time as the Chairman of the Council may appoint in this behalf and shall, subject to the other provisions of this section, observe such rules of procedure in regard to transaction of business at its meetings as it may with the approval of the Central Government lay down from time to time.

(2) The Zonal Council shall unless otherwise determined by it, meet in the States included in that zone by rotation.

(4) All questions at a meeting of a Zonal Council shall be decided by a majority of votes of the Members present and in the case of an equality of votes, the Chairman shall have a second or casting vote.

(5) The proceedings of every meeting of a Zonal Council shall be forwarded to the Central Government and also to each State Government concerned.

19. (1) Each Zonal Council shall have a secretarial staff consisting of a Secretary, a Joint Secretary and such other officers as the Chairman may consider necessary to appoint.

(2) The Chief Secretaries of the States represented in such Council shall each be the Secretary of the Council by rotation and hold office for a period of one year at a time.

(3) The Joint Secretary of the Council shall be chosen from amongst officers not in the service of any of the States represented in the Council and shall be appointed by the Chairman.

20. (2) The administrative expenses of the said office, including the salaries and allowances payable to or in respect of members of the secretarial staff of the Council other than the Secretary, shall be borne by the Central Government out of monies provided by Parliament for the purpose.

21. (1) Each Zonal Council shall be an advisory body and may discuss any matter in which some or all of the States represented in that Council, or the Union and one or more of the States represented in that Council, have a common interest and advise the Central Government and the Government of each State concerned as to the action to be taken on any such matter.

(2) In particular, and without prejudice to the generality of the provisions of sub-section (1), a Zonal Council may discuss, and make recommendations with regard to,—

(a) any matter of common interest in the field of economic and social planning;

(b) any matter concerning border disputes, linguistic minorities or inter-State transport; and

(c) any other matter connected with or arising out of the reorganization of the States under this Act.

22. (1) Where it is represented to a zonal council that a matter in which a State included in that zone and one or more States included in some other zone have a common interest should be discussed at a joint meeting of the zonal councils concerned it shall be legitimate for the Councils to meet and discuss the matter.

(2) The Central Government may make rules for regulating the procedure at such joint meetings.

LEGISLATURES

22. (1) Such six of the eleven sitting members representing the State of Hyderabad as the Chairman (of the Council of States) shall specify shall fill six of the eighteen seats allotted to the State of Andhra Pradesh.

(2) Such five of the six sitting members representing the State of Travancore-Cochin and such three of the eighteen sitting members representing the State of Madras as the Chairman shall specify shall fill eight of the nine seats allotted to the State of Kerala.

(3) The eleven sitting members representing the States of Bhopal, Madhya Bharat and Vindhya Pradesh and such five of the twelve sitting members representing the State of Madhya Pradesh as the Chairman shall specify shall be deemed to have been duly elected to fill the sixteen seats allotted to the new State of Madhya Pradesh.

(4) Such one of the six sitting members representing the State of Travancore-Cochin as the Chairman shall specify be deemed to have been duly elected to fill one of the seats allotted to Madras State.

(5) The six sitting members representing the State of Mysore, and such four of the seventeen sitting members representing the State of Bombay, and such two of the eleven sitting members representing the State of Hyderabad, as the Chairman shall specify shall fill the twelve seats allotted to the new State of Mysore.

(6) The eleven sitting members representing the existing States of Punjab and Patiala and East Punjab States Union shall fill the eleven seats allotted to the new State of Punjab.

(7) The nine sitting members representing the State of Rajasthan and the sitting member representing the States of Aggar and Coorg shall fill the ten seats allotted to the new State of Rajasthan.

(8) The five sitting members representing the States of Saurashtra and Kutch and the sitting members representing the existing States of Bombay, Hyderabad and Madhya Pradesh who have not been allocated under sub-sections (1), (3) and (5) to Andhra Pradesh, Madhya Pradesh and Mysore shall fill the twenty-seven seats allotted to the new State of Bombay.

25. As soon as may be after the appointed day, bye-elections shall be held to fill the vacancies existing on the appointed day in the seats allotted to the States of Kerala and Madras.

26. In order that as nearly as one-third of the members may retire on 2nd April, 1958, and on the expiry of every second year thereafter, the President shall after consultation with the Election Commission make such provision as he thinks fit in regard to the terms of office of members.

27. Nothing (in this Bill) shall be deemed to affect the constitution or duration of the existing House of the People or the extent of the constituency of any sitting member of that House.

28. (1) Where by virtue of the provisions of this Bill the whole area of any Assembly constituency in an existing State is transferred to any other existing State or becomes part of a new State other than Kerala,—

(a) that area shall be deemed to form a constituency of such other existing State or of such new State, as the case may be; and

(b) the sitting member representing that constituency shall, be deemed to have been elected to the said Legislative Assembly by that constituency.

(2) The sitting members for constituencies in the State of Madras falling wholly or partly within that State which after the appointed day become part of the State of Kerala shall from that day cease to be members of the Legislative Assembly of Madras.

(3) The provisions of the First Schedule shall apply in relation to the sitting members representing the Assembly constituencies specified therein.

(4) The members of the electoral college for Kutch shall, as soon as may be after the commencement of this Act elect eight persons from among themselves in accordance with the system of proportional representation by means of the single transferable vote and the persons so elected shall be deemed to have been elected to the Legislative Assembly of Bombay by a constituency comprising the whole of Kutch district.

(5) The sitting members nominated to represent the Anglo-Indian community in the Legislative Assemblies of Madhya Pradesh,

and Mysore shall be deemed to have been nominated to the Legislative Assemblies of the corresponding new States.

29. When a general election is next held in the State of Andhra Pradesh for electing members to the House of the People, elections shall also be held to fill the seats allotted to the Assembly constituencies into which the transferred territory in that State is divided.

30. The period of five years shall in the case of Legislative Assembly of each new State except Kerala, be deemed to have commenced on the date on which it actually commenced in the case of the Legislative Assembly of the corresponding State.

COUNCILS

33. (1) As from such date as the President may appoint, there shall be a Legislative Council for the new State of Madhya Pradesh.

(2) In the said Council there shall be 72 seats of which—

(a) the numbers to be filled by persons elected by the electorates referred to in sub-clauses (a), (b) and (c) of clause (4) of article 171 shall be 24, 6 and 6 respectively;

(b) the number to be filled by persons elected by the members of the Legislative Assembly in accordance with the provisions of sub-clause (d) of the said clause shall be 24; and

(c) the number to be filled by persons nominated by the Governor in accordance with the provisions of sub-clause (e) of that clause shall be 12.

34. (1) As from such date as the President may appoint, there shall be a Legislative Council for the new State of Bombay.

(2) Until the said Council has been reconstituted in accordance with the provisions of sub-sections (4) and (5) of this section and summoned to meet for the first time, the said Council shall consist of—

(a) all the sitting members of the Legislative Council of the existing State of Bombay, except those representing the Belgaum (Local Authorities), Bijapur (Local Authorities) and Dharwar (Local Authorities) constituencies; and

(b) 25 members to represent the territories specified in clauses (b), (c), (d) and (e) of sub-section (1) of section 8 who shall be chosen in such manner as may be prescribed.

(3) After such reconstitution as aforesaid, there shall be 72 seats in the said Council of which—

(a) the numbers to be filled by persons elected by the electorates referred to in sub-clauses (a), (b) and (c) of clause (3) of article 171 shall be 24, 6 and 6 respectively;

(b) the number to be filled by persons elected by the members of the Legislative Assembly shall be 24; and

(c) the number to be filled by persons nominated by the Governor shall be 12.

35. (1) In the Legislative Council of Madras, as from the appointed day, there shall be 50 seats of which—

(a) the numbers to be filled by persons elected by the electorates referred to in sub-clauses (a), (b) and (c) of clause (3) of article 171 shall be 16, 6 and 4 respectively;

(b) the number to be filled by persons elected by the members of the Legislative Assembly in accordance with the provisions of sub-clause (d) of the said clause shall be 16; and

(c) the number to be filled by persons nominated by the Governor in accordance with the provisions of sub-clause (e) of that clause shall be 8.

(3) The two sitting members of the said Council representing the West Coast (Local Authorities) Constituency and such two of the eighteen sitting members elected by the members of the Legislative Assembly, as the Chairman of the said Council shall specify shall, on the appointed day, cease to be members of the said Council.

(4) If, immediately before the appointed day, the total number of sitting members nominated by the Governor is nine, such one of them as the Governor shall specify shall, on the appointed day, cease to be a member of the said Council.

(6) As soon as may be after the appointed day, bye-elections shall be held in all the local authorities constituencies to fill the vacancies existing on that day in the said Council.

(7) In order that as nearly as one-third of the members of the said Council may retire on 20th April 1958, and on the expiry of every second year thereafter, the Governor shall after consultation with the Election Commission make such provision as he thinks fit in regard to the term of office of members.

36. (1) There shall be a Legislative Council for the new State of Mysore.

(2) Until the said Council has been reconstituted in accordance with the provisions of sub-sections (3) and (4) of this section and summoned to meet for the first time the said Council shall consist of—

(a) all the sitting members of the Legislative Council of the existing State of Mysore, and

(b) 12 members to represent the territories specified in clauses (b), (c), (d) and (e) of sub-section (1) of section 7 who shall be chosen in such manner as may be prescribed.

(3) After such reconstitution as aforesaid, there shall be 52 seats in the said Council of which—

(a) the numbers to be filled by persons elected by the electorates referred to in sub-clauses (a), (b) and (c) of clause (3) of article 171 shall be 18, 4 and 4 respectively;

(b) the number to be filled by persons elected by the members of the Legislative Assembly shall be 18, and

(c) the number to be filled by persons nominated by the Governor shall be 8.

37. (1) There shall be a Legislative Council for the new State of Punjab.

(2) Until the said Council has been reconstituted in accordance with the provisions of sub-sections (3) and (4) of this section and of any other law for the time being in force the said Council shall consist of—

(a) all the sitting members of the Legislative Council of the existing State of Punjab.

(b) six persons to be elected in such manner as may be prescribed by the members of the Legislative Assembly of the existing State of Patiala and East Punjab States Union from amongst persons who are not members of that Assembly

(3) After such reconstitution as aforesaid, there shall be 40 seats in the said Council of which—

(a) the numbers to be filled by persons elected by the electorates referred to in sub-clauses (a), (b) and (c) of clause (3) of article 171 shall be 13, 3 and 3 respectively;

(b) the number to be filled by persons elected by the members of the Legislative Assembly shall be 13; and

(c) the number to be filled by persons nominated by the Governor shall be 8.

DELIMITATION OF CONSTITUENCIES

41. As soon as may be after the commencement of this Act, the President shall make such modifications in the Constitution (Scheduled Castes) Order, 1950, the Constitution (Scheduled Castes) (Part C States) Order, 1951, the Constitution (Scheduled Tribes) Order, 1950 and the Constitution (Scheduled Tribes) (Part C States) Order, 1951, as he thinks fit having regard to the territorial changes and formation of new States.

42. (1) The population as at the last census of the scheduled castes and of the scheduled tribes in each of the States of Andhra Pradesh, Bombay, Kerala, Madhya Pradesh, Madras, Mysore, Punjab, Rajasthan shall be ascertained or estimated by the census authority.

(2) The population figures shall be taken to be the relevant population figures as ascertained at the last census and shall supersede any figures previously published.

43. (1) As soon as may be after the commencement of this Act, the Central Government shall constitute a Commission to be called the Delimitation Commission which shall consist of three members as follows:—

(a) two members each of whom shall be a person who is, or has been, a Judge of the Supreme Court or of a High Court, to be appointed by the Central Government; and

(b) the Chief Election Commissioner, *ex officio*.

44. It shall be the duty of the Commission—

(a) to determine on the basis of the population figures the number of seats, if any, to be reserved for the scheduled castes and the scheduled tribes of each of the States mentioned in section 42 in the House of the People and in the Legislative Assembly of the State;

(b) to determine the parliamentary and assembly constituencies into which each new State shall be divided, the extent of, and the number of seats to be allotted to each such constituency, and the number of seats if any, to be reserved for the scheduled castes and the scheduled tribes of the States in each such constituency.

45. (1) For the purpose of assisting the Commission the Commission shall associate with itself in respect of each new State such five persons as the Central Government shall by order specify, being persons who are members either of the House of the People or of the Legislative Assembly of an existing State.

Provided that such persons shall be chosen as far as practicable from among those members who were associated with the former Commission. None of the associate members shall have the right to vote or sign any decision of the commission.

HIGH COURTS

49. (1) The High Courts exercising immediately before the appointed day jurisdiction in relation to the existing States of Bombay, Madhya Pradesh and Punjab shall, as from the appointed day, be deemed to be the High Courts for the new States of Bombay, Madhya Pradesh and Punjab, respectively.

(2) As from the appointed day, there shall be established a High Court for each of the new States of Kerala, Mysore and Rajasthan.

50. (1) As from the appointed day, the High Courts of all the existing Part B States, except Jammu and Kashmir, and the Courts of the Judicial Commissioners for Ajmer, Bhopal, Kutch and Vindhya Pradesh shall cease to function and are hereby abolished.

65. (1) As from the appointed day,—

(a) the jurisdiction of the High Court of the existing State of Andhra shall extend to the whole of the territories transferred to that State from the existing State of Hyderabad;

(b) the said High Court shall be known as the High Court of Andhra Pradesh; and

(c) the principal seat of the said High Court shall be at Hyderabad.

EXPENDITURE

70. In the case of every new State, the Governor or Rajpramukh of the corresponding State may before the appointed day authorise such expenditure as he deems necessary for a period not extending beyond the 31st day of March, 1957.

Provided that the Governor of a new State may authorize such further expenditure as he deems necessary for the said period.

71. (1) As from the appointed day, any Act passed by the Legislature of the State of Andhra or Madras before that day for the appropriation of any money to meet any expenditure in respect of any part of the financial year 1956-57 shall have effect also in relation to the transferred territory in that State.

(2) The Governor of Andhra Pradesh or Madras may authorize such expenditure as he deems necessary for any purpose or service in

the transferred territory of the State for any period not extending beyond the 31st day of March 1957.

72. (1) Where the whole or any part of the territory of an existing State has been transferred to another existing State or to a new State the reports of the Comptroller and Auditor-General of India relating to the accounts of that existing State shall be submitted to the Governor of such State or of each of such States and the Governor shall thereupon cause them to be laid before the Legislature of that State.

(2) The President may by order—

(a) declare any expenditure incurred out of the Consolidated Fund of Bombay, Madhya Pradesh or Punjab or of any Part B or Part C State on any service during the financial year 1955-56 or any earlier financial year in excess of the amount granted for that service and for that year as disclosed in the reports referred to in sub-section (1) to have been duly authorised, and

(b) provide for any action to be taken on any matter arising out of the said reports.

73. The allowances and privileges of the Governor of each new State shall, until provision in that behalf is made by Parliament by law be such as the President may, by order, determine.

74. (1) Section 3 of the Union Duties of Excise (Distribution) Act, 1953 and paragraphs 3 and 5 of the Constitution (Distribution of Revenues) Order, 1953 shall, in respect of the financial year 1956-57, have effect in the modified form set out in the Fourth Schedule.

(2) There shall be charged on the Consolidated Fund of India in respect of each of the three financial years 1957-58, 1958-59 and 1959-60 as grants-in-aid of—

(a) the State of Bombay, the sum, if any, by which 8.58 per cent of the total of the amounts payable to that State under articles 270 and 272 falls short of 245 lakhs of rupees;

(b) the State of Kerala, the sum if any, by which 81.91 per cent of the total of the amounts payable to that State under the said articles falls short of 232.35 lakhs of rupees;

(c) the State of Madras, the sum, if any, by which 2.97 per cent of the total of the amounts payable to that State under the said articles falls short of 24.65 lakhs of rupees;

(d) the State of Mysore, the sum, if any, by which 46.75 per cent of the total of the amounts payable to that State under the said articles falls short of 289.80 lakhs of rupees.

DIVISION OF ASSETS

75. The provisions of this Part shall apply in relation to the apportionment of the assets and liabilities immediately before the appointed day of every Part A or Part B State the whole or any part of whose territories is transferred to another State or becomes a Part C State.

76. (1) Subject to the other provisions of this Part, all land and all stores, articles and other goods belonging to an existing State shall

(a) if within the existing State, pass to the successor State in which they are situated; or

(b) if outside the existing State, pass to the successor State, or if there be two or more successor States, to the principal successor State;

Provided that where there are two or more successor States and the Central Government is of opinion that any goods or class of goods should be distributed among them otherwise than according to the situation of the goods, the Central Government may issue such directions as it thinks fit for a just and equitable distribution of the goods and the goods shall pass to the successor States accordingly.

(2) Any unissued stores of any class in an existing State shall pass to the successor State, or if there be two or more successor States, shall be divided between them in proportion to the total indents for stores of that class made in the period of three years ending with the 31st day of March, 1956, for the territories

of the existing State included respectively in each of those successor States excluding the indents relating to the Secretariat and offices of heads of departments having jurisdiction over the whole of the existing State.

Provided that nothing in this sub-section shall apply to stores held for specific purposes, such as use or utilisation in particular institutions, workshops, or undertakings or on particular works under construction.

(3) In this section, the expression "land" includes immovable property of every kind and any rights in or over such property, and the expression "goods" does not include coins, bank notes and currency notes.

77. The total of the cash balances in all treasuries of an existing State and the credit balances of that State with the Reserve Bank of India immediately before the appointed day shall pass to the successor State, or, if there be two or more successor States, be divided between them according to the population ratio:

Provided that for the purpose of such division, there shall be no transfer of cash balances from any treasury to any other treasury and the apportionment shall be effected by adjusting the credit balances of the successor States in the books of the Reserve Bank of India on the appointed day.

Provided further if any successor State has no account with the Reserve Bank of India the adjustment shall be made in such manner as the Central Government may direct.

78. The right to recover arrears of any tax or duty on property including arrears of land revenue shall belong to the successor State in which the property is situated, and the right to recover arrears of any other tax or duty shall belong to the successor State in whose territory the place of assessment of that tax or duty is included.

79. (1) The right to recover any loans or advances made before the appointed day by an existing State to any local body, society, agriculturist or other person in an area within that State shall belong to the successor State in which that area is included.

(2) The right to recover any loans or advances made before the appointed day by an existing State to any person or institution outside that State shall belong to the successor State or, if there be two or more successor States, to the principal successor State.

Provided that where there are two or more successor States any sum recovered in respect of any such loan or advance shall be divided between all the successor States according to the population ratio.

80. The investments in the cash balance investments account, the famine relief fund and the general fund of an existing State and the sums at the credit of an existing State in the central road fund shall pass to the successor State or, if there be two or more successor States, be divided between them according to the population ratio; and the investments in any special fund the objects of which are confined to a local area in an existing State shall pass to the successor State in which that area is included.

81. (1) The assets and liabilities relating to any commercial or industrial undertaking of an existing State shall pass to the successor State in which the undertaking is located.

(2) Where a depreciation reserve fund is maintained by an existing State for any commercial or industrial undertaking, the securities held in respect of investments made from that fund shall pass to the successor State in which the undertaking is located.

PUBLIC DEBTS

82. (1) The public debt of the existing State of Hyderabad attributable to loans raised by the issue of Government securities and outstanding with the public immediately before the 31st of October, 1956, shall as from that day be the debt of the Union, and immediately on such transfer of the debt, the Central Government shall be deemed to have made a loan to

that State of an amount equal to the debt so transferred on the same terms in regard to interest and repayment as are applicable to the loans so raised by that State.

(2) The public debt of any other existing State attributable to loans raised by the issue of Government securities and outstanding with the public immediately before the appointed day shall, as from that day, be the debt of the successor State or, if there be two or more successor States, be the debt of such one of them as the Central Government may, by order, specify, and in the latter case,—

(a) the other successor States shall be liable to pay to the successor State so specified their share of the sums due for the servicing and repayment of the debt, and (b) for the purpose of determining the said shares, the debt shall be deemed to be divided between the successor States as if it were a debt referred to in sub-section (3).

(3) The public debt of an existing State attributable to loans taken from the Central Government, the Reserve Bank of India or any other Bank before the appointed day, including in the case of Hyderabad the loan deemed to have been made by the Central Government shall pass to the successor State, or if there be two or more successor States, be divided between them in proportion to the total expenditure on all capital works and other capital outlays incurred up to the appointed day in the territories of the existing State included respectively in each of those successor States:

Provided that for the purposes of such division, only expenditure on assets for which capital accounts have been kept shall be taken into account.

Provided further that any loan taken from the Central Government by the Government of an existing State before the appointed day in connection with the construction of buildings, roads or other works for the capital of a new State or any State affected by the territorial changes, or for purposes incidental thereto shall to the extent of the expenditure so incurred until that day, be wholly the liability of the successor State in which the capital is included.

(4) Where a sinking fund or depreciation fund is maintained by an existing State for the repayment of any loan raised by it, the securities held in respect of investments made from that fund shall pass to the successor State or, if there be two or more successor States, be divided between them in the same proportion as the public debt referred to in sub-section (3).

84. Civil deposits and local fund deposits with an existing State shall pass to the successor State in whose area the deposits have been made and the liability to pay them shall fall on that State.

85. The liability of an existing State in respect of the provident fund account of a Government servant in service on the appointed day shall as from that day, be the liability of the successor State to which that Government servant is permanently allotted.

86. The liability of the existing States in respect of pensions shall pass to, or be apportioned between, the successor States in accordance with the provisions contained in the Fifth Schedule.

CONTRACTS

87. (1) Where an existing State has made any contract in the exercise of its executive power that contract shall be deemed to have been made in the exercise of the executive power—

(a) if there be only one successor State,—of that State;

(b) if there be two or more successor States and the purposes of the contract are exclusively purposes of any one of them,—of that State; and

(c) if there be two or more successor States and the purposes of the contract are not exclusively purposes of any one of them,—of the principal successor State:

Provided that in any such case the initial allocation of rights and liabilities made by this sub-section shall be subject to such financial adjustment as may be agreed upon between all the successor States concerned, or in default of such agreement, as the Central Government may by order direct.

88. Where, immediately before the appointed day, an existing State is subject to any liability in respect of an actionable wrong other than breach of contract, that liability shall—

(a) if there be only one successor State, be a liability of that State;

(b) if there be two or more successor States and the cause of action arose wholly within the territories which as from that day are the territories of one of them, be a liability of that successor State; and

(c) in any other case, be initially a liability of the principal successor State, but subject to such financial adjustment as may be agreed upon between all the successor States concerned, or in default of such agreement, as the Central Government may by order direct.

89. Where an existing State is liable as guarantor in respect of any liability of a registered co-operative society, that liability shall—

(a) if there be only one successor State, be a liability of that State;

(b) if there be two or more successor States and the area of the society's operations is limited to the territories which are the territories of one of them, be a liability of that successor State; and

(c) in any other case be a liability of the principal successor State.

Provided in any such case the initial allocation of liabilities shall be subject to such financial adjustments as may be agreed upon between all the successor States, or in default of such agreement as the Central Government may direct.

90. If any item in suspense is ultimately found to affect an asset or liability of the nature referred to in any of the foregoing provisions it shall be dealt with in accordance with that provision.

91. The benefit or burden of any assets or liabilities of an existing State not dealt with in the foregoing provisions shall—

(a) if there be only one successor State, pass to that State; and

(b) if there be two or more successor States, pass to the principal successor State in the first instance, subject to such financial adjustment as may be agreed upon between all the successor States before the 1st day of October, 1957, or in default of such agreement, as the Central Government may direct.

92. Where by virtue of any of these provisions any of the successor States becomes entitled to any property or obtains any benefits or becomes subject to any liability, and the Central Government is of opinion, on a reference made within a period of three years by any State that it is just and equitable that that property or those benefits should be transferred to or shared with, one or more of the other successor States, or that a contribution towards that liability should be made by one or more of the other successor States, the said property or benefits shall be allocated in such manner, or the other successor State or States shall make to the State primarily subject to the liability such contribution in respect thereof, as the Central Government may, after consultation with the State Governments concerned by order determine.

93. All sums payable by the Union to any State or by any State to any other State or to the Union by virtue of these provisions shall be charged on the Consolidated Fund of India, or as the case may be, the Consolidated Fund of the State by which such sums are payable.

PART C STATES

94. In this Part,—

(a) "existing State" means any of the existing Part C States of Ajmer, Bhopal, Coorg, Kutch and Vindhya Pradesh;

(b) "Union purposes" mean the purposes of Government relating to any of the matters mentioned in the Union List.

95. Subject to the other provisions—

(a) such of the assets of the Union within an existing State as are held by the Union for purposes of the governance of that State shall pass to the successor State, unless the purposes for which the assets are so held are Union purposes; and

(b) all liabilities of the Union arising out of, or in relation to, the governance of an existing State shall be liabilities of the successor State, unless the liabilities are relatable to a Union purpose.

96. The right to recover arrears of any tax (including land revenue) due in an existing State, being a tax enumerated in the State List, shall pass to the successor State.

97. The right to recover any loans or advances made to any local body, society, agriculturist or other person in an existing State shall belong to the successor State unless the loan or advance was made in connection with a Union purpose.

98. Any debt of an existing State attributable to any loan given by the Central Government on or after the first day of April, 1954 and outstanding shall be a debt due by the successor State to the Central Government.

99. The liability of the Union in respect of the provident fund account of a Government servant serving in an existing State under the administrative control of the Lieutenant-Governor or Chief Commissioner thereof shall be the liability of the successor State:

Provided that the Central Government shall transfer to the successor State funds equal to the liability of the Union.

100. Where a Government servant under the administrative control of the Lieutenant-Governor or Chief Commissioner of an existing State has retired or proceeded on leave preparatory to retirement, any outstanding claim in respect of his pension shall be settled by the successor State, but the liability in respect of the pension sanctioned to any such Government servant, shall be the liability of the Union.

101. (1) Any contract made by the Union in the exercise of its executive power for purpose of the governance of an existing State shall be deemed to have been made in the exercise of the executive power of the successor State, unless the purposes of the contract are Union purposes; and all rights and liabilities which have accrued or may accrue under any such contract shall, to the extent to which they would have been rights and liabilities of the Union if this Act had not been passed, be rights and liabilities of the successor State.

CORPORATIONS, PROJECTS

102. (1) As from the appointed day, the Financial Corporations established under the State Financial Corporations Act, 1951, for the existing States of Madhya Bharat, Punjab, Rajasthan and Travancore-Cochin shall be deemed to be the Financial Corporations established under the said Act for the new States of Madhya Pradesh, Punjab, Rajasthan and Kerala, respectively.

(2) The States of Kerala, Madhya Pradesh and Rajasthan shall be liable to pay to the States of Madras, Rajasthan and Madhya Pradesh, respectively, on account of the share of each of the last-named States in the paid-up capital of the Financial Corporations for the existing States of Travancore-Cochin, Madhya Bharat and Rajasthan, respectively, such amount as the Central Government may determine.

(3) As from the appointed day, the Financial Corporations established under the State Financial Corporations Act, 1951, for the existing States of Andhra and Hyderabad shall stand amalgamated and shall be deemed to be the Financial Corporation established under the said Act for the State of Andhra Pradesh.

(4) After consulting the Governments of the existing States of Andhra and Hyderabad, the Central Government may, before the appointed day, provide for the constitution of the Board of Directors of the Financial Corporation for the State of Andhra Pradesh and for such

consequential, incidental and supplemental matters as may, in the opinion of the Central Government, be necessary to give effect to the provisions of sub-section (3).

(5) The State of Andhra Pradesh shall be liable to pay to each of the new States of Mysore and Bombay on account of its share of the paid-up capital of the Financial Corporation for the existing State of Hyderabad such amount as the Central Government may determine.

(6) As from the appointed day, the Financial Corporations established under the State Financial Corporations Act, 1951, for the existing States of Bombay and Saurashtra shall stand amalgamated and shall be deemed to be the Financial Corporation established under the said Act for the new State of Bombay.

(7) After consulting the Governments of the existing States of Bombay and Saurashtra, the Central Government may, before the appointed day, provide for the constitution of the Board of Directors of the Financial Corporation for the new State of Bombay and for such consequential, incidental and supplemental matters as may, in the opinion of the Central Government, be necessary to give effect to the provisions of sub-section (6).

(8) The new State of Bombay shall be liable to pay to each of the new States of Mysore and Rajasthan on account of its share of the paid-up capital of the Financial Corporation for the existing State of Bombay such amount as the Central Government may determine.

103. (1) The Madras Industrial Investment Corporation shall be deemed to have been constituted for the new State.

(2) The State of Madras shall be liable to pay to each of the new States of Kerala and Mysore on account of its share of the paid-up capital of the said Corporation such amount as the Central Government may determine.

105. In the Multi-Unit Co-operative Societies Act, 1942, after section 5, the following sections shall be inserted, namely:—

"5A. (1) Where any co-operative society which, immediately before the 1st day of November, 1956, had its objects confined to one State becomes, as from that day, a multi-unit co-operative society, it shall be deemed to be a co-operative society to which this Act applies and shall be deemed to be actually registered in the State in which the principal place of business of the co-operative society is situated.

(2) If it appears to the Central Registrar of Co-operative Societies necessary or expedient that any such society should be reconstituted or reorganised in any manner or that it should be dissolved, the Central Registrar may, with the approval of the Central Government, place before a meeting of the general body of the society a scheme for the reconstitution, reorganisation or dissolution of the society, including proposals regarding the formation of new co-operative societies and the transfer thereto of the assets and liabilities of that society.

(3) If the scheme is sanctioned by a resolution passed by a majority of the members present at the said meeting, either without modifications or with modifications to which the Central Registrar agrees, he shall certify the scheme, and upon such certification, the scheme shall, notwithstanding anything to the contrary contained in any law, regulation or bye-law for the time being in force, be binding on all the societies affected by the scheme, as well as the shareholders and creditors of all such societies.

(4) If the scheme is not sanctioned under sub-section (3), the Central Registrar may refer the scheme to such Judge of the appropriate High Court as may be nominated in this behalf by the Chief Justice thereof, and the decision of that Judge in regard to the scheme shall be final and shall be binding on all the societies affected by the scheme as well as the shareholders and creditors of all such societies.

106. (1) The State Electricity Board for any of the existing States of Bombay, Madhya Pradesh and Saurashtra shall continue to function in those areas in respect of which it was

functioning subject to the provisions of this section and to such directions as may be issued by the Central Government.

(3) A State Electricity Board shall be deemed to be dissolved on the 1st day of November, 1957, or such earlier date as the Central Government may appoint; and upon such dissolution, its assets and liabilities shall—

(a) in the case of the Board for Saurashtra pass to the State of Bombay, and

(b) in the case of the Board for the existing State of Bombay or Madhya Pradesh, be apportioned between the successor States in such manner as may be agreed upon between them, within one year of the dissolution of the Board or if no agreement is reached, in such manner as the Central Government may determine.

(4) Nothing in the provisions of this section shall be construed as preventing the Government of any of the successor States to the existing States of Bombay, Madhya Pradesh and Saurashtra from constituting at any time a State Electricity Board; and if such a Board is so constituted before the dissolution of a Board continued under sub-section (1) and functioning in any part of that successor State—

(a) provision may be made by the Central Government enabling the new Board to take over from the existing Board all or any of its undertakings, assets and liabilities in that State, and

(b) upon the dissolution of the existing Board, any assets and liabilities which would otherwise have passed to the successor State shall pass to the new Board instead of to the successor State.

107. If it appears to the Central Government that the arrangement in regard to the generation or supply of electric power or the supply of water for any area has been or is likely to be modified to the disadvantage of that area by reason of the fact that it has been transferred from the State in which the power stations and other installations, or the catchment area reservoirs and other works are located the Central Government may give such directions as it deems proper to the State Government or other authority concerned for the maintenance, so far as practicable, of the previous arrangement.

108. (1) Any agreement or arrangement entered into between the Central Government and one or more existing States or between two or more existing States relating to—

(a) the administration, maintenance and operation of any project or

(b) the distribution of benefits, such as, the right to receive and utilise water or electric power, to be derived as a result of the execution of such project, shall continue in force, subject to such adaptations and modifications, if any, (being of a character not affecting the general operation of the agreement or arrangement) as may be agreed upon between the Central Government and the successor State concerned or between the successor States concerned, as the case may be, by the first day of November 1957, or, if no agreement is reached by the said date, as may be made therein by the Central Government.

(2) Where a project concerning one or more of the existing States has been taken in hand, but not completed, or has been accepted by the Government of India for inclusion in the Second Five-Year Plan, neither the scope of the project nor the provisions relating to its administration, maintenance or operation or to the distribution of benefits to be derived from it shall be varied,—

(a) in the case where a single successor State is concerned with the project except with the previous approval of the Central Government; and

(b) in the case where two or more successor States are concerned with the project except by agreement between those successor States, or, if no agreement is reached except, in such manner as the Central Government may direct, and the Central Government may from time to time give such directions as may appear to it to be

necessary for the due completion of the project and for its administration, maintenance and operation thereafter.

(3) In this section, the expression "project" means a project for the promotion of irrigation, water supply or drainage or for the development of electric power or for the regulation or development of any inter-State river or river valley.

INTER-STATE TRANSPORT

100. (1) Save as otherwise expressly provided by the foregoing provisions where any body corporate has been constituted under a Central Act, State Act or Provincial Act for an existing State the whole or any part of which is transferred to any other existing State or to a new State, then, notwithstanding such transfer, the body corporate shall, as from the appointed day, continue to function and operate in those areas in respect of which it was functioning and operating immediately before that day, subject to such directions as may from time to time be issued by the Central Government, until other provision is made by law in respect of the said body corporate.

(2) Any directions issued by the Central Government under sub-section (1) in respect of any such body corporate shall include a direction that any law by which the said body corporate is governed shall in its application to that body corporate have effect subject to such exceptions and modifications as may be specified in the direction.

110. (1) Notwithstanding anything contained in section 63 of the Motor Vehicles Act, 1939, a permit granted by the State or a Regional Transport Authority in an existing State, the whole or any part of the territories of which is transferred to another existing State or to a new State shall, if such permit was, immediately before the appointed day, valid and effective in any area in the territories so transferred, be deemed to continue to be valid and effective in that area after that day subject to the provisions of that Act as for the time being in force in that area; and it shall not be necessary for any such permit to be countersigned by any other State or Regional Transport Authority for the purpose of validating it for use in such transferred territories:

Provided that the Central Government may, after consultation with the State Government or Governments concerned, add to, amend or vary the conditions attached to the permit by the Authority by which the permit was granted.

(2) No toll, entrance fees or other charges of like nature shall be levied after the appointed day in respect of any transport vehicle for its operations in any transferred territory under any such permit, if such vehicle was, immediately before that day, exempt from the payment of any such toll, entrance fees or other charges for its operations beyond the boundaries of the State in which such permit was granted.

Provided that the Central Government may, after consultation with the State Government or Governments concerned, authorise the levy of any such toll, entrance fees or other charges, as the case may be.

111. Where on account of the reorganisation of the States under this Act, any body corporate constituted under a Central Act, State Act or Provincial Act, any co-operative society registered under any law relating to co-operative societies or any commercial or industrial undertaking of an existing State, is reconstituted or reorganised in any manner whatsoever or is amalgamated with any other body corporate or undertaking, or is dissolved, and in consequence of such reconstitution, reorganisation, amalgamation or dissolution, any workman employed by such body corporate or in any such undertaking is transferred to, or re-employed by, any other body corporate or undertaking, then, notwithstanding anything contained in section 26F of the Industrial Disputes Act, 1947, such transfer or re-employment shall not entitle him to any compensation under that section:

Provided that—

(a) the terms and conditions of service applicable to the workman after such transfer or re-employment are not less favourable to the workman than those applicable to him immediately before the transfer or re-employment; and

(b) the employer in relation to the body corporate or the undertaking where the workman is transferred or re-employed, is by agreement or otherwise legally liable to pay to the workman, in the event of his retrenchment, compensation under section 25F of the Industrial Disputes Act, 1947, on the basis that his service has been continuous and has not been interrupted by the transfer or re-employment.

112. (1) As from the appointed day, there shall be established in the State of Madras a Devaswam Fund for the management of Hindu temples and shrines in the territories transferred to that State from the State of Travancore-Cochin.

(2) The assets as on the appointed day of the Devaswam Surplus Fund constituted by section 26 of the Travancore-Cochin Hindu Religious Institutions Act, 1950, shall be divided into two parts in the ratio of 37.5 to 13.5 in such manner as the Central Government may direct, and the smaller part shall, as from the appointed day, be transferred to the Fund mentioned in sub-section (1).

113. The Central Government may in respect of the institutions of the categories specified in the Sixth Schedule located in a new State or in the State of Andhra Pradesh or Madras direct that such facilities shall be provided to the Government and the people of one or more adjoining States for such period and upon such terms and conditions as may be agreed upon between the State Government concerned before the 31st day of March, 1957, or if no agreement is reached by the said date, as may be fixed by the Central Government.

ADMINISTRATIVE SERVICES

114 (2) As from the appointed day, there shall be constituted for each of the new States a State cadre of the Indian Administrative Service and a State cadre of the Indian Police Service.

(3) The initial strength and composition of each of the said cadres shall be such as the Central Government may determine before the appointed day.

(4) The cadres of each of the said services for the existing States of Bombay, Madhya Pradesh, Punjab and Vindhya Pradesh and for the existing Part B States shall cease to exist, and the members of each of the said services borne on those cadres shall be allocated to the State cadres of the same service for the other existing States or for the new States in such manner and with effect from such date or dates as the Central Government may specify.

115 (1) Every person who is serving in connection with the affairs of the Union under the administrative control of the Lieutenant-Governor or Chief Commissioner in any of the existing States of Ajmer, Bhopal, Coorg, Kutch and Vindhya Pradesh, or is serving in connection with the affairs of any of the existing States of Mysore, Punjab, Patiala and East Punjab States Union and Saurashtra shall be deemed to have been allotted to serve in connection with the affairs of the successor State to that existing State.

(2) Every person who is serving in connection with the affairs of an existing State part of whose territories is transferred to another State shall, as from that day, provisionally continue to serve in connection with the affairs of the principal successor State to that existing State, unless he is required by general or special order of the Central Government to serve provisionally in connection with the affairs of any other successor State.

(3) As soon as may be the Central Government shall, determine the successor State to which every person referred to in sub-section (2) shall be finally allotted for service and the date with effect from which such allotment shall take effect.

(4) Every person who is finally allotted under the provisions of sub-section (3) to a successor State shall if he is not already serving therein be made available for serving in that successor State from such date as may be agreed upon between the Governments concerned, and in default of such agreement, as may be determined by the Central Government.

(5) The Central Government may establish one or more Advisory Committees for the purpose of assisting it in regard to—

(a) the proper integration of the services and their division among the States of Andhra Pradesh and Madras and the new States; and

(b) the ensuring of fair and equitable treatment to all persons affected by the provisions of this section and the proper consideration of any representations made by such persons.

(6) The foregoing provisions of this section shall not apply in relation to any person to whom the provisions of section 114 apply.

(7) The conditions of service applicable immediately before the appointed day to the case of any person referred to in sub-section (1) or sub-section (2) shall not be varied to his disadvantage except with the previous approval of the Central Government.

116 (1) Every person who is holding or discharging the duties of any post or office in connection with the affairs of the Union or of an existing State in any area which on 1st Nov falls within another existing State or a new State or in a Union Territory shall, except where such post or office ceases to exist, continue to hold the same post or office in the other existing State or new State or Union Territory in which such area is included on that day and shall be deemed to have been duly appointed to such post or office by the Government of, or other appropriate authority in, such State, or by the Central Government or other appropriate authority in such Union Territory.

(2) Nothing in this section shall be deemed to prevent a competent authority, from passing in relation to any such person any order affecting his continuance in such post or office.

117. The Central Government may at any time give such directions to any State as may appear to it to be necessary for the purpose of giving effect to the foregoing provisions and the State Government shall comply with such directions.

118. (1) The Public Service Commissions for the existing States of Bombay, Mysore, Punjab, Rajasthan and Travancore-Cochin shall be deemed to be the Public Service Commissions for the corresponding new States.

(2) The Public Service Commissions for the existing States of Hyderabad, Madhya Bharat, Madhya Pradesh, Patiala and East Punjab States Union and Saurashtra shall cease to exist.

(3) Every person holding office as chairman or other member of any of the Commissions mentioned in sub-section (2)

(a) shall become a member and if so specified also the Chairman of such one of the Public Service Commissions for the States of Andhra Pradesh, Bombay, Madhya Pradesh, Punjab and Mysore as the President shall specify and

(b) shall, as such member or Chairman be entitled to receive conditions of service not less favourable than those to which he was entitled immediately before the appointed day.

(4) Every person who becomes a member of a Public Service Commission under sub-section (1) or sub-section (3) shall, hold office or continue to hold office until the expiration of his term of office as determined under the provisions applicable to him immediately before the appointed day.

LEGAL AND MISCELLANEOUS PROVISIONS

119. The provisions effecting territorial changes shall not be deemed to have effected any change in the territories to which any law in force extends or applies, and territorial references in any such law to an existing State shall, until otherwise provided by a competent Legislature

or other competent authority, be construed as meaning the territories within that State immediately before the appointed day.

120. For the purpose of facilitating the application of any law in relation to any of the States or Union Territories formed or territorially altered the appropriate Government may before the expiration of one year from the appointed day make such adaptations and modifications of the law, whether by way of repeal or amendment, as may be necessary or expedient, and thereupon every such law shall have effect subject to the adaptations and modifications so made until altered, repealed or amended by a competent Legislature or other competent authority.

121. Notwithstanding that no provision or insufficient provision has been made under section 120 for the adaptation of a law made before the appointed day, any court, tribunal or authority may, for the purpose of facilitating its application in relation to any State or Union Territory formed or territorially altered construe the law in such manner without affecting the substance as may be necessary or proper in regard to the matter before it.

122. The Central Government, as respects any Union Territory, and the State Government as respects any new State or any transferred territory, may specify the authority, officer or person who, as from the appointed day, shall be competent to exercise such functions exercisable under any law in force on that day as may be mentioned in the notification.

123. Where immediately before the appointed day the Union or an existing State is a party to any legal proceedings with respect to any property, rights or liabilities subject to apportionment under this Act the successor State which succeeds to, or acquires a share in, that property or those rights or liabilities shall be deemed to be substituted for the Union or the existing State as a party to those proceedings, or added as a party thereto, as the case may be, and the proceedings may continue accordingly.

124. Any person who immediately before the appointed day, is enrolled as a pleader entitled to practise in any subordinate courts in an existing State which is affected by the territorial provisions of this Act shall, for a period of six months from that day, continue to be entitled to practise in those courts, notwithstanding that the whole or any part of the territories within the jurisdiction of those courts has been transferred to another State.

125. (1) Every proceeding pending before a court (other than a High Court), tribunal, authority or officer—

in any area which falls within a State shall, if it is a proceeding relating exclusively to any part of the territories which as from that day are the territories of another State, stand transferred to the corresponding court, tribunal, authority or officer in the other State.

(2) If any question arises as to whether any proceeding should stand transferred under subsection (1), it shall be referred for the decision of the High Court having jurisdiction in respect of the area and the decision of the High Court shall be final.

126. (1) All ancient and historical monuments in Part C States which, before the 1st April 1956, have either been declared by the Central Government to be protected monuments or which have been taken possession of by the Central Government as protected monuments are hereby declared to be ancient and historical monuments of national importance.

(2) All archaeological sites and remains in Part C States which, before the 1st April 1956, have either been declared by the Central Government to be protected areas or which have been taken possession of by the Central Government as protected areas are hereby declared to be archaeological sites and remains of national importance.

127. The provisions of this Act, shall have effect notwithstanding anything inconsistent therewith contained in any other law.

128. If any difficulty arises in giving effect to the provisions of this Act, the President may do anything not inconsistent with such provisions which appear to him to be necessary or expedient for the purpose of removing the difficulty.

129. (1) The Central Government may, by notification in the Official Gazette, make rules to give effect to the provisions of this Act.

(2) All rules made under this section shall be laid before both Houses of Parliament as soon as may be after they are made.

130. (1) The Government of Part C States Act, 1951, is repealed with effect from the appointed day.

(2) The said repeal shall not affect any laws made by the Legislature of a Part C State by virtue of any power conferred on that Legislature by the Act so repealed, and all such laws in force immediately before the appointed day shall continue in force, subject to such adaptations and modifications as may be made therein until altered, repealed or amended by a competent Legislature or other competent authority.

SCHEDULES

The First Schedule shows in which new State certain constituencies of the Bombay, Hyderabad, Madhya Bharat and Madras Legislative Assemblies will be placed.

The following constituencies will be in Bombay. The name of the State in which the constituency lay before the appointed day is shown in brackets:

Palanpur-Abu-Vadagam-Danta (Bombay); Chandgad (Bombay); Halpur (Hyderabad); Udglr (Hyderabad); Deglur (Hyderabad); Kinwat (Hyderabad).

The following constituencies will be in Andhra Pradesh:

Kodangal (Hyderabad); Zahirabad (Hyderabad); Mudhol (Hyderabad).

The following constituencies will be in Mysore: Tandur-Seram (Hyderabad); Bidar (Hyderabad); Panemangalore (Madras).

The following constituency will be in Madhya Pradesh:

Bhanpura (Madhya Bharat).

The Second Schedule shows the modifications made in the delimitation order relating to the Madras Legislative Council (Order 1951) constituencies.

The Third Schedule shows the number of seats fixed for each of the State Legislative Assemblies and the number of seats assigned to each State and Union territory in the Lok Sabha (see the article on the Government of India in this book for the number so fixed or assigned).

The First Part of the Fourth Schedule modifies Section 3 of the Union Duties of Excise (Distribution) Act, 1953 and shows how a part of the Union duties of excise are to be distributed among the States during the first half of the financial year commencing 1st April 1956. The figures are in percentages:

Andhra 5.92, Assam 2.61, Bihar 11.60, Bombay 10.37, Hyderabad 5.39, Madhya Bharat 2.29, Madhya Pradesh 6.13, Madras 10.30, Mysore 2.84, Orissa 4.22, PEPSU 1.00, Punjab 3.66, Rajasthan 4.41, Saurashtra 1.19, Travancore-Cochin 2.69, Uttar Pradesh 18.23, West Bengal 7.16.

During the second half the payments will be as follows, again in percentage, and extra payments, if any to four of the States as follows:

Andhra Pradesh 9.03, Assam 2.61, Bihar 11.60, Bombay 12.57 + 1.19, Kerala 1.49 + 2.42, Madhya Pradesh 6.25, Madras 8.39 + 0.26, Mysore 2.90 + 2.62, Orissa 4.22, Punjab 4.66, Rajasthan 4.40, Uttar Pradesh 18.23, West Bengal 7.16.

The first half of the year will be deemed the first seven months, and the second half the remaining five months of the financial year.

The Second Part of the Fourth Schedule modifies parts 3 and 5 of the Constitution (Distribution of Revenue) Order 1956.

The proceeds of income-tax attributable to Part C States for the first half of the financial year 1956-57 shall be taken as 2½ per cent of so much of the net proceeds of taxes on income for the half year as does not represent the net proceeds of taxes payable in respect of Union emoluments; and the proceeds attributable to Union territory for the second half of the financial year as one per cent.

The percentage of net proceeds of income tax, except in so far as these represent proceeds attributable to Part C States or taxes payable in respect of Union emoluments, which is to be assigned to Parts A and B States except Kashmir for the first half of the financial year 1956-57 shall be 55 per cent. And this total amount shall be distributed among the States as follows, figures in percentages:

Andhra 5.49, Assam 2.25, Bihar 9.75, Bombay 17.50, Hyderabad 4.50, Madhya Bharat 1.75, Madhya Pradesh 5.25, Madras 9.56, Mysore 2.45, Orissa 3.50, PEPSU 0.75, Punjab 3.25, Rajasthan 3.50, Saurashtra 1.00, Travancore-Cochin 2.50, U.P. 15.75, West Bengal 11.25.

And for the second half of the financial year 1956-57 the total amount represented by 55 per cent (with the same sort of qualifications as above) will be assigned as follows, the figures in percentages:

Andhra Pradesh 8.09, Assam 2.25, Bihar 9.75, Bombay 18.10 + 1.00, Kerala 1.38 + 2.26, Madhya Pradesh 5.40, Madras 7.59 + 0.24, Mysore 3.74 + 2.25, Orissa 3.50, Punjab 4.00, Rajasthan 3.51, Uttar Pradesh 15.75, West Bengal 11.25.

The first half shall be deemed to be the first seven months and the second half the remaining five months.

Grants-in-aid of the revenues of each State for the first half of the financial year 1956-57 (seven months constituting the first half and five months the second) for general purposes shall be as follows. The figures are in Rs. lakhs:

Assam 58.33, Mysore 23.33, Orissa 43.75, Punjab 72.92, Saurashtra 23.33, Travancore-Cochin 26.25, West Bengal 46.67.

For expansion of primary education the grant for the first half of the financial year (seven months) shall be as follows: the figures are in Rs. lakhs

Bihar 49.42, Hyderabad 23.33, Madhya Bharat 10.5, Madhya Pradesh 29.17, Orissa 18.67, PEPSU 5.25, Punjab 16.33, Rajasthan 23.33.

Grants-in-aid in the second half (five months) for general purposes shall be as follows. The figures are in Rs. lakhs:

Assam 41.67, Mysore 16.67, Orissa 31.25, Punjab 52.04, Bombay 16.67, Kerala 16.91, Madras 1.92, West Bengal 33.33.

For the expansion of primary education the grant for the second half of the financial year (five months) shall be as follows. The figures are in Rs. lakhs:

Bihar 34.58, Andhra 9.62, Mysore 2.41, Bombay 12.10, Madhya Pradesh 20.04, Orissa 13.33, Punjab 15.42, Rajasthan 16.56.

There shall also be charged on the Consolidated Fund of India:

In the first seven months of the financial year as grant-in-aid to Mysore the sum by which the total amounts payable under the Union excise and revenue fall short of Rs. 201.2 lakhs, to Saurashtra the sum by which the total amounts fall short of Rs. 160.42 lakhs, to Travancore-Cochin the sum by which the total amounts fall short of Rs. 163.33 lakhs.

In the remaining five months of the financial year as grant-in-aid to Mysore the sum by which the total amounts payable as additional percentage fall short of Rs. 143.75 lakhs, to Bombay the sum by which the total amounts fall short of Rs. 114.56 lakhs, to Kerala the sum by which the total amounts fall short of Rs. 105.38 lakhs, and to Madras the sum by which the total amounts fall short of Rs. 11.29 lakhs.

These sums will be in addition to sums payable under the provisos to clause 1 of Article 275 of the Constitution.

The Fifth Schedule is about pensions.

Existing pensions shall be paid by the successor State or successor States. Pensions of those whose claims are outstanding immediately before November 1, 1956 shall be paid by the successor State; if there is more than one successor State by such one of them as the Central Government may specify.

Where there are two or more successor States, there shall be computed in respect of the period commencing from Nov. 1, 1956 and ending March 31, 1957 and for each subsequent financial year the total payments made in all the successor States in respect to pensions mentioned above. This total shall be apportioned between the

successor States in the population ratio, and a State paying more shall be reimbursed by a State paying less.

Provision is also made about the payment of pension to officers who retire after service to more than one successor State.

The Sixth Schedule gives a list of the type of institutions about which the Central Government can issue directions. The directions will be to the effect that the State in which such an institution is situated should provide facilities to the Government or people of one or more adjoining States on condition that may be agreed upon by 31st March 1957 or in the absence of an agreement as may be fixed by the Central Government:

Engineering colleges and schools of technology; medical colleges; veterinary colleges;

Government hospitals providing for special treatment such as tuberculosis hospitals or sanatoria, cancer hospitals, mental hospitals, leprosy hospitals or sanatoria, or hospitals providing for unani or ayurvedic treatment; research institutions such as irrigation research institutes, Government analysts' departments and serum institutes; central jails; Borstal schools and Certified schools; police training colleges and institutes; fire service training schools; hostels for Scheduled Castes, Tribes and Backward classes.

Photo Registry offices; Central Records offices; Forest Schools; Finger print bureaux.

Agricultural Colleges.

Radium Institutes.

Reformatory Schools.

BIHAR AND WEST BENGAL (TRANSFER OF TERRITORIES) ACT, 1956

Below we give a summary of some of the more important provisions of the Act which received the President's assent on 1st Sept., 1956. The Act came into force on 1st Nov., 1956. The numbers of the provisions have been retained.

3. (1) As from the appointed day, there shall be added to the State of West Bengal the territories which on the 1st day of March, 1956, were comprised in—

(a) that portion of Kishanganj sub-division of Purnea district which lies to the east of the boundary line demarcated in accordance with the provisions of sub-section (2) by an authority appointed in this behalf by the Central Government, and that portion of Gopalpur thana of the said district which lies to the east or north, as the case may be, of the said boundary line; and

(b) Purnia sub-division of Maudhum district, excluding Chas thana, Chandil thana and Patnania police station of Barabhum thana.

(2) The boundary line referred to in sub-section (1) shall be so demarcated as to be generally two hundred yards to the west of the highway in Purnea district connecting Dalkola, Kishanganj and Chopra with Silguri in Darjeeling district and two hundred yards to the south or south-west of the highway in Purnea district connecting Dalkola and Karandighi with Rajganj in West Dinajpur district:

Provided that the boundary line shall be so demarcated as not to cut across any village or town;

Provided further that from the point where the first-mentioned highway meets the southern boundary of Kishanganj municipality to the point where it leaves the northern boundary of that municipality, the boundary line shall be the same as the boundary of that municipality on the east.

(3) The territory specified in clause (a) of sub-section (1) shall be included in, and form part of, Darjeeling district, and the territory specified in clause (b) of that sub-section shall form a separate district to be known as Purnia district within Burdwan division of the State of West Bengal.

(4) Nothing in sub-section (3) shall be deemed to affect the power of the State Government to alter after the appointed day the name, extent and boundaries of any district or division in the State of West Bengal.

5. As from the appointed day, in the Fourth Schedule to the Constitution, in the Table of Seats, for the entries in the second column relating to Bihar and West Bengal, the entries "22" and "16" shall, respectively, be substituted.

6. As soon as may be after the appointed day, bye-elections shall be held to fill the vacancies existing on that day in the seats allotted to Bihar and West Bengal.

7. In order that, as nearly as may be, one-third of the members of the Council of States may retire on the 2nd day of April, 1958, and on the expiration of every second year thereafter, the President shall, after consultation with the Election Commission, make by order such provisions as he thinks fit in regard to the terms of office of the members elected under section 6.

8. Nothing in section 3 shall be deemed to affect the extent of the constituency of any sitting member of the existing House of the People from Bihar.

9. The sitting members of the Legislative Assembly of Bihar representing the Hukurganj Karandighi, Para-cum-has and Barabazar-cum-Chandil constituencies shall notwithstanding the reduction in the extent of these constituencies by the transfer of portions thereof to West Bengal, continue to be members of the Legislative Assembly of Bihar; and the sitting members of that Assembly representing any other constituency lying wholly or partly in the transferred territories shall, as from the appointed day, be deemed to have been elected to the Legislative Assembly of West Bengal and cease to be members of the Legislative Assembly of Bihar.

10. The changes in the composition of the Legislative Assemblies of Bihar and West Bengal under section 9 shall not affect their duration, as provided in clause (1) of article 172.

11. (2) Every sitting member of the Legislative Council of Bihar representing a council constituency the extent of which is altered by virtue of sub-section (1) shall, as from the appointed day, be deemed to have been elected to the said Council by that constituency as so altered.

12. (2) In the Table appended to the said Order, in the entry in the second column, against West Bengal West (Graduates) Constituency, after the word "Bankura", the word "Purnia" shall be inserted.

(3) Every sitting member of the Legislative Council of West Bengal representing a council constituency the extent of which is altered by virtue of sub-section (1) or sub-section (2) shall, as from the appointed day, be deemed to have been elected to the said Council by that constituency as so altered.

13. The number of seats in the House of the People allotted to Bihar and to West Bengal and the number of seats assigned to the Legislative Assembly of each of those States shall be modified as follows:—

In the House of the People Bihar will have 53 seats and West Bengal 36.

The strength of the Bihar Legislative Assembly will be 314, and of the West Bengal Assembly 252.

14. As soon as may be after the commencement of this Act, the President may, by notified order, make such modifications in the Constitution (Scheduled Castes) Order, 1950, and the Constitution (Scheduled Tribes) Order, 1950, as he thinks fit, having regard to the transfer of territories effected by section 3.

15. (1) After the said Orders have been so modified, the population as at the last census of the scheduled castes and of the scheduled tribes in Bihar and West Bengal shall be ascertained or estimated by the census authority.

(2) The population figures so notified shall be taken to be the relevant population figures as ascertained at the last census and shall supersede any figures previously published.

16. (1) As soon as may be after the commencement of this Act, the Central Government shall appoint an authority

(a) to determine on the basis of the population figures notified under section 15 the number of seats to be reserved for the scheduled castes and the scheduled tribes of Bihar and of West Bengal in the House of the People and in the Legislative Assembly of each of those States;

(b) to revise to such extent as may be necessary or expedient, having regard to the said provisions, the orders of the Delimitation Commission made under section 5 of the Delimitation Commission Act, 1952, with respect to Bihar and West Bengal.

The rest of the provisions are on the same basis as the provisions of the States Reorganization Act.

ANDHRA-MADRAS BORDER

Besides the States Reorganization Act and the Bihar and West Bengal (Transfer of Territories) Act, the report of Mr Hari Vinayak Pataskar would also affect the boundaries of two States, viz., Madras and Andhra.

This report which recommended the transfer of certain areas in Madras and Andhra has been accepted by both the Governments. Details are being worked out and would later have to be finalized by legal measures.

Three Districts are affected: Chingleput District and Salem District in Madras and Chittoor District in Andhra.

Broadly speaking, the Report makes the following recommendations:

Transfer of the northern portions of Ponneri and Trivellore talukas, in Chingleput district, and three villages in Krishnagiri taluka, in Salem district, to Andhra Pradesh and almost

the entire taluka of Tiruttani, including the Tiruttani town and one village in Puttur taluka in Chittoor district, to Madras.

In terms of area, Madras will receive about 310 square miles of territory while surrendering about 380 square miles to Andhra Pradesh. While the temple town of Tiruttani will be a prize acquisition for Madras, the Aranyar Project headworks will now go to Andhra Pradesh.

ANDAMAN AND NICOBAR ISLANDS

Capital: Port Blair.
Area: 3,215 sq. miles. Pop. 39,000 (1956).

The Andamans are a group of islands of various sizes large and small lying in the Bay of Bengal about 780 and 740 miles from Calcutta and Madras respectively. The main part of the group is composed of five large islands, viz., North Andamans, Middle Andamans, South Andamans, Baratang and Rutland Islands generally known as the Great Andamans. Included in the Great Andaman group are also 204 islets, stretching from Landfall Island in the north about 560 miles from the Hooghly mouth to the Little Andaman in the south. To the south of the Great Andamans is the island of Little Andaman. The extreme length of the Great Andaman Islands is 290 miles and the extreme breadth 32 miles, the total land area being approximately 2,580 sq. miles. These islands have several very good harbours—Port Blair, Port Cornwallis, Mayabunder and Rihstone Harbour. The headquarters are at Port Blair.

The Nicobar Islands numbering 19 from Car Nicobar in the north to Great Nicobar in the south intervene between Little Andaman and Sumatra. The southern island of Great Nicobar is about 100 miles from Pulo Brasse of Achin Head in Sumatra and the northern island of Car Nicobar 75 miles from Little Andaman. The extreme length of the seaspace occupied by the Nicobars is 163 miles and the extreme width is 36 miles. The islands forming Andamans mostly consist of a mass of hills enclosing narrow valleys covered by dense tropical forests. The islands in the Nicobar group are partly hilly and partly flat.

POPULATION

The 1956 population of the Andaman and Nicobar Islands is about 39,000 of which about 27,000 live in the Andamans and 12,000 in Nicobars. The population consists of (i) Andaman Indians including settlers 26,000; (ii) Aborigines 1,000 consisting of Onges 600, Andamanese 23 and Jarawas and Sentinelese 377 roughly; (iii) Nicobars 11,900; (iv) Shom-Pens of Great Nicobar 101.

Some of the islands are not populated at all, some only sparsely while Car Nicobar is densely populated.

The original inhabitants of the Andaman group of islands are of a small Negrito type who live in the forests by hunting and fishing. They have no fixed habitation, and do no cultivation. Their civilization is about that of the Stone Age. Their numbers are not known as they prefer to avoid all contact with civilization.

The climate of the islands can be generally described as tropical, warm but tempered by pleasant sea breezes. The islands are exposed to both monsoons with north-easterly gale from November to January and south-westerly gale from May to October. The weather is smooth only from February to April and to some extent in October. The average rainfall is 125 inches. The maximum temperature varies between 45 and 92 degrees throughout the year. The scenery of the islands is everywhere strikingly beautiful.

HISTORY

Very little is known about these islands earlier than the year 1789 when the first attempt to colonise these islands was made by Captain Archibald Blair, R.N. The first settlement was established in 1789 in the South Andaman at an island now called Chatham and given the name of Port Cornwallis, which in course of time changed to Port Blair after the name of its founder Archibald Blair. The settlers were engaged in clearing and cultivating the island, the greater portion of which was by August 1790, planted with vegetables and fruit trees. The settlement continued free from sickness. For strategic reasons the settlement was moved to north islands (North Andaman) in 1792 and the new settlement also given the name of Port Cornwallis. A number of new settlers were sent from the mainland. The situation in Port Cornwallis proved highly unfavourable and dangerous to the health of the settlers and the

settlement was ultimately abandoned in 1796. The present colony was actually opened in the year 1858 for the accommodation of a large number of prisoners following the uprising in India used to be called the "Great Mutiny".

From 1858 to 1942 the islands were used by the Government of India as a penal settlement for convicts serving life sentences and long terms.

The islands were occupied by the Japanese in March 1942 and re-occupied by the Government of India in October 1945.

With the re-occupation of these islands the penal settlement was abolished.

202 families of displaced persons from East Pakistan were settled in the South Andamans during 1949 under a pilot scheme sanctioned by the Government of India, Ministry of Rehabilitation. Measures were taken for the expansion of education in the rural areas of South Andaman and in Car Nicobar.

When India became a Republic in January 1950, these islands were given the status of part 'D' Territory under the direct administration of the President. A new A.C. Power Station was established at Port Blair. A Junior Division of the National Cadet Corps was raised. Social work and cultural activities were organised. A plan for large-scale colonisation of these islands was approved by the Government of India in 1952. The judicial administration of the islands was placed under the jurisdiction of the Calcutta High Court. A State Transport Service was constituted and a road scheme was approved. A Motor vessel equipped as a travelling dispensary was acquired from the Australian Government under the Colombo Plan for rendering medical aid to the people of the distant islands who had been neglected in the past.

There is no zamindari in the islands.

AGRICULTURE, INDUSTRY

In the year 1955-56, 33,382 tons of timber and 41,207 bags of match splints were shipped to India and foreign countries and the revenue from the sale of timber amounted to Rs. 90,31,606. Coconut and rubber are other sources of income.

There is a Government saw mill at Port Blair and a match factory.

There are 40 co-operative societies.

The islands are slowly being made self-sufficient in paddy and rice and now grow approximately half their annual requirements. No proper survey of the mineral resources of these islands has yet been undertaken.

Coconuts are next to timber the most important among the produce of the islands and a major item in the diet of the Nicobars. Exports which go to Calcutta and Madras generally are in the form of nuts and copra. There is plenty of scope for fruit growing. Such fruit as papaya, pineapple, Citrus, Bananas, mangoes, etc. can be easily grown.

Some of the species of wood found in the forest regions are Paduak, Andaman Redwood and Gurjan. Gurjan is in great demand for the manufacture of plywood. Large quantities of soft wood are supplied to match factories.

There is one high school, 2 middle schools, 23 primary schools, 5 primary-rum-basic schools. The number of students is 2,612.

There is a well-equipped hospital at the headquarters with a separate branch for women and children. There are smaller hospitals and dispensaries at the outlying places. The incidence of malaria is moderate in areas under control and in other areas the disease is kept in check with regular administration of paludrine. Plague, cholera and small-pox are unknown.

The present activities of the forest Department comprise regeneration and other silvicultural work over large areas in all the three forest divisions, departmental exploitation and milling and sale of timber from the South and Middle Andamans Division and a considerable volume of work pertaining to the Colonisation Scheme.

A dry dock was completed and opened on 20th March 1956. This dock is capable of handling small ships up to 12 ft. draft in favourable tide conditions.

A Government bus service was started from 5th April 1956 with a fleet of five buses on four different routes within South Andamans.

A private company has started air service between Calcutta and Port Blair from the 23rd of April 1957.

A Motor Vessel Indus is fitted as a floating hospital under the Colombo Plan. With a view to developing inter-island communication a.s. 'Cholunga' a 390-ton cargo-cum-passenger ship has been put into service.

Comprehensive schemes have been drawn up for effective control of diseases like Malaria, Filaria and V.D. Malaria and Filaria Survey and Control Unit under the national health scheme has been set up and is operating in Car Nicobar.

ABORIGINAL TRIBES

The aborigines of the Andamans are the remnant of a Negrito race supposed to have been the earliest people to inhabit the continent of South Eastern Asia. The Andamanese are of two types of which the first type is almost extinct now as a result of its contact with civilisation. The other type the Jarawas and Sentinelese are still hostile and the administration is trying to win them over by giving them gifts.

The Government of India have sanctioned a sum of Rs. one lakh for the amelioration of aboriginal tribes in the Andaman and Nicobar Islands under the Second Five-Year Plan.

THE SECOND FIVE-YEAR PLAN

The Plan involves an outlay of Rs. 6 crores. Of this about 30 per cent will be spent on colonisation and refugee rehabilitation. Two thousand acres of unproductive forests will be cleared and brought under coconut plantation. The production of timber is to be raised to 75,000 tons per annum by the end of the plan period. Two veterinary hospitals and two veterinary outposts will be constructed. 100 miles of new roads will be constructed.

Some of the important changes envisaged as a result of the implementation of the recommendations of the Andaman Education Committee are: Four new Basic Primary Schools are to be set up in the headquarters area. New Basic Schools will be opened in rural areas. A Senior Basic School for girls will be opened in Port Blair. Social education will be introduced. A School for the Training of Teachers in Junior Basic Education will be set up at Port Blair. The expansion of educational facilities in tribal areas is to be speeded up.

New modern hospitals will be constructed at Port Blair and Car Nicobar. Four Maternity and Child Welfare Centres at Mayabunder, Rangat, Wimberleygunj and Car Nicobar, will be opened. Schemes have been included for the expansion and development of co-operative societies. A branch of the State Bank of India has been opened at Port Blair. The annual volume of business is of the order of Rs. 80 lakhs for exports and Rs. 55 lakhs for imports. The Bank has also taken over the Government Treasury business.

ADMINISTRATION

The Andaman Islands are administered by the President acting through a Chief Commissioner and an Advisory Council of 8 Members. The seat of administration is at Port Blair, which is connected with Calcutta and Madras by a mail steamer which calls approximately once every 8 weeks at Port Blair. The islands are connected to India by wireless telegraphy. An Assistant Commissioner is stationed at Car Nicobar and another at North Andamans.

The budget estimates for 1956-57 were: Revenue Rs. 1,26,45,000, expenditure Rs. 8,38,56,000.

Chief Commissioner, T.G.N. Ayyar, I.C.S.
Advisory Council, Lachman Singh, M.P., Duria Prasad, Swarup Ram, Profulla Garami, N.K. Lu Ku.

ANDHRA PRADESH

(See Index for page number)

ASSAM STATE

GEOGRAPHY

Assam has three distinct natural divisions: Brahmaputra or Assam Valley, Surma or Barak Valley and the hills.

The river basins are naturally fertile and present in the main few difficulties to the cultivator. Rainfall being high the problem in general is to dispose of the surplus water and to control the action of floods rather than irrigation in the usual sense.

Rice is the staple food crop. Tea and Jute are the most important crops grown for export. Besides, potatoes are also cultivated in Assam. A good deal of short staple cotton and fruits like oranges and pineapples are grown in the hills.

Rainfall is everywhere abundant, and ranges from 50 to 258 inches a year leaving aside the highest recorded rainfall in this part of India with the maximum reached at Cherrapunji in the Khasi Hills 32 miles south of Shillong (905 inches in 1861: record precipitation for one day is 41 inches) This is reputed to be the wettest place in the world. Temperatures are moderate.

Earthquakes of considerable severity have taken place. By far the worst in recent times was that which occurred on August 15, 1950, one of the world's five biggest recorded tremors. According to old records the Assam earthquake of 1897 is regarded as the severest in human history.

COTTAGE INDUSTRIES

Main cottage industries: Sericulture and Weaving. Principal areas for Sericulture: Sib-sagar, Kamrup, Nowgong and Lakhimpur Districts.

Handloom weaving is done in most of the families in Assam. Number of fly and throw-shuttle looms in the State: Nearly 500,000. There are professional weavers in Cachar District and Sualkuchi area in Kamrup District. 1956-57:

Value of total production: Rs. 5,00,00,000.

Value of production of individual industries: Weaving products (Rs. 4,17,00,000); Muga raw silk (Rs. 48,00,000); Mulberry raw silk (Rs. 8,70,000); Open Eri Cocoon (Rs. 25,30,000).

Production of individual industries: Cloth—4,00,00,000 yards; Mulberry raw silk—29,000 lb.; Muga raw silk—1,60,000 lb.; Open Eri Cocoon—5,10,000 lb.

Total number of workers in Cottage Industries 20,00,000.

Number of workers in individual industries: Weaving (1,280,000); Sericulture (720,000). Almost all these workers are part-time.

Budget grant for the year 1956-57: Rs. 52,33,200.

AGRICULTURE

Latest available:

Main food crops of the State: Rice, Rape, Mustard, Sugar-cane, Potato, Pulses, Maize and Oranges.

Main cash crops of the State: Tea, Jute, Cotton and Tobacco.

Production of food crops in tons (Figures are for 1955-56): Autumn Rice: 370,940 tons; Winter Rice: 1,280,469 tons; Spring Rice: 6,037 tons; Rape and Mustard: 52,362 tons; Sugar-cane: 66,287 tons (in terms of gur); Winter Potato: 104,124 tons; Summer Potato: 35,457 tons; Sweet Potato: 19,530 tons; Pulses, Rabi: 26,694 tons; Tur (Arhar): 1,744 tons; Maize: 8,224 tons; Gram Pulse: 1,205 tons; Wheat: 870 tons; Other cereals and small millets: 2,380 tons.

Production of individual cash crops in tons: Tea: 335,524 301 lb. (Black Tea: 332,824,621 and Green Tea: 2,699,689 lb.); Jute: 1,093,808 bales (one bale—400 lb.); Cotton: 8,652 bales (1 bale—392 lb.); Tobacco: 7,508 tons; Mesta: 10,235 bales.

Total geographical area of the State including areas now transferred to and forming part of the North-East Frontier Agency: 35,784,120 acres.

Area cultivated: 6,298,064 acres.

Area sown more than once: 921,153 acres.

Area under food crops: 4,987,238 acres.

Area under cash crops: (Tea, jute, cotton, tobacco and mesta): 784,334 acres.

Area under individual food crops: Autumn rice (Ahu)—1,037,590 acres; Winter rice (Sall and Bao)—3,259,141 acres; Spring rice (Boro)—11,270 acres; Rape and Mustard—267,539 acres; Sugar-cane—63,787 acres; Winter Potato: 53,298 acres; Summer Potato: 18,755 acres; Sweet Potato: 13,916 acres; Pulses, Rabi: 170,841 acres; Tur (Arhar) 6,173 acres; Maize: 41,956 acres; Gram Pulse: 6,621 acres; Wheat: 4,317 acres; Other cereals and small millets: 12,174 acres.

Area under individual cash crops: Tea—385,920 acres; Jute—333,229 acres; Cotton—36,063 acres; Tobacco—23,572 acres; Mesta—5,230 acres.

The cultivation of oranges, which is a principal crop, is mainly confined to the Khasi-Jaintia Hills which are a non-cadastrally surveyed area. Hence no data available.

Jhum Cultivation: Prevails in the hill districts of Assam. Trees and shrubs on hill slopes selected every year are cut down and burnt and then crops grown on the bald patches. The area is then abandoned for a number of years so that trees may grow again and fertility recouped.

Under this system a particular group of people jointly occupy a particular area. They have no individual right over the land. In lieu of land revenue they pay a tax known as House Tax, Hoe Tax or Dao Tax which generally varies from Rs. 2 to Rs. 3 per family.

Research and Training Centres. Assam Agricultural College, Jorhat. Extension Training Centres and Basic Agricultural Schools at Barbheta (Jorhat), and at Upper Shillong. Agricultural Research Station and Farm at Barbheta where the laboratories of the Agricultural Chemist, Mycologist, Entomologist, Economic Botanist and Sugar-cane Specialist are located; Experimental Farm at Upper Shillong; Fruit Garden in Shillong. Paddy Research Stations at Karimganj, Itanagar, Raha and Upper Shillong. Citrus Research Station at Pura and Burnihat. Ginger Research Station at Naya Buncalow.

Veterinary: Total number of cattle: 5,145,576 (cows 4,745,500; Buffaloes 475,231); Horses and Ponies—15,590; Sheep—32,604; Goats—307,239. Other livestock—291,920 and Fowls—5,050,724. (1951 livestock census).

Research Institutes: a) Bovine Contagious Pleuro Pneumonia Scheme (Research Institute, Gauhati); b) Cattle Nutritious Scheme (Research Institute, Khanapara, Gauhati).

PLANTATIONS

Latest available

1955-56:

Plantation in the State: Tea.

Area under Plantation: 1,399,493 acres.

Number of Plantations (tea): 968.

Area under Tea: 385,920 acres.

Area: 85,012 sq. miles (including N.E.F.A. and the Naga Administrative Unit); Assam: 45,767 sq. miles; N.E.F.A.: 32,909 sq. miles; Naga Unit: 6,276 sq. miles.

Population (1951 census): 8,837,757 (including some parts of N.E.F.A.). Excluding N.E.F.A. and Naga Unit: 8,772,874.

Capital: Shillong.

The 1951 census which yielded the latest population figures covered only a small portion of N.E.F.A. The total population of N.E.F.A. is very roughly estimated at 650,000.

Of the total population (census) males number 4,812,166, females 4,231,541, urban 414,418, rural 8,020,289. The rural population is subdivided into Agricultural at 6,606,216, Non-Agricultural 2,923,073.

Population according to religion: Hindus 6,914,738; Muslims 1,996,456; Christians 685,399; Buddhists 22,675; Jains 4,245; Sikhs 4,107; Jews 209; Other religions: Tribal 527,712; Non-Tribal 8,144; Zoroastrians 27.

Number of Scheduled Castes: 424,044; Scheduled Tribes: 1,735,245.

Density of population per sq. mile: 179.4. No reliable figures on birth rate, death rate or infant mortality in the State can be found.

More than one half of the area of Assam State is covered by hills. Plains: 23,033 sq. miles; Hills: 27,010 sq. miles (excluding N.E.F.A.). The hill areas are sparsely populated and inhabited by the hill tribes. Plains: 7,805,558; Hills: 1,238,149 (including some parts of N.E.F.A., covered by 1951 census).

Names of Districts with headquarters in brackets: Goalpara (Dhubri); Kamrup (Gauhati); Darrang (Tezpur); Nowgong (Nowgong); Sib-sagar (Jorhat); Lakhimpur (Lakhimpur); Cachar (Silchar); Garo Hills (Tura); United Khasi-Jaintia Hills (Shillong) which is also the capital of the state; United North Cachar and Mikir Hills (Diphu); Mizo previously called Lushai Hills (Aizawl).

The hill districts have been given, under the Constitution of India, a large measure of self-governing rights according to their respective tribal traditions and customs, exercised through Autonomous District Councils under the supervision of the Government of Assam.

For purposes of Autonomous District Councils, United North Cachar and Mikir Hills are two Districts: North Cachar Hills (Nafong); Mikir Hills (Diphu).

Number of Circles: In Assam Tahsils are termed as Circles: 50.

Number of Local Boards (District Boards): 16.

Number of Municipalities: 17.

Number of Town Committees: 13.

Number of Cantonments: 1.

Number of Panchayats: (at the end of March 1957): Rural 429; Primary 2,376.

Number of villages: 28,327.

There is no city in Assam. Names of towns with a population of over 50,000 (according to 1951 Census): Shillong: 63,756 (excluding Cantonment area comprising a population of 4,740).

Forty per cent of the population are recorded as speaking Assamese and about 24 per cent Bengali. Other languages spoken in the State are Hindi, Oriya, Mundari, Nepali and a great variety of languages and dialects, classified under the general heading Tibeto-Burman languages.

Number of people speaking the main languages (1951 census): Assamese: 4,978,498; Bengali: 1,719,185; Hindi: 336,668.

Produce from plantation: Tea: 335,524,301 lbs. (Black tea—332,824,821 lbs.; Green tea—2,699,830 lbs.).

Average daily number of workers:

- Permanent garden labour: 445,176.
- Permanent outside labour: 30,148.
- Temporary outside labour: 41,878.

Fisheries: Variety of fish produced: Rahu, Katia, Mrigal, Mall, etc.

1956-57:

Number of fish farms 9 (under Government control).

Fish seed collecting centres 14.

FORESTS

Main types of Forest with some species of trees of economic importance occurring in them:

Evergreen forests, mixed deciduous forests, deciduous and dry deciduous forests, riverain forests, Savannah forests, swamp forests, bamboos and temperate forests.

A large area under forests falls in the hill districts which are sparsely populated and covered with vegetation.

Assam possesses one of the richest fauna in Asia and it is claimed that outside Africa, there is no part in the world with so many varieties of animals, birds, reptiles and insects. Rhinoceroses, elephants, wild buffaloes, bisons (called 'Mithuns' by most of the hill tribes and the N.E.F.A.), swamp deer, Sambar, spotted deer, barking deer, tiger, leopards, black panther, King Cobra, pink-headed duck and Giant Hornbill are some of the well-known specimens of wild life.

Four sanctuaries and two game reserves with a total area of about 500 sq. miles, are maintained by the Government Forest Department for the protection of the interesting and in some cases the numerically dwindling species. Kaziranga and Manas are the two most famous sanctuaries, both nearly the same size, 166 and 162 sq. miles respectively. Kaziranga, in the heart of Assam and situated on the South Trunk Road, is easily accessible and affords every facility to the visitor to see the famous one-horned rhinoceros from elephant back at close range. The sanctuary at Manas at the foot of Bhutan Hills is the more attractive from the scenic point of view.

1956-57 (unless otherwise mentioned):

Total forest area in State: 16,907 sq. miles.

Reserve forests: 6,373 sq. miles; Protected forests: 110 sq. miles; Unclassed State forests: 10,424 sq. miles.

Total area of private forests (1955-56): 975 sq. miles inclusive of Corporation Forests.

Total revenue from forests and total expenditure:

Revenue	Rs. 97,45,254.
Expenditure	Rs. 72,29,609.

Main Forest produce with the quantity and value of each variety in brackets (1955-56):

Timber (7,123,000 cft., Rs. 63,70,440); Firewood (7,874,000 cft., Rs. 1,15,234); Bamboo (6,953,984 Nos., Rs. 1,93,121); Elephants 33 Nos., Rs. 1,24,495); Cane (9,511,475 Rft. and 16,03,475 bundles, Rs. 2,34,305); Lac (347 mds. 24 seers, Rs. 3,457); Elephant Tusks (1 md. 30 seers, Rs. 745); Rhino horns (6 pieces, Rs. 7,600) (1954-55); Thatch (405,704 Nos. and bundles, and Bases, Rs. 1,35,159); Fishery (Leases, Rs. 1,554); Stone (2,107,847 cft.; Rs. 85,404); Sand (8,134,624 cft., Rs. 3,09,510); Drugs (1954-55) (Rs. 95,565); Spices (1954-55) (Rs. 450); Incense and Perfumes (1954-55) (Rs. 9,374); Fibres and Flashes (1952-53) (Rs. 346).

Afforestation undertaken (1956-57):

Artificial regeneration ..	51,147 acres.
Natural regeneration ..	25,330 acres.
Total	76,477 acres.

Expenditure—Rs. 8,01,076.

Grazing allowed: Cows and bullocks: 49,070 Nos.; Buffaloes: 23,124 Nos.; Sheep and Goats: 2,897 Nos.; Other livestock: 560.

Vanamahotsava:

Number of trees planted:	
Edible fruits:	65,218
Others:	25,730
Total:	90,948

Number of trees survived:	
Edible fruits:	44,723
Others:	14,966
Total:	59,689

Percentage of survivals to planted: 65.

LAND TENURE SYSTEM

There are two classes of land tenure system in the State—the permanently settled estates and the temporarily settled estates.

Permanently settled estates: These are found in Goalpara District and Karimganj Sub-division of the Cachar District. The land is held by zamindars having intermediaries under them. The actual tillers of the land are the tenants who hold land either directly under the zamindars or intermediaries. The tenants also pay a fixed amount of rent.

In common with other States having the permanent settlement system, Assam Government has passed laws to end zamindari rights. An area of 15,18,982 acres has already been acquired by Government out of the total permanently settled area of 1,702,055 acres. The rights of intermediaries between tillers and Zamindars (that is, of tenure holders and joddars, are now being abolished in Goalpara District. Steps for the acquisition of Zamindari in Karimganj are in progress. Total compensation is estimated at about Rs. 5 crores.

Temporary settlement system: Also known as the Ryotwari system. Prevails in the other plains districts of the State. These lands are assessed to full revenue and are called Khiraj lands.

The peculiarity of this system is that generally the cultivators hold lands directly under the Government unlike the lands in permanently settled estates.

The Khiraj lands are again divided into two categories, periodic and annual. The periodic landowner has a heritable and transferable right whereas the annual landowner has a right of occupation only and has no right of transfer or subletting. Subject to the payment of the land revenue the owners of annual lands get renewal of the lease from year to year.

Besides these, there are some La-Khiraj (full revenue free) and nisf-Khiraj (half revenue free) tenures in Assam and also a number of Fee Simple tenures. These Fee Simple tenures are for cultivation of tea. These tenures are initially revenue-free, but subsequently they have been assessed at full rate of revenue under Assam Revenue Free Waste Land Grants Act, 1948.

There are three tenancy Acts in Assam, viz. The Goalpara Tenancy Act, The Sylhet Tenancy Act and the Assam (Temporarily Settled Districts) Tenancy Act. The former two Acts apply to the Districts of Goalpara and Cachar (those portions of Sylhet District which have remained in Assam after partition) respectively. The last Act applies to the plains districts of Assam. These Acts confer rights of occupancy, determine the rent payable by the tenants and regulate the relationship between the landlords and the tenants. The Assam Adhikars Protection and Regulation Act, 1948, governs the conditions regarding crop-rent payable by the crop-sharing tenants and prescribes the conditions on which the landlord can resume possession for personal cultivation. Government has also passed a law called the Assam Fixation of Ceiling on Land Holdings Act whereby the holding of agricultural lands has been limited to a maximum of 150, bighas (about 50 acres) per family.

Hill Districts: In the hill districts of Assam, land administration is carried on by the Autonomous District Councils according to local customs and usages. The provisions of revenue

regulations and tenancy acts in force for the plains districts do not apply there and even land-revenue as it exists in the plains, is not realised there. In its place, a house tax or hoe tax is levied on the people. In many parts of the hills, land is held in common by entire villages.

MINES, INDUSTRIES

The only minerals in Assam worked on a commercial scale are coal, limestone and petroleum oil. Petroleum output about 100,000,000 gallons; coal output 4,72,000 tons; and limestone output approximately 1,000,000 tons. The most extensive coal measures hitherto worked are in the Naga Hills, Lakhimpur District and Khasi-Jaintia Hills. Important deposits also exist in the Garo Hills; but these are yet to be exploited. Limestone is quarried in the Khasi-Jaintia Hills. Petroleum is worked only in Lakhimpur and refined there. An oilfield has been found at Nahorkatiya.

Silk is manufactured in the Assam valley; also cotton weaving prevails as a cottage industry, women playing a predominant part. In this valley there are no caste weavers. In the Surma Valley or Cachar weavers carry on a brisk manufacture on a commercial scale. These handloom products find a ready market on account of the great scarcity of mill made cloth. There is no textile mill in Assam and the entire requirement of mill-made cloth has to be imported from other States.

Tea is the main industry, but there is a large petroleum mining concern with Digboi in Upper Assam as the centre and also some coal-mines. There is a big match manufacturing concern at Dhubri. Boat-building, brass and metal and earthenwares, limestone burning, cane and bamboo work, furniture making, soda hat, smithy, brick making, mustard oil pressing, rice and saw mills are other industries. But agriculture employs about 80 per cent of the population. Assam carries on a considerable trade with the adjoining hill tribes and countries.

Total number of registered factories (1956-57): 1,123.

Total number of workmen employed in the State in registered factories (1956-57): 71,662 (Men: 64,193; Women: 8,221; Adolescents: 1,070; Children: 575).

TRADE

Assam has to import almost every article of daily necessity except rice and paddy to meet the requirements of the population. As there are no production units every type of manufactured goods has to be imported and brought into Assam by the rail link, steamer or air, none of which has so far been able to cope with the demand. Prices have gone up in the State as a consequence of this.

Manufactured goods, textiles, iron and steel, medicine, sugar and pulses are some of the main items of import. Exports from Assam are tea, jute, timber, cane, bamboo, petroleum and fresh fruits.

TRANSPORT

Much of the trade of Assam is carried by river. Steamer companies maintain fleets of vessels which ply to and from Neamat, Dibrugarh, Tezpur, Gauhati, Goalpara, Dhubri, Karimganj, Silchar and many other smaller stations.

During the dry season the formation of char and sandbanks restrict the volume of riverine traffic.

The rail system in Assam is entirely metre-gauge. Till November 1, 1957 the total mileage in the State was 1,455.08, broken down as follows:

Running Track mile ..	1093.30
Transport Siding ..	267.50
Commercial Siding ..	90.28

After Partition the Assam Rail Link was built to connect the State directly with the rest of India but as the line is very close to the Himalayas from which a number of rivers run down into the plains, it is subject to heavy

damage by floods almost every year and through traffic also remains suspended for long periods. The Railway Board has sanctioned certain measures designed to prevent recurring flood damage and dislocation of traffic.

From August 1955, goods traffic to the rest of India was also started through East Pakistan.

On the bank of the Brahmaputra, the rail system starts from Pandu, which is reached from the north bank terminus Amlingao by a ferry. The construction of a bridge to link the two banks has been under contemplation for long.

Because of the slender surface link between Assam and the rest of India, air services are of great value to the State. The first direct link by air between Calcutta and Gauhati was established in 1947. This air service was originally on a non-scheduled basis but very soon it became a daily service and now there is more than one service a day. Almost all the big towns—Tezpur, Jorhat, Dibrugarh, North Lakhimpur, Silchar, Imphal and Gauhati—are served by daily scheduled flights. Pasighat and Abang in N.E.F.A. have also been placed on the airmap.

Shillong is reached by a 63-mile nationalised motor route from Gauhati, the nearest railhead, steamer ghat and air station. Assam Government's State Transport carries both passengers and goods on a monopolistic basis on the National Highway, in combination with railway and steamer services on out-lying routes.

Nationalisation of motor transport in the State was started in 1948, and till March 1957, 432 miles were covered. The Second Five Year Plan aims at nationalising 830 miles.

Till October 31, 1957:
Number of passenger buses—312
Number of cars—25
Number of Goods Vehicles—170
Number of passengers carried in a day (1955-56)—11,340
Goods carried in a day (1955-56)—7,870 maunds.

The organisation provides employment to 2,200 persons. Capital invested till March 31, 1957 is Rs. 1,05,05,430. Profit in 1956-57 stood at Rs. 23,81,247. The State Transport is under the administrative management of a Board, with the Minister for Transport as Chairman.

The programme of road making has its special significance in that it is designed to make Assam self-sufficient in ensuring quick transport of its exports to and imports from other parts of the Indian Republic without having to pass through Pakistan. At the same time communications within the State are being improved by provision of necessary feeder roads from and to the arterial road system of the State so that local surplus produce may find good markets.

Before Independence the State had only 2,610 miles of motorable roads—2,040 miles in the plains and 570 miles in the hills. After the achievement of Independence an extensive programme of road-making was taken in hand and on March 31, 1956, the total length of motorable roads stood at 6,627 miles including 797 miles of National Highway. Of these 5,163 miles were in the plains and 1,464 in the hills. Besides, there were on this date 1,641 miles of bridle roads.

CIVIL SUPPLIES

In January 1957 the Assam Government promulgated a Food Grains Licensing and Control Order with immediate effect to regulate the sale, purchase, storage and milling of rice paddy throughout the State.

There was some uneasiness over the 1958 food prospects and it was expected that the shortfall might amount to about 70,000 tons.

No person, except the producer will now be able to purchase, sell, store for sale of mill food grains without a licence.

The State Government may also compel, for the purpose of "maintaining or increasing supplies or securing an equitable distribution and availability at fair prices", the holders of food stocks to sell to the Government or other specified persons at prices determined by the Central Government.

The movement of food grains out of Goalpara, Nowgong, Sibsagar, Cachar, Kamrup and Darrang districts and North Lakhimpur and Dibrugarh sub-divisions has been banned.

An exception has been made, however, in the case of *bona fide* travellers carrying food grains not exceeding five seers.

Rice is the staple food in Assam. There was no rationing nor general restriction on movement of rice and paddy except in four districts on the border of East Pakistan—Goalpara, Garo Hills, Khasi & Jaintia Hills and Cachar after the war-time restrictions were withdrawn until the Control Order mentioned above was promulgated.

In the latter part of 1956, two control orders were, however, promulgated to restrict the export of rice, paddy, mustard oil and mustard seeds from Assam and also to restrict the movement of rice and paddy from the four districts adjoining East Pakistan. Though there was no statutory rationing, imported rice was being distributed through fair price shops throughout the State. Imported rice was being stored in Central Government godowns at eight centres for issue to the dealers appointed by the local officers for distribution at a subsidised price to low income groups.

Wheat what used to be imported from Central Government stocks in Calcutta by *bona fide* traders on the recommendations of the State Government till August 1957. After September 1957, imported wheat was being stored in Central Government depots in Assam for issue to the selected mills according to allocations made by the State Government. Atta produced from imported wheat is sold by the dealers and millers at prices fixed for different areas.

A new Roller Flour Mill has been functioning since May 1957 but the maize and fines produced by this mill are quite inadequate to meet the requirements of the State.

Arrangements have been made for the supply of 1,500 tons of maize per month from Calcutta flour mills in addition to the local production of about 600 tons.

The entire requirements of sugar, salt, cloth and yarn have to be imported as there is no production unit for any of these commodities.

The demand for sugar prior to December in June 1957 was about 2,500 tons monthly. This has now gone up to 5,000 tons. For the entire quantum—Assam depends on mills in other States.

In the matter of cloth there is no control on movement or price, but the licensing of dealers still continues.

State's requirements: Rice—1,542,000 tons (annual); Wheat—5,000 tons (monthly); Salt—200,000 md (monthly); Sugar 5,000 tons (monthly); Cloth 5,000 bales per month; Yarn 3,000 bales per month.

CO-OPERATION

1955-56:
Total number of Co-operative Societies: 1,265.
Total membership of Co-operative Societies: 649,345.

Total working capital: Rs. 4,20,42,288.
Types of Co-operative Societies and the number of each:

Farming (105); Milk Societies (3); Agricultural Credit (1,925); Non-Agricultural Credit (162); Non-Agricultural Non-Credit (1,777); Weaving (717); Fishery (71); Industrial (92); Rural Credit (1,509) (1954-55); Central Non-Credit (12); Consumers and Trading (1,103); Primary Land Mortgage Bank (2); Multi-purpose (48); Social Service (3); Sugar Mill (1); Cotton-ginning Mill (2); Co-operative Union (4); Marketing (20); Dairy Farm (4); Milk Union (1); Jute-baling (1).

Number of Banking Unions: 15; Number of Central Banks (Assam Co-operative Apex Bank): 1 with 17 branches:

Assam Co-operative Apex Bank (1956-57):
Working capital Rs. 4,02,82,787
Deposits 2,30,78,660
Paid-up share capital 22,83,000
Profit 5,75,069

Budget allotment for the department for the year 1954-55: Rs. 10,90,300.

STATE HELP FOR AGRICULTURE

1955-56:

Manure distributed and the quantity of each: Rural Compost: 1,20,000 tons, benefiting an area of 26,600 acres; additional yield expected: 1,320 tons; Town Compost: 594 tons; Oil-cake: 21,816 md., covering an area of 5,838 acres; additional production anticipated: 721 tons; Fertilizers (Bone meal): 3,672 md., serving an area of 1,049 acres; estimated additional production: 315 tons; Ammonium Sulphate distributed: 2,500 tons.

Quantity of improved seeds distributed: Paddy: 30,375 md.; Pulses and wheat: 1,431 md.; Mustard (1954-55): 23 md.

Monetary or other help given by Government to cultivators:

Loans: Rs. 2,05,500.
Government's share of 50 per cent contribution towards irrigation projects: Rs. 6,01,000. Area covered: 2,41,980 acres. Additional outturn: 33,990 tons.

Manures and fertilizers are being subsidised by Government.

Number of Agricultural experimental farms: 9 (excluding 4 district seed farms under "Grow More Food").

Plant protection organisations: One.
It has been under the supervision of a Mycologist assisted by an Entomologist since 1949-50. During 1955-56, 1,372 acres of paddy, 3,895 acres of potato, 4,200 acres of pulses, fruits and vegetables were treated against insect pests, in addition to 2,50,000 maunds of paddy, 70,000 maunds of pulses and 20,000 maunds of potatoes, treated in storage against pests.

Target for additional production of food crops under "Grow More Food" for the five-year period ended 1955-56 as agreed to by the State Government under seven different schemes for irrigation, reclamation of land, production and distribution of manures, fertilizers and seeds was 2,00,000 tons against which actual achievement was 2,11,140 tons.

Highest yield per acre:
Sahi Paddy—114 maunds 33 seers 2 chhaks—in Lakhimpur.
Potato—453 maunds 33 seers—in Lakhimpur.
Budget estimates for 1957-58:

	(Rs. lakhs)
Seeds	5.28
Excluding District seed farms for which there is provision for Rs. 13.8)	
Manures	1.52
Plant protection	2.87
Tea Garden Loan	3.00

PUBLIC HEALTH

Latest figures available:
Commonest diseases in State and mortality from each disease during 1956.

Diseases	Persons affected	Death
Malaria	96,240	5,955
Kala-Azar	29,120	244
Total: All fevers	not available	22,992
Small Pox	not available	109
Dysentery and Diarrhoea	not available	3,418
Respiratory diseases	not available	3,754
Injuries	not available	829

Total number of hospitals and dispensaries: 482.

Number of Allopathic hospitals and Dispensaries: Rural 394; Urban—78.

Total number of Ayurvedic dispensaries: 10.
Types of special hospitals and the number of each: T.B. Hospitals—11 (437 beds); Mental Hospital 1 (740 beds); Leprosy Hospitals and Clinics 15 (755 beds); Kala-Azar Hospitals—3 (301 beds).

Total number of Allopathic doctors (Rural and Urban) (1955)—3,137.

Total number of Ayurvedic doctors (Rural and Urban)—194.

Total number of Nurses—616.
Total number of Midwives 505.

Total number of Dhals (Rural and Urban)—430.

Total number of Compounders—2,195.

Total number of indoor patients treated in Hospitals—35,315.

Total number of outdoor patients treated in Hospitals—1,86,526.

Total number of Government Hospitals and Dispensaries—452 (rural 351, urban 71).

Total number of Government doctors: Allopathic—312, Ayurvedic—10.

Total number of Government Nurses: 243.

Total number of Medical Colleges: Allopathic—1; Ayurvedic—1.

Total number of students: Allopathic—501; Ayurvedic—24.

Special Medical Research Institute—1 (Pasteur Institute, Shillong).

Budget allotment for Public Health for 1956-57—Rs. 46,55,300.

EDUCATION

The information furnished below relates to the year 1956-57 unless otherwise mentioned.

Elementary Schools:

Total number of elementary schools—13,361.

Total enrolment: 837,018 (in 1955-56 boys 523,096; girls 279,149).

Total number of teachers: 21,682.

Total expenditure: Rs 1,10,74,909 (excludes expenditure on unrecognised institutions).

Contribution by State Government: Rs. 98,20,240.

By Local Bodies: Rs. 1,91,927.

By Private agencies: (1955-56) Rs. 9,46,253.

Nursery Schools:

Total number of Nursery Schools: 24 (boys 6 girls 18).

Total enrolment: 921 (boys 440, girls 484).

Total number of teachers: 35.

Number of schools with Nursery classes attached (1955-56): 15 (urban areas 3; rural areas 12).

Total enrolment in such classes: 85 (1954-55).

Total expenditure on Nursery Schools: Rs. 41,028 (excludes expenditure on unrecognised institutions).

Secondary Schools:

Total number of Secondary Schools: 2,111 (for boys: 1,889; for girls: 222).

Total enrolment: 260,861 (in 1955-56, boys 214,121; girls 67,160).

Total number of teachers: 13,214.

Total expenditure on Secondary Education: Rs. 1,56,14,117 (excludes expenditure on unrecognised institutions).

Contribution by State Government (1955-56): Rs. 73,76,974.

By Local bodies (1955-56): Rs. 1,26,720.

By Private agencies (1955-56): Rs. 18,11,373.

Fees (1955-56): Rs. 49,72,537.

European and Anglo-Indian Schools:

Number of European and Anglo-Indian Schools: 4.

Total enrolment: 1,161.

Total Government grant: Rs. 57,856.

Sanskrit Tols:

Number of Sanskrit tols: 139.

Enrolment: 3,063.

Government grant: Rs. 74,000.

Arabic Madrasahs:

Number of Arabic Madrasahs: 121.

Total enrolment: 12,500.

Government grant: Rs. 92,262.

Number of Elementary schools owned by State Government: 1,320; by School Boards: 9,980; by Private agencies: 2,261.

Number of Secondary schools owned by State Government: 147; by Central Government: 2; by Local Bodies: 510; by Private agencies: 1,452.

Number of Colleges owned by State Government: 1; by Local Bodies: Nil; by Private agencies: 26.

Number of teachers' training institutions owned by State Government: 10; by Local Bodies: 11; by Private agencies: 6.

Number of commercial and technical institutions owned by State Government: 22; by Central Government: Nil; by Local Bodies: 1; by Private agencies: 27.

Number of European and Anglo-Indian Schools owned by State Government: 1; by Private agencies: 3.

Number of Sanskrit Tols owned by State Government: Nil; by Private agencies: 139.

Number of Arabic Madrasahs owned by State Government: 1; by Private agencies: 120.

Number of nursery schools owned by State Government: 1; by Private agencies: 23.

Schools for Defectives:

Total number of schools for defectives: 2.

Total enrolment: 61.

Number of teachers: 5.

Government grant: Rs. 4,660 (for one school).

Schools for Social Education:

Number of Institutions: 634.

Number of teachers: 634.

Total expenditure: Rs. 1,46,013.

Contribution by State Government: Rs. 1,14,006; by Central Government: Rs. 11,927; by Private agencies: Rs. 4,930 (1954-55).

Training Institutions:

Total number of teachers' training institutions: 33 (for men 25; for women 5).

Number of training institutions which confer degrees: 1 (Gauhati University).

Total number of new trained teachers available for staffing elementary schools in a year: 734.

Total number of new trained teachers available for staffing secondary schools in a year: 243.

Total expenditure on teachers' training institutions: Rs. 9,99,178.

Contribution by State Government: Rs. 8,43,144; by Local Bodies: Rs. 1,060; by Private agencies: Rs. 13,155; Fees: Rs. 1,829.

Commercial and Technical Institutions:

Total number of Commercial and Technical institutions: 59 (Commercial: 22, Technical: 28).

Total enrolment: 3,995 (Commercial: 2,067; Technical: 1,938).

Total number of teachers: 249 (Commercial: 62; Technical: 187).

Total expenditure: Rs. 12,53,045 (1955-56) (excludes expenditure on unrecognised institutions).

Contribution (1955-56) by State Government: Rs. 1,54,960; by Central Government: Rs. 2,38,749; by Local Bodies: Rs. 4,018; by Private agencies: Rs. 50,317; Fees: Rs. 75,666.

Colleges:

Number of colleges: 27.

Total number of women's colleges: 4.

Total enrolment (1955-56): 12,336 (boys 10,965; girls 1,651), including enrolment in unrecognised colleges.

Total number of teachers (1955-56): 445.

Total expenditure on Collegiate Education (1955-56): Rs. 20,23,153.

Contribution (1955-56) by State Government: Rs. 7,19,645; By Central Government: Rs. 22,020; By Private agencies: Rs. 86,940; Fees: Rs. 11,95,530.

Professional Colleges:

Total number of Professional Colleges: 6.

Number in each category:—Medical: 1; Agriculture: 1; Veterinary: 1; Law: 1; Engineering: 1; Ayurvedic: 1.

Total enrolment: 1,193 (excluding Engineering College).

Total enrolment in each category: Medical: 501; Agriculture: 158; Veterinary: 227; Law: 283; Ayurvedic: 24; Engineering: Not available.

Total number of teachers: 109 (excluding Engineering and Law Colleges).

Total expenditure on Professional Education (1955-56): Rs. 11,90,747.

Contribution (1955-56) by State Government: Rs. 1,04,926; by Private agencies: 8,445; Fees: Rs. 1,33,040.

The grant given by the Central Government under Article 275 of the Constitution for education of backward classes: Rs. 10,93,935.

Research Institutions:

Kamrup Anusandhan Samity, Gauhati.

Assam Provincial Museum, Gauhati.

Assam Parishad Committee, Gauhati.

Assam Sahitya Sabha, Gauhati.

Universities:

Number of Universities: One (Gauhati University).

Elementary education is compulsory in selected Plains areas in the State for children of the age group 6-11.

Total number of children of school-going age in areas under compulsion: 350,323.

Number of Primary Schools maintained by the State Primary Education Board: 9,980.

Total enrolment: 668,285.

Number of teachers: 17,506.

Government expenditure: Rs. 74,80,925 (excluding contribution by local bodies).

The Assam Elementary Education Board has made arrangements for the training of 700 teachers annually.

Literacy in the State: The percentage of literates in the State (according to 1951 census) 18.07. Males 1,303,367, Females 3,30,754, Total 1,634,122.

SOCIAL EDUCATION

Number of Social Education Centres organised so far throughout the State: 1,762.

In order to cater for the post-literacy centres 428 village libraries were given grants-in-aid in 1957.

Adults both male and female are generally admitted into the Social Education Centres.

Total number admitted: 28,114 (men 25,522; women: 2,595).

Total budget for the scheme in the State: Rs. 3,65,900.

Number of adults who appeared in the literacy tests held every year from the Social Education Centres: 24,231 (men: 21,767; women: 2,464).

Number of adults who came out successful: 18,471 (men: 16,430; women: 2,041).

Number of teachers in Social Education Centres: 604.

Hindi in the Education System:

With a view to introducing Hindi in secondary schools in the State as a compulsory subject from class IV onwards, it is proposed to make Hindi a compulsory subject in all institutions every year.

Total number of schools where Hindi has been introduced as a compulsory subject: 637.

The number of candidates who appeared at the different examinations conducted by the Assam Rashtriya Prachar Samity: Prathamik—10,948; Prabodh—4,478; Probdh: 1,744; Bihard—489.

Basic Education :

The Scheme for Basic Education was first introduced in this State only in the year 1949-50 on the lines of the Wardha Education Scheme.

Due attention was paid to the productive side of Basic Education.

It is expected that the existing 5 training centres with Basic Schools under them will earn on an average Rs. 1,000 per centre.

LABOUR

Average daily number of workers in registered factories at the end of March 1957: 83,426 (Adults: men 30,370; women 2,972; Children: 484).

Names of industries in which a minimum wage is fixed: Tea Plantation, Motor Transport, Rice and Oil Mills, Agriculture, Road Construction, Building Operations and Stone-breaking or crushing.

Average monthly earnings of workers in some of the more important industries (in March 1957) (earnings include basic wage as well as other cash remunerations like dearness allowance and overtime; basic wages are shown in brackets):—Plantations: Rs. 45 (Rs. 30-8); Tea factories: Rs. 52-2 (Rs. 37-4); Rice Mills: Rs. 80-5 (Rs. 61-7); Plywood factories and saw Mills: Rs. 67-9 (Rs. 48-3); Match factory: Rs. 114-8 (Rs. 49-2); Petroleum: Rs. 194-8 (Rs. 102-6).

Total number of Trade disputes for the year 1955: 4,012.

Total number of Strikes (October 1956-September 1957): 21 (18 in plantations).

Total number of workers affected: 10,525 (8,850 in plantations).

Number of Man-days lost: 99,196 (93,942 in plantations).

Number of registered Trade Unions in State (October 1957): 118.

Total membership of Trade Unions: 1,81,136 (of only 73 unions, figure for 35 Unions not available).

Number of Labour Welfare Centres in State: 20.

Number of houses built through the Industrial Housing Scheme: 11. In the tea industry in

1954-55 3,280 houses of the type approved by the Government were constructed, and 521 old houses adapted to the approved standard.

COMMUNITY PROJECTS

The Community Development Projects and Blocks and the National Extension Service Blocks taken up in the State till March 31, 1957 cover a total area of about 17,257 sq. miles with a population of 28,62,268 (about 34 per cent of the State population) in about 9,915 villages. There are in all 53 blocks in operation now.

HOUSING

Housing authority: Housing Board, Assam.

Finance available for housing: Schemes are entirely financed by loans and subsidies from the Government of India, Ministry of Works, Housing and Supply except that for slum clearance schemes a matching subsidy is given by the State Government. Staff expenses for all schemes are borne by the State Government. Allotment by Government of India for the Second Five-Year Plan period: Rs. 1,23,50,000.

Types of houses built: 2. Tenements for municipal sweepers at a ceiling cost of Rs. 3,500 per tenement, and residential houses by private individuals with no prescribed ceiling.

Rents charged: For tenements for municipal sweepers: Nil; for residential houses: does not arise.

Financial help given to local bodies: To Municipalities for sweepers' tenements, 80 per cent of the estimated cost of construction or Rs. 2,800 per tenement, whichever is less. So far Rs. 10,20,000 has been given as loan.

The Housing Board advances loans also to private individuals for construction of residential houses at the rate of 80 per cent of the cost of construction or Rs. 8,000, whichever is less, repayable with interest at 5½ per cent per annum in 18 years. During 1956-57 Rs. 20,36,000 was sanctioned as loans for construction of 321 residential houses. Till August 15, 1957, the total amount given as loans amounted to Rs. 35,90,000.

Schemes for implementation during Second Five Year Plan period: Development of building sites—Rs. 5,00,000; Loans to Local Bodies—Rs. 5,00,000 from Government of India and Rs. 10,00,000 (in 1956-57 only) from State

Government; Plantation labour housing scheme—Rs. 35,00,000; Slum clearance—Rs. 9,00,000; Subsidised industrial housing scheme—Rs. 9,00,000; Loans to individuals and co-operatives—Rs. 79,50,000.

BUDGET (1958-59)

Revenue: Rs. 29,26,58,000.
Expenditure: Rs. 28,39,18,000
Surplus: Rs. 87,40,000

FIVE-YEAR PLAN

Second Plan provision: Rs. 5,793,60,000.
1957-58 provision: Rs. 1,15,18 lakhs.
1958-59 provision: Rs. 1,07,17 lakhs.

See also under article 'Second Five-Year Plan'

THE ASSAM FINANCIAL CORPORATION

('Glenquahrt', Shillong)

(Position as on March 31, 1958)

The Corporation came into being on 14th August 1954.

Aims and objects: To contribute to the industrialisation of the State by providing credit, medium and long term to industrial concerns present or future in Assam.

Authorized capital: Rs. one crore divided into one lakh shares.

The one lakh shares are distributed as below:

1. Government of Assam .. 50,000
2. Reserve Bank of India .. 20,000
3. Scheduled Banks, Insurance Companies, Co-operative Banks and other financial institutions. 25,000
4. Parties other than those referred to above .. 5,000

Total number of applications received: 123

Total number of applications accepted: 50

Total amount of loan sanctioned: Rs. 1,07,50,000

Total amount of loan advanced: Rs. 54,03,148

Rate of interest charged: Six per cent to seven per cent.

Income (1957-58) .. Rs. 5,25,664
Expenditure 73,748
Profit 4,51,916

POPULATION OF DISTRICTS (1951 Census)

Assam Districts.	Total	Males	Females	Rural	Urban
1. Cachar	1,115,865	588,308	527,559	1,054,489	61,376

UPPER ASSAM CHAMBER OF COMMERCE

Jorhat.

NAGA HILLS - TUENSANG AREA

Area: 6,270 sq. miles (approximately).

Population: 355,000 (approximately).

Headquarters: Kohima.

Administrative Districts with headquarters shown within brackets: Kohima (Kohima); Mokokchung (Mokokchung); Tuensang (Tuensang).

This administrative unit comprising the Naga areas of Assam State and North-East Frontier Agency, that is, the Naga Hills district of Assam and the Tuensang Frontier Division of NEFA, came into being on December 1, 1957, following

the acceptance by the Government of India of a resolution passed by a Naga convention at Kohima which advocated this course as a step preliminary to solving the political deadlock there.

The Naga Hills-Tuensang Area is, like NEFA, administered by the President through the Governor of Assam. The responsibility for the administration rests with the External Affairs Ministry. The Governor has under him, for this Area, a Commissioner who in turn is helped by three Deputy Commissioners in the three districts and other staff.

The economy of the unit is entirely dependent on its abundant forests. Revenue is derived from house tax and forest produce like bamboo, cane, timber, thatch and 'Agar'. Rice is grown but all other necessities of life have to be imported. The Naga tribes depend on their own cottage industry for cloth but yarn is imported.

The main tribes in the Area are: Angami, Sema, Lhota, Ao, Rengma, Chake-sang, Sangtam, Konyak, Chang, Phom, Yimchungar, Khimung, and others.

NORTH - EAST FRONTIER AGENCY

Area: 34,960 sq. miles.

Headquarters: Shillong.

Population: The latest census of India in 1951 did not extend to the whole of the North-East Frontier Agency and only a very small portion of the territory was covered. These figures are included in the total population of Assam. The population of N.E.F.A. is very roughly estimated now at 6,00,000.

The North-East Frontier Agency, geographically and constitutionally a part of Assam but administered by the Union Government is situated on the borders of Bhutan, Tibet and Burma.

The Agency is inhabited exclusively by hill tribes who have only recently been integrated with the rest of India. The main tribes are: Monas, Sherdukpen, Akas, Apatanis, Daflas, Lamas, Hill Murs, Mhilyones, Lachons, Gallois, Mendas, Umlaths, Rums, Bokaro, Boris, Melours, Simphos, Kharapls, Wancho, Noksas and seven tribes of Nagas: Konyaks, Phoms, Chaks, Sanglams, Semas, Yimchungs and Khimungs.

Before Independence the area was practically unadministered. Since August 15, 1947, considerable attention is being devoted to it and it is now administered by the Ministry of External Affairs, with the Governor of Assam acting as the Agent of the President of India under the provisions of the Sixth Schedule of the Constitution. The Governor is assisted by an Adviser. The N.E.F.A. is completely separate from Assam administratively.

The Agency Secretariat is situated in Shillong capital of Assam.

Divisions in the Agency with headquarters in brackets: Kameng Frontier Division (Bomdila); Subansiri Frontier Division (Ziro); Sang Frontier Division (Along); Lohit Frontier Division (Tezpur); Thap Frontier Division (Khela).

Each Division is under the charge of a Political Officer. The Sub-divisions are entrusted to Assistant Political Officers who have under them three Superintendents and are Superintendents. The system of administration has been organised on a single line. At the Secretariat in Shillong the heads of various departments are organised and in the Divisions, the Political Officers are assisted by all the technical departments. Senior officers of the Agency are drawn from a newly created special cadre—Indian Frontier Administrative Service.

GEOGRAPHY

The North-East Frontier Agency is a wild mountainous country and presents a remarkable geographical variety. The northern regions, bounded by the Himalayas are perennially snow-bound. On the east, the hill ranges bordering on Burma stand as formidable slopes. Near Assam State Areas the Agency has some plains.

The entire area is intersected by rivers, numbering about 50, including the Dihang, continuation of the Tsangpo of Tibet, which emerges in Assam as the mighty Brahmaputra. About 15,000 sq. miles of the total area, are estimated to be covered by forests.

The fauna and flora are very rich. Wild elephants, buffaloes, tigers and various kinds of deer are found. To the people of the Agency the mithun, described as a cross between a cow and a buffalo, is most important as it serves as the standard of value and the medium of exchange.

Monsoon sets in from the month of April and continues till October. Rainfall is heavy except in the Moma-Sherdukpen area.

LANGUAGES AND DIALECTS

Just as a large variety of tribes is found in the Agency, so also a large number of distinct languages and dialects are spoken. A vast amount of research still remains to be done but broadly the following is the list. Dialect-wise, dialects of the main languages are given in brackets:

Kameng Frontier Division—Moma or Bhaloo (Moma, Dihang, Moma, Lish Moma, Mro, Akas, Khon, Sherdukpen, Dafla, Sulung, Tibetan); *Subansiri Frontier Division*—Dafla, Apatani, Hill Murs, Miker, *Sang Frontier Division*—Ahi (Chang, Moya, Gallois, Bor, Bokar, Korko, Simon, Dihang of Gomti, Bando, Puhbar, Ramo, Panggi, Tangam, Pulum, Mnyong, Pasir, Menda); *Lohit Frontier Division*—Kharapls, Diga, Loh (Baboya, Loh, Myn, Sangphos, Kharapls); *Thap Frontier Division*—Pan-sha (Achi, Lakkhak, Lunkhang, Moshang, Hux), Luma, Lomphi, Ponthai, Rundu, Munglam, Noksas (Bordima, Sadas, Wancho).

A very few of these languages have a script and it is one of the objectives of the Agency Administration in the sphere of education, to provide the people with a medium for writing their languages.

EDUCATION

Education in the Agency is of the Basic type. Some of the schools have already been converted into the Basic pattern and the rest are in the process of conversion.

The emphasis is laid on instruction in crafts and agriculture. Attached to every school is an agricultural garden where seasonal vegetables are grown by the students through improved methods. Different crafts like carpentry, weaving, cane and bamboo work and soap-making are also practised. The products of these activities may be utilised by the students either for their own use or sold by them for economic gain.

Up to the Primary stage, the mother tongue of the students is sought to be made the medium of instruction in schools, after which Hindi takes the place up to the Xth Class. Assamese is introduced as a compulsory second language from Class VI. Assamese will, however, be retained as the medium of instruction for those students who are using it at present and the switchover to Hindi will be gradual.

The task of preparing text-books in tribal languages is being given great importance. Thirty-four text books for Grade I have been translated into 13 tribal languages and books for Grades II and III are under preparation. A Philological Section in Shillong looks after the accuracy of the translations.

In 1947, when the Department of Education was set up, there were only two Lower Primary Schools in the entire Agency. At the end of 1956-57 the situation was:

Number of institutions: Lower Primary—10; Middle English—14; High English—3; Total—27.

Number of students: Lower Primary—4,234; Middle English—908; High English—181; Total—5,323.

Number of teachers: Lower Primary—277; Middle English—72; High English—35; Total—384.

Amount spent on education: Rs. 5,00,000 (1956-57).

A Basic Education Training Institute at Marchanta runs residential courses for the teachers.

1956-57.

Senior Basic Teachers—28; Junior Basic Teachers—28; Hindi Teachers—10; Number of teachers—66.

COTTAGE INDUSTRIES

The people of the Agency have a great tradition of artists and cultural skill. The Administrators are assisting them to develop their capacities and to improve their standard of living by a better technique.

Cottage Industries Training and Production centres have been opened at 13 places to impart training in weaving, spinning, knitting, carpentry, carpentry, wood-carving, cane and bamboo work, smithy and pottery. Rearing of silk and end is demonstrated at sericultural farms at three centres.

Till the end of 1956-57, 906 persons were trained in different crafts and 345 more were under training at the beginning of the next financial year. About 100 instructors impart training in crafts and agriculture. Expenditure during 1956-57: Rs. 5,25,073.

PUBLIC HEALTH

1956-57 :

Main types of disease with number of patients treated within brackets :

Malaria (51,412); Diarrhoea and dysentery (20,741); Goltre (13,450); Venereal disease (2,847).

Number of Hospitals: 30; Number of beds: 561; Number of Leprosy colonies: 3; Number of leprosy patients treated: 191; Number of dispensaries: 36; Number of doctors: 87; Number of Nurses: 15; Number of out-door patients treated: 3,28,270; Number of indoor patients treated: 5,232.

Two B.C.G. teams toured Pasighat area of the Slang Frontier Division of the Agency covering a population of 5,503. The campaign will be carried on until the whole of the Agency is covered.

A Health Training and Research Centre has been started to train rural health workers drawn from the villages.

Expenditure in 1956-57: Rs. 21,06,850.

AGRICULTURE

Agriculture is the mainstay of the people of the Agency. Generally, the *jhum* system is followed as in the hills of Assam and the yield is not enough to meet the requirements.

A radical change from *jhumming* to permanent cultivation is not considered possible in the difficult terrain of the Agency and the objective of the Agriculture Department of N.E.F.A. is to introduce permanent cultivation wherever possible and simultaneously to improve *jhumming* on scientific lines.

Since independence, over 23,500 acres of land have been developed for permanent cultivation and 10,000 acres more are proposed to be so developed during the Second Five-year Plan period.

No data are yet available on the total area under cultivation or on the nature and quantity of crop produced.

State help towards agriculturists consists of:

(i) Subsidy towards land reclamation, minor irrigation, purchase of tools, purchase of seeds, purchase of plough bullock, agricultural education and training and purchase of improved cattle, pigs and poultry;

(ii) Technical advice and guidance along with free services with necessary equipment for plant protection, organisation of marketing facilities, organisation of exhibitions, organisation of conducted tours, organisation of crop competitions, organisation of demonstration of improved crops, veterinary aid and livestock upgrading.

LAND TENURE

There is no regular land tenure system in N.E.F.A. as in other settled areas. Each tribe has its own customary system, giving individual as well as joint right on the land as under the jurisdiction of each village. Land belonging to each village is controlled by village elders organised in institutions similar to *panchayats* and they are guided by the old customs which vary greatly from place to place.

As no regular survey has yet been undertaken a detailed description is not available.

COMMUNITY PROJECTS

Community Development and National Extension Service Blocks in the Agency cover 1,200 sq. miles with a total population of 80,454. A special N.E.F.A. type block has been evolved by the Administration with the approval of the Ministry to meet the specific needs of the people with less expenditure. The main emphasis is laid, on self-sufficiency in food, better roads, water supply and sanitation.

COMMUNICATIONS

The difficulty of communications in the densely forested mountainous terrain is one of the major problems in the Agency. The highest

priority is assigned to communications so that easy contact may be established with every part of the territory.

The total mileage of roads, paths and tracks in the Agency on March 31, 1957:

Roads: 533 miles; Bridle Paths: 267 miles; Mule Paths: 297 miles; Porter Tracks: 2,671 miles; Total: 3,768 miles.

On March 31, 1957, seven airfields and three light plane strips were in commission and plans were in hand for five more airfields and two more airstrips. For the development of the interior, carriage of mail and cash and the evacuation of casualties the Administration depends greatly on light aircraft while bigger planes are used for landing or dropping supplies all over the Agency.

A wireless network has been set up to provide quick connection among the various administrative centres and outposts.

POWER DEVELOPMENT

A provision of Rs. 13,00,000 has been made in the Second Five-Year Plan for the development of power in the Agency. Of this amount, Rs. 11,00,000 is for providing diesel generating sets at 15 places for supply of electricity and Rs. 2,00,000 for survey of hydro-electric schemes.

SUPPLY

Air supply in the interior areas of N.E.F.A. commenced in January 1951. The Indian Air Force and chartered companies fly regular sorties to land or air-drop supplies. The total tonnage air-lifted during the calendar year 1956 was 6,881 tons. Up to October 31, 1957, the total tonnage airlifted was 7,360 tons.

Under a State Trading Scheme all ration and stores for the Agency Service Corps and for sale to the people, are procured centrally at Jorhat, N.E.F.A.'s air base and supplied by air to the interior.

BIHAR STATE

Area : 67,164 sq. miles.*

Total Population : 38,779,562.*

Capital : Patna.

See note on the Bihar and West Bengal (Transfer of Territories) Act, 1956, on page 359.

Administrative Divisions :—Patna, Bhagalpur, Tirhut and Chota Nagpur.

Districts with names of District Headquarters in brackets in each Division :

Patna Division : Patna (Patna) ; Gaya (Gaya) ; Shahabad (Arrah).

Tirhut Division : Muzaffarpur (Muzaffarpur) ; Saran (Chhapra) ; Champaran (Motihari) ; Darbhanga (Laheriasarai).

Bhagalpur Division : Bhagalpur (Bhagalpur) ; Monghyr (Monghyr) ; Purnea (Purnea) ; Santal Parganas (Dumka) ; Saharsa (Saharsa).

Chota Nagpur Division : Ranchi (Ranchi) ; Hazaribagh (Hazaribagh) ; Palamau (Daltonganj) ; Singhbhum (Chaibassa) ; Dhanbad (Dhanbad).

Number of Districts : 17 ; Number of District Boards : 17 ; Number of Municipalities (including Patna Municipal Corporation) : 49.

Number of Notified Area Committees : 27 ; Number of Panchayats : 7,112 (1957). Names of towns with a population of over 50,000 : Patna, Monghyr, Jauharipur, Muzaffarpur, Gaya, Chhapra, Bhagalpur, Arrah, Ranchi and Darbhanga.

Number of towns 112 ; number of villages about 65,000.

(For names, area and population of taluks see under the heading Population.)

GEOGRAPHY

Bihar lies between 20°30' and 27°30' N. latitude and between 82°31' and 88°26' E. longitude and includes the former States of Sarsikella and Kharasawan. It is bounded on the north by Nepal and the Darjeeling District of West Bengal ; on the east by West Bengal ; on the south by the State of Orissa ; and on the west by Uttar Pradesh and Madhya Pradesh.

The area of the territories which constitute the Government of Bihar is 67,164 square miles. The State comprises the plateau-land of Chota Nagpur and the valley of the Ganges from the spot where it issues from the territories of the Governor of Uttar Pradesh till it enters West Bengal near Rajmahal. Following the main geographical lines, there are four Civil Divisions with headquarters at Patna, Muzaffarpur, Bhagalpur and Ranchi. The headquarters of the Government are at Patna. The new capital which lies between the Military Cantonment of Dinapore and the old civil station of Patna is known as "Patna," the old town being called "Patna City."

Bihar is more thickly populated than Germany. Hindus form an overwhelming majority of the population. Though Muslims form about one-fifth of the total population they constitute more than one-fifth of the urban population of the State. Animists account for 6 per cent. There are inhabitants of the Chota Nagpur plateau and the Santal Parganas, the latter being a continuation of the plateau in a north-easterly direction.

Although there is a great deal of mineral wealth in Chota Nagpur and important industries are developing in connection with it, still the bulk of the population of the State is agriculture continues to be the basic occupation. Over 80 per cent of the population depends wholly on agriculture, while only 7-8 per cent depends on industries.

The soil throughout the whole of that portion of the Indo-Gangetic plain lying within the State boundaries is extremely fertile, particularly in North Bihar, in parts of which the density of the population is more than 900 people to the square mile. The State occupies a transitional position between the Ganges delta with its damp climate so suitable for the paddy crop and the States to the north and west where large irrigation schemes have had to be provided to enable the soil to produce its bounty. As in the delta of the Ganges, rice is by far the most important crop as it occupies normally an area of approximately 12 million acres or over 50 per cent of the net cropped area of the State. As canal irrigation is available only in the Bone Valley and to a moderate extent in Champaran District, the importance of the south-west monsoon to the State of Bihar cannot be overestimated.

In addition to the rice crop, however, other grain crops are grown on a tolerably large scale. Of the monsoon cereals, maize, wheat and barley are extensively grown. The cultivation of oilseeds like castor, mustard and linseed forms a large and important part of the agriculture of Bihar.

After Uttar Pradesh, Bihar is the most important white sugar area in India, some 23 per cent of the total production of white sugar in the country being turned out in Bihar factories.

Jute has been an important crop and is confined almost entirely to the Purnea District part of which has gone to West Bengal after reorganization.

Tobacco is a crop of increasing importance in the State and one which is likely to expand in importance.

A State Finance Corporation was set up on December 6, 1954, with an authorized capital of Rs. 2 crores.

LARGE-SCALE INDUSTRY

The large-scale industries are :

Iron and Steel, Aluminium, Lead, Foundry, General and electrical engineering, Bicycles, Tanning, Leather goods and foot-wear making, Sulphate of ammonia, Hume pipe and R.C.C. products, Asbestos products, Glass and glass-ware, Ceramics, Cement, Heavy chemicals, Woolen textiles, Cotton textiles, Jute textiles, Silk and Art silk, Tobacco, Distilleries, Bezol, Sugar, Food Industries, Roller flour mills, Mica and Shells.

The number of registered factories in Bihar in 1956 : 4,575.

The number of factories worked in 1955 was 4,081, and the average daily number of workers engaged in these factories was 1,71,954. The number of women workers engaged in all the factories in 1955 was 10,153.

The figures below are for 1953 unless otherwise stated :

Iron and steel (1954) : (4 ; 37,096) ; Copper (1 ; 1,701) ; Aluminium (1 ; 330) ; Lead (1 ; 233) ; Sugar (29 ; 21,881) ; Cement (6 ; 4,231) ; Refractories (8 ; 6,200) ; Mica (137 ; 11,608) ; Bldl (327 ; 18,153) ; Glass (2 ; 1,388) ; Coke ovens (6 ; 1,674) ; Jute mills (3 ; 5,839) ; Cotton mills (2 ; 1,365) ; Woollen mills (1 ; 692) ; Cigarettes (1 ; 2,540) ; Pulp and paper (1 ; 1,218) ; Shoe (1 ; 682) ; Tannery (1 ; 290) ; Slidri (1 ; 6,520) ; Rice mills (348 ; 6,074) ; Oil mills (317 ; 2,790) ; Shellac (94 ; 3,407).

COTTAGE INDUSTRIES

The main cottage industries in the State :

(A) Textile industries : 1) Cotton Weaving, 2) Hand spinning and khadi industries, 3) Sericulture, 4) Mulberry silk, 5) Eri Silk, 6) Tassar

Silk, 4) Wool sheaving, spinning and weaving, 5) Dyeing and printing, 6) Tailoring, embroidery and Zardosi, 7) Twine and rope making.

(B) Wood working industries : 1) Sewing, 2) Village Carpentry, 3) Furniture making, 4) Bamboo work and Basketry, 5) Palm leaves products, 6) Handmade paper making, 7) Charcoal burning, 8) Manufacture of toys, comb-futes, drums, hookas, lathis, etc.

(C) Metal industries : 1) Village Smithy, 2) Cutlery, 3) Manufacture of trunks, etc., 4) Brass and bell metal work, 5) Gold and Silver smithy.

(D) Leather and allied industries : 1) Tanning, 2) Foot-wear and leather goods making, 3) Manufacture of manure from dead animal, 4) Mother of Pearl button making.

(E) Ceramics Industries : 1) Village pottery, 2) Brick making, 3) Manufacture of stoneware and porcelain articles, 4) Lime.

(F) Chemical Industries : 1) Shellac manufacture, 2) Extraction of saltpetre, 3) Soap making, 4) Kath making, 5) Miscellaneous chemical industry.

(G) Miscellaneous cottage industries.

MINERALS (1954)

Chief Minerals	Quantity
Iron ore	1,919,974 tons
Coal	19,421,618 "
Mica	21,440 cwt.
Manganese	49,465 tons
Kyanite	11,456 "
Asbestos	3,092 cwt.
Copper ore	353,054 tons
Chromite	1,391 "
Steatite	152,154 cwt.
Slate	156 tons
Limestone	1,290,428 "
Igneous rocks	319,979 "
Fireclay	36,007 "
China clay	44,392 "
Silica	11,739 "
Bauxite	41,777 "

The distribution of the minerals is as follows : Coal in Jharia, Bokaro, Kurnapura, parts of Ranganj ; Iron ore in Noamundi, Gua, Buda Bunde in Singhbhum District ; mica in a 90-mile long and 20-mile broad belt extending from Gaya District through Hazaribagh to Monghyr and Bhagalpur Districts ; copper at Rakha, Mosaboni, Dhobani and Radia in Singhbhum ; bauxite at Pakripat, Serendag in Ranchi District and at Netarhat in Palamau District ; limestone at Benjari, Rohtas, Bandia in the districts of Shahabad, Palamau, Hazaribagh and Singhbhum ; China clay in Singhbhum, Dhanbad, bhumi ; Fire clay at Bhagalpur and Santal Parganas ; Fire clay at Jharia and Daltonganj in Monghyr and Singhbhum Districts ; manganese in Singhbhum District ; kyanite at Lapsa Buru, Ghagdi, Kanyaluka in Singhbhum and Dhanbad Districts ; steatite at Belaipahar, Digha, Bhilardari and Narda in Singhbhum District and Pukhukata in Dhanbad District ; chromite near Chaibasa ; pyrites in Shahabad District ; graphite in Palamau and Chota Nagpur ; apatite at Nandup, Pathargara, Badia, Sunrui in Singhbhum District ; antimony at Hisuta in Hazaribagh District ; asbestos at Barhans and Saranghori in Sarsikella State and in Monghyr District ; ochre in Singhbhum District and in Rajmahal hills in Santal Parganas ; tungsten at Tatanagar ; uranium deposits have also been located in Bihar.

* After the transfer of territory to W. Bengal in the course of reorganization. The figures under Population are from the 1951 census.

Workers employed in mines in 1955: Iron ores—13,851; Coal—179,826; Mica—16,923; Kyanite—2,523; Manganese—1,220; Chromite—185; Copper ore—4,114; Asbestos—352; Limestone—6,566; China clay—2,512; Stone (igneous rock)—2,151; Fire clay—270; Bauxite—483.

AGRICULTURE

Area and Production before transfer of territories

The following statement shows the figures of out-turn of principal crops obtained by crop cutting experiment and eye-estimation during 1954-55 (in thousand tons):—

Paddy (autumn and winter) 3,920; Wheat 425; Gram 263; Barley 189; Maize 388; Masoor 57; Arhar 97; Khesari 268; Peas 42; Sugarcane 2,175; Potato 222; Tobacco 8; Jute 373; Chillies 18; Rice 2,613.

The following figures show areas under principal crops in 1954-55 (in thousand acres):—

Rice 12,091; Wheat 1,595; Gram 1,384; Barley 898; Maize 1,775; Masoor 339; Arhar 469; Khesari 1,317; Peas 203; Sugarcane 326; Tobacco 28; Potatoes 99; Jute 266; Chillies 52; Marua 373.

Area and Production after the transfer of territories

	Area (in thousand acres).	Production (in thousand tons unless otherwise stated).
Rice ..	1,22.09	25.53
Wheat ..	14.44	4.12
Pulses ..	55.03	9.69
Sugarcane ..	3.79	4.95 (in terms of raw sugar of gur).
Cotton ..	11	2 (in thousand bales of 392 lbs. each of cotton).
Jute ..	2.70	5.83 (in thousand bales of 400 lbs. each).

There are about 4 lakh cane-growers in Champaran, Saran, Darbhanga and Muzaffarpur. Tobacco is grown in Muzaffarpur, Monghyr, Purnea, Darbhanga; and jute in Purnea part of which has gone to West Bengal after reorganization.

Variety of fish produced (inland): Carg, Cat-fishes, feather backs, Murrells and miscellaneous.

Estimated production of fish: 10 lakh maunds valued at Rs. 7 crores approximately.

Estimated fishing population: 22 lakhs.

FORESTS (1955-56)

Total forest area: 13,652 square miles. Types of forests: Mainly sal.

Total revenue from forests for 1956-57: Rs. 98,80,000 and total expenditure: Rs. 1,07,60,000 (including Rs. 43.37 lakhs under the Second Plan).

The following is the latest information available in 1956-57:

Main forest produce	Quantity
Timber	3,248,000 c.ft.
Fuel	4,036,000
Bamboo	0,173,000 Nos.
Mahala grass	22,265 mds.

Three afforestation divisions have been functioning in the State since 1951. An area of 5,659 acres was afforested upto 1956-57.

Livestock: The distribution of livestock and poultry in Bihar after the transfer of territories and according to the 1956 livestock census is as follows: The figures are provisional. - Total number of Cattle: 14,331,000; Cows 6,859,900 (1953-54); buffaloes 33,87,000; working bullocks (cattle over 3 years) 6,500,000 (1953-54); bullocks (buffaloes) over three years 600,000 (1953-54); horses and ponies 600,000 (1953-54); sheep 900,000; goats 64,22,000; donkeys 40,000 (1953-54); mules 2,000 (1953-54); camels 1,000 (1953-54); pigs 700,000 (1953-54).

Poultry (1953-54): Hens 2,100,000; cocks 1,600,000; chickens 4,000,000; ducks 200,000; drakes 100,000; duckings 200,000. Poultry (1956): 86,90,000.

TRANSPORT (1955-56)

Total mileage of roads: 7,941 miles; metalled roads: 5,378 miles; unmetalled roads: 2,563 miles.

Total mileage of waterways: Length open to navigation: 900 miles.

Transport is nationalized in Serakella, Jamshedpur, Patna District, Gaya District and on Patna-Ranchi trunk road and Monghyr-Bhalupur road. The number of routes increased from 86 in 1956 to 93 in 1957 and the route mileage from 2,854 to 3,211. The total mileage covered increased from 64,79,221 in 1955-56 to 91,10,714 in 1956-57. The total number of passengers increased from 2,25,94,133 in 1955-56 to 2,43,59,176 in 1956-57.

After nationalisation, only the third class fare was increased by 25 per cent.

A five-year plan has been drawn up by the Government for expanding nationalised transport.

A proposal to form a corporation for a more flexible, dynamic and co-ordinated system, is under the active consideration of the Government. The two participants in the Corporation will be the Government with 75 per cent share and the Railway with 25 per cent share.

TRADE

Statement showing exports and imports during 1955-56. The first three items in numbers, rest in maunds.

Article.	Exports.	Imports.
Horses, ponies, mules	131	200
Cattle (excluding sheep and goats) ..	71,151	60,447
Sheep and goats ..	132,196	3,279
Bones	523,395	1,081
Cement	11,832,457	1,514,331
Coal and coke ..	2,88,413,257	36,289,828
Cotton twist and yarn	5,814	129,024
Cotton piecegoods ..	11,828	778,089
Dyes and tans ..	16,527	1,770
Fruits dried ..	21,116	81,816
Glass	202,300	94,371
Malze	21,396	1,016,712
Jawar and Bajra ..	37,790	371,485
Hemp, Indian and others	36,817	2,907
Hides	342,710	26,900
Skin	29,440	715
Hides and skins (tanned) and leather	19,796	9,705
Jute (loose)	149,668	9,636
Jute (Pucca bales) ..	4,364,282	1,756
Gunny bags and cloths	725,676	332,886
Iron and steel bars, sheets, girders ..	14,381,454	4,168,419
Lac and shellac	66,663	40,150
Manganese ore	1,815,363	8,149
Oil cakes	624,473	700,870
Kerosene oil	136,444	2,870,621
Vegetable oil	—	—
Coconut oil	14,908	90,091
Castor oil	18,158	8,149
Groundnut	48,322	267,419
Salt	112,081	576,624
Sugar	2,556,213	1,271,671
Gur	616,331	738,987
Tea	12,186	41,801
Tobacco (raw)	298,899	106,797
Wood and timber ..	20,026	46,068

IRRIGATION (1955-56)

Area irrigated by Government irrigation works: 952,275 acres; private canals: 757,696; tanks: 1,203,075 (1953-54); wells: 559,653; other sources: 1,420,247; tube-wells: 68,000 (1953-54).

The larger irrigation works are Sone Canal covering Shahabad, Patna and part of Gaya District; Tribeni Canal, Dhaka Canal and Teer Canal covering Champaran; and Sakri Canal covering Gaya, Patna and Monghyr Districts.

During the First Five-Year Plan period (up to March 1956), 4,953 minor irrigation works, 16,545 surface wells, 7,082 open borings and 406 medium irrigation works and 116 tube-wells were completed by the Agriculture Department in connection with the Grow More Food Scheme. In addition, 3,564 Bahaat pumps were also sold. Besides about 13,586 tons of phosphate fertilizers, including bone meals, 67,355 tons of Ammonium sulphate and 311,000 tons of town compost, 65 lakh tons of rural compost and 1,540 maunds of green manure seeds were supplied to farmers during the First Five-Year Plan period. Improved seeds of potato and other crops were also distributed. During the year

1955-56, 3,742 minor irrigation schemes were completed by the Revenue Department. The total number of such schemes executed during the period 1948-49 to 1955-56 (December) is 46,470 benefiting an area of 913,020 acres.

As regards major and medium irrigation projects, 8 irrigation schemes, 29 drainage schemes, 13 flood protection schemes and seven river training schemes have been completed in North Bihar during the First Five-Year Plan period at a total cost of Rs. 2 crores 20 lakhs. The total area benefited by these schemes comes to about 8 lakh acres. Further 66 more schemes, consisting of 5 irrigation, 33 flood control, 26 drainage and 3 river training schemes are either in progress or proposed to be taken up shortly at a total estimated cost of Rs. 11 crores. An area of 11 lakh acres is likely to be benefited by these schemes.

In South Bihar 61 irrigation schemes were completed during the First Plan period up to 31st March 1956. The Mayurakshi left bank works have been completed at a cost of Rs. 81 lakhs, and it is likely to benefit an area of 20,000 acres of land during Kharif and 5,000

acres during rabi season. 450 tube-wells have been sunk in reserve areas of sugar factories and in Community Project areas of North Bihar. In South Bihar 499 tube-wells have been sunk under various schemes.

In all the additional area, which were assumed of irrigation by the First Five-Year Plan Schemes, were about 10 lakh acres. In addition, nearly 14 lakh acres were benefited by flood control measures.

There are 32 schemes for implementation during the Second Plan period including the Kosi Project. Of these 14 are new and the rest are spill-over from the First Plan period. The spill-over schemes and five of the new schemes were under execution during 1956-57. The work done in respect of these schemes during 1956-57 provided additional irrigation facilities to 21 lakh acres.

The total number of minor irrigation schemes completed upto 1956-57 was 46,470 at a total cost of Rs. 909.38 lakhs benefiting an area of 10,11,860 acres.

Irrigation Projects

Name of Project.	District/Area benefited.	Date begun.	Date for completion.	Total Cost (Rs. in Lakhs.)	Development Expenditure - Five Years 1951-56 (Rs. in Lakhs)	Area to be irrigated on completion in '000 acres.
300 tube-wells in North Bihar	Champan, Muzaffarpur, Darbhanga and Saran	1950-51	1955-56	1.83	1.74	120
Tube-wells in South Bihar	Shahabad and Patna	1946-47	1.48	85	114
Drainage of chaura and other small irrigation and flood protection schemes	Patna, Gaya, Shahabad, South Monghyr, Bhagalpur and Santhal Parganas	1948-49	3.75	1.18	115
Sakri (Lower Valley) Scheme	Monghyr and Gaya	1948-49	35	10	50
Tribeni canal extensions	Champan	1950-51	1955-56	24	23	25
Emergency pumping schemes	Entire State	1951-52	1955-56	93	93	90
Further 300 tube-wells in sugar factory areas	North Bihar	1953-54	1955-56	1.81	1.61	120
Sakri (Upper Valley) Irrigation	Gaya	1952-53	1957-58	93	53	60
Further 200 tube-wells in South Bihar	Gaya, Patna, Shahabad, North Bhagalpur and North Monghyr	1952-53	1955-56	98	98	80
Irrigation dams and weirs in hilly districts	Chota Nagpur and Santhal Parganas	1951-52	2.00	1.58	75
TOTAL				14.14	9.78	852

Power Projects

Project	Area	Date begun	Date for Completion	Five-Year Cost (Rs. in lakhs)	Plan Target (kW)
P.B.R.E.B. scheme in emergency tube-wells irrigation scheme (electrical)	Patna-Barh, Bhaktiarpur, Ekargasara, Bihra	1949-50	1955-56	70.43	2,700
Dehri-Sasaram lift irrigation and electrification scheme	Dehri-Sasaram and the neighbourhood	1949-50	1955-56	41.51	1,700
Gaya electric supply scheme	Gaya and the neighbourhood	1949-50	1955-56	83.21	1,500
Hazariabagh electric supply scheme	Hazariabagh and the neighbourhood	1950-51	1955-56	21.23	800
Kolarina and Mica mines electrification scheme	Kolarina and neighbouring mica mines and villages.	1950-51	1955-56	47.92	3,000
Coal mines area electrification scheme	Coal mines area	1951-52	1955-56	15.50	6,750
Taking over of derelict electric supply undertakings	Sahelganj, Muzaffarpur, Monghyr and Darbhanga	1952-53	1955-56	3.64	3,150
Girdih electric supply scheme	Girdih township and neighbourhood	1950-51	1955-56	14.6	700
Girdih-Madhopur-Jasidih electric supply	Girdih - Madhopur - Jasidih and Deogarh	1952-53	1955-56	34.21	1,150
North Bihar tube-well and electrification scheme	Northern areas of Bihar State	1950-51	1955-56	198.98	4,050
Buxar tube-well and electrification scheme	Buxar and the neighbouring areas	1952-53	1955-56	20.40	525
TOTAL				707.57	23,475

The total connected load of electric energy in 1954 was about 82,000 kW.

The following is a list of Adjustment Schemes under Power Projects, showing the cost within brackets: Electrification of the towns of Katihar, Purnea and en route villages (Rs. 7.68 lakhs); Electrification of Kishanganj town and neighbouring areas (Rs. 4.00 lakhs); Electrification of Saharsa, Madhepura towns and en route villages (Rs. 4.14 lakhs); Loan to Muzaffarpur licensees (Rs. 10 lakhs); Electrification of Raiganj, Sitamarhi, Buxar and en route villages (Rs. 17.00 lakhs); Utilization of D.V.C. Powers for supply to Aurangabad, Delhi, Bahua and Buxar areas (Rs. 80.84 lakhs); Utilization of D.V.C. Power for supply to Gaya-Patna area (Rs. 76.08 lakhs); Coal mines area electrification (Rs. 16.76 lakhs); Electrification of Rini, Chakradharpur and rural areas in Singhbhum District (Rs. 55.00 lakhs); Electrification of Dumka and adjoining areas (Rs. 6.30 lakhs); Electrification of Jamarpur, Monghyr, Bhagalpur, Sahelganj and adjoining areas (Rs. 14.22 lakhs); Loan to Bhagalpur Electric Supply Co. (Rs. 3.00

lakhs); T.C.A. Schemes 1952 (Rs. 131.06 lakhs); T.C.A. Schemes 1953 (Rs. 6.25 lakhs); T.C.A. Schemes related to the execution of tube-well schemes to cover 385 tube-wells distributed both in South and North Bihar areas.

Electrification scheme as in 1955-56: Large-scale rural electrification works have already been carried out throughout the State. In South Bihar and Chota Nagpur power availed from D.V.C. and various other sources is distributed over an extensive area. In North Bihar, seven diesel generating stations have been commissioned and four more are under erection with a wide net-work of distribution lines round each. A net-work of 3,000 miles of H.T. and L.T. transmission and distribution lines with 1,500 transformer stations for town and village electrification have been erected. 300 villages have been electrified and power is available in another 1,000 villages for working the tube wells and surface wells.

Area of land reclaimed from 1947-48 to 1953-54 was 2,25,596.55 acres.

LAND TENURE

The land tenure system in Bihar is governed by the following Tenancy Acts: The Bihar Tenancy Act, 1955; The Chota Nagpur Tenancy Act, 1908 and the Santal Parganas Tenancy (Supplementary Provisions) Act, 1949. The above Acts protect all types of raiyats against eviction and ensure special privileges to scheduled castes and scheduled tribes against alienation.

The raiyats are classified as raiyats at fixed rents or rates and occupancy raiyats. A very small area is held by non-occupancy raiyats who have no permanent and heritable interest in their holdings. There is also a small number under raiyats having occupancy rights holding of lands both under raiyats at fixed rents and under occupancy raiyats.

The Government of Bihar enacted the Bihar Land Reforms Act, 1950 which provides for the liquidation of Zamindari system in the State.

The Bihar Land Reforms Act, 1950 was put into force with effect from 25th September 1950,

and now all intermediary interests have been acquired by the Government. The Zamindari system in Bihar now stands completely abolished.

It is estimated that now the State would derive a land revenue of Rs. 16 crores per annum which may ultimately increase to Rs. 18 crores.

The Government has laid down a sliding scale for the assessment of compensation. Where the net income does not exceed Rs. 500, the compensation payable is twenty times the net income, and where the net income computed exceeds Rs. 1,00,000 it is payable at three times the amount.

The total compensation is estimated at Rs. 158.24 crores. Provision has been made for the payment of an interim compensation.

The assessment of compensation for mines and minerals has either to be fixed by agreement or by a tribunal appointed for the purpose.

As for funds to finance compensation, the proposal for Zamindari abolition in Bihar has been drawn up as a self-liquidating scheme. So all the compensation money will be realised from the beneficiaries. The gross rental in the State is estimated at about Rs. 16 crores per annum which is likely to increase at the rate of Rs. 5 lakhs per year as a result of reclamation of waste lands, their development and of the development of forests. It is estimated that during the first eleven months the State may be faced with a deficit.

The amount of compensation will be paid in cash or in bonds or partly in cash and partly in bonds. The bonds will be either negotiable or non-negotiable and non-transferable, and will be payable in forty equal instalments; and carry interest at two and a half per cent per annum with effect from the date of issue.

The total income from the Zamindaris taken over upto 31st March 1954, was Rs. 2,48,52,943.

The maximum rent that a tenant has to pay to the landlord, has been fixed at 35 per cent of the gross produce. The tenant in Bihar has the option to pay rent in cash or kind.

Official statistics show that agricultural production has increased because of the new systems of tenure, the increase being estimated at 722,000 tons at the end of the First Plan. As regards the question of land ceilings an official Bill has been stalled at the select committee stage for the last two years owing to the opposition of owners holding between 100 and 1,000 acres.

Consolidation.—As for the fragmentation of holdings, some consolidation is being done in pilot projects, involving 150,000 acres. The final picture is yet to emerge.

The Government has allotted 38,100 acres of waste land to 59,000 families belonging to the Scheduled Caste, Scheduled Tribes and backward communities. The Government also provides financial and technical resources to these families.

The Bhoomda movement has received considerable response in Bihar. To date, more than 2,100,000 acres have been given away. Of these, 229,000 acres have been distributed and 117,562 landless families settled. The Government has confirmed 24,563 *dan puras* under the Bhoomda Act. Bhoomda workers have been carrying out pilot projects for the resettlement of landless agricultural workers and organising distribution in one tona of every district. But it is learnt that 40 per cent of the land made over to landless families remains fallow because they have not the means to cultivate it.

On account of the worst drought in the State in 1957 a shortage of 325,000 tons in yields that would ordinarily have been harvested between December and March, was anticipated in 1957-58 and it was estimated that the paddy crop would be a mere 35 per cent of the year's average.

Paran, Palaman and Pahanara have been the hardest hit. As much as 85 per cent. of the crops in these areas has been written off. In Purnea, Hazarilagh, Darbhanga and Panchal Parganas, the losses are placed as high as 70 per cent. while

as much as 60 per cent. are given up as a total loss in Champaran, Singhbhum and Ranchi.

Sahabad, which is irrigated by one of the oldest canals in eastern India, suffered the least. The loss of crops is estimated at 35 per cent. there.

The State Government and millions of peasants did their best in saving as much of the standing crop as they could with the limited sources of irrigation available to them. Pumps, canals and tubewells were worked to capacity and every ounce of water available near the fields was diverted to save the paddy crop.

The Government had collected seeds for the spring crop and provided cash to the peasants who were unable to buy seeds without Government aid.

The estimated loss in yield was a net 19 per cent., autumn paddy 53 per cent., other autumn crops 32 per cent. and main winter paddy 60 per cent. The total deficit in food grains was thus officially estimated at 8,500,000 maunds between December 1957 and March 1958—that is, till the next spring crop.

CO-OPERATION (1954-57)

Number of Co-operative Societies (as in May 1957): 32,010; Membership: 814,800; Working capital: Rs. 11,68,34,362 (1956); Share capital: Rs. 1,00,19,825; Reserve Fund: Rs. 1,21,64,249.

Types of Co-operative Societies and number of each type: Provincial and Central Banks 52 (1956); other Central Societies 70; total Central Societies 131; Primary Credit Societies with limited liabilities 17; Primary Credit Societies with unlimited liabilities 2,135; multipurpose (1957): 12,173 (registered); 2,979 (converted); Weavers' Co-operative Societies (1957): 341 and 70 sales emporia; Vishwakarma 42 (1957); oilmen's 201 (1957); vegetable growers 82 (1957); fishermen's 63 (1957); primary stores 322; teachers' stores 259; Harijan Co-operative Societies 49 (1957); Cane Marketing unions 71 (1957); Cane Growers' Co-operative Societies 4,057 (1957); Milk Societies: 15 (1957); Industrial Societies other than Vishwakarma Industrial Societies: 19 (1957); Ghee Producers' Societies: 7 (1957); Palm Gur Producers' Societies: 13 (1957); Jute Growers' Societies: 12 (1957); Bird Workers' Society: 1 (1957); other types including consumers' stores, and Teachers' Co-operative Societies: 756.

Position about multipurpose Societies is as follows: number of members 2,60,245; paid up share Capital Rs. 28,20,562; reserves Rs. 14,64,560; loans to financing banks and others Rs. 52,41,537.

Bihar State Co-operative Bank: paid up shares Rs. 44.21 lakhs, deposits Rs. 124.34 lakhs, loans from other sources Rs. 106.67 lakhs, reserves Rs. 16.84 lakhs, working capital Rs. 296.14 lakhs, loans to central banks and societies Rs. 98.30 lakhs.

Position about credit agricole: number of depots 191; Chemical fertilizers sold 21,559 tons worth Rs. 71,61,825 (1955); Oilcakes sold 46,469 mds. worth Rs. 3,71,744 (1955); Iron sold (for manufacture of agricultural implements) 1,939 tons worth Rs. 9,52,400 (1955).

Weavers Societies (1955): Number 165; value of goods produced Rs. 4,18,162; value of goods sold Rs. 6,64,748.

Consumers' Co-operative Stores, number 322. The apex organisation of all Co-operative Societies is the Bihar Co-operative Federation, the annual Government grant for which is about Rs. one lakh.

STATE HELP FOR AGRICULTURE

Loans for agriculture, 1954: Rs. 5.38 crores.

Number of experimental farms: 21.

The total number of Government veterinary hospitals in State in 1957 was 12 and the number of veterinary hospitals managed by local bodies in 1957 was 27. One veterinary hospital number 239. Number of mobile veterinary units: 10.

HEALTH SERVICES

The following particulars are for 1956:

Allopathic hospitals 201; Allopathic dispensaries 654; Beds in allopathic hospitals 7,400; Ayurvedic and Unani dispensaries 223 and 11 respectively; T.B. hospitals 4; Mental hospitals 2; Beds in T.B. hospitals 456 and in Mental hospitals 1,380.

Allopathic doctors 5,817 (1956); Nurses 754 (1955); Trained dais in urban and rural areas 43; Compounders 1,908; Ayurvedic and Unani doctors 476; Nurses 276; Compounders in Government employment 239.

Number of Medical Colleges (Allopathic) 2; Government Ayurvedic 1; Private 2; Government Unani 1.

At the end of 1953 there were 766 Hospitals and Dispensaries, out of which 119 were maintained by the State Government and 656 by District Boards.

There were 47 first class medical officers, 584 assistant surgeons, 642 sub-assistant surgeons, 525 nurses, 108 mid-wives, 206 dais.

466 beds in all were available for T.B. patients. There is one sanatorium at Itki, two at Ranchi and a T.B. Centre in Patna. The total number of B.C.G. tests and vaccinations upto March 1956 were 73,19,294 and 33,75,902 respectively.

There is a leprosarium at Brahmba near Ranchi with a provision for 75 beds.

A separate infectious diseases hospital has been opened in Patna city.

18 malarial control units each covering a population of two million are working at an estimated cost of Rs. 31 lakhs.

There are 20 epidemic doctors and 100 health assistants maintained at the headquarters in addition to 30 doctors and 210 health assistants in the districts.

150 vaccinators are working in a mass vaccination scheme to re-vaccinate the entire adult population at a cost of Rs. 16,000.

Training facilities for M.B.B.S. are available for 160 persons, for nurses 100, mid-wives 40, compounders 400, dressers 60 to 70, operation room assistants 8, dais 200, sanitary inspectors 75, health inspectors between 100 and 120.

LABOUR

Average daily number of workers in registered factories in 1956: 1,70,778; number of factories 5,337.

Number of women in seasonal factories (1953): 1,018; number of women employed in non-seasonal factories in 1953: 10,217.

The average annual earnings of factory workers was Rs. 1,423 in 1952. Daily wage of agricultural labourer, Rs. 1-3 in 1949-50.

The following particulars refer to 1953-54:

Industries in which minimum wage is fixed: Agricultural employment; Woollen carpet making and shawl making; Rice, flour, dal and oil milling; Bidi making; Lac manufactures; Road construction and building operation; Stone breaking and stone crushing; Employment in public motor transport; Tanneries and leather manufactures; Mica works; Tea plantations; Employment in local bodies.

Number of strikes: 43 (1956).

Number of lockouts: 6 (1955).

Number of man-days lost: 37,435 (1956).

Number of Disputes settled by conciliation 123 (1955).

Number of awards: 22 (1956).

Important State laws affecting industrial labour: Bihar Maternity Benefit Act, 1947; Bihar Workmen's Protection Act, 1948.

Number of registered trade unions (upto October 1957): 840.

Total membership of trade unions: 262,100 (1956).

Total amount of maternity benefits given to women workers during 1955: Rs. 82,233.

Total amount of compensation paid in 191 fatal cases in 1956: Rs. 3,60,532; in 44 non-fatal cases: Rs. 2,14,499. Compensation paid to temporary employees for injuries in 1956: Rs. 1,69,871.

Number of labour welfare centres: 31 (including six model State welfare centres) (1956-57).

Number of houses built through the Industrial Housing Scheme: 2,213, with the help of loans advanced under the Bihar Industrial Housing Scheme to the Telco (Jamshedpur), Rohas Industries Ltd. (Dalmianagar), Tata Foundry Co. Ltd. (Tatanagar), S.K.G. Sugar Ltd., Jauriya (Champanagar) and Dehri-Rohas Light Railway (Dalmianagar).

Approximate cost: a little over one crore.

TELCO: 546 houses at a cost Rs. 50 lakhs.

TISCO: 600 houses at a cost Rs. 32 lakhs.

In Sahabganj 108 two-room houses at an approximate cost of Rs. 5 lakhs were built for the workers of Dwarakadas Radhakrishna Oil Mills and Bharatiya Engineering Works Ltd. under the Government of India's Housing Scheme for which the Government advanced a loan of Rs. 5,50,000. The cost was shared between the State Government (one-third) and the Government of India (two-thirds).

Number of factories under purview of Provident Fund Scheme: 108 covering more than 80,000 employees.

Fifteen factories employing 51,510 employees were exempted as they had their own P. F. Scheme.

EDUCATION (1955-56)

On March 31, 1956 there were 29,541 primary schools with 50,000 teachers and about 17 lakhs pupils. The State Government provide free education upto class V of the primary stage. The work of converting lower primary schools into upper primary schools, continues and during 1955-56, 200 lower primary schools were upgraded to upper primary schools.

The percentage of pupils of the age-group 6-11 would be about 30 in 1956-57. Age group 11-14: 14 per cent.

There are 535 Basic schools, four pre-Basic schools, 14 post-Basic schools, 20 Senior Training schools, three Teachers' Training Colleges and 41 Junior Basic Training schools under Government Management.

There are 435 Basic schools in Community Development and N.E.S. Blocks under the Project administration. 12 post-Basic schools and 129 Basic schools are run by private agencies and they are given grant-in-aid by Government.

Four Shishuhalas (Rural Nursery schools) are also being run in Turki-Vaishali area as an experimental measure. A rural institute has also been set up to impart higher rural education at the University stage to boys who have completed the post-Basic stage.

These converted primary and basic schools would be managed directly by Government.

The number of teachers employed in High, Middle and Basic schools is about seven lakhs.

There are 900 high schools. There are seven lakh pupils in all types of secondary schools.

There is now a School Examination Board to conduct the Secondary School Examination, and also a Board of Secondary Education.

Compulsory primary education is in force in the municipal (urban) areas of 17 towns and in one rural area.

Students are taught through the medium of regional languages upto 111 class. Hindi as compulsory language begins in class IV. From class VI onwards all non-language subjects

are taught in Hindi. English as compulsory starts in class VIII.

Number of literates according to 1951 census. 12.83 per cent of the total population.

BUDGET 1958-59

Income: Rs. 1,02,65 lakhs.

Expenditure: Rs. 1,03,22 lakhs.

Deficit: Rs. 57 lakhs.

TRANSFERRED TERRITORY

The percentage of population transferred from Bihar to W. Bengal under the States re-organization scheme was 3.60.

The percentage of population transferred from Manbhum (excluding Dhanbad) to W. Bengal in relation to its original population was 75.54.

The percentage of population transferred from Purnea in relation to its original population was 10.98.

The total area and population transferred from Manbhum:

2,407 sq miles; 11,69,097

The total area and population transferred from Purnea:

759 sq. miles; 2,77,288

The total area and population transferred from Bihar:

3,166 sq. miles; 1,44,385

While practically the whole of the former Purulia sub-division was transferred in the south, in the north the following areas were transferred from Purnea Dt: Thakurganj, Chopra, Islampur, Kishanganj, Gosal Pokhar, Karandighi.

Singhbhum Dt. was reconstituted with the addition of Patamda, Chandil, Ichagarh.

Dhanbad Dt. was reconstituted with the addition of Chas and Chaudankary.

Income: Rs. 1,28,94,019. (This includes income from Government.) Recurring. Rs. 9,83,716 and non-recurring Rs. 39,05,303.

Expenditure: Rs. 1,33,67,874.

ASSOCIATIONS, INSTITUTIONS

SARVODAYA SAMAJ

(Khadigrum, Monghyr)

The Samaj is not an organization in the accepted sense of the term. After the death of Mahatma Gandhi constructive workers from all over India met in a conference in March 1948 at Sevagram in Wardha. They decided to form a voluntary brotherhood of all who believe in the ideal of truth and non-violence.

The Secretary of the Samaj is Mr. Vallabh Swami, and there is a register of those who have declared their faith in Sarvodaya.

The Samaj has, however, an executive organ, the Sarva Seva Sangh with principal Centre at Khadigrum, Monghyr.

The word 'Sarvodaya' was popularised by Mahatma Gandhi. He gave the name 'sarvodaya' to his Gujarati translation of Ruskin's 'UNTO THIS LAST'. In the preface to this book he writes: "The object of this book is to plead for the rise of all. I, therefore, gave it the name 'Sarvodaya'".

The term Sarvodaya thus stands for the good of all, and is the name given collectively to the ideas and teachings of Mahatma Gandhi.

More specifically, Sarvodaya strives towards a social order based on Truth and Non-violence, in which there will be no distinction of class or creed, no exploitation of any kind, offering full scope for the development of the individuals as well as groups.

It insists on the purity of the means as that of the ends.

For the achievement of the aim, the following programme is followed:

Communal harmony (fellowship between followers of different faiths and sects); Removal of untouchability; Abolition of class distinctions; Prohibition; Promotion of khadi and other home industries; Village sanitation; Basic Education; Equality of status and rights for both men and women; Health and hygiene; Development of provincial languages; Removal of provincialism; Propagation of Hindustani as the national language; Economic equality; Development of agriculture; Organization of labour; Welfare of aboriginals; Organization of students; Service of leprosy patients; Relief-work; Cow protection; Naturopathy.

Whoever accepts the above aim and the basic principle and endeavours to follow them is eligible for the brotherhood of the Samaj. On sending his or her name and address to the Secretary of the Sarvodaya Samaj, Khadigrum, Monghyr, Bihar, he or she will be registered as a "Sevak".

The 30th January of every year when Mahatma Gandhi passed away is observed at all places as Sarvodaya day.

On 12th February every year, fairs are organized at places where the Mahatma's ashes were immersed.

To facilitate mutual contact and exchange of views among the Sevaks Sarvodaya melas and Sammelans are held.

The deliberations of the Samaj are of an advisory nature and not mandatory in any way.

BHAGALPUR LITERARY & SCIENTIFIC INSTITUTE

Cleveland Road, Bhagalpur.

THE BIHAR CHAMBER OF COMMERCE
(Estd. 1926).

Districts: The districts given below are grouped according to the six Administrative Divisions into which the State is broken up. The district headquarters are given in brackets after the name of the District:

Ahmedabad Division (Ahmedabad): Ahmedabad (Ahmedabad), Banaskantha (Palanpur), Baroda (Baroda), Broach (Broach), Kaira (Kaira, Nadiad), Mehsana (Mehsana), Panch Mahals (Godhra), Sabarkantha (Himatnagar).

Aurangabad Division (Aurangabad): Aurangabad (Aurangabad), Bhilr (Bhilr), East Khandesh (Jalgaon), Nanded (Nanded), Osmanabad (Osmanabad), Parbhani (Parbhani).

Bombay Division (Mumbai, Bombay): Dangs (Ahwa), Greater Bombay (Bombay), Kolaba (Alibag), Nasik (Nasik), Ratnagiri (Ratnagiri), Surat (Surat), Thana (Thana), West Khandesh (Dhulia).

Nagpur Division (Nagpur): Akola (Akola), Amaravati (Amaravati), Bhandara (Bhandara), Buldana (Buldana), Chanda (Chanda), Nagpur (Nagpur), Wardha (Wardha), Yeotmal (Yeotmal).

Poona Division (Poona): Ahmednagar (Ahmednagar), Kolhapur (Kolhapur), Poona (Poona), Satara North (Satara), Satara South (Sangli), Sholapur (Sholapur).

Rajkot Division (Rajkot): Amreli (Amreli), Gohilwad (Palitana), Halar (Jamnagar), Kutch (Bhuj), Madhya Saurashtra (Rajkot), Sorath (Junagadh), Zalaad (Surendranagar).

The five constituent units of the new Bombay State are Kutch, Saurashtra, Marathwada (roughly the Marathi-speaking Districts of the former Hyderabad), Vidarbha (roughly the Marathi-speaking Districts of the former Madhya Pradesh) and the residuary Bombay State (that is, the former Bombay State bereft of the Karnatak Districts).

The area and the population (in thousands) of these constituent units are given below:

Kutch : 16,724 sq. miles; 568,000. Saurashtra : 21,451 sq. miles; 4,137,000. Bombay (residuary) : 90,123 sq. miles; 30,768,000. Marathwada : 25,694 sq. miles; 5,185,000. Vidarbha : 36,880 sq. miles; 7,607,000.

Some other census relating to Bombay State:

Density : 15 per cent; Rural population : 72.1 per cent; Urban population : 27.9 per cent; Agricultural population : 62.5 per cent.

Area under cultivation : 55 per cent of the total area; Per capita area under cultivation : 1.38 acres; Area under food crops : 68.2 per cent of the total cultivated area; Area irrigated : 5.6 per cent of the total cultivated area; Area under forests : 14.5 per cent of the total area of the State.

Bombay State now bulks larger in the size and economy of the country than before 1st Nov. 1956.

The area is 15 per cent of that of the Indian Union and the population 13.4 per cent.

The value of its annual textile production is about 70 per cent of that of the country and the number of persons employed in the industry 67 per cent of the number employed in the country as a whole.

It has 37.7 per cent of the area in India under ground nut, and 50 per cent of the area in India under cotton.

Of the manganese ore produced in India 21.1 per cent would be mined in this State.

The installed capacity of electrical energy in the new State is about 27.7 per cent of the installed capacity of the country as a whole, and the amount of electricity generated about 39.8 per cent.

The number of motor vehicles is 26.2 per cent of the country as a whole.

The State has 22.6 per cent of the total Indian student population.

POLITICAL SET-UP

The State has 43 Districts. All the Districts are territorially compact except two—Amreli and Nanded. Amreli is broken up into eight parts separate from one another all in the Kathiawar peninsula, while Nanded has Rajura and Kinwat Taluks (former Hyderabad State) which is separated from the main body of the District by Yeotmal.

Each of the six Administrative Divisions has a Divisional Commissioner.

The State is a member of the Western Zonal Council, the other member of which is Mysore.

The Bombay Secretariat has eleven Departments:

The Political and Services Department, Home Department, Revenue Department, Agriculture and Forests Department, Education Department, Local Self Government & Public Health Department, Finance Department, Public Works Department, Legal Department, Industries & Co-operation Department, Labour & Social Welfare Department.

The total number of officers in the I.A.S. Cadre has been tentatively fixed at 180 and of the I.P.S. at 128.

The strength of the Legislative Assembly is 396 and of the Council 1084. The State sends 66 members to the Lok Sabha and 27 to the Rajya Sabha.

GEOGRAPHY

The State embraces a wide diversity of soil, climate and people. In the residuary area of the former Bombay State there are the rich plains of Gujarat, watered by the Narmada and the Tapi, whose fertility is so marked that it has long been known as the Garden of India.

South of Bombay City the State is divided into two sections by the Western Ghats, a range of hills running parallel to the coast. Beyond the Ghats are the Deccan Districts; on the sea side is the Konkan, a rice-growing tract, intercepted by creeks which make communication difficult.

The rainfall of the State is derived chiefly from the south-west monsoon between June and October. The amount of rainfall varies widely in different areas from 20" to about 250".

The population varies as markedly as soil and climate. The people of Gujarat although softened by prosperity, are among the keenest trading races in the world. The Deccan peasant has been seasoned by adversity; the saying goes that the Deccan expects a famine one year in every three, and gets it.

Hindi in the Devanagari script is recognized by the Government as one of the regional languages of the State.

The principal occupation is agriculture, which supports sixty-four per cent of the population. In Gujarat the soils are of two classes, the black cotton soil, which yields the famous Broach cottons, the finest in India, and alluvial, which under careful cultivation in Ahmedabad and Kaira, makes splendid garden land.

The dominant soil characteristic of the Deccan is black soil, which produces cotton, wheat, gram and millet, and in certain tracts rich crops of sugar-cane.

The Konkan is a rice land, where the crop is grown under the abundant rains of the sub-montane regions.

There are no great perennial rivers suitable for irrigation, and the harvest is largely dependent upon the seasonal rainfall, supplemented by well irrigation. A chain of irrigation works, consisting of canals fed from great reservoirs in the region of unfailing rainfall in the Ghats, is gradually nearing completion, and this will ultimately make the Deccan immune to serious drought.

The territory covered by the former Saurashtra State stands boldly out into the Arabian Sea between Kutch and the Gujarat Coast.

Saurashtra's physical features suggest it may once have been an island or a group of islands of volcanic origin. The surface of Saurashtra is for the most part undulating with low ranges of hills running in very irregular directions. With the exception of the Thanga and Mandav hills, in the west of Jhalavar, and some unimportant hills in Halar the northern portion of the country is flat. But in the south from the neighbourhood of Gogha, the Gir range runs nearly parallel with the coast and at a distance of about 20 miles from it, along the north of Babariwad and Sorath to the neighbourhood of Girnar. The principal river is the Bhadar which rises in the Mandav hills and, flowing south-west, falls into the sea at Navibandar after a course of about 110 miles, everywhere marked by highly cultivated lands bordering its course. Other rivers in the area are Mauj, Machhu, Ozat and Shetrunji, the last remarkable for wild and romantic scenery. There are a number of salt-water creeks. The area has a 600-mile coast line and a number of ports: Bedi Bunder, Navlakhi, Bhavnagar, Porbandar and Sica. Of these the first and chief port in the matter of import traffic from Europe is Navlakhi.

The area has a variety of minerals: sand stone, pottery, clay, iron slugs, moulding sand, chandani, bhutdo, black stone, white chalk stone, marble, lime-stone, clippings, white clay building stone and toad.

All the forests here are situated in one District Sorath. In addition there are a number of mangrove forests along the sea coast. The main species of wood in the inland forests is teak. Others are sawar, tanach, salado, bly-kalam and haladvan.

The adjoining area of Kutch has good cultivable land, the principal crops being bajra, wheat, barley and cotton. Irrigation is well developed. The area is also rich in such deposits as gypsum, clays, lime-stone and even larger deposits.

* Note that there is a small difference in the figures relating to area and population as published by the Government of India and the Government of Bombay. These are the Bombay Government figures.

† Originally it was fixed at 72.

lignite, alum, marble and ochres. The main occupation of the people apart from agriculture is embroidery and silver work. The Kutchis are an enterprising people. It is estimated that over six lakhs of them are in trade and industry in the cities of India or abroad. Kutch exports salt, cotton, wool, castor seeds and fish and imports foodgrains and cloth. The chief means of communication are the sea; and Kandla port which is now open is one of the major ports of India.

The south-eastern part of Bombay State is made up of Marathawada formerly in Hyderabad State. It is covered by trappean rock or black cotton soil and the chief produce is wheat and cotton. Part of it is hilly and covered by luxuriant vegetation, but the forests have little economic value. The soil is very rich and advantage is taken of the water obtainable from rivers and wells to grow garden crops which are more profitable. Only two crops are raised during the rains. The kharif crops are yellow jawar, bajra, cotton, rana, kodru, til, tor and kulthi, the rabi crops are cotton, white jawar, chenna, karad, wheat, linseed, chillies, sugarcane and tobacco. There is in this area no wet cultivation.

There are cotton ginning and pressing factories in Aurangabad, Parbhani, Nanded and Bhir, and cotton mills in Nanded and Aurangabad.

In the far east of the State are the Nagpur, Wardha, Chanda and the Berar Districts. This is on the whole, rich agricultural land supported by industry and well provided with transport facilities and electric power.

The Nagpur plain and the Berar constitute with their black soil one of the richest cotton-growing areas in the country. The food crops are rice in Nagpur and jawar in Berar. The south-east is covered with forests where many jungle tribes live.

Cotton is the most important cash crop of which over ten lakh bales are produced every year. Out of this a quarter is consumed in the local mills and the rest is exported. Most of the cultivated area is under medium staple cottons like burl, cambodia, jarilla and veram and the rest under eumra cotton.

The orange crop of Nagpur is notable. The Nagpur orange has the reputation of being among the most delicious and finds a ready market all over the country. Over a lakh ton of the fruit is produced annually valued at about Rs. 2.5 crores. There are two crops, winter and summer though the supply is continuous from September to the end of May.

Among the mineral deposits are coal and manganese. The reserves of coal in the Wardha valley (part of which lies in Madhya Pradesh) are estimated at 4,000 million tons. The manganese deposits chiefly in Nagpur and Bhandara are reckoned among the finest in the world. The reserves of higher grade ores are estimated at around 10 million tons.

The chief industry is, of course, the textile mill industry. But there are also glass, and soap factories and oil mills. Some lac is produced in India.

There are about ten spinning and weaving mills in Nagpur, Hingangaht, Akola, Pulgaon, Indhara and Ellichpur. Some spin mostly coarse counts of yarn, the chief market for which is the handloom industry. Most of the producing units are medium-sized. There are over 400 cotton spinning and pressing factories. The increasing popularity of small-scale power looms is a significant feature of the textile industry. There are over 500 power looms operating in small weaving factories and cottages.

Coop-keeping is a popular cottage industry particularly in Nagpur, Wardha and Akola.

Electric power which is mostly of the thermal variety is well developed and covers by means of a grid a whole area from Akola to Chanda.

Land and railway communications are good except in the Chanda District.

ECONOMY

Bombay is a highly urbanized State. There are eleven cities with a population of a lakh and over in the State and a total population of 57.8 lakhs.

The State now accounts for the largest handling of the foreign trade of India about 41 per cent—53 per cent of the imports and 29 per cent of the exports.

Apart from the production of commercial raw materials, and the growth and development of foreign trade, the industrial environment in Bombay State has also been helped by development of means of communications and transport, generation and supply of electrical energy and growth and development of financial institutions as well as private enterprise.

The route mileage of railways located in Bombay State may be estimated at 5,062 miles. For every hundred sq. miles area, Bombay State has railway routes of about 3.3 miles compared to the all-India average of 2.9 miles.

The State has a road route mileage of 36,050 of which 18,895 are metalled roads and 17,155 are unmetalled roads.

As it is, Bombay State accounts for 2.3 billion units or over a third of the electrical energy generated in the country of about 6 billion units at the end of the First Five-Year Plan. The supply of electrical energy in the State at the end of the Second Five-Year Plan will be considerably augmented by the Koyna Project, the Trombay extensions, the Koyna-Sholapur transmissions, the Vidarbha Grid Schemes, the North and South Gujarat Grid Schemes as well as by the Saurashtra Electricity Board's schemes.

When completed the schemes will add 30 per cent, to the present supply, and the State will still have the highest power resources of all the States in the country.

Of the 5,140 banking offices in the country opened according to the importance of business done, 1,290 or nearly one fourth are in Bombay State and considering the paid up capital and reserves and corresponding deposits, it may be estimated that these do over one-third of the country's banking business.

Insurance statistics are not available State-wise, but considering the transactions of one of the old major insurance companies doing business throughout India, it may be stated that nearly 40 per cent of the insurance business of the country is being done in Bombay State.

It may be estimated that the national income of Bombay State, as a part of the national income of India as a whole would be round about Rs. 2,000 crores or 20 per cent with a population share of 13.5 per cent of the all-India total.

Banks and their offices in this State account for 35 per cent of their resources in India as a whole and 40 per cent of the insurance business of the country is being transacted in this State.

The establishments registered under the Factories Act in this State employ about 10 lakh workers or nearly 40 per cent of the workers in the country.

A balance-sheet of the gain and loss through the reorganization of 1st Nov. 1956 would go somewhat like this:

In the case of the following industries there has been a substantial addition to the productive capacity: salt, vanaspathi, cement, cotton textiles and sugar.

Bombay has lost the Bagalkot Cement Company. But this is more than compensated by the addition of the Saurashtra cement companies.

With the addition of Saurashtra and Vidarbha textile mills, there will be 179 composite cotton mills in Bombay State out of the total of 291 in the country as a whole. These mills will produce 3,468 million yards or about 70 per cent of the mill cloth produced in the country.

Vidarbha and Saurashtra will also substantially add to the raw cotton production which will increase to 21.4 lakh bales or two-thirds of that produced in the country as a whole.

At present 10 per cent. of the sugar produced in India is produced in Bombay State.

With the addition of cement, gypsum, manganese ore, bauxite and China clay Bombay will have a more diversified and variegated industrial outlook.

The Government has established a mineral department at Nagpur for the growth and development of the minerals.

It will be possible to develop the manganese ore industry in the State which accounts for about a third of the manganese ore production of the country. Most of the manganese ore produced at present, about 4 lakh tons, is exported in its raw form.

For the first time in its history, Bombay State will also be a producer of coal, though the all-India importance is negligible.

It is quite possible that oil may be struck in northern Gujarat, Saurashtra and Kutch and explorations and experiments in this direction are being conducted.

The State produces about 40 per cent. of the groundnut of the country as a whole and it is possible that industries producing edible oil as well as Vanaspathi can develop more than they have done hitherto.

PRODUCTIVE CAPACITY

The table below gives the rated productive capacity of the more important industries in Bombay State at the end of 1955-56:

1. Bicycles No. (thousands)	100
2. Electric Transformers No. Kvs. (thousands)	264
3. Electric Motors H.P. (thousands)	124
4. Electric Fans (thousands)	66
5. G.L.S. Bulbs (Million)	5.4
6. Dry Battery Cells (Million)	52
7. Radio Receivers (000s)	64
8. Sulphuric Acid (000 tons)	58
9. Salt (lakh mounds)	529
10. Sugar (000 tons of cane crushed per day)	13.5
11. Vanaspathi (thousand tons)	106
12. Biscuits (thousand tons)	10.6
13. Confectionery (thousand tons)	12
14. Soda Ash (000 tons)	77
15. Improved Ag. Implements (Steel and Iron) (000s)	4.5
16. Power Driven Ag. Pumps (000s)	35
17. Diesel Engines (000s)	12.7
18. Phosphate Fertilisers (000 tons)	70
19. Ray. stuff (Million lbs.)	6.0
20. Starch (000 tons)	47
21. Plastic Moulding Power (tons)	1,182
22. Paints and Varnishes (000 tons)	20
23. Soap Organised factories only (000 tons)	91
24. Vegetable Tanning (000 tons)	131
25. Chrome tanning (000 tons)	86
26. Paper and Paper Board excluding newsprint (000 tons)	12
27. Cement (000 tons)	792
28. Glass (000 tons)	51
29. Refinery — Crude Petroleum (Million tons)	3.2
30. Cotton Textiles	
(a) Spindles (No. 000)	7,000
(b) Looms (No. 000)	143
(c) Mills Composite (No.)	174
31. Spindling	22
32. Cloth (Million yards)	3,468
Yarn (Million lbs.)	867

1. AREA AND POPULATION

Below we give statistical tables on a number of subjects relating to Bombay State.

	Bombay State	ADMINISTRATIVE DIVISIONS					
		Rajkot	Ahmedabad	Bombay	Poona	Aurangabad	Nagpur
1. Area (in square miles) ..	190,832	30,809	26,099	28,325	28,030	30,180	36,880
2. Number of towns ..	625	105	120	111	124	90	75
3. Number of villages ..	54,281	5,651	10,034	10,358	6,400	8,730	12,448
<i>Population (Figs. in thousands)</i>

REVIEW, 1957-58

Below we give extracts from the Governor's speech to the joint session of the legislature on 17th Feb., 1958 :

To give more effective representation to the local people in the day-to-day administration, Government decided to set up Panchayats so as to cover every village during the course of the next few years.

A State Council consisting of officials and non-officials, was established to advise the Government on matters relating to village panchayats.

Similar Councils were also established at the Divisional level.

The question of having a unified village panchayat law for the whole State was being examined.

In all areas of the State, local bodies were made elective. It was decided to raise substantially the level of grants to local bodies, and to have a uniform system of financial assistance throughout the State.

The grant to village panchayats in all regions, will now range from 25 per cent to 30 per cent of the land revenue according to the classification of the village panchayats, to be prescribed by Government.

The grants to municipalities and District

Local Boards to meet 50 per cent of the expenditure on account of harness allowance to their staff, were extended to the whole State. The Boards would now get annual grants equal to 5 per cent of the land revenue collected in their respective areas excluding only the municipal areas.

A share of 2 per cent of the forest revenue was to be given to all District Local Boards throughout the State.

Development Boards at the District level have now been established throughout the State in addition to Development Councils for each Division.

Senior officers of Government were to be appointed as Commissioners of Divisions.* They would be entrusted with substantial powers hitherto exercised directly by Government. Powers were also to be delegated by Government to the various Heads of Departments so as to reduce to the minimum the need for making references to Government.

Proposals for further delegation of powers were to be investigated and would be implemented from time to time.

With the enlargement of the State, an urgent task before the Government was the integration of the various service cadres, administrative procedures, and laws prevalent in the different parts of the State. The old Bombay cadres were taken as the basis for organising the new ones. On the question of posts, the scales of pay prescribed for the corresponding posts in the former Bombay State, were made applicable to the personnel from the former States of Madhya Pradesh, Hyderabad, Saurashtra and Kutch, with retrospective effect from the 1st Nov. 1956. The other conditions of service applicable to Government servants were also unified by extending the Bombay Civil Services Rules to the personnel allocated from the States other than the former Bombay State.

With a view to eradicating the evil of corruption Committees have been formed at the Head of Department and District levels. The Departmental Committees consist of three or four officers and representatives of different levels of administration. For better co-ordination of work, Government has sanctioned the establishment of an Anti-Corruption Bureau under the direct supervision and control of Government in the Home Department. This Bureau will be independent of the Police.

The work relating to the unification of laws in the State is also making progress. Certain measures have been passed in this behalf. On the more complicated matters such as tenancy, consolidation of holdings, primary education and industrial relations, the necessary measures aiming at uniformity are under preparation.

FOOD PRODUCTION

Due to unsatisfactory rains in certain districts in 1957, scarcity conditions made their appearance. Government took prompt measures to meet the situation: relief works to provide immediate employment, gratuitous relief to those who are unable to work, conservation of drinking water. Besides, local officers were instructed to give water free of cost for irrigation purposes in such areas. Waste lands adjoining tanks were allowed to be cultivated, and cultivators were allowed to dig katcha wells in tank beds to raise irrigated fodder. Fodder reserve stocks were also built up in these areas.

In spite of the set-back due to scarcity conditions in some parts, agricultural production recorded a substantial improvement. Even so, the over-all food position was by no means satisfactory. To make foodgrains available at reasonable prices, the fair price shop scheme was extended throughout the State.

Government has now introduced in Greater Bombay the Household Foodgrain Card System through which a limited quantity of rice is supplied according to the stocks made available by the Government of India. A sufficient quantity of wheat also is sold at the same shops. Government is watching the situation in other large cities like Ahmedabad, Poona and Nagpur. For ensuring sufficient supplies to the foodgrain shops, Government has opened godowns in the districts. Loans to the extent of Rs. 1,000 per village panchayat, are also given to encourage more village panchayats to undertake the work of distribution of foodgrains.

To economise the use of rice, restrictions have been placed on the service of rice or preparations made of rice in catering establishments, and in the number of participants in functions and parties where such preparations are served.

[It may be added here that the State is now almost entirely dependent on the Centre to fill up the gap in its rice requirements. The rice

production in 1955-56 was 1,448,000 tons and in 1956-57 it was 1,569,000 tons. It needs about 400,000 tons more to meet its requirements. —Editor.]

Government has undertaken large additional (besides the Plan works) programme of Minor Irrigation Works, especially construction of wells throughout the State. A programme for the construction of 35,000 new wells and repairs to 28,000 old wells, has been prepared for the remaining three years of the Second Plan. This scheme is expected to bring under irrigation, over 2½ lakh acres of land. The scheme has already been started; and during 1957-58 5,500 new wells were being constructed and 4,000 old wells repaired.

Under this Scheme, long term tagal loans and subsidy would be granted in all the regions of the State. For sinking of new wells, financial assistance to the extent of Rs. 2,500 per well would be given of which 25 per cent or Rs. 500 whichever is less will be treated as subsidy and the rest as loan. The response to the wells scheme was encouraging and in January alone over 10,000 applications for the construction of new wells were received.

Steps were taken to strengthen and reorganise the Irrigation Wing of the Public Works Department. A new post of Chief Engineer in charge of Irrigation Projects has been created. A special Circle called Water Resources Investigation Circle has been established. Government also decided to set up a Board of Irrigation for the State of Bombay.

Measures have also been taken to ensure that water from projects which have already been constructed, is utilised to the fullest extent. A State Water Utilisation Committee has been established to study the short-fall in the utilisation of irrigation water. The Agriculture Department is establishing about 40 trial-cum-demonstration farms in the commanded areas of the irrigation projects to bring home to the cultivators the advantages of irrigated farming.

To enable cultivators to familiarise themselves with the use of water for irrigation purposes, certain concessions have now been announced by Government for the initial years for irrigation works recently completed or in progress. For example, in respect of 'food grains and fodder crops', no water rate will be charged for the first year. For crops other than food grains and fodder crops, the charge, in the first year, will be ½ of the normal water rates. Another important scheme relates to soil conservation by contour bunding. This activity is now being intensified. In order to provide improved seed for all cultivated lands, 450 seed farms, each comprising an area of about 25 acres, are being established, one in each taluka. This programme is to be completed before the onset of the monsoon in June, 1958. The Japanese method of cultivation of paddy which has already yielded encouraging results in several parts, is being extended to cover about 1½ lakh acres.

While immediate efforts have to be made to increase food production in the manner mentioned above, it is evident that for any long term solution of the problem in this State, special attention has to be given for many years to schemes of major irrigation.

The major irrigation programmes of the new Bombay State included in the Second Plan, whether viewed from the standpoint of its scope, or the capital expenditure involved, or the targets of areas to be irrigated, signifies a determined effort to implement it.

The programme of Community Development and National Extension Service was further extended during 1957 to cover about 45 lakhs of rural population in 68 blocks. Greater emphasis is now being laid on the programme of increase in agricultural production, the execution of construction works through village panchayats and the active participation of the Village Panchayats in the various activities of community development.

The programme for women and children is being co-ordinated with that of the State Social Welfare Board, and Government has also started five pilot projects for women in different districts.

It may be added here that in all 261 blocks covered 26,154 villages and a population of 1.73 crores at the end of 1957.

In regard to animal husbandry and dairy development, Government has constituted a new Department designated 'Animal Husbandry Department'.

Similarly, in view of the importance of urban and rural milk supply schemes, Government has decided to constitute a 'Dairy Development Department' with Regional Officers for different Divisions of the State.

In order to meet the demand for trained personnel, Government is establishing a Veterinary College at Nagpur for which assistance from the Government of India is expected.

The College is expected to start functioning from June 1958.

In the matter of land reforms, the policy of removing intermediaries and of making the tiller of the soil the occupant of the land, is being extended to all areas. The changes required in the tenancy laws of the various regions have been taken in hand.

In the case of the Marathwada area, the necessary amendment of the tenancy law was brought before the last session of the State Legislature.

Tenancy laws in the areas of Vidarbha, Saurashtra and Kutch do not provide for conferring occupancy rights on tenants or for fixing ceiling of land holdings.

The question of undertaking suitable legislation for these areas is, therefore, under consideration.

Amendments regarding the law in Saurashtra and in the Bombay merged territories, were carried out in 1957. The remaining work in respect of the areas of Kutch and Marathwada is expected to be completed in 1958. It is the policy of Government to abolish inams of all kinds. Service inams have hitherto been excluded from the purview of such abolition mainly on the ground that these have far-reaching financial and administrative consequences. Government has again taken up this matter and come to the conclusion that a beginning must be made in the direction of abolition of the inams of these inferior village servants. The proposals are being worked out.

The fullest possible advantage is being taken of the Co-operative Movement on the lines suggested by the All India Rural Credit Survey Committee. The principle of direct and indirect participation in the share capital of the co-operative credit institutions at all levels has been accepted and is being implemented.

Government has established a State Warehousing Corporation for putting up warehouses at suitable selected centres.

[It may be pointed out here that the Corporation was inaugurated on 10th Dec. 1957. The Bombay Government's share capital is Rs. 15 lakhs. A like amount is subscribed by the Central Warehousing Corporation. Initially it is proposed to provide 20 warehouses in the State in addition to the six to be set up by the Central Corporation. —Editor.]

Out of the fifteen co-operative sugar factories which have obtained licences for import of machinery, nine factories have gone into production with a total crushing capacity of 8,400 tons of sugarcane a day. Six more sugar factories are expected to complete their erection programme during the 1958 crushing season and to go into production in the 1959 season.

[It may be added here that the nine factories are in Pravara Nagar (Poona Dt.), Bardoli, Kanaser (Poona Dt.), Kopergaon (Ahmednagar Dt.), two in Malegaon (Poona Dt.), Rahuri, Kohata and Kargan (all three in Ahmednagar Dt.).

* These have now been appointed.

Each unit is capable of producing about 10,000 tons of sugar a year. —*Editor.*

In the latter half of 1957-58 the accumulation of stocks of cloth adversely affected several cotton mills. Some of them discontinued their second and third shifts, and a few others put up notices of such stoppage. This resulted in some unemployment.

Some steps were taken to bring down the prices of medium varieties of cloth. As a result, the off-take of cloth improved.

Other measures are also being devised to improve the situation. The Narsinghirji Mills at Sholapur had closed down in August 1957, for financial reasons, throwing a considerable number of workers out of employment. With the object of providing relief to them, Government took over the mills on lease to run them as an Unemployment Relief Scheme.

Government also decided to fix minimum wages for employees in shops and commercial establishments. A notice declaring Government's intention was given, and minimum wages were to be fixed from 1st April 1958.

The State Government constituted a Wage Board for cotton textile industry in the Vidarbha region. During the 1957-58, eight new Employment Exchanges were opened in the State. It is proposed to start seven new Exchanges in 1958-59.

Government constructed from Nov. 1956 to Jan. 1958 4,968 tenements at a cost of Rs. 216.37 lakhs under the Subsidised Industrial Housing Scheme, and work on about 11,000 more tenements was in progress.

It is proposed to construct another 7,000 new tenements.

Government also granted loans amounting to Rs. 129.89 lakhs for the construction of houses under the Low Income Group Housing Scheme.

This scheme has now been modified so as to permit Government to construct houses direct and give them on rent to persons with low income. Full advantage would be taken of this

modification by constructing tenements on a rental basis.

About alum clearance, schemes have been formulated for the more congested areas — by the Corporations of Bombay, Ahmedabad and Poona, and forwarded by the State Government to the Government of India. The Nazpur Corporation was formulating its schemes at the time.

The 1957-58 programme of road construction has been fully implemented, and in the 1958-59 programme a number of new roads in sugarcane areas are included. An additional provision of Rs. 2.5 crores for roads in the Plan for Vidarbha, has been agreed to by the Planning Commission. Of this, a provision of Rs. 75 lakhs is made for 1958-59.

About education, two integration committees — one for primary and the other for secondary education — have been appointed to work out a uniform policy.

The question of the integration of salaries of primary teachers was being actively considered on the lines recommended by the Government of India. As a measure of immediate relief, the Bombay Dearness Allowance rates were applied to the new areas at an average annual cost of Rs. 1.27 crores to the State.

On the re-organisation of the State, 188 Junior Division troops of the N.C.C. including 164 for boys and 24 for girls from Saurashtra, Kutch, Vidarbha and Marathwada areas, came into the new Bombay State. In order to have uniformity throughout the State Government decided to re-start the Junior Division Scheme in the area of the former Bombay State which had previously been discontinued.

The Committee for the establishment of a University for Marathwada, has submitted its report which at the time of writing (Feb. 1958) was under the consideration of Government. It was hoped that the University would come into being by June 1958.*

In view of the growing importance of small savings to the Second Five-Year Plan, a Directorate of Small Savings has been set up in the Finance Department, to supplement the efforts of the National Savings Organisation of the Government of India. The Directorate has in consultation with the Government of India, secured several facilities for investments and incentives to small investors.

For the training of Small Savings workers, two training camps were organised — the first at Satana in the Nasik District in June 1957, and the other at Baroda in December last. These camps were the first of their kind in the country.

A single organisation has been formed for implementing the social welfare programme of Government — the Directorate of Social Welfare.

[A note on prohibition may be added here. This is not part of the Governor's address.]

In pursuance of its decision to extend total prohibition to the remaining areas of the State of Bombay from April 1, 1959, the Government of Bombay decided to introduce prohibition in the Nazpur and Aurangabad (except East Khandesh District) divisions of the State in two stages.

In the Nazpur division, the first stage would be for the period from April 1, 1957 to March 31, 1958 and the second from April 1, 1958 to March 31, 1959, while in the Aurangabad division, the first stage would begin on October 1, 1957 and would last up to March 31, 1958 and the second stage would be from April 1, 1958 to March 31, 1959.

There is total prohibition in East Khandesh district. In Saurashtra and Kutch, the Bombay Prohibition Act, 1948 is in force except in respect of opium.

BUDGET 1958-59

Revenue : Rs. 129 crores,
Expenditure : Rs. 122.91 crores,
Deficit : Rs. 2.09 crores.

* A bill has now been passed.

ROAD TRANSPORT

Passenger road transport is partially nationalised in Saurashtra, Vidarbha and Marathwada and almost wholly in Kutch and the residuary Bombay State. Goods transport is not nationalised in any area.

All the nationalized transport services in the whole of the present Bombay State have now come under the Bombay State Transport Corporation.

The Bombay State Road Transport Corporation was constituted under the provisions of the Road Transport Corporation Act, 1950.

The Corporation operates in all the districts of the new Bombay State.

The information given below covers the period from April 1956 to March 1957.

The data given as on 31st March 1957 relates to the new Bombay State excluding the merged areas (Vidarbha, Marathwada, Kutch and Saurashtra).

The annual data relate to the original Bombay State upto 31st December 1956 and to the new Bombay State excluding the merged areas upto 31st March 1957.

The latter are indicated with an asterisk.

Position as on 31st March 1957 :

Capital invested in the residual Corporation :

State Government Rs. 770.38 lakhs
Government of India . . . Rs. 395.68 lakhs

No. of passenger vehicles owned by the Corporation. . . . 2,710

No. of goods vehicles owned by the Corporation 669

No. of nationalised City Bus Services Three (Baroda, Surat and Kolhapur)

No. of municipalised city bus services Four (Bombay, Poona, Aurangabad and Sholapur)

Rate per passenger mile after nationalisation Nine pies (No difference between pre and post nationalisation rates per mile)

Total No. of routes operated 1,880
Route mileage operated 46,559
No. of persons employed 17,813

The Corporation has two major workshops for major overhauls, 13 Divisional Workshops for running repairs and servicing, and 121 depot and sub-depot workshops for maintenance of vehicles. The central workshop is at Dapodi, the regional workshop is at Ahmedabad, the divisional workshops are at the divisional headquarters, and the depot and sub-depot workshops are at various operating points spread over the entire residual State.

Annual results of the year 1956-57 :

Total bus miles operated 7,36,59,423*

Total number of passengers carried by the Corporation 18,48,79,056*

Total revenue expenses of the Corporation for 1956-57 Rs. 10,41,42,674*

Total revenue for 1956-57 Rs. 11,67,91,584*

Cost of staff per bus mile 63.68 pies*

Expenses per bus mile 257.40 pies*

The Corporation provides comfortable buses, long distance express services for the convenience of long distance passengers, well-equipped bus stations at important places with all modern

facilities, adequate services to meet the demand, and special services for fairs and other special occasions.

Passenger amenities provided by the Corporation as on 31st March 1957 : Booking Offices 142; Bus Stations 133; Passenger Stands 112; Canteens 127; Lavatories 161; Water Arrangements 113; Waiting Rooms 81.

MERGED AREA

The information given below covers the period from April 1957 to August 1957 for the 4 nationalised road transport undertakings in Saurashtra, Vidarbha, Marathwada and Kutch which are now in the new enlarged State of Bombay after the reorganisation of States.

The nationalised transport services in these areas are directed and co-ordinated by a department of the Government of Bombay, under the Motor Transport Controller, known as the Transferred Road Transport Undertakings Department.

The names of the Transport Authorities are :

(a) Saurashtra : Saurashtra State Road Transport Corporation.

(b) Kutch : Kutch State Road Transport Corporation.

These Corporations are constituted under the provisions of the Road Transport Corporation Act, 1950.

Passenger Road Transport is almost completely nationalised in Kutch with 58 routes under operation.

In Saurashtra, however, passenger services are partially nationalised, and only 183 routes have been taken over.

(c) Vidarbha : Provincial Transport Services.

Government has constituted a Board to manage the operations of the Provincial Transport Services under the supervision of a Committee. 63 routes have been taken over in the districts of Nagpur, Wardha, Yeotmal, Amravati and Bhandara. Of these 63 routes, 14 are city services operated in Nagpur City.

(d) Marathwada : State Transport (Marathwada).

The State Transport (Marathwada) undertaking is run departmentally under the supervision of a Committee constituted by the Government of Bombay, and operates 81 routes including two city service routes.

Position as on 31-8-1957 :

(a) Total capital investment in the units :

Contribution by State Government Rs. 101.24 lakhs

Contribution by Central Government Rs. 36.26 ..

Total Rs. 137.50 ..

The Central Government has contributed towards capital only in the case of the Saurashtra and Kutch Corporations and the Provincial Transport Services, Nagpur, while the entire capital for Marathwada which is a Government department, is contributed by the State Government alone.

(b) Total no. of passenger vehicles owned by the 4 units 612

(c) Total no. of goods vehicles owned by the 4 units 7

(d) Total no. of nationalised city bus services 4 (at Nagpur, Aurangabad, Nanded, and Rajkot).

(e) Total no. of routes operated as on 31st Aug. 1957 362 (Rural) ; 23 (City).

(f) Route mileage operated as on 31st Aug. 1957 10,972

(g) No of persons employed 3,848

Rate and fare structure :

The rate per passenger per mile charged in the 4 units is as under :—

(a) Saurashtra : At 9 pies per passenger per mile on a mileage system. Minimum fare charged is one anna.

(b) At 12 pies per passenger per mile for lower class services and at 18 pies for upper class accommodation on a mileage system. Minimum fare charged is 2 annas.

(c) Vidarbha : At a telescopic rate of 7.5 pies to 5 pies per passenger per mile with a surcharge on fares of 1 anna per rupee or part thereof and two annas per rupee or part thereof on fares in excess of one rupee. Minimum fare charged is 2 annas.

(d) Marathwada : At 10.25 pies per passenger per mile and 3½ annas per each stage of 4 miles or part thereof. Minimum fare charged is 3½ annas per passenger per stage.

Under the Saurashtra State Road Transport Corporation there are two workshops, one each at Rajkot and Junagadh, while under the Kutch State Road Transport Corporation there is a workshop at Bhuj for major repairs and day-to-day maintenance.

As regards the Provincial Transport Services, Nagpur, the Central Workshop is situated at Nagpur, while in the case of State Transport (Marathwada) the workshop at Aurangabad carries out major repairs as well as day-to-day maintenance.

Operational results of the period from April 1957 to August 1957 :

(a) Total No. of passengers carried by the buses in the 4 transport units 1,59,25,997

(b) Total revenue from April 1957 to August 1957 Rs. 107.02 lakhs

(c) Total gross mileage operated 79,90,527

(d) Cost of staff per bus mile 49.6 pies

(e) Expenses per bus mile 190.6 pies

Amenities :

Comfortable buses are provided and regular bus services are operated in all the 4 units. For the convenience of long distance travellers express services are operated. At all important places, well-equipped bus stations with all modern facilities have been provided.

Way-side stands at traffic centres for en route passengers have also been provided at important places.

Adequate arrangements for the supply of extra buses have also been made to meet the traffic demand and special services are also run for fairs and on other special occasions.

Passenger amenities provided in the 4 units :

Total no. of Depots 37; Booking Offices 54; Bus Stands 27; Sheds 49; Canteens 14; Lavatories 52; Water Arrangements 62; Waiting Rooms 34.

* Relates to the original Bombay State upto 31st Dec. 1956 and to the new Bombay State excluding the merged areas upto 31st March 1957.

IRRIGATION

Major projects now functioning :

Name of Project.	District/Area Benefited.	Date began.	Date of completion.	Total Cost, Rs. in lakhs.	Development Expenditure, Five Years 1951-56, Rs. in lakhs.	Area irrigated on completion in '000 acres.
Gangapur	Nasik, Ahmednagar	1949	1957	395	234	45
Mahī right bank canal	Kaira	1948	1954	425	401	150
Ranand tank	North Satara	1949	1953	30.18	19	3.6
Lower Tapi valley (Stage 1) (Kakrapur)	Surat	1949	1955-56	628†	1,151	562

† Estimates under examination.

Second Plan Projects :

Project	Cost (Rs. lakhs)	Area (Acres)	District
Vir	541	99,850	Sholapur, North Satara.
Khadakwada	1,023	80,000	Poona.
Mula	912	1,37,500	Ahmednagar.
Girna	905.4	88,000	East Khandesh.
Ukal	5,000	7,48,000	Broach and Surat.
Kadana	1,310	4,55,000	Kaira & Panchmahals
Narmada	2,500	9,97,500	Baroda & Broach
Dandiwada	702.52	1,45,000	Banskantha & Melsana
Gangapur 2nd Stage	87.6	19,000	Nasik & Ahmednagar
Warina	172	7,500	Kolhapur and South Satara.
Kurnur	136	9,000	Sholapur.
Saraswati	167	32,000	Melsana.
Bathmati	187.81	58,500	Sabarkantha and Ahmedabad
Shetrunji Khodiar	123.92	19,000	Amreli.
Shamaji	94.64	30,000	Kaira and Sabarkantha
Dor	160.00	50,534	Wardha.
Salgaonga	123.00	44,700	Buldhana.
Purna	555	1,60,000	Parbhani and Nanded.
Mahud	140	70,000	Nanded.
Bhadar	323	68,000	Madhya Saurashtra and Sorath
Shetrunji (Saurashtra)	431.66	80,000	Gondalwad.
Rudramata	53.84	15,000	Bluj Taluka in Kutch

The Bombay State has about the highest percentage of sown area to cultivable area. It is traversed by major rivers like Sabarmati, Mahi, Narmada, Tapi, Godavari and Krishna. Yet the proportion of area irrigated by Government irrigation works, tanks and canals to cultivable area before 1947 was only 2% as against 30% to 50% in States like Madras, the Uttar Pradesh and the Punjab.

After the completion of the Nira Right Bank Canal in 1926, no important irrigation work worth mentioning was taken up in this State till 1947. After the advent of Independence and with a view to making the country self-sufficient in regard to food grains, irrigation has been given priority. Before the First Five Year Plan began the total area under irrigation was 10.5 lakh acres.

At the end of 1955-56 it was 14.1 lakh acres.

During the First Five Year Plan period a provision of Rs. 2,257 lakhs was made for the construction of the following six major irrigation schemes to irrigate an area of 12,61,200 acres at full development:—

Kakrapur Weir and Canal Project, Mahi Right Bank Canal Stage 1, Ghataprabha Left Bank Canal Project, Gangapur Dam Project, Ranand Tank, and Kolchi Weir Project.

An expenditure to the extent of Rs. 1,806.41 lakhs was incurred on the six projects upto end of March 1956. An additional area of 79,425 acres was irrigated by the end of 1955-56.

The Mahi Right Bank Canal Project (Kaira) forms the first stage of the Mahi Valley Development. It consists of a weir at Wanakhori and

a canal 44 miles long to take off from the right bank. The project was originally envisaged with a canal capacity of 2,000 cusecs at a cost of 4.25 crores. The work was started in 1949. The scope of the scheme has subsequently been revised and the canal is now designed for a monsoon supply of 7,000 cusecs.

Work is in progress and the Project is being continued in the Second Plan period. The project will benefit Kaira Dist. and will bring under irrigation 4,47,000 acres of land. It would be completed in 1958-59.

The Kakrapur Project (Surat) consists of a weir at Kakrapur and two canals on either side to irrigate an area of 562,000 acres. It forms part of a more comprehensive project for the development of the Lower Tapi Valley. The project is estimated to cost Rs. 624 lakhs and is under revision. The work on it is making good progress and will be continued during the Second Plan.

Irrigation has started on the completed section of the canal.

The Gangapur Project (Nasik) comprises a dam on the Godavari river at Gangapur, 8 miles from Nasik, to impound 5,500 mcf of water, and remodel the existing Godavari right and left bank canals, and a new canal to take off directly from the dam, Nasik Left Bank Canal. The project will bring under irrigation an area of 45,000 acres in Nasik and Ahmednagar Districts. The work on the dam proper is completed and that on the canal is at an advanced stage of completion. The project is estimated to cost Rs. 395 lakhs.

Water from the storage is being utilized on the existing Godavari Canal System. Irrigation on a section of the Nasik Left Bank Canal has also started.

Ranand tank (Satara North) is situated in Man Taluka of North Satara District and is estimated to cost Rs. 30.18 lakhs. There are two canals. The project will bring under irrigation an area of 3,550 acres after completion. The tank proper is complete. The two canals are also complete.

Irrigation was started in 1954.

Besides this, the Meshwa Canal Project in Kaira District and the Radhanagari Hydro-electric Scheme (irrigation part) in Kolhapur District were also taken up outside the Plan and have been practically completed.

The Meshwa Project is estimated to cost Rs. 53 lakhs and would irrigate an area of 18,000 acres and has been completed. Irrigation started in June 1956.

The Radhanagari Project is estimated at Rs. 166.25 lakhs and will irrigate an area of 12,000 acres.

Irrigation is done by means of lifts on the Panchantra and Bhagwati rivers at the dam site.

In addition to the above six major irrigation works, schemes giving quick production of food crops had to be put through. The Government of India came forward with loan assistance for the programmes. The programmes are—

- Special Loan Programme Rs. 1 crore.
- Security Programme Rs. 1.11 crores.
- Minor Programme of Irrigation Rs. 50 lakhs.
- " " " " Rs. 4 lakhs.

A programme of much greater importance was one of Rs. 4.87 crores later revised to Rs. 10.5 crores.

Some of the important irrigation works taken up under this programme now under construction are—

Name	Estimated cost Rs. lakhs	Dist.
Gibed Dam Project	485	Poona and Ahmednagar.
Extension of Krishna Canals	82	South Satara.
Mosam Bandhara	57	Nasik.
Budhiel Tank	65	Sholapur.
Karad Tank	65	Panch Mahals.
Patadungri Tank	53	Panch Mahals.
Moti Fatewadi Canal	48	Ahmedabad.

The works taken up in the medium and minor irrigation programmes will irrigate an area of 2,32,800 acres.

A total expenditure of Rs. 480 lakhs was incurred by March 1955 and the approximate expenditure during 1955-56 was Rs. 321.57 lakhs.

A North Gujarat Tube Well Scheme which envisages the construction of 400 tube wells in the scarcity tracts of Ahmedabad, Mehsana and Banas Kantha Districts at a cost of Rs. 247 lakhs has been taken up. An expenditure of Rs. 164.02 lakhs has incurred till the end of March 1956. So far about 396 tube wells have been drilled. An area of 80,000 acres will be brought under irrigation by this Scheme on full development.

In the Saurashtra area 70 tube wells are proposed to be sunk in Second Plan to irrigate about 5,600 acres.

Thus an additional area of 361,300 acres would have been brought under irrigation by the end of 1955-56 over and above 1,050,000 acres irrigable during 1950-51. On the completion of the schemes under the First Five Year Plan period, an additional area of 1,531,740 acres would have been brought under irrigation, and after full development, 1,722,000 acres.

In the Second Five Year Plan a capital outlay of Rs. 88.14 crores is proposed on irrigation in the entire reorganised Bombay State. However, some of the major schemes included in it will not be completed during the Second Plan period and may spill over in the subsequent plan or plans.

The estimated costs of all these schemes on the present estimation is well over Rs. 200 crores.

Details of some of the important schemes are given in a table on the previous page.

When completed they will bring an additional area of 34,11,000 (seasonal) acres of land under irrigation.

By the end of the Second Plan, however, 9,13,000 acres would come under irrigation.

Preliminary work has started on almost all the projects except Narmada and Kurnoor. The former is still under investigation while the investigation of the latter has just been completed.

Besides the ones in the table, the following medium schemes in the various parts of the State are in progress.

In the Saurashtra area works under progress are: Machu Stage I; Aji, Bhogavo Stage I, Rangola, Brahmanli, Sassi Dam, Meji, Hiran, Raval, Macclimndari, Munjdar and Bhogavo Stage II, Limbdi-Bhogavo, Sakrol, Fulbar, Ghelo, Rojki, Dendi Ozar Stage II.

In the Kutch area works under progress are: Gayel, Samandro, Kalia and Kankavli. Up to the end of March 1956 an expenditure of Rs. 51.6 lakhs was incurred.

Preliminary work has been started on Suval, Nironi, Gaganisar.

In the Marathwada area works under progress are: Dhaku, Zin, Shivana Amant, Poorna Anant, Bendsura, Kamli, Talwar Khasapur and Naldurg.

Others provided for in the Second Plan are: Chandni, Therna, Khadkali and Harnli.

In Vidarbha work on the scheme for improvement of the Navegaon project is in progress. Up to the end of March 1956 the expenditure was of the order of Rs. 5.19 lakhs.

In the Second Five Year Plan of the new Bombay State a total amount of Rs. 947.385 lakhs is proposed to be spent on minor irrigation and tube-wells under the Public Works Department.

Out of this amount, a sum of Rs. 314.69 lakhs constituted spill over from certain minor irrigation projects undertaken in the old Bombay State.

Including this, a total amount of about Rs. 560.09 lakhs will be spent on minor irrigation and tube-wells in the areas constituting the old Bombay State (excluding the transferred areas) during the Second Five-Year Plan period.

For the Saurashtra and Kutch areas provisions have been made of Rs. 144 lakhs and Rs. 130.80 lakhs respectively for expenditure on Minor Irrigation Works.

The Vidarbha and Marathwada areas will have Rs. 24.20 lakhs and Rs. 28.75 lakhs respectively, for the execution of Minor Irrigation Works under the Public Works Department.

In addition to the above, various flood control measures are taken by the Irrigation Department for controlling the recurring floods during the monsoon. The Baroda Flood Control Scheme on the Vishwamtri river may be mentioned in this connection. It has protected the Baroda town from flooding.

ELECTRIC POWER DEVELOPMENT

For major particulars about electric power development in Bombay State see under the relevant table* in this article.

TATA PROJECTS

The greatest hydro-electric undertakings in the State are the three schemes developed and brought into operation by Tata Sons, Ltd., and continued under their management until 1929, when they were transferred to the management of the Tata Hydro-Electric Agencies, Ltd., in which Messrs. Tata Sons retain a majority interest. These undertakings are:—

- (a) The Tata Hydro-Electric Power Supply Company, Ltd. Supply started in 1916.
- (b) The Andhra Valley Power Supply Company, Ltd. Supply started in 1922.
- (c) The Tata Power Company, Ltd. Supply started in 1927.

The three Hydro-Electric Companies are interconnected with the 64 MW Chola Steam Station of the Central Railway and the State Electricity Board's 54 MW Steam Station also at Chola under the same roof as the Railways and operated by them; together they are operated as a Hydro-Thermal system under the co-ordinated control of the Hydro Companies.

The three Hydro Companies have constructed a modern Steam Thermal Station of 125 MW capacity at Trombay which is also interconnected to the system.

This station which consists at present of two 62,500 kW units was opened on 15th Dec. 1956. A third unit of the same capacity is being planned (For details see below.)

During the nine months of 1956-57 (July to March) the system demand was 352.3 MW.

The sales by Tatas during the period was 1,147 million units and the purchase of Thermal Energy to supplement Hydro during the year was 154 million units.

Khopoli.—The hydraulic works of the Tata Hydro-Electric Power Supply Company are situated near Lonavla at the top of the Bhori Ghat. The monsoon rainfall is stored in three lakes, namely Lonavla, Walwan and Shirawta, from which it is conveyed in open masonry canals to the Forebay at Khandala and thence through steel pipes to the Power House at Khopoli at the foot of the Ghata, where the head at turbine nozzles is 1,726 feet or approximately 750 lb. per sq. inch. The capacity of the Power Station at Khopoli is 70,000 kW.

This scheme was formally opened by the Governor of Bombay on the 8th of February 1915.

Bhivpuri.—Investigations in 1917-18 led to the discovery of a site on the Andhra River just to the north of the Tata Hydro-Electric Supply Company's lakes, where additional power could be developed.

These investigations resulted in the formation of the Andhra Valley Power Supply Co. and the construction of the scheme, the principal features of which consist of a reservoir

formed by a dam about 190 feet high, across the Andhra River and a tunnel 8,700 feet long driven through solid trap rock to the scarp of the Ghata, from which the water is taken in steel pipes 4,600 feet long to the turbines in the generating station at Bhivpuri. The head of water at turbine nozzles is 1,743 feet or approximately 750 lb. per sq. inch.

The electrical energy is transmitted to Bombay over a transmission line 57.5 miles long for augmenting the supply from Khopoli.

The present capacity of this station is 72,000 kW.

Bhira.—The Tata Power Company's scheme on the Nila-Mula River to the south-east of Bombay was investigated and developed along lines similar to the Andhra Valley scheme and has an installed capacity of 132,000 kW.

The power is transmitted to Bombay over a transmission line 76 miles long and is used to augment the supply of the two earlier companies to mills, factories and railways.

The Trombay Thermal Power Station, the most modern of its kind in India, is situated on a 132-acre land on the south shore of Trombay Island, about seven miles north-east of Bombay. The station consists, at present, of two 62,500 kW units, and the layout permits expansion to an ultimate of four such units. A third unit of the same capacity is on order.

The plant is of semi-outdoor type, designed on the unit system basis with one boiler and one turbine per unit. The radiant type, water tube boilers at Trombay are designed to burn refinery waste gas, oil, and low-grade coal, and each of them is capable of generating steam at a rate of 600,000 lbs. hr at 1,325 psig and 955° F. The steam from the boiler will be delivered at 1,250 psig and 950° F to a 22 stage, twin cylinder, impulse turbine, which exhausts the steam into a single shell two pass condenser at 2½ Hg absolute. The steam in the condenser is cooled by means of sea water pumped from Bombay harbour through a 4,066 ft long 72" diameter steel pipe which projects approximately 2,000 ft. into the sea from the low water line. The condensed steam will be fed back to boiler at 410° F after passing through 5 feed-water heaters.

Each turbine drives a hydrogen cooled 13.8 KV, 50,000 62,500 KVA generator, which is connected to the transmission grid through a 80,000 KVA, 13.8/110 KV transformer.

The station was opened on 15th Dec. 1956

The Tata Hydro-Electric System, comprising the Tata Hydro-Electric Power Supply Company, the Andhra Valley Power Supply Company and the Tata Power Company, is operated as an integrated electric power system serving an area in the State of Bombay of more than 1,000 square miles.

It is the largest power system in the country having a fixed capital expenditure in excess of Rs. 25 crores and an annual output representing more than one-fifth of the total electricity production.

Electric service is rendered to the textile mills and other industries of Bombay and the suburban areas, to the railways for electric traction, to local authorities, and, in bulk for retail distribution, to the electrical undertakings supplying Greater Bombay, Poona and ten other localities within the area.

The transmission network of the system consists of 576 circuit miles of 100,000-volt lines and the distribution network of 129 circuit miles of 22,000-volt overhead as well as 111 miles of 22,000-volt and 124 miles of 6,600-volt underground cables.

Substantial additions to the transmission and distribution network are expected to be made during the next few years.

The interconnected transmission lines of the Railway add another 272 circuit miles to form the combined Tata Hydro-Railway Grid.

Due to the change in the character of the system from one of pure hydro to a hydro-thermal and the increasing purchases of thermal

energy to meet the growth, it became necessary to levy a thermal surcharge of 15 per cent on 1-4-54 which was revised effective from 1-1-56 to 24½ per cent to meet the cost of thermal energy. This resulted in increasing the overall charge from 0.42 As. before levy of any thermal surcharge to 0.525 As. per kWh. Still, it is lower than the average price at the beginning of the Second World War and compares favourably with that in any large commercial centre in the world.

A small quantity of power is also being drawn from the operation of the Power Pool viz an arrangement whereby private diesel generator sets with consumers are used to supplement the system requirements.

The full capacity of the Chola Plant of the State Electricity Board has already been brought into use and has been used up. The first set of Trombay went into operation in Dec. 1956 and the second set was brought into commission in April 1957. This would add to the system 125 MW.

The firm capacity of the entire system will then be 417 MW.

Indications are that this is not adequate and will be used up as it becomes available. Therefore, a study is in hand for adding additional capacity to the system.

ELECTRICITY BOARD SCHEMES

The original Bombay State Electricity Board for the pre-reorganization Bombay State was reconstituted on 1st February 1957, and has now taken over the assets and liabilities of all the State Electricity schemes in the merged areas.

Members of the Board: U. N. Mahida (Chairman), P. C. Hansotia, J. K. Modi, P. H. Bhutta, K. C. Patel, G. L. Nattu.

Position as in March 1957:

Total installed capacity	..	1,71,104 kW.
Steam:		1,43,300
Hydro:		5,824
Diesel:		21,920.
Total number of towns and villages supplied with electricity	..	509
Total length of Transmission lines above 11 KV in miles	..	2,834
Total number of consumers	..	1,01,500
Total production	..	about 370 million units.
Total sale	..	about 308 million units.
Total expenditure on Electricity Schemes from 1950-51 upto 31st March 1957	..	Rs. 23.00 lakhs (approx.).
Amount spent in 1950-57 on Electricity Schemes	..	Rs. 0.50 lakhs.
Establishment expenditure for the year ending 31st March 1957	..	Rs. 26.92 lakhs.
Total estimated cost of the Schemes under the Second Five Year Plan	..	Rs. 30.00 lakhs.
Total estimated Foreign Exchange component required during the period	..	Rs. 17.10 lakhs.
Estimated Capital Expenditure for 1957-58	..	Rs. 9.47 lakhs.

As a result of the intensive work carried out by the Bombay State Electricity Board the per capita consumption of electricity contributed by the Board is expected to be 25 kWh at the end of the Second Plan as against 12 kWh at the end of the First Plan.

The names of the more outstanding projects with the installed capacity of each:—

North Gujarat Electric Grid Scheme	..	22,500 kW.
South Gujarat Electric Grid Scheme	..	22,500 kW.
Kolhapur-R.H.E. Scheme	..	6,000 kW.
Bhatpur Hydro Electric Scheme.	..	1,000 kW.
Khaperkheda Thermal Scheme.	..	30,000 kW.
Ballarshah Power House	..	22,500 kW.
Shahpur Grid Scheme	..	6,000 kW.
Rajkot Diesel station	..	2,000 kW.

The capital assets of the Board stood at about Rs. 31 crores on 31st March 1957.

North Gujarat Scheme

Under this scheme power is being purchased in bulk from the power station at the Ahmedabad Electricity Company at Sabarmati, which has an installed capacity of 127.5 kW, and distributed to various load centres in the North Gujarat area.

Capacity to the extent of 22,500 kW is assigned to the Board.

The first stage of the scheme has been completed. It comprises about 70 miles of 66/110 kV line, 14 miles of 33 kV and 50 miles of 11 kV transmission lines and about 180 miles of distribution lines, a receiving station at Sabarnati and 66/11 kV step-down transformer stations at Baroda, Nadiad, Anand, Bareilly and Petlad and 33/11 kV sub-stations at Kalol, Unreth together with 11 kV 400-230 Volts sub-stations in various towns and villages.

The supply under this scheme was commenced on February 15, 1951 and the licensees of the Industries as the case may be at Baroda, Nadiad, Anand, Kalol, Petlad, Bareilly, Vallabh Vidyanagar and Dakore-Unreth now receive power under the scheme. Besides this, 68 villages were also electrified.

The system demand established upto the end of 1956 was 19,800 kW and the number of consumers served 5,419.

The total transmission and distribution lines laid is 750 circuit miles.

The area within the economic reach of the scheme is about 2,400 sq. miles.

During the Second Five-Year Plan extensions to the North Gujarat Scheme have been planned. The main features are:

Extension of tinathana area of villages (Rs. 23.48 lakhs); Extensions to Dehgun and electric tube-wells (Rs. 27.84 lakhs); Electrification of Kalol-Vijapur Zone (Rs. 65.43 lakhs); Extensions to Janbisar and other villages (Rs. 34.99 lakhs); Extensions to major Sub-Stations to cater for additional loads (Rs. 37.81 lakhs); Extension to Karjan (Rs. 8.15 lakhs); power supply to the Surendra Nagar area from Parega li sub-station, costing approximately Rs. 35 lakhs.

The cost given in brackets represents original estimates.

The total cost of these extensions is Rs. 224.69 lakhs in the Second Five-Year Plan, out of which Rs. 64 lakhs are to be provided by the Government of Bombay. The balance will have to be met from the internal resources of the Board.

The funds earmarked by the Bombay Government for the North Gujarat schemes are 64 lakhs, the balance will therefore be met from the internal resources of the Board; as a result of the extension to the South Gujarat Scheme, loads in Baroda and the surrounding area can be met from the Utran power station of the Board under the South Gujarat Scheme.

South Gujarat Scheme

During the first Plan this scheme consisted of a steam power station at Utran near Surat, with three turbo-alternator sets of 7,500 kW each for supply of power in areas from Surat to Bulsar.

Supply under this scheme was commenced in November, 1952 and power is at present being given to Surat, Navsari, Bilimora, and also to Bulsar, Rander and Kathor users.

Besides this, Gandevi town and 10 villages in Bulsar Taluka are also supplied with electricity.

The diesel generating station at Surat with an installed capacity of 3,000 kW of the Surat Electricity Co. is interconnected with this scheme and is run as a controlled station when required.

The system demand upto end of March 1956 was 15,000 kW.

The number of consumers served was 1,154. The total transmission and distribution lines laid was 160 circuit miles.

An area of 900 sq. miles is within the economic reach of this scheme.

During the Second Five-Year Plan major extensions have been planned. They have also been approved by the Planning Commission, by which the installed capacity of the Utran power station would be augmented by three sets of 10,000 kW each. This will meet all additional loads expected to come on the system during the next five years and will also make possible supply to the Broach and Baroda loads from the South Gujarat Scheme, thus enabling corresponding blocks of power from the Ahmedabad Electricity Company's power house at Sabarnati to be distributed in the area north of Ahmedabad.

The revised estimate shows that the scheme might cost Rs. 181.20 lakhs.

A transmission and distribution system will supply power to needy areas.

Extension of Utran Set-up Station; a 66 kV line from Utran to Baroda via Broach, a distance of 80 miles will connect the north and South Gujarat schemes, a sub-station at Broach, a second circuit for the Utran-Navsari-Bilimora 66 kV Line.

Nursery Schemes

For isolated towns and rural areas beyond the economic reach of the grid lines and with possibilities of cottage and small-scale industries and agricultural pumping small diesel stations under diesel nursery schemes were established.

A good number of the merged States power houses were old and the distribution system outmoded and inadequate. Some of them were therefore closed down and connected to neighbouring grid schemes.

Large scale renovation schemes were started particularly in Himatnagar, Radhanpur and Devad Bana.

The total aggregated units supplied under this scheme was 5.1 millions and the number of consumers served upto the end of the First Plan was 18,000. The total distribution lines installed is 300 miles.

A list of some towns covered under the Nursery Scheme is given below :—

District	Towns covered	Remarks
Surat (Rs. 4.97 lakhs)	Ten villages in Bulsar Taluka.	Supply has already commenced; power in bulk was purchased from Bulsar licensee. These villages are now being supplied from the South Gujarat Grid Scheme.
Ahmedabad	Dhanduka.	Scheme was postponed due to financial stringency. The Central Government are giving a loan. Installation of diesel sets is in progress.
East Khandesh (Rs. 14.40 lakhs).	Dharangaon, Erandol and Parola.	Supply from the diesel power station (400 kW) has commenced.
Sholapur	Akluj.	Scheme was postponed due to financial stringency. The Central Government are giving a loan. Installation of diesel sets is being planned.
Poona	Lonavla-Talegaon area.	Power is being purchased from Tatas.
Satara (North) (Rs. 11.34 lakhs).	21 villages in Satara Taluka.	Power in bulk is purchased from Satara licensee. Supply has already commenced.
Satara (South) (Rs. 4.57 lakhs).	Islampur-Peth.	Supply from the diesel power station (150 kW) has commenced.
Ratnagiri (Rs. 23.16 lakhs).	1) Ratnagiri. 2) Vengurla. 3) Chiplun. 4) Malwan.	The supply from all the four diesel power stations (400 kW) each has already commenced. Arrangements have been made to instal two 200 kW sets each at Ratnagiri and Vengurla to meet a growing demand. A 200 kW set at Ratnagiri has been commissioned.

Phaltan-Bhatgar Hydro-Electric Project.—A demand of about 10,000 kW can be met from this source, provided the power station is linked up either with Koyna when developed or the Tata system at Poona.

At present Bhatgar Power House has an installed capacity of 1,024 kW. Power from this station is transmitted to Rajewadi, Shirwal, Nira, Narasapur, Lonand and Phaltan.

The number of consumers served was 548 and the maximum demand established was 560 kW.

Bhandardara-Randha Electric Scheme.—The existing Wilson dam across the Pravara River in Ahmednagar District lets down water in varying quantities in the Pravara Canal System. About 3½ miles down stream at Randha the river has a natural fall of 140 feet. Power is proposed to be generated at the foot of the Wilson dam and at Randha.

The scheme provides for the installation of two 7,500 kW sets at Bhandardara and two of 6,000 kW at Randha. Advantage is proposed to be taken of the nearness of Central Railway transmission lines at Igatpuri which form a part of Bombay-Poona Inter-connected System. In times of low output, one of the 18,000 kW sets at Chola will be brought into service.

Power will be supplied to Nasik, East and West Khandesh and Ahmednagar Districts where the demand is estimated to be 17,000 kW.

The capital cost of the scheme is estimated to be of the order of Rs. 700 lakhs.

Narmada River Project.—In order to meet the anticipated demands of power in the Fourth Five Year Plan it is imperative that the development of the lower reaches of Narmada River be so taken up as to enable the commissioning of the initial power house at Fursat (in Madhya Pradesh) together with storage facilities there, more or less by the end of the Fourth Five Year Plan.

For this purpose the Central Water and Power Commission are expected shortly to start the preliminary surveys and investigations. The Rs. 70 crores Fursat Power Project in Khandwa District is expected to generate 3,00,000 kW of power initially.

Tapti (Tapti) Project.—Under this project, which was initially intended to be an irrigation scheme only, it is now proposed to also develop hydel power with initial installed capacity of 24,000 kW

the ultimate capacity being 216,000 kW. The work is being carried out by the Central Water and Power Commission on behalf of the Bombay Government. The Tapti Hydel power when available will supply the power requirements of the South and the North Gujarat Electric Grid Schemes.

At present only the irrigation part of the project is being proceeded with because of financial stringency. Total cost: Rs. 6 crores.

Radhanagari.—The Radhanagari scheme is a multi-purpose project for irrigation, power generation and water supply and comprises construction of a dam, about 140 feet high above the deepest foundation across the Bhogavati River, about 32 miles from Kolhapur, and a power station with an installed capacity of 4,800 kW at Radhanagari in Kolhapur District.

Hydro-Electric supply was commenced from August 1952.

This is operated in conjunction with: The Emergency Irrigation Diesel Power Station (1,350 kW) for supplying power for irrigation and industries at Kolhapur.

The estimated cost of the two together is about Rs. 35.62 lakhs.

The interconnected system, besides supplying power to Kolhapur City which is partly served by Government and partly by the Kolhapur Electric Supply, supplies power to 39 agricultural pumps along Bhogavati and Panchanga rivers and to the licensees of Kolhapur, Ichalkaranji, Jaysingpur, Wadgaon, Hupri and seven other villages in the region.

The extension of the scheme towards Sangli and Miraj was executed under the Second Plan.

The total number of consumers served is about 5,000.

Chola Steam Station.—In order to relieve the acute power shortage existing in the Bombay-Poona area since 1946, it was decided, in consultation with the Railway Board, to extend the Railway's power station at Chola by an additional installed capacity of 54,000 kW (3 units of 18,000 kW each).

The scheme cost about Rs. 4 crores and is operated as a part of the Tata-Central Railway Inter-connected System.

This has been in operation since 1954. To ensure full supply to the Bombay-Poona area Tatas have set up a thermal station at Trombay. Later the Koyna project will contribute its supply of electric power.

The Chola Station has now been taken over by the Railways.

Koyna Project.—The first stage of development of the revised project as at present approved by Government now comprising storage of 36,045 m.c.ft. of water, behind a dam of 208 feet height above the river bed at Jalkawadi, sufficient to produce 240,000 kW of power.

The estimated cost of the dam, tunnel, necessary generating plant and transmission and transformation equipment for the first stage development is expected to be approximately Rs. 39 crores.

Upto Feb. 1958 about Rs. 10.35 crores was spent.

The foundation stone of this scheme was laid on January 16, 1954.

Supply of power is expected to start in 1961.

The dam is under construction, under the auspices of the Koyna Control Board.

The Koyna-Sholapur Transmission Scheme is based on the purchase of power from the Koyna Power House with major 110 kV sub-stations at Karad, Satara, Vishramnagar, Pandharpur and Sholapur.

To strengthen the Bhatgar system an initial arrangement for supplying power from the Tata's Ganeshkind sub-station near Poona is also contemplated under the scheme.

This scheme is likely to cost about Rs. 457.85 lakhs out of which Rs. 300 lakhs will be spent under the Second Plan.

The scheme forms part of the Second Five Year Plan Projects under the Bombay Electricity Board.

Initial supply of power from this Scheme is expected to be commenced six working seasons after the funds are allotted for the commencement of the work.

Some Power Houses

The capacity and cost of other power houses are given below:

Chhotu-Udepur (300 kW; Rs. 5.01 lakhs); Rajpila (410 kW; Rs. 3.70 lakhs); Himatnagar (160 kW; Rs. 2.83 lakhs); Radhanpur (60 kW; Rs. 97,929); Dharampur (215 kW; Rs. 1.66 lakhs); Mania (16 kW; Rs. 31,695); Santrampur (66 kW; Rs. 54,755); Devgad-Baria (300 kW; Rs. 1.27 lakhs); Banada (80 kW; Rs. 1.14 lakhs); Janjira (93 kW; Rs. 52,239); Jawahar (88 kW; Rs. 41,496); Wal (80 kW).

2-51-Crore Loan Scheme

This is a scheme sponsored by the Central Government for increasing employment opportunities. As it was sanctioned only towards the end of the First Five Year Plan period not much progress could be achieved in the First Plan. The scheme is, therefore, continued in the Second Plan period and works under it are in full swing. The extensions coming under this scheme are mainly the following:—

- Extension to Kadi Licensee.
- Electrification of Mahuda, Vina and Ankav.
- Electrification of Viramgam and Sonand.
- Electrification of Dholka and round about villages.
- Electrification of villages in the Nadlad-Petlad Zone and the Anand-Petlad-Camlay Zone.
- Electrification of tube-wells in Mehsana.
- Renovation of the existing diesel nursery schemes and the installation of the new diesel nursery schemes.

Revised Khandesh-Marathwada Electrification Scheme

This scheme contemplates power supply to the Khandesh and Marathwada areas. Stage I of the project is proposed to be completed during the Second Five-Year Plan and Stage II in the Third Five-Year Plan.

Under Stage I of the scheme it is proposed to extend the Akola (Paras) Power Station by the addition of a 30 MW turbo alternator set, and supply power to important loads in Khandesh and Marathwada areas, including the Railway load at Bhusaval for the proposed electrification of their Igatpuri-Bhusaval tracks.

There will be major 132 KV sub-stations at Bhusaval and Dhule, and 66 KV sub-stations at Parbhani, Puri, Nanded, Jalna and Aurangabad supplying power at 11, 22 and 33 KV to the towns of Bhusaval, Jalgaon, Haver, Faleapur, Sayda, Yaval, Amslner, Chalisgaon, Chopda, Dhule and Malegaon in Khandesh, and Parbhani, Puri, Jalna, Aurangabad, Nanded and Ganjakhed in the Marathwada area.

Under the Stage II of the scheme, in order to meet the increasing demands of these areas, a power station is proposed to be established at Bhusaval with an installed capacity of 2 x 30 MW capacity. Further transmission and distribution lines also will be laid and besides meeting additional loads in the towns already served under Stage I, power supply will also be made available to Jamner, Shendurni, Parhora, Nerdana, Shripur in Khandesh area and Salu, Purna, Manwat, Partur, Jantur, Hingoli, and Patluri in Marathwada area.

The total cost of the scheme is Rs. 1,420 lakhs of which Rs. 626 lakhs is the estimated cost of the 1st Stage.

The scheme has only recently been approved by the Bombay State Electricity Board and is under the consideration of the Government of Bombay and the Planning Commission.

MERGED AREAS

Vidarbha Region

The Khaperkheda Scheme: This consists of a thermal generating station at Khaperkheda, situated 8 miles by road from Nagpur, with 3 turbo alternator sets of 10,000 kW each.

Power generated here is transmitted to Amaravati a distance of 120 miles from Khaperkheda. From Amaravati another line, 29 miles long, enters to the loads in Achalapur area. Akola and Khamgaon areas in Akola District are supplied over 112 miles of 66 KV line from Amaravati. The 66 KV lines are tapped at Wardha, Fulgaon, and Murtizapur to feed the loads in these areas. 33 KV and 11 KV distribution lines totalling 280 miles are laid to supply the loads at Chandur, Dhamsgaon, Akot, Yeotmal, Darwa, Digra, Pusad, Karanja, Baryapur and Basim from the sub-stations.

From the Khaperkheda power station a 66 KV line also takes off towards the north to supply power to Mansar, Tumsar and Gondia in Bhandara District; the Balaghat and Katangi areas in Madhya Pradesh are also fed from Khaperkheda over this line. The supply of power also extends over a 66 KV line to Sonner, (Tilindwar, Barkul) and as far as Parnara in Madhya Pradesh.

From the main 66 KV sub-station at Nagpur, all the important taluka towns and commercial centres are fed by means of 33 KV and 11 KV distribution lines, totalling about 200 miles in length.

In the Second Five-Year Plan, under the head "Development in Southern Grid", it is proposed to extend the Khaperkheda Thermal Station by an additional set of 30,000 kW and to lay 11 miles of 66 KV line from Khaperkheda to Bhandara and to erect necessary sub-stations. The project also provides for a 30,000 kW Thermal Station at Paras near Akola and laying transmission lines in Amravati-Akola-Malkapur region and erection of necessary sub-stations, 203 miles of 66 KV lines, 117 miles of 33 KV lines and 250 miles of 11 KV lines.

The total estimated cost of the scheme under the Second Five-Year Plan is Rs. 725.59 lakhs.

The Ballarshah Thermal Station is the other central power station situated in the Southern Grid area. This comprises 3 turbo alternator sets of 7,500 kW each and is interconnected with the Khaperkheda system over 66 KV transmission system at Wardha. The

double circuit line of length 89 miles between Wardha and Ballarshah also supplies power to the Hingnaghat and Warora areas in the Wardha and Chanda Districts respectively.

The maximum demand of this interconnected Khaperkheda-Ballarshah system viz., the Southern Grid, has gone to about 30,000 kW and the anticipated load in 1960 is about 53,000 kW.

The Ballarshah station (22.5 MW) lies in the coal mining region of Vidharba.

The capital expenditure spent on the various schemes in the Vidarbha area which passed to the Bombay State Electricity Board is approx. Rs. 1029.39 lakhs.

Saurashtra Electricity Board

Shahpur Station: This project consists of two turbo-sets of 3,000 kW each at Shahpur, on the bank of the river Oxat in the district of Sorath. The power generated at this station is stepped up to 33,000 volts for distribution to important places in the areas of Junagadh, Dhoraji, Upleta, Manavadar, Keshod, Mangrol, Veraval and Kodinar. The area of supply practically covers the whole of Sorath and a part of Madhya Saurashtra.

Three 33 KV lines going to Upleta, Manavadar and Veraval form the backbone of the grid system based on this station.

The scheme was commissioned in December 1956.

The estimated cost of the scheme is about Rs. 153.66 lakhs.

The construction of lines to various load centres included under the First Plan was delayed and an amount of Rs. 50 lakhs will be spent in the Second Plan to complete the above scheme. It is also proposed in the Second Plan to extend the Shahpur Thermal Station by the installation of 2 x 5,000 kW turbo-alternators sets and to supply power to Veraval and Kodinar areas by the extension of suitable lines.

The total estimated cost of this Shahpur-Veraval Scheme in the Second Five Year Plan is Rs. 100 lakhs.

Bhavnagar Power House: Bhavnagar Power House with an installed capacity of 2,000 kW belonged to a private company, viz. Godhra Electricity Co. Ltd. A new company called the Bhavnagar Electricity Co. Ltd. was formed in 1952 wherein the State invested Rs. 20 lakhs to acquire interest in the power house before proceeding with the expansion.

The old power house was taken over by the new company in April 1954. Soon after taking over one 2,000 kW turbo-set was added. One 45,000 lbs. per hour boiler was also installed. As the old building was not large enough a new building was constructed.

The scheme as included in the Second Five Year Plan consists of the installation of 2 x 4,000 kW turbo-sets in the new power station and extension of lines from Bhavnagar Power House for power supply to Sihor, Sonagadh, Palitana, Lathi and Kartej. The estimated cost of the Board's contribution in the Bhavnagar Electricity Co. Ltd. for the establishment of a Grid in Bhavnagar area is Rs. 50 lakhs only.

Power Houses at Rajkot, Gondal, Dhrangadhra, Porbunder, Dhoraji and Palitana: The expansion in the above areas was necessary mostly to regularise, and to make available, dependable power to the community, which was mainly dependent upon the surplus power available from the industrial concern in those places.

The expansion of the six power houses mentioned above added nearly 4,300 kW of generating capacity, 38 miles of 33 KV lines, 12 miles of 11 KV lines, H.T. and L.T. Sub-stations, 750 kW of rectifying plant, etc.

The Rajkot area scheme consists of an extension to the existing diesel station at Rajkot by the installation of 3 x 1,000 kW diesel sets and the conversion of the existing D.C. supply to A.C. supply and the extension of transmission and distribution lines to meet the increasing demand in Rajkot, Gondal, Toramba and

Pudhari. The station capacity has been extended by 3,000 kW and transmission work including conversion is in progress, 1,379 consumers were converted to A.C. supply during the year.

The estimated expenditure of the scheme in the Second Plan is Rs. 22.57 lakhs.

The Porbunder Scheme consists of the installation of 3 x 5,000 kW turbo-sets to supply power to Porbunder, the Soda Ash and Caustic Soda Plant of Messrs. Birla Bros. and the cement factories that are proposed to be set up in the region. Power is proposed to be transmitted over 33 and 11 KV lines to Kutiana and Bhavnagar towns. The work on steam station erection is in progress.

The estimated expenditure of the scheme is Rs. 168.16 lakhs during Second Five Year Plan period.

The area was served by a diesel power house at Jannagar belonging to Jannagar Electric Supply Co. and the Sikka Steam Station of Messrs. Nawanager Electric Supply Co. Both these stations were acquired by the Saurashtra Electricity Board. The scheme of power supply to this area in the Second Plan therefore consists of extensions to the diesel power house at Jannagar and the Sikka Steam Station at Sikka.

The extension of the Jannagar diesel station was planned by the installation of 2 x 646 kW and 1 x 1,000 kW diesel generating sets, and the conversion to A.C. of 1,200 street lights and 7,000 consumers. Two 646 kW diesel generating sets were erected, tested and commissioned during the year. 3 x 300 KVA sub-stations were erected and energised. 8 miles of L.T. lines were laid and 250 street lights and 1,018 consumers converted to A.C. supply during the year.

The Sikka Steam Station had an installed capacity of 8,000 kW with two turbo alternators of 4,000 kW capacity each. The extension envisages the addition of two more turbo-generators of 4,000 kW capacity each and associated equipment. Both the turbo-sets have been ordered and one has been received at the site. One boiler purchased from Messrs. Sholapur Spinning & Weaving Mills was to be commissioned in a short time while the other from Messrs. Skoda (India) Ltd. is under erection.

The estimated cost of the scheme in the Second Five-Year Plan is Rs. 95.32 lakhs.

The Surendranagar area scheme consists of a step-down station at Surendranagar for which power will be transmitted over 66 KV S.C. line from the North Gujarat Electric Grid Sub-Station at Barjod. Power will be supplied to Limdi and Dhrangadhra from Surendranagar by providing suitable 22 KV distribution lines.

The Morvi-Wankaner scheme as originally proposed consisted of the installation of 2 x 2,000 kW turbo-sets at Morvi, part of this power being supplied to the Wankaner Licensee. The scheme is under modification. It is now proposed to connect up the Licenses power house at Morvi with the Board's Power House at Rajkot by 66 KV transmission lines.

Marathwada

In this region there are only two important schemes, at present, one at Aurangabad and the other at Nanded.

At Aurangabad a diesel generating station with an installed capacity of 787 kW serves 1,890 consumers whose total connected load amounts to 1,706.6 kW. This system consists of 19.5 miles of 3.3 KV transmission lines and a distribution network of 23.5 miles.

At Nanded, 250 kW of power purchased from the local Omansabhi Mills in bulk is distributed to 1,487 consumers, with a connected load of 1,378.2 kW. The system consists of 8.25 miles of 6.6 KV lines and a distribution network of 15.6 miles of L.T. lines.

The new Nanded Thermal Power Station scheme envisages installation of 3 diesel generating sets of 500 kW at Nanded, and is expected to meet the full demand of Nanded Town.

22 KV transmission lines 40 miles long will be laid to Purna and Farbhani. The estimated load demands are about 200 kW at Purna and 400 kW at Farbhani.

The estimated cost of the scheme in the Second Five-Year Plan is Rs. 16.82 lakhs.

The rural electrification scheme included in the Second Five Year Plan consists of the electrification of 5 towns, viz., Patna, Bhir, Hingoli, Puri and Osmanabad by installing small diesel nursery stations with the following installed capacities. It is essentially a spill-over scheme from the First Plan :

Bhir, 2 x 50 kW; Osmanabad, 2 x 50 kW; Puri, 2 x 50 kW; Hingoli, 2 x 50 kW; Patna, 2 x 200 kW.

The total cost of the scheme is Rs. 16.18 lakhs.

The Purna Hydro Electric Scheme is being executed under the auspices of the Government of Bombay. However, it is expected that the transmission and distribution portion of the project would be handed over to the Bombay State Electricity Board. Some important features of the project as at present sanctioned, are as under :—

The scheme envisages the construction of a storage dam 132 ft. high at Yeldari on the River Purna, a tributary of the Godavari. The reservoir has a gross capacity of 25,307 million cu. ft. and a net capacity of 16,132 million cu. ft.

In the power station situated at the top of the dam, it is proposed that 2 units of 3,000 kW be installed initially with a provision for the addition of a third unit of the same size at a later stage.

The total estimated cost of the project is Rs. 303.92 lakhs and can save the power needs of the industrial towns in the Marathwada Districts of Farbhani, Nanded, and Aurangabad.

Power Projects of Kutch

Kutch has about 964 villages and 10 towns, out of which Bhuj is the largest. At the beginning of the First Plan, Kutch had a total installed capacity of 615 kW (all diesel generation) and the total demand on these power stations was about 275 kW.

Out of a total of Rs. 112 lakhs allotted during the First Plan Rs. 23 lakhs was spent for the following projects :

- Taking over of the electrical undertakings at Mandvi and Bhuj from the Kutch Development Co.
- Construction of a new power house at Bhuj and conversion of D.C. to A.C. in this town.
- Rural electrification of the Nakhtrana area.
- Supply of electricity to Kandla Port and adjoining areas.
- Power station at Mundra.
- Extension of electric lines to 15 villages around Bhuj, Mandvi and Mundra.

Of the above numbers (i) and (ii) were completed during the First Plan period.

The rest would be completed during the Second Plan period for which a provision of Rs. 88.9 lakhs has been made.

The Central Power Station at Kandla and the rural electrification schemes consist of the installation of 2 x 3,000 kW turbo-sets at the Central Steam Station at Kandla, the major port of Kutch and the west coast area at a capital cost of Rs. 68.49 lakhs. 33 kV lines are contemplated from this station to supply the loads at Bhuj, Anjar, Bachan, Nakhtrana, Mandvi and Mundra from where 11 KV lines will meet the rural loads nearby.

Diesel Stations of 300 kW and 600 kW capacity respectively are also contemplated at Rapar and Kothara.

A number of villages are also proposed to be electrified during the Second Plan at an estimated cost of Rs. 120.99 lakhs.

HOUSING

Notes are given below about housing projects in Bombay.

In Bombay city itself it might be pointed out there are about 140 slum areas housing nearly half the city's population.

There are about 200,000 single-room tenements which house about 1,200,000 persons.

About 20,000 to 55,000 residential buildings are over 60 years old. About 9,000 of these accommodate as many as 500,000 persons.

The State has 21 slum clearance projects at a total cost of Rs. 2.67 crores (Union Govt. subsidy 25 per cent, loan 50 per cent). Of these 21 projects five are for the Poona Corporation (1,930 total one-room tenements), seven are for the Ahmedabad Corporation (1,856 total one-

room tenements), the remaining nine projects for the Bombay Corporation (2,342 one-room tenements).

Practically all the tenements have individual bath and W.C. for each unit.

They are due for completion by March 31, 1960.

There is a Rural Housing Cell for Bombay State at the State headquarters. It will provide technical guidance to local authorities in drawing up master plans for housing projects.

In Special Multi-purpose Projects—Community Development—National Extension Service Block areas, Collectors and Deputy Commissioners have been given power to advance loans to villagers on certain conditions.

In 1957-58 Rs. 3,80,000 were allotted for subsidizing housing for Scheduled Tribes, and Rs. 1,50,000 for Scheduled Castes.

BOMBAY HOUSING BOARD

The achievement of the Bombay Housing Board is given below in a tabular form: The position is as it existed at end of Aug. 1957.

No.	Scheme.	Tenements completed.	Under construction.	Total.	Total exptl. (Rs. in lakhs)
	(A) Industrial Housing.	17,050	4,864	21,914	771.152
	(B) Low Income Group Housing.				
1.	New construction of buildings	2,067	—	2,067	122.82
2.	Reconditioned hutments	1,187	—	1,187*	28.98*
3.	'Own Your Own House' scheme for Low Income Group	—	18	18	1.00
4.	Development of sites for Low Income Group people (Juhu and Vile Parle)	—	—	—	2.70
	(C) Rehabilitation Housing.				
	Housing for D.P.s.	25,162	828	25,990	486.00
	(D) Schemes on behalf of Private Industries.				
5.	Burmah-Shell Oil Refineries Ltd.	500	—	500	36.95
6.	Juhu-Vile Parle Development Scheme works of Development of 18 co-operative Housing Societies only in the area.	—	—	—	75.91
	Total	45,906	5,710	51,616	1325.572

* 188 Military Hutments have since been demolished and the credits accrued have been adjusted accordingly.

During the Second Plan it is proposed to construct 16,623 tenements (old State) at an estimated cost of Rs. 6.58 crores.

LABOUR AND SOCIAL WELFARE DEPARTMENT

The Government of Bombay undertakes construction of tenements for industrial workers under the Industrial Housing Schemes sponsored by the Government of India.

Till the end of the year 1956-57, the construction of 15,872 tenements costing Rs. 538.78 lakhs had been completed and the construction of 12,702 tenements costing Rs. 440.85 lakhs was under progress.

These tenements were constructed at Bombay, Ahmedabad, Nagpur, Rajkot, Nanded and other industrial centres.

The construction of tenements is undertaken through certain statutory bodies, viz., the Bombay Housing Board, the Saurashtra Housing Board and the Vidarbha Housing Board.

In Marathwada, the construction is departmentally undertaken.

Particulars about Low Income Group Housing Schemes carried out under the auspices of the Labour and Social Welfare Department are given below :

No. of tenements completed upto June, 1957	1,960
Land developed	95 acres
Total expenditure on the Scheme	Rs. 214 lakhs

Loan is given to various categories of persons and institutions such as individuals, Co-operative Housing Societies, Local Bodies like Municipalities, Panchayats, Charitable Institutions, etc.

No rent is charged in the case of individuals as they have taken loans for their own residence. In the case of Local Bodies, they may fix the rents in accordance with the cost of construction, floor area, etc.

The scheme is intended to relieve the housing shortage in the case of persons whose total annual income does not exceed Rs. 6,000. The loan is granted upto 70 per cent. of the estimated cost of construction of a tenement subject to the maximum limit of Rs. 8,000 at rates varying from 5 to 5½ per cent. per annum. It is repayable by half yearly or annual equated instalments within a period of 10, 20 or 30 years. The person repaying the loan instalments regularly gets a rebate of ½ per cent.

For the purpose of individuals who are not in a position to obtain house building sites and construct houses with loans themselves, the Bombay Housing Board has been given a loan to construct houses and sell these houses on a hire-purchase basis.

The Scheme of Low Income Group Housing has recently been modified by the Government of India so that the State Governments are authorised to construct houses for rental purposes on No Profit No Loss basis, and accordingly a programme for the construction of houses in the larger cities by the Bombay Housing Board is under active consideration.

The details of construction of tenements, shops and school buildings for Displaced Persons are given as under :-

Item.	Completed.
Residential tenements in Displaced Persons Colonies ..	38,113
Shops	2,565
School buildings	15

Every Collector of a District in the residuary State area is competent to grant loans for that area. For Vidarbha the Secretary, Vidarbha Housing Board, Nagpur, is competent to grant loans.

Government has decided to participate in the Slum Clearance Scheme of the Government of India, which provides for a Central loan of 50 per cent and a subsidy of 25 per cent. on condition that the State Governments and local bodies concerned bear the balance of the cost in their share of the subsidy.

It is proposed to concentrate first on large industrial cities such as Bombay, Ahmedabad, Poona and Nagpur, where slum conditions are bad.

Projects worth about Rs. 4 crores have already been forwarded to the Government of India, and that Government has sanctioned schemes worth Rs. 47 lakhs.

Proposals from other smaller Municipalities have also been called for and the scheme would be extended to these towns, if sufficient funds are available.

MARATHWADA

Brief notes on industrial housing and low-income group houses in Marathwada are given below.

No. of tenements completed upto the end of 1957 : 1,490 (Industrial Labour Houses) ; 207 (Low Income Group) ; Total : 1,757.

No. of tenements under construction : nil.

Total expenditure upto 31st March, 1957 : Rs. 49,30,903.

Size of tenements and no. of each class : 577 one-room ; 348 two-room ; 32 three-room. The size of a room is 12' x 9'.

Cost of building : One-room Rs. 2,500 ; two-room Rs. 4,000 ; three-room Rs. 7,000.

Rent charged (provisional) : one-room Rs. 10 ; two-room Rs. 18 ; three-room Rs. 26. These are inclusive of water or electricity charges.

The location of these tenements is as follows.

Industrial Labour Houses : Aurangabad 300 ; Jalur 200 ; Jalna 283 ; Nanded 807.

Low Income Group : Aurangabad 60 ; Nanded 10 ; Jalur 40 ; Parbhani 26 ; Jalna 40 ; Hingoli 10 ; Basmathnagar 10 ; Udgir 15 ; Osmanabad 10 ; Bhilir 15.

SAURASHTRA HOUSING BOARD

At the end of 1955, 700 tenements were completed under the industrial housing scheme. The target for the second Plan is a total of 6,034 tenements.

The tenements are one-roomed, with a total floor space (including bath, W.C.) of 288 sq. feet. Each tenement costs about Rs. 3,300. The Government of India has fixed the standard rent at Rs. 10 per month. The rent actually charged is in some cases Rs. 9 and in others Rs. 10.

The District-wise distribution of the 700 tenements completed is as follows :

Godilwad 200, Halar 200, Madhya Saurashtra 200, Sorath 40 and Zalawad 60.

During the year 1955-56 the construction of 1,000 tenements was undertaken by the Board under the Subsidised Industrial Housing Scheme.

During 1956-57 the construction of another 834 tenements was taken in hand.

A sum of Rs. 19,28,939 was debited for the construction of all these tenements upto 31st March, 1957.

In all, it is proposed to build 4,334 tenements during the Second Plan under this scheme.

With a view to providing fully developed plots to Co-operative Societies and individual applicants for the construction of houses on No Profit No Loss basis, it is proposed to develop 30 acres of land for each of the five years of the second Five-Year Plan from 1956-57 to 1960-61 at an estimated cost of Rs. 17,50,000. A sum of Rs. 3,45,000 for the development of 30 acres of land during 1956-57 is already sanctioned by the Government of India, and that amount has been allotted to the Board.

A sum of Rs. 3,45,000 was provided in the budget estimate for 1957-58 for the development of 30 acres of land at Jamnagar.

VIDARBHA HOUSING BOARD

Details about subsidised industrial housing schemes and low-income group housing schemes executed by the Vidarbha Housing Board are given below.

Under the industrial housing scheme plans for about 4,350 one-roomed tenements were drawn up during the First Plan period under the Government of India's original as well as the modified schemes of 1949 and 1952. Of these 4,350 tenements, 1,680 were completed.

The progress achieved to the end of Aug. 1957 is as follows :

Period.	Qrs. built by Co-op. Societies.	Qrs. built by Local Bodies.	Qrs. built by Individuals.	TOTAL
1957-58 (i.e. to end of Aug. 1957)	437	135	124	696
In progress	462	135	61	661

The tenements built under this scheme are being allotted on hire-purchase basis or on outright sale.

EMPLOYEES' STATE INSURANCE CORPORATION

The following particulars show the position as on 31st Dec. 1957 in relation to the Bombay region (that is, the old Bombay State, Saurashtra and Kutch) :

Total number of employees : 8,71,516.

The following particulars show the position as on July 1, 1957 in relation to Greater Bombay :

Total number of insured workers : 5,54,422.

Total number of panel doctors : 1,196 (118 ayurvedic, 6 unani, rest allopathic).

Total number of general beds sanctioned : 500.

Total T. B. beds : 250.

The area provided by a tenement is roughly 220 sq. feet. The standard cost of building is about Rs. 2,500 inclusive of cost of land. The rent charged is Rs. 10 per month.

Details regarding the town-wise distribution of the tenements built are as follows :

Fifty tenements were built by the Vidarbha Mills at Achnapur. These were completed on May 1st, 1955. They were built under the Government of India's original scheme of 1949.

Under the Government of India's modified scheme of 1952, 459 tenements were built in Nagpur, 100 at Pulgaon and 100 at Hinganghat.

A third scheme was set on foot to construct 1,000 tenements at Nagpur and 200 at Akola. While the 980 tenements at Nagpur were completed, work on the 200 tenements at Akola has not started.

A fourth scheme has been drawn up for the construction of 2,000 tenements in Nagpur, 200 in Akola, 100 in Pulgaon and 200 in Achnapur. But work is still in the preparatory stage.

Under the Low Income Group Housing Scheme, a 30 year loan is advanced to the State Government for disbursement to persons whose income does not exceed Rs. 6,000 a year or to Housing Co-operative Societies consisting of such persons. The loan assistance is limited to a figure not exceeding 80 per cent of the actual cost of the house, inclusive of land, subject to a maximum of Rs. 8,000 per house. In the case of local bodies the loan assistance is limited to a figure not exceeding 80 per cent of the actual cost of the house, including land subject to a maximum of Rs. 2,500 per house. The remaining 20 per cent of the cost will have to be found from the builders' own resources.

The accommodation to be provided in each house built under the scheme, should not be less than 280 sq. ft. of floor area, and normally not more than 1,200 sq. ft. The Housing Board was asked by the old Madhya Pradesh Government to implement the Scheme.

The total amount of loan obtained from Government to the end of March 1957 was Rs. 1,10,94,400. A further sum of Rs. 5,00,000 was received from Government in June 1957 for disbursement during 1957-58 under the Scheme. Thus the total amount of loan obtained from Government was Rs. 1,15,94,400 of which Rs. 1,08,95,542 was disbursed to the end of October 1957.

The progress achieved to the end of Aug. 1957 is as follows :

Period.	Qrs. built by Co-op. Societies.	Qrs. built by Local Bodies.	Qrs. built by Individuals.	TOTAL
1957-58 (i.e. to end of Aug. 1957)	437	135	124	696
In progress	462	135	61	661

The tenements built under this scheme are being allotted on hire-purchase basis or on outright sale.

Number of diagnostic centres : 6, Number of ambulances : 6.

Number of laboratory tests : 2,08,394; Number of persons screened : 41,394; Number of persons X-rayed : 46,974; Number of approved chemists : 104; Number of costly drugs : 195.

The following particulars show the position as on 31st Dec. 1957 in relation to Vidarbha :

In the eight Districts here the scheme has so far been implemented in three towns : Nagpur, Akola and Hinganghat. (The last in Wardha District.)

The number of employees covered : 39,500.

Diagnostic and special treatment are provided in the Mayo Hospital and the Medical College Hospital, Nagpur.

General medical treatment is provided under the 'service system,' that is, in the State Insurance dispensaries.

The number of beds reserved in Nagpur: 45 (includes 10 T.B. and 10 maternity beds); in Akola: 6; in Hinganghat: 4.

In addition to the above, five T.B. beds are reserved in the T.B. Sanatorium at Buldana.

The offices concerned are:

1. Employees' State Insurance Corporation, Bombay Regional Office, Colaba Causeway, Bombay 5.
2. Administrative Medical Officer, The Employees' State Insurance Scheme, Bombay State, Indian Mercantile Chambers, Ballard Estate, Bombay 1.
3. Employees' State Insurance Corporation (Kanpur Regional Office), 7/202, Swarup Nagar, P.O. Box 169, Kanpur.
4. Regional Administrative Medical Officer, Employees' State Insurance Scheme, Vidarbha Region, Nagpur.

The last two for the Vidarbha area.

(See also Employees' State Insurance Corporation in the article 'Labour'.)

AAREY MILK COLONY, 1957

Started: March 1949.

Area: 3,167 acres.

Number of dairy farm units at Aarey: 28.

Number of buffaloes and other stock: 17,300 (Sept. 1957).

Total quantity of milk per day from Aarey: 2,400 maunds.

Total quantity of milk per day from Anand: 800 mds.

Number of milk distribution centres in Greater Bombay: 843.

Total number of consumers taking milk from Scheme: 15,00,000.

Quantity of toned milk distributed to school children in Bombay city per day: 60,000 in 6oz. bottles.

Value of milk distributed per annum Rs. 3,60,00,000.

Number of bottles filled daily at the colony: 500,000.

Total quantity of whole milk processed per day: 2,200 maunds.

Total quantity of toned milk processed per day: 2,200 maunds.

Government employees working in the scheme: 5,000

Private employees of the cattle-owners: 2,500.

Sale price of whole milk per seer: 88 nP.

Sale price of toned milk per seer: 44 nP.

LABOUR

Particulars about labour in Bombay State are given below:

Total number of registered factories: 10,813 (As on 31st Dec. 1956).

Number of Works Committees functioning: 286 (24 in Saurashtra and Kutch, 'Nil' in Vidarbha, 2 in Marathwada and 200 in the remaining areas of the State).

Average daily number of workers employed in factories: 9,80,333 (in 1956).

Number of towns covered by the:

Bombay Shops & Establishments Act: 86.

Saurashtra Shops & Establishments Act: 22.

Central Provinces & Berar Shops and Establishments Act: 14.

Hyderabad Shops & Establishments Act: 16.

Number of industries covered by the Bombay Industrial Relations Act, 1946: 10.

Number of workers covered by the Bombay Industrial Relations Act, 1946: 5,24,500 (As on 1st Aug. 1957).

Number of registered trade unions in the State: 1,599 (As on 31st March 1957).

Total membership of registered trade unions 7,75,688 (As on 31st March 1957) in respect of 1,176 unions. The membership figures of 423 unions from the merged areas is not available.

Number of Regd. trade unions affiliated to I.N.T.U.C.: 176 (As on 31st March 1957) *.

Membership of unions affiliated to I.N.T.U.C.: 2,31,434 (As on 31st March 1957) *.

Number of regd. trade unions affiliated to A.I.T.U.C.: 38 (As on 31st March '57) *.

Membership of unions affiliated to A.I.T.U.C.: 57,914 (As on 31st March '57) *.

Number of regd. trade unions affiliated to H.M.S.: 81, (As on 31st March 1957) *.

Membership of unions affiliated to H.M.S.: 90,767 (As on 31st March 1957) *.

Total number of strikes: 143 (Jan. to June 1957)

Total number of workers involved in the strikes: 95,428 (Jan. to June 1957).

Total number of man-days lost due to the strikes: 3,70,662 (Jan. to June 1957).

The number of welfare centres in the

(i) Saurashtra and Kutch Areas: 25.

(ii) Vidarbha Area: 7.

(iii) Marathwada Area: 3.

(iv) Remaining Areas of the State: 50.

Attendance at these centres:—

(i) Saurashtra & Kutch Areas: 10,27,928 during 1955-56.

(ii) Vidarbha Area: 50 or more workers attend each centre daily.

(iii) Marathwada Area: About 100 per day.

(iv) Remaining Areas of the State: 1,87,16,889 during 1956-57.

WAGES

The statement below shows the per capita annual earnings of factory workers during the year 1956:

Industry.	earnings Rs.
Processes allied to agriculture (Gins and Presses)	141-60
Food except beverages	603-00
Beverages	1,195-03
Tobacco	476-86
Textiles	1,474-87
Footwear, other wearing apparel and made-up textile goods ..	1,051-90
Wood and Cork except furniture ..	829-72
Furniture and fixtures	970-02
Paper and Paper products	971-17
Printing, publishing and allied industries	1,269-07
Leather and Leather products (except footwear)	977-70
Rubber and rubber products ..	995-47
Chemicals and chemical products ..	1,384-74
Products of petroleum and coal ..	1,812-94
Non-metallic mineral products (except products of petroleum and coal)	832-39
Basic metal industries	1,316-56
Metal products (except machinery and transport equipment) ..	1,271-09
Machinery (except electrical machinery)	1,268-15
Electrical machinery, apparatus, appliances and supplies ..	1,512-40
Transport equipment	1,819-03
Miscellaneous industries	1,170-06
Electricity, gas and steam	1,563-37
Water and sanitary services ..	1,273-85
Recreation services (cinema studios)	1,353-06
Personal services (laundries, dyeing and cleaning)	854-91

BOMBAY STATE FINANCIAL CORPORATION

The Bombay State Financial Corporation was set up by a notification of the Government of Bombay dated 30th November 1953 in exercise of the powers conferred by the State Financial Corporation Act, 1951.

The Corporation started functioning on 1st December 1953.

With effect from Nov. 1, 1956 the Bombay and Saurashtra State Financial Corporations were amalgamated and the new Corporation is called the Bombay State Financial Corporation, with headquarters in Bombay and a branch office in Rajkot.

It is proposed to open a branch office in Nagpur also.

The main office is at the United India Building, Sir Phirozshah Mehta Road, Bombay.

The branch office is at Vijay Kunj, Jagnath Road, Rajkot.

The main object of the Corporation is to provide financial assistance to medium and small-scale industrial concerns in the State for purposes of purchase of land, plant and machinery and other assets for renovation and expansion of existing units and for the development of new ones.

Under an arrangement with the Government of Bombay, the Corporation, on behalf of the Government of Bombay, considers applications from small and medium scale units, under the State Aid to Industries Rules from Rs. 10,000 up to Rs. 75,000 and in exceptional cases up to Rs. 1 lakh. Liberal terms are offered to the prospective loanee concerns under the scheme, the rate of interest chargeable being 3 per cent for loans up to Rs. 50,000 and 5 per cent for loans up to Rs. 1 lakh.

Industrial concerns which are eligible for financial accommodation from the Corporation are those engaged in or to be engaged in the manufacture, preservation or processing of goods, or engaged in mining or in the generation or distribution of electricity, or other forms of power.

The Government of Bombay has fixed the authorised capital of the Bombay State Financial Corporation at Rs. 4 crores divided into 400,000 fully paid-up shares of Rs. 100 each of which 200,000 fully paid-up shares of the total value of Rs. 2 crores were issued and subscribed.

The shares of the Bombay State Financial Corporation are guaranteed by the State Govern-

ment as to the repayment of the principal. Payment of annual dividend at the minimum rate of 3½ per cent. per annum is also guaranteed by the State Government.

The dividend payable on shares of the Corporation is limited to a maximum of 5 per cent. per annum.

In October 1957, the Corporation issued 4½ per cent 1957 10-year bonds of the face value of Rs. 1,16,50,800 at Rs. 99/8 per cent. Repayment of the principal and interest at 4½ per cent on the bonds is also guaranteed by the Government of Bombay.

Rate of interest for loans advances: 6½ per cent.

The period of loan is decided on merit but will not generally exceed ten years.

The amount of loan is advanced to the extent of 50 per cent. of the net value of the fixed assets, consisting of land, building, plant and machinery.

The Corporation received (inclusive of Rajkot branch) 64 applications during 1957-58 and the total amount of loan applied for, exceeded Rs. 1,95,00,000. The Board of Directors of the Corporation sanctioned loans of the aggregate amount of Rs. 3,21,20,000 till that date.

* Excludes information for Marathwad, Vidarbha, Saurashtra and Kutch.

SECOND FIVE YEAR PLAN

The Plan for the new Bombay State involves a total outlay of Rs. 350.22 crores over the Second Plan period. For the year 1957-58 the programme was to involve an expenditure of Rs. 73.43 crores. This programme is, as always,

subject to minor modifications. The details of the allotments are given below.

In addition to this programme the State Government will undertake schemes sponsored by the Central Government. The entire cost of these schemes is borne by the Centre. They are

not, therefore, shown below. Prominent among these schemes are those relating to national highways, roads financed from the Central Road Fund, rehabilitation schemes, certain special backward classes schemes and the local development works programme.

(Rs. in lakhs)

GRAND TOTAL	7,677.74

GREATER BOMBAY

On 1st Feb. 1957 Greater Bombay was enlarged by the addition of 34 villages of the Thana District having an area of about 75 sq. miles and a population of about 2 lakhs.

The area of Greater Bombay now would be about 175 sq. miles and the population over 30 lakhs.

The areas added include Malad, Kandivli, Mulund, Goregaon and Dahisar.

The new northern boundary now runs from the north of Dahisar village in the west, in the centre between the mile stones 21 and 22 on the Agra Road, and in the east north of Mulund Municipality.

The municipal area of Greater Bombay described above is also the area covered by Bombay City and the Bombay Suburban District from the point of view of revenue division.

The area of Bombay City is 25 sq. miles and the population 2,329,020 (1951 census). The area of the Bombay Suburban District is now about 150 sq. miles and the population about 7 lakhs (1951 census).

The Collector for Bombay City is also the Collector for the Bombay Suburban District. Bombay City Collectorate is directly under the Government and is governed in accordance with the provisions of the Bombay City Land Revenue Act of 1876.

The Bombay Suburban District has besides the Collector one Deputy Collector and two Mamlatdars one for each of the Talukas Andheri (also called South Salsette) with headquarters in Andheri, and Borivli with headquarters in Borivli.

The courts of Judicial Magistrate, First Class and Civil Judge (Junior Division), Borivli, were abolished.

Instead, three courts of Presidency Magistrates were established, two at Borivli and one at Mulund to deal with criminal cases. Civil suits up to the value of Rs. 3,000 will be disposed of by the Court of Small Causes, Bombay, and those of the value up to Rs. 25,000 by the Bombay City Civil Court. Suits of the value of over Rs. 25,000 will be filed in the High Court.

There are now six police stations under the Greater Bombay Police in the new area, one each at Borivli, Kandivli, Malad, Goregaon, Aarey and Mulund.

From February 1, 1957 the villages of Mulund and Nahur of Thana taluka and the whole of Borivli taluka, except the seven villages of Bhayandar, Dongri, Ghodbunder, Kashi, Mire, Rai Murde and Uttan, stood transferred from Thana district to the Bombay suburban district and were constituted into a taluka known as Borivli taluka.

The seven excluded villages have been transferred to the Thana taluka of Thana district.

In the process of amalgamation with Bombay City, the old Municipal Boroughs of Bandra (established in 1876), Kurla (estd. 1877), Parle-Andheri (estd. 1931), Juhu (estd. 1921), Ghatkopar-Kirol (estd. 1916) Malad, Kandivli and Mulund have ceased to exist.

AGRICULTURE

In Bombay Island proper though about 8 sq. miles of unbuilt and undeveloped land is available there is practically no agriculture. Vegetables, flowers and fruit are grown in private gardens and Wadis but on a very negligible scale. In the newly merged areas and the adjoining suburbs, however, extensive paddy cultivation is carried on. Vegetables and fruit are also grown especially during the monsoon. The produce is largely marketed in Bombay.

COMMERCE AND INDUSTRY

Commercially and industrially Bombay is the second, if not the first City in India. It is the principal centre of the cotton textile industry (66 cotton mills with 64,500 looms). Its share in looms and spindles is about 31 per cent of the total in the country. There are 170 textile factories including silk, woollen and hosiery; 400 engineering undertakings; 110 establishments manufacturing articles of food, drink and tobacco; 110 establishments producing chemicals, etc.; 50 hides and skins processing concerns, and 150 factories of a miscellaneous character.

After Calcutta, Bombay is the biggest financial centre in India. The Stock Exchange, Bullion Exchange and Cotton Exchange regulate trading in stocks and shares of a wide circle of industrial undertakings. The Reserve Bank of India, the central banking and currency authority has its headquarters in Bombay. About 33 Scheduled Banks operate in Bombay. Of these six have their headquarters here. There are over 15 foreign Exchange Banks. Of these seven have their principal offices located in Bombay. The head office of the Life Insurance Corporation of India is also located in Bombay.

Being the best natural harbour in India, the trade carried through Bombay is about 46 per cent of the total trade of India. The principal items of import are bricks, cement, sand, etc.; China clay; coal; cotton; glassware; grain; hardware; iron and steel; kerosene; fuel oil; motor vehicle parts; machinery; boilers and railway materials; oilman stores; oils; vegetables, etc.; paper; piece-goods; petrol; sugar; timber; twist and yarn; Government and naval and military stores.

The main exports are coal; cotton; flour; groundnuts; hemp; hides and skins; kerosene and fuel oil; manganese ore; myrobalans; oil-cake; piece-goods; seeds; spices; sugar; wool packages; twist and yarn; Government and naval and military stores.

The total returns to the Central Government from Greater Bombay in customs revenue is about 46 per cent of the total revenue from the seaborne trade of India. The income-tax return to the Central Government from Greater Bombay is about 30 per cent of the total income from the country. The Corporation Tax amounts to about 20 per cent of the total income from this source.

COMMUNICATIONS

From the communications point of view Bombay holds a unique position. There are numerous air routes connecting Bombay with the rest of the country, and it is also directly linked with foreign countries aurally. The head offices of two chief railway systems, the Central and Western Railways are in Bombay which is rail linked with Calcutta, Delhi, Nagpur and Madras. It is the second biggest port and the chief sea communications centre of India. Greater Bombay's transport requirements are met by the local services of the two railways, Central and Western, besides the tram and bus services of the municipalised Bombay Electric Supply and Transport Undertaking.

1951 CENSUS

Note: After the census were taken Greater Bombay was enlarged and a population of about 700,000 was added to it. The census given below do not include particulars about these 700,000 persons. But the census would indicate in a rough way the chief census characteristics of the population of the area.

The number of each religious group in Greater Bombay is given below. The first figure shows the number of males, the second figure the number of females:

Hindus (1,291,004; 748,240); Sikhs (8,617; 5,367); Jains (47,110; 33,000); Buddhists (1,049; 448); Zoroastrians (34,924; 33,736); Muslims (268,902; 143,364); Christians (117,660; 89,639); Jews (9,247; 6,838); Non-tribals (848; 379).

NON-INDIAN NATIONALS

The number of non-Indian nationals in Greater Bombay is given below. The first figure shows the number of males, and the second figure the number of females:

Portuguese (7,398; 4,361); British (2,624; 2,222); Pakistan (1,388; 289); Iranian (1,101; 525); Nepalese (792; 78); Chinese (984; 306); American (320; 174); Afghan (199; 43); Arabian (184; 72); African (43; 35); Burmese (43; 48); German (70; 48); Swiss (79; 65); Ceylonese (105; 30); French (60; 40); Danish (88; 23); Russian (70; 20); Greek (24; 18); Swedish (31; 15); Israelites (43; 32); Italian (33; 28); Spanish (51; 4); Norwegians (65; 11); Australians (32; 14); Eire (23; 31); Iraqi (31; 20).

For the rest the figure is less than 50 for each group.

AGE AND LITERACY

A ten per cent sample survey by age group showed the following position. The first figure in the brackets shows the number of males, and the second figure the number of females:

Number surveyed (171,940; 103,996); Literates (93,654; 38,847); Illiterates (78,286; 65,149).

Age group 5—9: Literates (5,141; 4,445); Illiterates (7,531; 8,191).

Age group 10—14: Literates (9,007; 6,747); Illiterates (3,833; 3,976).

Age group 15—24: Literates (27,566; 24,400); Illiterates (54,008; 76,571).

Age group 25—34: Literates (40,846; 13,707); Illiterates (51,492; 73,357).

Age group 35—44: Literates (14,527; 4,255); Illiterates (11,530; 7,249).

Age group 45—54: Literates (7,758; 2,106); Illiterates (5,995; 4,682).

Age group 55—64: Literates (3,170; 1,070); Illiterates (2,098; 2,531).

Age group 65—74: Literates (934; 460); Illiterates (467; 924).

Age group 75 and over: Literates (295; 152); Illiterates (143; 406).

OCCUPATION GROUPS

The main occupation groups in Greater Bombay are as follows. The first figure in the brackets shows the number of males and the second figure the number of females:

All Industries and Services

Employers (48,933; 1,614); Employees (879,265; 71,134); Independent workers (215,245; 21,251).

Fishing

Employers (480; 22); Employees (1,694; 125); Independent workers (2,805; 761).

Salt, Saltpetre, Saline substances

Employers (11; 0); Employees (88; 18); Independent workers (10; 2).

Foodstuffs, Textiles, Leather

Employers (4,567; 154); Employees (256,374; 19,558); Independent workers (21,900; 2,497).

Tobacco

Employers (91; 13); Employees (3,151; 1,045); Independent workers (1,719; 1,119).

Textiles

Employers (711; 37); Employees (206,713; 16,405); Independent workers (1,485; 157).

Wearing Apparel

Employers (1,832; 62); Employees (12,368; 314); Independent workers (10,413; 887).

Other Textiles

Employers (139; 4); Employees (11,733; 944); Independent workers (311; 89).

Leather and its products

Employers (336; 1); Employees (5,415; 178); Independent workers (4,704; 76).

Manufacture of Metals and Chemicals

Employers (2,039; 38); Employees (75,532; 1,964); Independent workers (6,049; 227).

Manufacture of Iron and Steel

Employers (131; 5); Employees (6,605; 132); Independent workers (195; 9).

Transport equipment

Employers (236; 7); Employees (22,282; 190); Independent workers (660; 6).

Electrical Machinery

Employers (175; 0); Employees (4,725; 104); Independent workers (598; 18).

Machinery including Engineering

Employers (431; 5); Employees (14,919; 259); Independent workers (1,634; 18).

Medical Preparations

Employers (59; 2); Employees (2,014; 185); Independent workers (87; 83).

Clay products

Employers (53; 1); Employees (1,443; 437); Independent workers (206; 12).

Rubber products

Employers (50; 0); Employees (2,100; 91); Independent workers (75; 2).

Wood and wood products

Employers (399; 10); Employees (16,693; 145); Independent workers (7,266; 303).

Printing and Allied Industries

Employers (609; 16); Employees (15,353; 172); Independent workers (653; 15).

Buildings

Employers (747; 7); Employees (10,004; 1,559); Independent workers (9,443; 296).

Roads, Bridges

Employers (6; 0); Employees (356; 53); Independent workers (34; 0).

Electric Power and Gas Supply

Employers (12; 0); Employees (2,821; 32); Independent workers (209; 1).

Sanitary Works

Employers (28; 1); Employees (8,854; 2,157); Independent workers (471; 100).

Commerce

Employers (28,342; 727); Employees (129,336; 4,744); Independent workers (91,453; 6,979).

Retail trade in foodstuffs

Employers (6,923; 239); Employees (20,469; 781); Independent workers (33,080; 4,595).

Retail trade in fuels

Employers (1,108; 31); Employees (8,389; 227); Independent workers (1,515; 115).

Retail in textile and leather

Employers (3,809; 63); Employees (8,643; 128); Independent workers (8,795; 158).

Wholesale trade in foodstuffs

Employers (710; 49); Employees (1,341; 170); Independent workers (1,724; 105).

Real estate

Employers (70; 4); Employees (2,059; 21); Independent workers (270; 15).

Insurance

Employers (163; 4); Employees (5,964; 148); Independent workers (642; 39).

Money lending, banking

Employers (1,068; 25); Employees (11,907; 350); Independent workers (5,244; 164).

Transport, storage, communications

Employers (1,374; 63); Employees (95,386; 2,491); Independent workers (15,795; 270).

Below we give the totals of some other categories. The first figure shows the number of males and the second the number of females:

Transport by road (33,982; 592); Transport by water (36,962; 601); Transport by air (2,534; 91); Railway transport (24,689; 424); Storage and warehousing (2,835; 417); Postal services (5,965; 216); Telegraph services (1,783; 77); Telephone services (1,657; 315); Wireless services (161; 3); Health, education and public administration (74,389; 12,170); Medical and health services (9,407; 4,466); Educational Services and Research (10,316; 4,334); Police (11,108; 209); Employees of municipalities and local bodies (13,597; 1,231); Employees of State Governments (14,832; 1,337); Employees of Union Govt. (14,715; 511); Employees of non-Indian Governments (172; 26); Services not elsewhere specified (226,890; 34,177); Domestic services (65,784; 21,091); Barbers and beauty shops (9,836; 104); Laundries and laundry services (13,971; 444); Hotels, restaurants, eating houses (46,725; 1,790); Recreation services (13,777; 1,270); Legal and business services (14,000; 1,143); Arts, letters, journalism (3,232; 137); Religious, charitable and welfare services (5,776; 312).

AGE GROUPS

In a 10 per cent sample survey the numbers in the different age groups were as follows:

	Males	Females
0	3,232	3,278
1—4	10,828	10,688
5—14	25,512	23,359
15—24	41,959	23,402
25—34	43,422	19,417
35—44	26,057	11,504
45—54	13,753	6,788
55—64	5,268	3,601
65—74	1,461	1,384
75 and over	438	558

Total number of households: 568,862.

22,695 households were examined in a sample survey. The number of persons living in them was 107,282—66,530 males and 40,752 were females.

Out of these households, the number of small households (3 members and less) was 9,110, and the number of persons living in them was 18,518; of medium households (4 to 6 members) 8,234, and the number of persons 39,699; of large households (7 to 9 members) 3,656, and the number of persons 28,454; of very large households (10 and above) 1,691, and the number of persons 20,611.

THE GREATER BOMBAY CORPORATION

THE municipal area of Greater Bombay is now divided into 15 administrative wards. These are A, B, C, D, E, F, G, H, K, L, M, N, P, R, and T.

For election purposes the municipal area of Greater Bombay is divided into 44 electoral wards—and are numbered 1 to 44.

From a demarcation point of view one or more electoral wards would go to make one administrative ward.

Total no. of seats: 131.

The administrative ward, the electoral ward, the area covered by the electoral ward, and the number of seats allotted to it are given below:

Administrative	Electoral	Area	Seats
A	1	Colaba	2

The municipal government of Greater Bombay vests in the Municipal Corporation, composed of 131 representatives elected on adult franchise.

The Corporation has four statutory committees, the Standing Committee, the Improvements Committee, the Education Committee and the Bombay Electric Supply and Transport Committee.

The executive power in regard to general municipal administration vests in the Municipal Commissioner. The administration of the B.E.S.T. Undertaking, however, vests in the General Manager, B.E.S.T.

The Corporation is required to meet at least once a month. In actual practice it meets twice a week and oftener if necessary. Meetings of the Corporation are presided over by the Mayor who also convenes the meetings. The Mayor's term of office is one year and he is elected at the first meeting in April.

The Standing Committee consists of 17 members, 16 of whom are elected by the Corporation. The Chairman of the Education Committee serves as an additional member. Half the members retire at the end of each year. The Chairman is elected by the members of the Committee at the first meeting in April every year. The main functions of the Committee are to sanction contracts, to scrutinise the budget and establishment schedule, frame service regulations, sanction investment of funds, prescribe the form of keeping accounts and conduct their scrutiny. The Committee meets once every week usually on Wednesdays.

The Improvements Committee consists of 16 Councillors, all of whom are elected by the Corporation. The Chairman is elected for a term of one year, while half the Councillors retire at the end of each year. The Committee is charged with all improvement and development schemes, slum clearance, poorer classes accommodation and purchase and sale of land which does not exceed Rs. 50,000. The Committee usually meets once a fortnight on Tuesdays.

The Bombay Electric Supply and Transport Committee consists of nine members, one of whom is the Chairman of the Standing Committee (ex-Officio), while the remaining members are appointed by the Corporation from among persons who (may or may not be members of the Corporation) have experience of administration, transport or electric supply, or of engineering, industrial, commercial, financial or labour matters. The Chairman is appointed by the members for a period of one year, while half the members retire every second year. The Committee usually meets every Friday; and the Chairman and members are paid a fee for attending the meetings. The Committee exercises a general control over the electric supply and transport undertakings of the Corporation.

The Education Committee consists of 16 members of whom 12 are Councillors and 4 non-Councillors of whom two have to be women. The Chairman of the Committee is elected for a period of one year, while half the members retire at the end of each year. The Committee usually meets on the first Friday of every month. The main function of the Committee is to administer the Primary Education Act, or any other law for that purpose for the time being in force.

Besides the Statutory Committees mentioned above there are four Special Committees appointed by the Corporation. These are: 1. the Works Committee, 2. the Medical Relief and Public Health Committee, 3. Markets and Gardens Committee, and 4. Law, Revenue and General Purposes Committee. Each Committee consists of 24 Councillors appointed by the Corporation after each general election. There are a Chairman and a Deputy Chairman for each Committee who are elected by the members and who hold office for one year. All questions that are due to go before the Corporation must first be considered by the appropriate Special Committee which then makes its recommendations to the Corporation.

Then there are a number of *ad hoc* Consultative Committees appointed from year to year, to which the Corporation can refer any matter for consideration and report.

The four most important officers of the Corporation are the Municipal Commissioner, the General Manager of the Undertaking, the Municipal Secretary and the Municipal Chief Auditor.

The Municipal Commissioner is at the head of the Executive. He is usually a senior member of the Indian Civil Service and is appointed by the Government for a renewable period of three years. He can be removed by the Corporation by a five-eighths vote. If however Government desire to revert him to their service the consent of the Corporation is necessary. He attends meetings of the Corporation and Committees but does not vote. He is assisted by three Deputy Municipal Commissioners, with one Assistant Commissioner to look after the extended suburbs.

The General Manager of the Undertaking is in the same position to the Electric Supply and Transport Undertaking as the Municipal Commissioner is to the Corporation as a whole. He is appointed by the Corporation subject to the approval of the Provincial Government for a renewable period of not more than five years at a time. He can be removed by the votes of not less than half the total number of Councillors. He attends the meetings of the B.E.S.T. Committee and takes part in the discussions but does not vote.

The Municipal Secretary is in charge of all the secretarial work pertaining to the Corporation and its Committees. He is independent of the Commissioner and is directly under the Standing Committee.

The Municipal Chief Auditor is also independent of the Commissioner and is directly under the Standing Committee.

Primary education is free and compulsory in the Lower Primary standards of Municipal Schools all over Greater Bombay. It is the special responsibility of the Corporation.

From 1958 the benefit of free education is to be extended to the upper primary classes too.

There were on March 31, 1957, 605 Municipal Schools and Classes conducted by the Education Committee and 324 Aided Schools to which the Corporation makes grants or gives recognition. The total number of pupils in all Primary Schools on March 31, 1956 was 3,28,337 out of whom 2,43,522 were in Municipal Schools and 79,815 in Aided Schools. The Corporation grant to the Education Committee was Rs. 1,25,60,000. Of this Government contributed Rs. 80,60,000.

To meet the growing expenditure on primary education the Corporation decided for the first time in 1958 to levy an education cess at 1½ per cent.

The Municipality maintains the Victoria and Albert Museums at Victoria Gardens and a number of free reading rooms and libraries (3 libraries in each ward, one for women and two for men).

As for medical relief the Municipality conducts one large fever hospital (Arthur Road), and three large general hospitals (K.B.M., Nair and Sion) and four hospitals, an isolation centre and three

clinics for tuberculosis patients, while in the suburbs there are two general hospitals and a provision for 100 beds for T.B. patients. Then there are 35 free dispensaries, five maternity homes, 15 ante-natal clinics, 22 family planning clinics and one venereal diseases clinic.

WATER SUPPLY

The water supply of the City is drawn from four lakes: Tansa, Vihar, Tulsi and Vaitarna. The Tansa Lake can supply more than 100 million gallons per day and is the main source of water supply. It is situated about 66 miles north-east of Bombay. The Vihar Lake can supply 20 million gallons a day exclusively to the north-east part of the City and also partly to Chembur and Kurla. It is situated about 18 miles north of Bombay. The Tulsi Lake which is to the north-west of Vihar Lake supplies about 4 million gallons a day to H, K and J. Wards.

The Vaitarna Lake feeds the Tansa at present.

Under Section 140 of the Bombay Municipal Corporation Act the Corporation can levy water tax on buildings, lands and premises in the City. The tax is fixed as a certain percentage of the rateable value of the building, land or premises. The present rate is 3½ per cent. Under Section 169 the water supplied can also be charged on meter measurement and at the rates prescribed from time to time by the Standing Committee. Water tax is the first charge on a property under Section 141, and can be recovered from the owner by distress (Sections 203, 204) and is also recoverable from tenants by authorizing them to make payments from their rents (Section 209). The supply of water to any premises can be cut off in default of payment of water tax or any sum due for water or hire of meter or expenses of work done (Section 279 (1) (a)). Copies of Water Charges Rules can be had from the office of the Hydraulic Engineer on payment of a sum of annas 5 per copy.

The amalgamated areas of the former Bombay Suburban District are divided into five wards for purposes of water supply H, K, L, M and N, with two Assistant Engineers in charge, one looking after H and K Wards and the other after L, M and N. The supply is throughout metered.

The obligatory duty of the Corporation to supply an adequate quantity of water relates to the provision of supply only up to the boundary of the premises, as distinguished from the distribution of water within the premises. Any premises can be served by means of one communication pipe only, the size of which depends upon the quantity of water needed in the premises. The owner can have separate connections to each floor provided he pays the cost of all the connections but one.

If the Municipal Commissioner finds that any premises are not provided with an adequate supply of pure water he has the power under Section 271(2) to compel the person who pays the property tax to obtain an adequate supply from a Municipal Water Works and carry out all such works as is necessary for a proper distribution of the water.

No one except a licensed plumber can undertake work on water-pipes and fittings and no person can allow any such work to be done by anyone except a licensed plumber.

For purposes of distribution Bombay is divided into 3 parts, called A Division, B Division and C Division. Broadly speaking, the A Division consists of the areas of Clerk Road, Hornby Vellard up to Jacob Circle, Lamington Road, part of Grant Road, Kika Street, Abdul Rehman Street and Carnac Road up to the Victoria Dock in the north, and on the west coast along Back Bay, Walkeshwar, Nepean Sea Road and Warden Road up to Clerk Road Junction—this Division is served by the Malabar Hill Reservoir.

Division B consists of the localities of Kalachowki Road, Beay Road, Coal Bunder in the north, on the eastern coast up to Carnac Road, Abdul Rehman Street, Kika Road, Falkland Road and part of Grant Road up to Lamington Road in the south, in the west Lamington Road and Arthur Road and finally some areas of Dongri and Mandvi and Mazagon. The whole of this Division is supplied from the Bhandarwada Hill Reservoir. The C Division, that is the north of the Island is served directly from the Trunk mains as they enter the City.

Total water supplied per day: 146 mln. gallons after completion of the first phase of Vaitarna-Tansa Scheme. When the scheme is completed the total supply is expected to be 220 million gallons a day.

The Tansa supply is chlorinated at the Chlorination Plants of Powai and Ghatkopar, while the Vihar supply is sterilized at Powai.

There is regular bacteriological and chemical analysis of water carried out by the Municipal Analyst.

PUBLIC HEALTH DEPARTMENT

The Public Health activities are carried on under the direct control and supervision of the Executive Health Officer. The Department is divided into several branches such as environmental sanitation, food sanitation, vital statistics, prevention and control of communicable diseases, maternity and child hygiene, medical relief and health propaganda.

Environmental sanitation comprises inspection and supervision of premises, provision of public sanitary conveniences, sanitary control over factories, licensable trades, overcrowding.

The veterinary staff inspects the stables in the city and are also in charge of the bullock hospital and segregation sheds in Mahalaxmi.

For purposes of sanitation, registration and vital statistics the city is divided into seven divisions, each division being under the charge of an Assistant Health Officer who is directly responsible to the Executive Health Officer.

For the hygienic control of foodstuffs including milk trade there are Milk Sub-Inspectors and Sanitary Inspectors.

For pest control there is a Malaria and Insecticide Branch.

The vaccination staff includes a Superintendent, a Head Vaccinator, a number of Vaccinators including a Lady Vaccinator. There are 67 permanent public vaccination stations 6 of which work daily at: 1. The Central Vaccine Depot, Parel, 2. The Sanitary Institute Building, Dhobi Talao, 3. Arthur Road Hospital, 4. Municipal Suburban Offices, Wakefield Road, Bandra, and 5. Municipal Office, Gazdar Hall, Andheri. The remaining centres work on one day every week by rotation for about 2½ hours. Besides, 4 additional temporary centres work one day every week for 2½ hours.

Hygiene includes maternity and child welfare, family planning and school health.

There are five Maternity Homes, each in charge of a Lady Medical Officer. Twenty Health visitors, do the follow-up work and domiciliary care under the direction of the Lady Medical Officer. A small maternity unit is conducted at Dharavi. Expectant mothers are encouraged to attend ante-natal clinics, of which there are 15 in number. The five Maternity Homes are at Cadell Road, Victoria Road, Bellasis Road, Khetwadi and Imamwada Road. And child welfare clinics are conducted (besides the Maternity Homes) at Ferguson Road Dispensary, Dadar Main Road Dispensary, Labour Welfare Centre at Arthur Road Chawls, Ambewadi Dispensary at Parel Tank Road, District Dispensary at Souther Street, Tardeo Flats Dispensary, District Dispensary at Charni Road, District Dispensary at Panjapole, Palton Road Stables Dispensary, District Office at Kolsa Mohalla.

There are Family Planning Clinics at 264, Charni Road; Bai Gulbai Choksy Dispensary at Dr. D'Silva Road, Dadar; Bellasis Road Maternity Home; Victoria Road Maternity Home; Imamwada Maternity Home; Cadell Road Maternity Home; and Khetwadi Maternity Home; Municipal General Hospital, Sion and fourteen other centres.

School Health Work is limited to Municipal Schools only and is under a Medical Officer. Children found to have defects are taken for treatment in school buses to the school clinic at K.E.M. Hospital. Dental care is given at the Dental Clinic at the Bai Yamunabai L. Nair Hospital. Undernourished children in municipal schools are given free milk and snacks on working days.

The Public Health Laboratory which is under the charge of a Municipal Analyst conducts routine and special examinations of water, sewage, food, urine, blood and sputa of patients at Municipal Institutions.

The Conservancy Branch, under the City Engineer, is in the charge of a Public Health Engineer. Under him are Supervisors, Senior Overseers, Junior Overseers, Depot attendants, etc.

Conservancy includes cleansing of streets, etc., removal and disposal of refuse, destruction of rats and dogs, veterinary service, removal of carcasses, disinfection, ambulance and so on.

The Veterinary staff is under a Senior Veterinary Inspector, who has a number of Junior Inspectors and qualified veterinary surgeons.

Medical Relief is given at the following general hospitals: K.E.M., Nair, Sion Municipal Hospital, R.P.T.B. and Arthur Road, at Municipal Free dispensaries and one Eye Dispensary and Hospital.

There are dispensaries at 55, Rajwadar Street, Colaba; 303, Freer Road, Fort; 250, Vallabhji Patel Road, Dongri; 212(1) Panjapole Street, Bhuleswar; 264, Charni Road, Girgaum; 15-17, Khetwadi First Lane; 1, Souther Street, Byculla; 143, Foras Road; Bai Gourabai Dispensary, Kamathipura 8th Lane; Bai Gulbai Choksy Dispensary, D'Silva Road, Dadar; B.D.D. Chawl, No. 46, Worli; 213C, Delle Road; 245(H) and (I), Dharavi Road; New Paradevi Road and Cadell Road Junction; Mulji Bhuvan, Sewri New Road; New Chawl, Ambewadi, Parel Tank Road; 160-160-A, New Delle Road; Tardeo Flats, Mahalaxmi; Connaught Road, Byculla; Chembur Dispensary, Chembur; King George V Infirmary, Haines Road, Mahalaxmi; Palton Road; Zandu Ayurvedic, Gokhale Road (South), Dadar; Dadar Main Road, Municipal Chawl No. 1; Waterfield Road; Khetwadi, Khar East; Vile Parle; Andheri; Jogeshwari; Versova; Kurla; Bhandup and Ghatkopar.

The Eye Dispensary is in Bai Engulbal Building in Kamathipura where an eye hospital is also located.

There are also physiotherapy and occupational therapy centres, school clinics, a rehabilitation and training centre for the crippled and family health at the K.E.M. Hospital; dental clinics at the Nair Hospital Dental College; and the benefit of a paying-beds scheme at the Sion Hospital.

The Bombay Civic Journal

To stimulate civic awareness and promote closer contact with the public, the Corporation has been running an illustrated English monthly called 'The Bombay Civic Journal' from March 1954. It deals with the activities and problems not only of the Bombay Municipality, but also of other local bodies all over the country and

seeks to foster 'an objective discussion of civic issues and the larger questions relating to local self-government from the national angle.'

Editor, U. G. Rao; Advertisement and Circulation Manager, R. S. Shanbhag.

Another new development is the starting of a Public Relations Department from February 1956 to attend to complaints from the public and do publicity. The old Propaganda Section of the Public Health Department and the Ward Officers' section are merged in it.

HISTORY

One of the earliest self-governing institutions in the country, with a history of autonomous functioning going back to nearly a century, the Bombay Municipal Corporation had until 1950 a territorial jurisdiction more or less confined to the seven islands of Bombay, with an area of 26 square miles and a population of about 23 lakhs.

Owing to the rapid growth of population during and after the war years, the lack of room for expansion within the existing limits, the increasing dependence of the suburbs on the City for essential services like water supply, medical relief and fire protection and the need of a proper pooling of resources and a co-ordinated plan for development, it was found necessary to merge the suburbs in the City proper to constitute Greater Bombay. This came about on April 15, 1950.

It brought a territory as large as 68 square miles, with a population of five lakhs, under the control of the Corporation, and the strength of the civic body was raised from 117 Councillors to 135, to be reduced later to 124 by the abolition of the representation to various public organisations.

Six years later, following the decision of Parliament to create the bigger bilingual State of Bombay, it became clear that the importance of Bombay as a political, commercial, industrial and educational centre would increase, resulting in a large influx of population from the newly-merged territories and also necessitating major plans of development.

Finding that it is imperative that the limits of the Municipality should be further extended the Corporation passed a resolution on September 20, 1956, requesting the State Government to take urgent steps to merge the following areas in Greater Bombay to promote co-ordinated development: (1) Borivli Taluka of Thana District excepting the villages of Bhayander, Dongri, Ghodbunder, Kasli, Mire, Murdhe and Utan; and (2) the villages of Mulund and Nahur in Thana Taluka of Thana District.

The requisite legislation being passed, a territory, extending over 75 square miles with a population of about two lakhs, was absorbed in Greater Bombay on February 1, 1957, and the membership of the Corporation was increased by seven to 131 to give adequate representation to what have come to be known as the extended suburbs.

The new areas, now in charge of an Assistant Municipal Commissioner, have been divided for administrative and electoral purposes into three wards: P Ward (Goregaon-Malad), R Ward (Kandivli-Borivli) and T Ward (Mulund).

Thus in the course of about seven years, from 1950 to 1957 the Corporation saw almost a seven-fold increase in the extent of its territory.

Greater Bombay now spreads over 175 square miles from Colaba to Dahisar on the Western Railway and to Mulund on the Central Railway, with a population of over 30 lakhs according to the census of 1951.

In the process of amalgamation with Bombay City, the old Municipal Boroughs of Bandra (established in 1876), Kurla (estd. 1877), Parle-Andheri (estd. 1931), Juhu (estd. 1921), Ghatkopar Giral (estd. 1916), Malad, Kandivli and Mulund have ceased to exist.

Meeting the civic needs of this vast territory as already mentioned are the following statutory authorities: the Corporation; the Standing Committee; the Improvements Committee; the Bombay Electric Supply and Transport Committee; the Education Committee; the Municipal Commissioner; and the General Manager of the B.E.S.&T. Undertaking.

A notable feature of the Act governing the Corporation is that while the municipal government of the City vests in the Corporation except where it is otherwise expressly provided, the executive power in regard to ordinary municipal administration is vested in the Commissioner.

With regard to the B.E.S.&T. Undertaking, the General Manager enjoys executive powers similar to those of the Commissioner in the Corporation.

The Corporation has been a pioneer in many spheres of civic activity. It was the first in the country to experiment with adult franchise, introduce free compulsory education at the primary stage, to be extended in 1958 to the upper primary classes, to own and administer urban transport and electric supply, to undertake trading, supply free milk and snacks to under-nourished school children, and to promote family planning.

Other notable activities of the Corporation have been the building of a dormitory for the homeless in the City, starting of physiotherapy and occupational therapy schools and centres, and several new ventures in medical relief, education and research; conduct of two medical colleges and a dental college, the creation of a family health centre and a health museum, and the running of a regular monthly publication, 'The Bombay Civic Journal', for publicising

the activities of the Corporation and of other civic bodies and for promoting discussion of civic issues.

Other activities include the production of films for health education, the introduction of various modern devices for traffic control, starting of a unit for research in primary education, the opening of a municipal bank, the building of an open-air theatre for the recreation of citizens, holding of civic exhibitions, organisation of Health and Cleanliness Weeks and the starting of a department of preventive and social medicine at the Topiwala National Medical College.

A vast new five-storied structure, designed to accommodate the numerous scattered departments of the Corporation was built by the side of the old head office and declared open on February 5, 1958.

The City Engineer's, the Special Engineer's and the Hydraulic Engineer's departments are all now housed in the new building.

The new building, has lounges, party rooms and committee rooms for Councillors and also accommodates the Municipal Secretary's Office, the Estate Agent and Land Manager's Department and the Public Health and Public Relations Departments.

The Corporation, however, continues to meet in the Corporation Hall in the old building.

GREATER BOMBAY

Below we give particulars about Greater Bombay:

No. of Hospitals (Municipal, Government and Private):	18.
No. of Municipal Hospitals:	7.
No. of Municipal Dispensaries:	35.
No. of Primary Schools (Municipal and Private):	about 950.
No. of pupils in all Primary Schools:	about 3,23,337.
No. of Municipal Primary Schools:	605.
No. of children in Municipal Primary Schools:	2,43,522.
No. of teachers in Municipal Primary Schools:	6,608.
No. of Medical Colleges:	3 including a Dental College.
No. of Motor Vehicles:	More than 40,000.
Road Mileage:	about 466.
No. of Markets (municipal and private):	60.
No. of gardens, open spaces etc.:	about 115.
No. of Fire Brigade Stations:	12.
Total no. of employees:	24,310 (1956).
Wage bill of employees:	Rs. 3.6 crores

CITY

Below we give some facts about the City for 1957-58:

Area of the City	16,762 acres (26,189 square miles).
Population	2,329,020 (according to census of 1951).
Density of population	139 per acre.
INCOME:—	
General Tax at 17 per cent and Fire Tax at 4 per cent	Rs. 4,18,83,270
Water Tax at 3½ per cent including other receipts from Water Works	2,40,19,945
Haalkhore Tax at 3 per cent including receipts from special service	76,90,860
Total income (including revenue from other sources)	10,40,96,378
Rates charged for water connections by measurement	From Rs. 12 to Rs. 2-6-0 per 1,000 gallons according to class of property.

EXPENDITURE:—

Primary Education (including suburbs)	Rs. 1,85,47,000
Medical Relief and Education	1,23,80,691
Water Works—	
Maintenance etc.	Rs. 49,17,858
Debt Charges	1,90,84,165
	2,40,02,023
Public Health	47,47,780
Fire Brigade	17,92,062
General Supervision, Collection of Revenue etc.	39,92,233
Contribution to Education Budget	1,14,84,778
Grants-in-aid to Public Institutions	9,24,500
Debt charges (excluding Water Works)	1,09,11,635
Total expenditure including other items	10,44,08,253

The following facts relate to 1956-57:

TAXES, LOANS ETC.:—	
Incidence of taxation per head	Rs. 37-8-6
Total rateable value of properties	25,74,42,682
Properties registered in the Assessment Book	54,728
Rateable value per head of population	110-10-11
Number of vehicles and animals taxed	48,486

	Ra.
Demand in respect of Urban Immovable Property Tax levied by Government and collected by Municipality for the year	1,07,44,677
Amount collected including previous arrears	1,11,05,596
Debits outstanding	33,41,31,582
Redemption or Sinking Fund in hand or invested	6,13,32,632
Net loan debt	27,27,08,950
Net debt per head of population	117-2-1

BIRTHS AND DEATHS

Total number of births registered during the year (1956-57)	64,835
Birth rate per thousand living	27-8
Total number of deaths during the year	27,759
Death rate per thousand of population	11-9

Budget, 1958-59

Here are a few salient features of the City Budget for 1958-59 as presented to the Corporation by the Chairman of the Standing Committee:

	Ra.
Opening balance on April 1, 1958	55,04,000
Income on existing basis of taxation	10,76,70,000
Expenditure	11,16,57,000
Deficit	39,87,000
Total (surplus)	15,17,000
Anticipated savings in expenditure	40,00,000
Closing Balance	55,17,000

Loan Works—

Out of the total expenditure of Rs. 545.75 lakhs proposed for the loan works programme for 1958-59, Rs. 4,40.48 lakhs are for works in progress and Rs. 76.75 for new works and Rs. 14.80 lakhs for plant and machinery to be purchased out of advances from Special Funds.

Among the major allocations are: Master Plan for distribution of water supply in City Rs. 112.71 lakhs; Vaitarna-cum-Tansa Scheme Rs. 43.23 lakhs; acquisition of land for further extension of B.Y.L.N. Charitable Hospital and T.N.M. College Rs. 30.28 lakhs; enlarging of Tansa Water Main Rs. 25 lakhs; construction of a new building for T.N.M. College Rs. 15 lakhs; re-modelling of Colaba Sewerage Scheme Rs. 15 lakhs.

Some interesting minor items are: acquisition of sites rendered vacant by house collapses along with adjacent built-up areas for various municipal purposes Rs. 12.14 lakhs; development of the interior of Mahim Rs. 10 lakhs; construction of an industrial estate building at Dapty Road Rs. 7.26 lakhs; construction of a vehicular subway near Princess Street junction Rs. 3 lakhs; construction of nurses' home at Sion Hospital Rs. 3 lakhs; extension of municipal press building Rs. 3 lakhs; construction of a fire brigade station with staff quarters at Colaba Rs. 3 lakhs; construction of an open-air theatre near Shivaji Park Rs. 2.25 lakhs; establishment of a recreation centre at Sion Hill Fort Rs. 2 lakhs; and construction of a 200-bed hospital in the premises of the T.B. Hospitals at Sewri.

Capital Account :—

Provision of Rs. 94.26 lakhs has been made in the capital budget for 1958-59 for laying sewers or improving them at various places, constructing or improving roads and streets, providing housing accommodation to the poorer classes and building more than 22,000 tenements in various localities, including acquisition of land. A sum of Rs. 62.64 lakhs has been set a part for acquisition of land for slum clearance at Kamathipura, Ghorupdeo Road, Lower Parel and Falton Road and construction of tenements and other buildings.

SUBURBS

The following particulars relate to the year 1957-58:

Area of the Suburbs	43,398 acres (67.81 miles)
Population	510,250 (according to the census of 1951).
Density of population	11.75 per acre,

INCOME :—

General Tax at different rates varying from 10 per cent to 17 per cent and Fire Tax at $\frac{1}{2}$ per cent	Ra. 73.88 lakhs.
Water Tax by measurement (including other receipts from Water Works)	47.36 lakhs.
Halalkhore Tax at 3 per cent including receipts from special service	8.78 lakhs.
Grant-in-aid from Government	19.91 lakhs.
Share from City Budget under Town Duties	17.60 lakhs.
Total income, including revenue from other sources	198.88 lakhs.

Rate charged for water supplied by measurement	From Rs. 12 to Rs. 2-8-0 per 1,000 gallons according to class of property.
--	--

EXPENDITURE :—

Education (Secondary)	Ra. 9 lakhs.
Medical Relief and Education	8.31 lakhs.
Water Works—	
Maintenance etc.	Ra. 35.15 lakhs.
Debt Charges	6.01 "
Public Health	10.09 lakhs.
Fire Brigade	1.51 lakhs.
General Supervision, Collection of Revenue etc.	9.33 lakhs.
Contribution to Education Fund	18.41 lakhs.
Grants-in-aid to Public Institutions	0.95 lakhs.
Debt charges excluding Water Works	16.35 lakhs.
Total expenditure including other items	205.03 lakhs.

The following particulars relate to 1956-57:

TAXES, LOANS ETC. :—

Incidence of taxation per head	Ra. 33-3-7
Total rateable value of properties	4,94,60,710
Properties registered in the Assessment Book	41,890
Rateable value per head of population	96-14-11
Number of vehicles and animals taxed	4,050 (excluding those taxed under Public Conveyance Acts).

Demand in respect of Urban Immovable Property Tax levied by Government and collected by Municipality	Ra. 17.21 lakhs including arrears of previous years.
--	--

Amount collected including previous arrears	16.80 lakhs.
Debits outstanding	2,62.10 lakhs.
Redemption or Sinking Fund in hand or invested	37.30 lakhs.
Net Loan Debt	2,24.79 lakhs.
Net debt per head of population	44-0-9

BIRTHS AND DEATHS :—

Total number of births registered during the year (1956-57)	22,239
Birth rate per thousand living	43.6
Total number of deaths during the year	5,835
Death rate per thousand of population	11.4

Budget, 1958-59

Here are a few salient features of the Budget for the Suburbs, (1958-59) as presented to the Corporation:

Estimated Opening Balance on April 1, 1958	Ra. 65,45,000
Income on present basis of taxation	1,94,92,000
Expenditure	2,33,27,000
Deficit	86,35,000
Total (surplus)	24,10,000
Deduct—Advance for Plant and Machinery	6,20,000
Closing Balance	17,90,000

Loan Works—

A sum of Rs. 138.31 lakhs has been provided for the Loan Works Programme during 1958-59, comprising the completion of works in progress and the execution of new works considered necessary in connection with water supply, drainage, building of a garage for municipal vehicles, construction of a fire station at Vikhroli, provision of gardens and open spaces, extension of markets and extension of village amenities. A total of Rs. 97.04 is for works in progress and Rs. 41.27 for new works.

EXTENDED SUBURBS

The following particulars relate to 1957-58:

The extended suburbs, merged in Greater Bombay on February 1, 1957, consist of areas once forming part of the municipal districts of Malad, Kandivli, Borivli and Mulund, village panchayats of Goregaon and Dahisar and 84 villages of the Thana District where there was no municipal administration of any kind, though certain functions were being performed by the District Local Board of Thana.

Area of the Extended Suburbs	About 48,000 acres (76 sq. miles).
Population	About two lakhs (according to the census of 1951).
Density of population	About 4.2 per acre.

INCOME :—

General Tax at different rates varying from 6 per cent to 17½ per cent	Rs. 19.02 lakhs.
Water Tax (including other receipts from Water Works)	" 6.94 lakhs.
Halalkhore Tax at 3½ per cent including receipts from special service	" 1.78 lakhs.
Grant-in-aid from Government	" 3.70 lakhs.

President: Seth Tulsidas Kilachand; Secretary: Dr. K. R. Paymaster.

* In the case of some associations, besides the title and the address a short note is added about their aims, etc. This is generally done where the aims, activities, organization are not immediately obvious from the title. Also, when an association appears for the first time in our book a note is generally added. The addition of a note is not necessarily an indication of the relative importance of the association, that is, in relation to others.

Two points should be kept in mind: office-bearers may change; addresses given may sometimes be in the nature of a reference specially where we say c/o.

ASSOCIATION OF MERCHANTS AND MANUFACTURERS OF TEXTILE STORES AND MACHINERY, INDIA

HAPPY HOME & SCHOOL FOR THE BLIND

B. D. D. Chawl 52, 3rd Floor, Worli.

This charitable residential institution for blind boys between 6 and 20 and fully secular, is the only one of its kind to provide for street blind and delinquents. It was started in 1925. It aims at giving educational and vocational training to blind juvenile boys. Music both instrumental and vocal as well as cane-work, weaving, net-work, sewing, knitting, dramatics, physical culture, scouting etc., are taught, with a view to making them self-supporting. It gives general education in Marathi and Gujarati upto the 7th standard. Hindi and a little bit of English are also taught. Special attention is paid to developing the character of inmates and turn them into useful citizens thus saving them from becoming beggars.

There are 56 inmates with room for 60, funds permitting.

President :—Kamalnayan Bajaj.

INDIAN CANCER SOCIETY

Tata Memorial Hospital, Parel, Bombay 12.

The aims and objects of the Society are to encourage and support scientific investigation of the cause, prevention and control of cancer; to create a public awareness of the curability of early cancer and a medical awareness of the best methods of detection, diagnosis and treatment; to encourage and aid financially and otherwise persons suffering from cancer; to combat quackery; to increase the facilities for more efficient social service to cancer victims in rural areas; to encourage research in the newer techniques of diagnosis and treatment. Thus it has initiated a cytology training scheme for medical and scientific workers throughout India, at the Tata Memorial Hospital. It has also set up Colposcopy and Chemotherapy Service Units at the same Hospital. To achieve these objects the Society depends entirely on and seeks voluntary aid from the public.

Chairman.—N. H. Tata.

EDUCATIONAL INSTITUTIONS IN GREATER BOMBAY*

UNIVERSITY OF BOMBAY

Incorporated under Act XXII of 1857 (subsequently amended by Act VII of 1904, and reconstituted by the Bombay University Act IV of 1928 and Act XXXI of 1953).

The Senate meets ordinarily once a year in June on a date fixed, and at other times when convened, by the Vice-Chancellor. A meeting of the Senate can be convened on the requisition of at least twenty Fellows to the Vice-Chancellor. Twenty members of the Senate form a quorum; and all questions are decided by a majority of the votes of the members present, the Chairman, when the numbers are equal, having a second or casting vote. There are seven Faculties, viz. Arts, Science, Technology, Law, Medicine, Commerce and Dentistry. Each Faculty elects its own Dean. The Annual Convocation for conferring degrees is held on the third Tuesday in August.

The Executive Government of the University is vested in the Syndicate. The Vice-Chancellor is the Chairman of the Syndicate.

ELECTED BY THE ACADEMIC COUNCIL TO THE SYNDICATE

Prof. P. R. Awati, B.A. (Bom. & Cantab.), D.I.C., F.N.I.

* In the case of some institutions, besides the title and address a short note is added about their curriculum, etc. This is generally done where the objects, curriculum, organization are not immediately obvious from the title. A note is also added when an institution appears in our book for the first time. The addition of a note is not necessarily an indication of the institution's relative importance, that is, in relation to others.

II. FELLOWS—ORDINARY (ELECTED).

ELECTED BY TEACHERS IN ARTS

Prof. G. D. Parikh, M.A.; Prof. M. M. Jhaveri, M.A.; Prof. D. S. Agashe, M.A.; Prof. T. A. Kamat, M.A.; Prof. William Coelho, M.A.

ELECTED BY TEACHERS IN SCIENCE

Prof. B. B. Deshpande, B.A., B.Sc., D.I.C.; Prof. L. V. Gurjar, M.A.; Prof. C. S. Karve, M.Sc., Ph.D.; Prof. G. R. Gogte, M.Sc., Ph.D., D.Sc.; Prof. R. T. Jog, M.Sc.

ELECTED BY TEACHERS IN TECHNOLOGY

Prof. P. W. Dharap, B.A., M.I.E., A.M.I.E.E., A.M. Brit. I.R.E.

ELECTED BY TEACHERS IN MEDICINE

Dr. S. S. Ugrankar, M.B., M.R.C.P.; Dr. A. V. Baliga, F.R.C.S.; Dr. S. C. Sheth, M.D., M.R.C.P., D.C.W., F.C.P.S.; Dr. V. V. Shah, M.D., M.R.C.P., M.R.C.P.E.

ELECTED BY TEACHERS IN COMMERCE

Prof. S. V. Ghatalla, B.Com., F.I.C.A., F.I.A. & A.; Prof. G. L. Maini, M.Com.

ELECTED BY TEACHERS IN LAW

Prof. T. K. Tope, M.A., LL.B.

ELECTED BY THE MUNICIPAL CORPORATION FOR GREATER BOMBAY

Ram Joshi, M.A.

ELECTED BY THE INDIAN MERCHANTS' CHAMBER

M. A. Master, M.A., LL.B.

ELECTED BY THE BOMBAY CHAMBER OF COMMERCE

E. S. Vernon-Jones, M.A. (Cantab.).

ELECTED BY THE BOMBAY MILLOWNERS' ASSOCIATION

Babulal Bubaia.

REGISTERED TRADE UNIONS

Rohit M. Dave, M.A., LL.B.; V. B. Karnik.

ELECTED BY THE BOMBAY LEGISLATIVE ASSEMBLY

V. R. Raut, B.A., LL.B., M.L.A.; Indravadanrai M. Oza, M.L.A.; Prof. P. G. Kher, B.A., LL.B., M.L.A.; Dr. R. B. Chaudhari, M.B.B.S., M.L.A.

ELECTED BY THE BOMBAY LEGISLATIVE COUNCIL

B. T. Kulkarni, B.A.

NOMINATED BY THE CHANCELLOR

Dr. M. D. D. Gilder, B.A., M.D., F.R.C.S., F.C.P.S.; V. K. Joag, M.A.; G. I. Patel, B.A.; Dr. H. D. Patel, M.B.B.S., D.O., D.C.M.R.; A. Soares, M.A., LL.B.; Dr. Bhasker R. Patel, M.D., M.R.C.P., D.T.D.; Prof. N. A. Nadvi, M.A.; Dr. J. M. Unwala, M.A., Ph.D.; M. P. Amin, B.A., LL.B.; Mr. Justice S. T. Desai, B.A., LL.B., Bar-at-Law; Mr. Justice D. V. Vyasa, M.A., I.C.S.; Dr. (Miss) Aloo J. Dastur, M.A., Ph.D.; J. A. Taraporevala, B.Sc. (Bom. & Edin.), M. I. Struct. S., M.I.C.E. (Lond.), M.I.E.; N. Dandekar.

ELECTED BY DONORS

S. S. Nalk, B.A., B.Sc., I.C.S., M.I.E.; Surgeon Lt.-Commander Jai R. Patel, M.D., F.C.P.S., R.I.F.V.B.; E. G. Saraiya, C.B.E., B.Sc., J.P.; B. A. Pudar, M.P.; J. H. Dave, M.A., LL.B.

UNIVERSITY DEPARTMENT OF ECONOMICS

Professor of Economics and Director of the Department of Economics. (His services are lent to the UNESCO Research Centre, Calcutta)—Prof. C. N. Vakil, M.A. (Bom.), M.Sc. (Lond.), F.R.S.; Temporary Professor in Agricultural Economics. (His services are lent to the Ministry of Finance, Government of India)—Prof. M. L. Dantwala, M.A. (Bom.); Acting Professor of Economics and Ag. Director of the Department—Dr. D. T. Lakdawala, M.A. (Bom.), Ph.D. (Bom.); Acting Professor of Agricultural Economics—Dr. M. B. Desai, M.Com., Ph.D. (Bom.); Reader in Monetary Economics—Dr. P. R. Brahmananda, Ph.D.; Reader in Business Management—K. Prasad, M.A., LL.B., M.B.A. (Michigan); Reader in Business Management—T. J. Ramakrishna, M.A. (Madras), M.A. (Toronto); Lecturer in Agricultural Economics (on study leave)—Dr. C. H. Shah, B.Com., Ph.D. (Bom.); Lecturer in Economics—Dr. C. B. Desai, M.A., Ph.D. (Bom.); Lecturer in Business Management—A. S. Deshpande, B.A. (Hons.), M.Com.; Lecturer in Agricultural Economics—Dr. N. A. Masumdar, M.A., Ph.D. (Bom.); Temporary Lecturer in Economics—Dr. H. Ezekiel, M.A., Ph.D. (Bom.); Ag. Lecturer in Agricultural Economics—V. S. Vyasa, M.A.; Senior Research Officer in Agricultural Economics—Dr. V. S. D'Souza, M.A. (Bom.), Ph.D. (Karnatak); Junior Research Officer in Agricultural Economics—Dr. S. S. Madalgi, M.A., Ph.D. (Bom.); Investigator in Agricultural Economics (at present Research Officer, F.A.O. Research Scheme in Fisheries Economics)—P. R. Rajchwal, M.A. (Bom.); Research Assistant in Economics—M. V. Kumbadkone, M.A. (Bom.); Investigator in Agricultural Economics—Smt. Tara Shukla, M.A.; Research Assistant in Economics—B. V. Mehta, M.A. (Bom.); Investigator in Agricultural Economics—V. M. Rao, M.A.

Professor of Sociology and Head of the Department of Sociology—Prof. G. S. Ghurye, M.A. (Bom.), Ph.D. (Cantab.), F.N.I.; Reader in Sociology—Dr. K. M. Karajia, B.A. (Bom.), Ph.D. (Bom.); Lecturers in Sociology—Dr. A. K. Desai, B.A. (Bom.), Ph.D. (Bom.); Dr. (Kum.) P. H. Cabinetmaker, B.A. (Bom.), Ph.D. (Bom.); Temporary Research Assistant in Sociology—A. Bopegamage, M.A. (Cal.), Ph.D. (Bom.).

UNIVERSITY DEPARTMENT OF POLITICS & CIVICS

Sir Pherozsha Mehta Professor and Head of the Department of Politics—Vacant; Reader in Politics and In-Charge of the Department of Politics—Dr. Aloo J. Dastur, M.A., Ph.D.; Montague Lecturer in Politics—Dr. Usha H. Mehta, B.A. (Hons.), LL.B., Ph.D.; Lecturer in Politics—Dr. S. P. Aiyar, M.A., Ph.D.; Research Assistants in Politics—R. J. Sardesai, M.A.; B. A. V. Sharma, M.A.

UNIVERSITY DEPARTMENT OF CHEMICAL TECHNOLOGY

Moday Professor of Chemical Technology and Director—K. Venkataraman, M.A. (Madras), M.Sc. (Tech.), Ph.D., D.Sc. (Manc.), M.I. Chem. E., F.R.I.C. (Now Director of the National Chemical Laboratory, Poona (services loaned); Professor of Textile Chemistry and Ag. Director—G. M. Natar, B.A., M.Sc. (Bom.), M.Sc. (Tech.), Ph.D. (Manc.), F.R.I.C., F.T.I.; Professor of Dyestuff Technology—B. D. Tilak, B.Sc. (Tech.), Ph.D. (Bom.), D. Phil. (Oxon.); Professor of Chemical Engineering—(Vacant); Professor of Food Technology—A. Sreenivasan, M.A., D.Sc. (Madras), F.R.I.C., F.N.I.; Sir Homi Mehta Reader in the Technology of Oils, Fats and Waxes—J. G. Kane, M.Sc. (Bom.), Ph.D. (Wisconsin), A.I.I.Sc., A.M.I. Chem. E.; Sir Dorabji Tata Reader in Pharmaceutical Chemistry—M. L. Khorana, B.S. (Pharm.), M.S. (Mich.); Sir Homi Mehta Reader in the Technology of High Polymers—N. R. Kamath, B.Sc., B.Sc. (Tech.); Reader in General Engineering—M. V. Joshi, B.E. (Bom.), B.Sc. (Tech.) (Manc.); Reader in the Technology of Dyeing and Printing—E. H. Daruwala, B.Sc., M.Sc. (Tech.), Ph.D. (Manc.), A.R.I.C.; Reader in Colour Chemistry—S. V. Sunthakar, B.Sc. (Tech.), Ph.D.; Reader in Metallurgical Engineering—V. A. Altakar, B.Sc. (Met.) (B.N.U.), M.S., D.Sc. (Met.) (Colonia); Singhanee Reader in Chemical Engineering—M. K. D. Panthvi, B.Sc. (Tech.), M.S., Ph.D. (Ohio State); Singhanee Lecturer in Colour Physics—M. R. Padhye, M.Sc., Ph.D. (Banaras), A. Inst. P.; Lecturer in Chemistry of Oils—D. Rebello, B.Sc. (Tech.), Ph.D. (Pittsburg); Singhanee Lecturer in Pharmacy—(Mrs.) M. R. Rajchwal, B.Sc. (Tech.), Ph.D.; Lecturer in Inorganic and Physical Chemistry—B. N. Ghosh, M.Sc. (Bom.), Ph.D. (Leeds), A.M.I.C., F.I.C. (Ind.); Lecturer in Applied Mathematics—D. K. Sen, M.Sc., Ph.D.; Singhanee Lecturer in Fuel Technology—S. B. Pandya, B.Sc., M.Sc. (Tech.) (Nagpur); Lecturer in Pharmacology—M. R. R. Rao, M.B., B.S.; Lecturer in Food Technology—D. V. Rege, B.Sc., B.Sc. (Tech.), Ph.D.; Lecturer in Technology of Paints and Varnishes—S. P. Potnis, B.Sc., M.Sc. (Tech.); Singhanee Lecturer in Chemical Engineering—M. R. Chivate, B.Sc., M.Sc. (Tech.); Temporary Lecturer in Pharmacy—R. G. Bhatta, B.Sc., B.Sc. (Tech.); Temporary Lecturer in Chemical Engineering—R. K. Prabhudesai, B.Sc., M.Sc. (Tech.); Lecturer in Experimental Dyeing—(Vacant).

UNIVERSITY DEPARTMENT OF STATISTICS

Reader and Head of Department of Statistics—M. C. Chakrabarti, M.Sc. (Dacca); Lecturers—K. C. Chanda, M.Sc. (Cal.), A. M. Kishiragur, M.Sc. (Bom.), M. N. Variak, M.Sc. (Bom.); Demonstrators—B. G. Sootharam, M.Sc. (Bom.), S. K. Karandikar, M.Sc. (Poona); Investigator—Kum. V. Joshi, M.Sc. (Bom.).

Total no. of Colleges : 32
Total no. of Students : 43,585

1957-58 BUDGET

(a) Income Rs. 40,81,843 (exclusive of non-recurring income);
(b) Expenditure Rs. 43,37,228 (exclusive of non-recurring expenditure); (c) Govt. Grants for year 1957-58 :—Bombay Government Grants Rs. 7,47,155; (d) Non-recurring expenditure Rs. 2,97,500.

COLLEGES**BHAVAN'S COLLEGE**

Bombay.

Principal :—Dr. R. D. Adatia, M.Sc., Ph.D.

BOMBAY COLLEGE

K. Dhuru Road, Dadar, Bombay 28.

Principal :—M. G. Bhate, M.A. (Bom.), B.Sc. (Econ.), (Lond.).

BOMBAY VETERINARY COLLEGE

Parel, Bombay 12.

Dr. F. S. Khambata, B.A., G.B.V.C., B.Sc. (Hons.), M.Sc., Ph.D.
(*Principal*).

COLLEGE OF PHYSICIANS AND SURGEONS OF BOMBAY

Hospital Avenue, Parel, Bombay 12.

Dr. Shantilal Chhaganlal Sheth, *President*; Dr. V. H. Salaskar, Dr. J. K. Thanawalla, Dr. D. D. Bamji, *Vice-Presidents*; Darabsha Kharshedji Bharucha, *Secretary*.

SIR CURRIMBOY EBRAHIM MEMORIAL DENTAL COLLEGE

Byculla, Bombay 8.

Principal :—K. L. Shourie, B.Sc., M.B.B.S., M.D.S., M.Sc., Ph.D.

Founder-President:—K. M. Munshi.**BOMBAY CITY SOCIAL EDUCATION COMMITTEE**

Bombay.

The Committee imparts Social Education including instruction in community and individual health, hygiene, civics and literature both in theory and practice.

The Committee carries on the campaign in accordance with the Ten-Year Plan supplemented by "New Approach" for liquidating illiteracy within ten years. However the Plan could not succeed due to want of funds and to extension of its jurisdiction to Greater Bombay. It has now a Fifteen Year Plan for educating 6,75,000 illiterate men and women at an aggregate cost of Rs. 92,06,815.

The Committee has a Special Scheme for educating workers in mills and factories also.

Activities:—The Committee runs 2,000 literacy and 600 post literacy centres per year in Marathi, Gujarati, Hindi, Urdu, Kannada and Telugu; arranges cultural programmes every week; cinema programmes every day; circulates library boxes; science and other exhibitions for the enlightenment of the illiterate masses, cleanliness squads, etc. It has also established 14 Community Radio Centres in the labour areas. It has organized a Matru Vikas Kendra for women and a special Research Department for Social Education.*Finances:*—The annual expenditure is about Rs. 1,50,000. The Government of Bombay pays 50 per cent of the annual expenditure and the Bombay Municipality contributes about 30 per cent. Amongst others, Sir Dorabji Tata, Sir Ratan Tata Trusts and N. M. Wadia Charities make regular yearly contributions. A special annual feature is the Social Education Week celebration to collect funds and to propagate social education.*Achievements:*—In the last 18 years, the Committee has educated in literacy and general knowledge in Marathi, Hindi, Urdu, Gujarati and Telugu languages more than 370,000 adults of whom 71,000 were women at a total cost of Rs. 36,51,504. Adults are provided with all educational facilities free.*President:*—Champaklal G. Modi. *Secretary:*—B. M. Kapadia.**BOMBAY CO-OPERATIVE SCHOOL**

In furtherance of the above objects, a *Vidyarthigriha* was started, at Bombay in 1915.

SHRIMALI BRAHMAN SAMAJ

129, Gulabwadi, Bombay 4.

Free distribution of Books for study of School and College to the students of Shrimali Brahman.

TATA INSTITUTE OF FUNDAMENTAL RESEARCH

Apollo Pier Road, Bombay 1.

The Tata Institute of Fundamental Research was established jointly by the Government of Bombay and the Trustees of the Sir Dorabji Tata Trust in June 1945. The object of this all-India Institute is fundamental research in Physics, Mathematics and allied sciences. The Institute is permanently recognised by the University of Bombay as a constituent recognized institution for post-graduate research in physics and mathematics.

Though, at its inception, the Government of India was not directly concerned with the Institute, it has provided grants since 1948. In view of the increasing financial assistance given by the Government of India, which latterly contributed over 90% of the Institute's budget, a tripartite agreement was entered into between the Government of India, the Government of Bombay and the Sir Dorabji Tata Trust, and came into force on April 1, 1956. This agreement, under which the Government of India recognises the Institute as the National Centre for advanced study and fundamental research in nuclear science and mathematics, provides for its administration by a council consisting of representatives of the 3 parties, the Government of India having a major voice.

Till the Atomic Energy Establishment of the Department of Atomic Energy was created, the Department recognised the Institute as the centre for all large-scale projects in nuclear research and entrusted to it important research projects in which it was interested. With the creation of the Atomic Energy Establishment such projects have been taken over by the Establishment; however, pending the construction of its own laboratories at Trombay, facilities are being provided at the Institute to divisions of the Engineering and Physics Groups of the Establishment.

COUNCIL

J. R. D. Tata (*Chairman*); S. Ratnam; V. T. Dehejia, I.C.S. Professor R. Chokai, M.A.; Dr. H. J. Bhabha, D.Sc., F.R.S., F.R.I., F.R.S.

STAFF

Academic

Dr. H. J. Bhabha, D.Sc., F.R.S., F.R.I., F.R.S., *Director and Professor of Theoretical Physics*; Professor K. Chandrasekharan, Ph.D., *Professor of Mathematics*; Professor D. D. Kosambi, *Professor of Mathematics*; Professor B. Peters, Ph.D., *Professor of Experimental Physics*; Dr. D. Y. Phadke, Ph.D., *Associate Prof. of Experimental Physics*; Dr. S. S. Dharmall, Ph.D., *Reader in Experimental Physics*; Dr. B. V. Thosar, Ph.D., *Reader in Experimental Physics*; Dr. M. G. K. Menon, Ph.D., *Reader in Experimental Physics*; Dr. K. G. Ramanathan, Ph.D., *Reader in Mathematics*.

Administrative

E. C. Allardice, I.C.S. (Retd.), *Deputy Director (Administration)*; N. E. Puthran (*Registrar and Secretary to the Council*).

TATA INSTITUTE OF SOCIAL SCIENCES

Chembur, Bombay 38.

Board of Trustees.—Lady Ratan Tata; Sir H. P. Mody (*Chairman*); J. R. D. Tata; Dr. John Matthai; A. D. Shroff; N. H. Tata; Professor R. Choksi (*Managing Trustee*).

Governing Board.—Prof. R. Choksi (*Chairman*); N. H. Tata; O. B. D. Tata; K. G. Falyidain; D. S. Naks; P. A. Narielwala; A. D. Gorwala; Col. L. Sawhny; Prof. A. R. Wadia; L. S. Kudchedkar (*Secretary*).

The Tata Institute of Social Sciences was founded in June, 1936—then known as Sir Dorabji Tata Graduate School of Social Work—by the Trustees of the Sir Dorabji Tata Trust. Admission to the Institute is open only to graduates of recognised universities. The Institute offers a two years' training in professional social work on the successful completion of which a Diploma in Social Service Administration is awarded. The Courses of specialisation include Labour Welfare and Industrial Relations, Family and Child Welfare, Medical and Psychiatric Social Work, Community Organisation and Development, Criminology, Juvenile Delinquency and Correctional Administration, Social Research, Rural Welfare and Tribal Welfare.

The Institute also offers one-year programmes of training in Applied Psychology and Social Research, and six months' programmes of training in (1) Criminology, juvenile delinquency and correctional administration, (2) Institutional care, (3) Organisation of Community Welfare Centres, (4) Rural Welfare and (5) Labour Welfare and Management.

In addition to the training programmes, the Institute maintains a Department of Research which promotes research in social problems. Under the auspices of the Department of Publications *The Indian Journal of Social Work* is published every quarter and edited by the Director of the Institute.

Among other activities of the Institute are the Child Guidance Clinic and the special school for bedridden hospitalised children located in the Jeebai Wadia Hospital for Children, Parel, Bombay, and a community welfare centre in Worli, Bombay. Psychological and Group Work Laboratories are also being equipped to provide facilities for practical work.

The Social Education Organizers' Training Centre is under the management of the Institute.

Director.—Professor A. R. Wadia, M.P.

Registrar.—L. S. Kudchedkar, M.A., Associate of Institute of Education (London).

WESTERN HIGHER TECHNOLOGICAL INSTITUTE

The Institute was expected to start functioning in July, 1958.

It is the second in the chain of four such institutes to be set up in the country. The first is located in Kharagpur.

To begin with, the Institute will function at the newly-constructed premises of the Silk and Art Silk Research Association at Worli, but it will move into its permanent home on the 550-acre site on the banks of Powai lake in July 1959.

In the beginning, 100 graduates and 50 post-graduates will be admitted into the Institute for courses in civil, mechanical and electrical engineering, chemical engineering and metallurgy.

But when completed, the Institute will have 2,000 resident students and will be one of the biggest and most up-to-date institutions of its kind in Asia.

The Institute will function as an autonomous body and will be declared, like the Kharagpur Institute, an institution of national importance by an act of Parliament as soon as possible.

A board of governors under the chairmanship of Mr. Kasturbhai Lalbhai for the administration and management of the affairs of the Institute is being set up.

The Bombay Government has placed at the disposal of the Central Government a 550-acre site near Powai Lake free of cost for the Institute. Construction of buildings was expected to begin at any time.

UNESCO has agreed to assist in the establishment of the Institute with 15 experts, three translators and a substantial amount of equipment from the U.S.S.R.

Thirteen Soviet experts and three translators have already arrived in India. Orders for equipment costing Rs. 54.61 lakhs have already been placed and part of the equipment has also started arriving.

UNESCO in its programme for 1958 has made a provision of about Rs. 12.5 lakhs.

The total UNESCO contribution is Rs. 1.5 crores. The Government of India will spend about Rs. 5 crores.

The U.N. team of experts is headed by Dr. Martin Ovsy and is helping to set up the Institute.

THE VAISHYA VIDYA VARDHAK SAMAJ, BOMBAY

33 G, Vithal Mandir, Mughbat Cross Lane, Bombay 4.

Educational Charitable Institute.

President: D. L. Heghte; *Secretary:* V. S. Khatu, B.A. (Hons); *Treasurer:* P. H. Helekar.

CARRIAGE TYRE CHANNELS

Pritt & Co., Ltd., 11-12, St. Swithin's Lane, London, E.C. 4. Agents: Soho House, Lohar Street.

CASE HARDENING COMPOUND

IMPERIAL CHEMICAL INDUSTRIES LTD., General Chemicals Division, England. ("Cassel" brand Heat treatment Salts). Agents in India: I.C.I. (India) Private Ltd., Post Box No. 310, Bombay 1.

CASTING MANUFACTURERS

Les Fonderies Magotteaux Limited, Belgium—Steel Casting, Grinding Bodies, for Cement, Mining, Chemical and Ore Crushing Industries. Contact: Ratansi Morari Private Limited, Prospect Chambers, 317/21, Dr. Dadabhai Naorji Road, P. B. No. 1270, Bombay 1.

CEMENT & CONCRETE

Cement Marketing Co., Ltd., London. Agents: Killick Nixon & Co. Private Ltd., Killick House, Home Street, Fort.

Christiani & Nielsen, Copenhagen, Denmark. Patented B. C. Arch Bridges with inclined hangers. Sole Agents in India: Gammon India Private Ltd., Hamilton House, Ballard Estate, Bombay.

Colcrete Ltd., London. Manufacturers of Colloidal Mixers and Colloidal Trouting. Sole Agents in India: Gammon India Private Ltd., Hamilton House, Ballard Estate, Bombay.

DYCKERHOFF PORTLAND CEMENT-WERKE AG., Wiesbaden-Amöneburg, Germany. Manufacturers of Rapid hardening cement, Dyckerhoff, Half-burnt-oil-well cement, Low Heat Portland cement, Dyckerhoff sulfated High Sulphate Resistant Cement. Sole Agents: H. Meelchand & Co., 25, Farooq Bazar Street, Bombay 1. Branch Office: 28, Chawringhee Road, Calcutta 13.

Keystone Refractories Co., "Dura-Stix"
Firebrick Cement. Agents: Hardcastle,
Waud & Co., Private Ltd., Alice Buildings,
Dr. Dadabhai Naoroji Road, Fort.
Moushel & Partners, L. G., Ltd., London.
Water Cooling Towers. Agents in India:
Gammon India Private Ltd., Hamilton
House, Ballard Estate.

CEMENT AND CONCRETE MACHINERY

Winget Limited. Concrete Mixers & Mortar
Mills, Vibrators, Batching Plants. Sole
Distributors: William Jacks & Co. Ltd.,
Hamilton House, Graham Road, Ballard
Estate.

CEMENT MACHINERY

Johnson (Machinery) Ltd., C. H., England.
Sole Agents: Killick Nixon & Co., Private
Ltd., Killick House, Home Street, Fort.

CEMENT WATERPROOFER

**Oliver Keeling & Sons, Keynsham, Nr.
Bristol.** Agents: Gillanders Arbuthnot
& Co. Ltd., 16, Queen's Road Estate,
Bombay 1.

CERAMIC KILNS & MATERIALS

Applied Heat Co., Ltd., The, England.
Agents in India: Indian Wild-Barfield
Co. Private Ltd., Lotus Cinema Buildings,
Hornby Vellard, Bombay 8.

Blythe Colour Works Limited, England.
General Agents in India: Indian Wild-
Barfield Co. Private Ltd., Lotus Cinema
Building, Hornby Vellard, Bombay 8

CHAIN BELTS AND CONVEYORS

Supplies Establishment, (Greenwich) House,
Taunton Somerset, England.**
Agents: E. W. Stevens and Co., Private
Ltd., 4, Ballard Road, Bombay 1.

CHEMICAL MANUFACTURERS

**A.C.C.I. CAUSTIC SODA, Liquid Chlo-
rine, Hydrochloric Acid.** Selling
Agents in India: I.C.I. (India) Private
Ltd., Post Box No. 310, Bombay 1.
(For details please see under the
heading "CHEMICALS".)

**DIA CHEMIE. (Gorman D. R.) Sole
Distributors: Mahendra Shantlal,
Abeebaher Mannan, 8, Causeway
Road, Bombay 1. Grams: "COAL-
TAN," Bombay.**

**HARDMAN & KOLDEN LTD., Man-
chester, England.** Manufacturers of
"Manox" Sodium Hydrosulphite.
Sole Suppliers in India: Ciba Dyestuffs
Private Ltd., Royal Insurance Build-
ing, Jamsheji Tata Road, Churchgate
Reclamation, Bombay 1. Phones:
37184-87. Tel. Address: "CIBA".
Post Box No. 479. Codes used: Uni-
versal Trade and Bentley's Second
Phrase.

Howards of Ilford Ltd., Ilford, near London.
Manufacturers of Pharmaceutical Chemi-
cals, Quinine preparations and Solvents.
Agents: The Anglo-Thal Corporation
Ltd., Ewart House, Bruce Street.

**JOHNSONS OF HENDON LTD., Hen-
don Way, London, England.** Scales
Brand Photographic & Process
Chemicals. Agents: Allied Photo-
graphics Private Ltd., Kasturi Bldg.,
Jamsheji Tata Road, Bombay 1.

**ROEM & HAAS CO., Philadelphia,
U.S.A.** Sole Representatives in India:
Amritlal & Co. Private Ltd., 11, Sprent
Road, Ballard Estate, Fort, Bombay.

CHEMICAL AND PHARMACEU- TICAL MACHINERY AND EQUIPMENT MFRS.

Amberg, Germany. Machinery for manu-
facture of Ampoules, Vials, Tablet and test-
tubes, bulbs, etc. Glass Tubes Cutting,
Sorting & Weighing Machines. Agents:
Armstrong Smith Private Ltd., 1, Sir
P. M. Road, Bombay 1.

Apex Construction Co., London. Tablet
Machines, Industrial Compressing Ma-
chinery, Pharmaceutical equipment, spe-
cial process plant. Agents: Armstrong
Smith Private Ltd., 1, Sir P. M. Road,
Bombay 1.

Blackfriars Engineering Co., England.
Mason Mills used in Rubber, Plastics
and allied industries. Agents: Armstrong
Smith Private Ltd., 1, Sir P. M. Road,
Bombay 1.

son & Junior" Rotary Cutters used in
Rubber, Plastic and allied industries.
Agents: Armstrong Smith Private Ltd.,
1, Sir P. M. Road, Bombay 1.

**Constructors John Brown Limited Fertilizer,
Heavy Water plant, etc. Sole Distributors:
William Jacks & Co., Ltd., Hamilton
House, Graham Road, Ballard Estate.**

**Enamelled Metal Products Corporation
(1933) Ltd., England.** "PFAUDLER"
Glass Enamelled Steel Storage & Mixing
Vessel, Steel Chemical Process Equip-
ment, Stainless Steel Vessel & Equip-
ment. Agents: Armstrong Smith Private
Ltd., 1, Sir P. M. Road, Bombay 1.

L. A. Mitchell Ltd., England. Heating
Ovens, Mitchell Drying Equipment, Acid
Pumps, Chemical Plants, etc. Agents: Arm-
strong Smith Private Ltd., 1, Sir P. M.
Road, Bombay 1.

Pfaudler Co., U.S.A. "Pfaudler" Glass
Enamelled Steel Storage & Mixing Vessel,
Steel Chemical Process Equipment, Stain-
less Steel Vessel & Equipment. Agents:
Armstrong Smith Private Ltd., 1, Sir
P. M. Road, Bombay 1.

Pfaudler Werke A. G., Germany. "Pfaudler"
Glass Enamelled Steel Storage & Mixing
Vessel, Steel Chemical Process Equipment,
Stainless Steel Vessel & Equipment.
Agents: Armstrong Smith Private Ltd.,
1, Sir P. M. Road, Bombay 1.

Q. V. F. Limited, England. Industrial Plants
in Glass, "FYREX" Visible Flow Pipes
Lines for Chemical, Pharmaceutical and
Food Industries. Agents: Armstrong Smith
Private Ltd., 1, Sir P. M. Road, Bombay 1.

**Sharples International Centrifugal Sales
Ltd., Nassau.** Complete range of special-
ized equipment for Centrifugal application
in paint, vegetable oil, lubricating oil,
transformer oil, pharmaceuticals, chemi-
cals, starch, oil re-claiming, etc. Agents:
Armstrong Smith Private Ltd., 1, Sir
P. M. Road, Bombay 1.

CHEMICALS

**Alro Company International, 60, East
42nd Street, New York 18 N.Y., U.S.A.**
Agents: Hardcastle, Waud & Co., Private
Ltd., Alice Buildings, Dr. Dadabhai
Naoroji Road, Fort.

Representatives in India: Voltas Limited, Ballard Estate, Bombay 1.

Weldcraft Ltd., 26, Purley Way, Croydon, England. Manufacturers of "Bronze-craft" Low Temperature Welding Rods. Sole Agents: Datson Raviraj & Co., 43, Tamarind Lane, Fort.

Welding Supplies Ltd., England. Electrodes & Welding Plants, Magnetic Crack Detectors, and Gas Cutting Machines. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

ELECTRONIC AIDS FOR AVIATION

Maryland Electronic Mfg. Co., Maryland, U.S.A. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

ELECTRONIC APPARATUS FOR RESEARCH & INDUSTRY

Allen B. Du Mont Laboratories, Inc. International Division, 615, Madison Avenue, New York, 22 N.Y., U.S.A. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

Buonton Radio Corp., Buonton, New Jersey, U.S.A. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

Southern Instruments Ltd., Surrey, England. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

Sperry Gyroscope Co. Ltd., Brentford, Middlesex, England. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

Sperry Gyroscope Co., Great Neck, New York, U.S.A. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

ELECTRONIC APPARATUS & RADIO BROADCASTING & COMMUNICATION EQUIPMENT

Westinghouse Trading Co. (Asia) Ltd., 40 Wall Street, New York, U.S.A. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

ELECTRONIC EQUIPMENT AND INSTRUMENTS

Brush Instruments, Cleveland 14, Ohio, U.S.A. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

Electronic Instruments Ltd., Surrey, England. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

General Radio Company, Cambridge 30, Mass., U.S.A. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

ELECTROPLATING & POLISHING EQUIPMENTS

I.C.I. LTD., General Chemicals Division England. (Cyanides) Agents: I.C.I. India Private Ltd., P.O. No. 310, Bombay 1.

MOND NICKEL CO. LTD. THE, England. (Nickel Sulphate, Chloride etc.) Agents: I.C.I. (India) Private Ltd., P.O. Box No. 310, Bombay 1.

R. Cruickshank Ltd., Camden St., Birmingham 1. Agents: Hardcastle, Waud & Co. Private Ltd., Alice Buildings, Dr. Dadabhoi Naoroji Road, Bombay 1.

W. Canning & Co. Ltd., Birmingham, England. Agents and Chief Distributors: S. Mitra & Co., 187, Dr. Dadabhoi Naoroji Road, Bombay 1. Grams: "Mudeshi."

ENGINEERING

Aerex Ltd., 46, Rutland Park, Sheffield. Mine Ventilating Fans. Agents: Balmer Lawrie & Co. Ltd., 5, Graham Road, Ballard Estate, Fort, Bombay. Phone: 261494 (3 lines). Grams: "BALMER."

Ashworth & Parker, Ltd., Rury, Lancs. High Speed Steam Engines and Accessories. Sole Representatives: W. H. Brady & Co., Ltd., Veer Nariman Road, Fort, Bombay 1.

Beck & Co. (Motors) Ltd., etc. Agents: Hardcastle, Waud & Co. Private Ltd., Alice Buildings, Dr. Dadabhoi Naoroji Road, Fort.

British Pitometer Co., Ltd., London. Agents: Glenfield & Kennedy, Ltd., 198, Jamshedji Tata Road, Fort, Bombay 1.

Charles Thomas & Co., Ltd., Wainwright Street, Aston, Birmingham, 6, England. Agents: Soho House, Lohar Street, Bombay.

Christiansen & Nielsen, Copenhagen, Denmark. Patented R.C.C. Arch Bridges with inclined hangers. Sole Agents in India: Gammon India Private Ltd., Hamilton House, Ballard Estate.

Craven Bros. Crane Division, Ltd., Loughborough. Breakdown and Railway Cranes. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Glenfield & Kennedy, Ltd., Kilmarnock. Agents: Glenfield & Kennedy, Ltd., 198, Jamshedji Tata Road, Fort, Bombay 1.

Henricot Steel Foundry, 5, Lawrence Pountney Hill, Cannon Street, London, E. O. 4. Steel Castings. Agents: Hardcastle, Waud & Co. Private Ltd., Alice Buildings, Dr. Dadabhoi Naoroji Road, Fort.

Hick Hargreaves & Co., Ltd., Steam Engines and Turbo Generators. Representatives: W. H. Brady & Co., Ltd., Veer Nariman Road, Fort, Bombay 1.

Hoffman Sprinkler Co., Ltd., Manchester. Specialists. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Hopkinson, Ltd., Huddersfield. Mountings and Fittings for all classes of Engines and Boilers, Steam, Air and Oil Valves, Oil Purifiers. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Kent, George, Ltd., Biscot Road. Work: Lutes, Beds, Steam, Water, Air and Oil Meters and Recorders. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Lister & Co. (R. A.), Dursley, Glos. Auto Trucks. Agents: Balmer Lawrie & Co., Ltd., 5, Graham Road, Ballard Estate, Bombay. Phone: 261494 (3 lines). Grams: "BALMER."

Morris (Herbert), Ltd., Loughborough. Hand & Electric Cranes, Pulley Blocks, Runways, Stacking Machines, Lifts, Conveyors, Elevators, and all types of Mechanical Handling Equipments. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Norris, Henty & Gardner, Ltd., High Speed Oil Engines. Sole Representatives: W. H. Brady & Co., Ltd., Veer Nariman Road, Fort, Bombay 1.

Renold Chain Ltd., Didbury, Manchester. Chains, Chain Drives, etc. Sole Representatives for India: W. H. Brady & Co., Limited, 12/14, Veer Nariman Road, Fort, Bombay 1.

Richard Klinger Ltd., Klinger Engineering specialities. Agents: Hardcastle, Waud & Co. Private Ltd., Alice Buildings, Dr. Dadabhoi Naoroji Road, Fort.

Ultra Lens Company, The, London, E.C. 2. Agents: Hardcastle, Waud & Co. Private Ltd., Alice Buildings, Dr. Dadabhoi Naoroji Road, Fort.

Veeder-Root Ltd., Hartford, U.S.A. Counters. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Weir, G. & J., Ltd., Glasgow. Pumps & Power Plant Auxiliaries, Refrigeration Plant. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Wells, A. C., & Company Ltd., Manchester. Wells Oil Filters. Agents: Hardcastle, Waud & Co. Private Ltd., Alice Buildings, Dr. Dadabhoi Naoroji Road, Fort.

ENGINEERING STORES & HARDWARE

Dicks Asbestos and Insulating Co., Ltd., Asbestos Packings. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Dixon (Joseph), Crucible Co., Graphite Specialities. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Lushington Tool & Gauge Co., Ltd., England. Representatives: Behram & Co., 11 Lakshmi Bldg, Sir P. M. Road, Bombay 1.

Nicholson File Co., Providence, U.S.A. Files and Rasps. Wholesale Representatives in Bombay State: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Signode Steel Strapping Co., Chicago. "Signode System" of Strapping and Seals. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

ENGRAVING MACHINES

Taylor, Taylor & Hobson Ltd., England. Engraving Machines, Pantograph Milling & Die-sinking Machines, Electric Etching Equipment. Toolmakers' Microscopes, Talsurf Instrument, Talysurf Roundness Measuring Instrument, Auto-Collimator, etc. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

ESSENTIAL OILS

Antoine Chris, S. A. Grasse, France. Sole Agents: Anil Trading Co. 32, Princess Street, Bombay 2.

Destillaciones Bordas Chinchureta, S.A., Seville, Spain. Essential Oils. Distributors: F. Bock & Co., Shale Building, Bank Street, Fort.

Destillaciones Garcia De la Fuente S.A., Granada (Spain). Sole Agents: Aromatic Products & Chemicals Private Ltd., 42, Prospect Chambers Annexe, Dr. Dadabhoi Naoroji Road, Fort, Bombay 1. Grams: "DISCOVERY."

Dragoco-Holzminnen, W. Germany. Agents: B. C. Patel & Co., 79, Princess Street, Bombay 2.

ESROLKO LTD. (formerly FLORA), Switzerland. Mfrs. of Synthetic Essential Oils & Aromatic Chemicals. Agents: M. C. Davar & Co., 143, Princess Street, Bombay 2.

H. Raab & Co., Amsterdam, Holland. Agents: B. C. Patel & Co., 79, Princess Street, Bombay 2.

Jean A. du Crocq Jr. N. V., Huizen N. H., Holland. Agents for Bombay State: R. K. Shapurji & Co., Prospect Chambers, 319, Dr. Dadabhoi Naoroji Road, P.O. No. 1065, Bombay 1.

L. Russo & Figlio, Messina (Italy). Sole Agents: Aromatic Products & Chemicals Private Ltd., 42, Prospect Chambers Annexe, Dr. Dadabhoi Naoroji Road, Fort, Bombay 1. Grams: "DISCOVERY."

M. M. Hatherbacha & Co., Penang, Malaya. Agents: M. C. Davar & Co., 143, Princess Street, Bombay 2.

N. V. Chemische Fabriek "FLEBO" Hoeszand (Holland). Sole Agents: Aromatic Products & Chemicals Private Ltd., 42, Prospect Chambers Annexe, Dr. Dadabhoi Naoroji Road, Fort, Bombay 1. Grams: "DISCOVERY."

P. Robertet & Co. Grasse, France. Agents: B. C. Patel & Co., 79, Princess Street, Bombay 2.

S. A. Jean Roure, Pierre Ziller, Bruno Court, Grasse (France). Sole Agents: Aromatic Products & Chemicals Private Ltd., 42, Prospect Chambers Annexe, Dr. Dadabhoi Naoroji Road, Fort, Bombay 1. Grams: "DISCOVERY."

Takasago Perfumery Co. Ltd., Tokyo, Japan. Sole Agents: Aromatic Products & Chemicals Private Ltd., 42, Prospect Chambers Annexe, Dr. Dadabhoi Naoroji Road, Fort, Bombay 1. Grams: "DISCOVERY."

EXCAVATING MACHINERY MANUFACTURERS

Austin Western Co., Construction Equipment Division, Aurora, Illinois, U.S.A. Power Graders, Hydraulic Cranes, Motor Sweepers, etc. Sole Concessionaires: Greaves Cotton & Co., Ltd., 1, Forbes Street, Fort, Bombay.

Blaw Knox Ltd., London. Excavators. Sole Agents: Marshall, Sons & Co. (India) Ltd., Marshall's Building, Ballard Road, Bombay 1.

Harnischfeger International Corporation, Milwaukee, Wisconsin, U.S.A. Power Shovels, Draglines, Cranes, Clamshells and Soil Stabilisers. Sole Importers: Voltas Ltd., Chinchpokli Road, Bombay 12.

Marion Power Shovel Co., Ohio, U.S.A. Agents: Blackwood Hodge (India) Private Ltd., Lotus House, Marine Lines, Bombay 1.

Newton Chambers & Co. Ltd., Horncliffe, Sheffield. Excavators, Earthmoving Plant. Agents: Balmer Lawrie & Co. Ltd., 5, Graham Road, Ballard Estate, Bombay. Phone: 261494 (3 lines). Grams: "BALMER".

Ruston-Bucyrus Ltd., Lincoln, England and Bucyrus-Erie Company, South Milwaukee, Wisconsin, U.S.A. Excavating Machinery, Well and Blast Hole Drills, Hydro Cranes. Sole Concessionaires: Greaves Cotton & Co., Ltd., 1, Forbes Street, Fort.

Thomas Smith & Sons (Rodley) Ltd., Rodley. Excavators. Sole Agents: Marshall, Sons & Co. (India) Ltd., Marshall's Building, Ballard Road, Bombay 1.

EXPLOSIVES

I.C.I. LTD. Nobel Division, Glasgow, Scotland. Commercial Explosives & Accessories for Blasting also Sporting Gunpowder. Selling Agents: I.C.I. (India) Private Ltd., P.B. No. 310, Bombay 1.

FACTORY AND CALENDAR CLOCKS

Solari Remic O. & C. (Italy). Agents: for India: Essential Engineering Co., Botawalla Building, Horniman Circle, Fort, Bombay.

FANS

Blackman Export Co. Ltd., London. Industrial Fans and Blowers. Sole Agents: Marshall Sons & Co. (India) Ltd., Marshall's Building, Ballard Road, Bombay 1.

FILTERS

Vokes Ltd., Guilford, England. Agents: John Fowler India Private Ltd., Marshall's Bldg., Ballard Road, Bombay 1.

FIRE ENGINES AND APPLIANCES MANUFACTURERS

Coventry Climax Engines, Ltd., Widdrington Road Works, Coventry (ENGLAND). Sole Agents: Kooveryl Devshi & Co., Private Ltd., 164, Lohar Street, Bombay 2.

Dennis Bros. Ltd., Guildford, Surrey, England. Dennis' Motor, Fire Engines and Trailer Pumps. Agents: Roberts, McLean & Co., Ltd., Ilaco House, Sir Phipposah Mehta Road.

Merryweather & Sons, Ltd., Greenwich, London. Fire Engines and Appliances. Agents: Balmer Lawrie & Co., Ltd., 5, Graham Road, Ballard Estate, Bombay. Phone: 261494 (3 lines). Grams: "BALMER".

Read & Campbell Ltd., 75, Victoria Street, Westminster, London S.W. 1 (ENGLAND). Sole Agents: Kooveryl Devshi & Co., Private Ltd., 164, Lohar Street, Bombay 2.

Walter Kidde Co., England. Fire Extinguishers and built-up systems. Agents: Roberts McLean & Co., Ltd., Ilaco House, Sir Phipposah Mehta Road, Fort.

FIRE FIGHTING APPLIANCES

Albion Motor Co., Sweden. Sole Agents: National Fire Equipment Co., 11 Bank Street, Bombay 1.

Firewater Company, 1, First Street, Los Altos, California (U.S.A.). Sole Agents: Kooveryl Devshi & Co., Private Ltd., 164, Lohar Street, Bombay 2.

James Hendry Ltd., 252 Main Street, Bridgeton, Glasgow, S.E. (ENGLAND). Sole Agents: Kooveryl Devshi & Co., Private Ltd., 164, Lohar Street, Bombay 2.

Koehler Mfg. Co., Marlboro, Massachusetts (U.S.A.). Sole Agents: Kooveryl Devshi & Co., Private Ltd., 164, Lohar Street, Bombay 2.

Mandala Reberthane C. H. Co., Oslo, Norway. Sole Agents: National Fire Equipment Co., 11, Bank Street, Fort, Bombay 1.

Pyrene Company Ltd. Fire fighting Appliances. Sole Distributors: William Jacks & Co., Ltd., Hamilton House, Graham Road, Ballard Estate.

FIRE WORK MFRS.

ALBRIGHT & WILSON LTD., England. (Strontium Nitrate). Selling Agents: I.C.I. (India) Private Ltd., Post Box No. 310, Bombay 1.

ENGLISH METAL POWDER CO., LTD., England. Aluminium Powder Pyrotechnic. Selling Agents: I.C.I. (India) Private Ltd., Post Box No. 310, Bombay 1.

I.C.I. LTD., Nobel Division, England. (Barium Nitrate). Selling Agents: I.C.I. (India) Private Ltd., Post Box No. 310, Bombay 1.

FISH (PRESERVED)

Seafood Products Ltd., Vancouver. Frozen Fish. Sole Distributors: Spencer & Co., Ltd., Spencer's Building, Forjett Street, Bombay 26.

Stavanger Preserving Co., A.B. Canned Fish. Sole Agents: J. I. Morrison, Son & Jones (India) Private Ltd., Contractor Building, Nicol Road, Ballard Estate, Bombay 1.

FLAME GUNS & BURNERS

Hauck Manufacturing Co., U.S.A. Agents: Guest, Keen, Williams, Ltd., Wakefield House, Sprott Road, Ballard Estate, Bombay 1.

FLAVOURING & PERFUMERY RAW MATERIALS

Jean A. du Crocq Jr. N. V., Hulzen N. H. Holland. Sole Agents for Bombay State: R. K. Shapurjee & Co., Prospect Chambers, 319, Dr. Dadabhai Naoroji Road, P.B. No. 1065, Bombay 1.

R. Lienau & Co., 22(a) Urdingen A. B.H., Germany-West. Sole Agents: R. K. Shapurjee & Co., Prospect Chambers, 319, Dr. Dadabhai Naoroji Road, P.B. No. 1065, Bombay 1.

FLOOR HARDENING COMPOUND

Ironite Co., Ltd., 4, Holbeine Place, Sloane Square, London, S.W. 4. Sole Agents: Hestly & Graham, Ltd., 9, Forbes Street, Fort.

FOOD PREPARATION MACHINERY

Allied Ironfounders Ltd., England. Heavy duty Hotel & Canteen Cooking and Food Preparation Machinery. Sole Distributors: William Jacks & Co. Ltd., Hamilton House, Graham Road, Ballard Estate.

FORGINGS AND STAMPINGS FOR RAILWAYS

COMPTON DES FERRURES, CHARLEVILLE (ARDENNES), France. Manufacturers of Component Parts of Machinery, Rolling Stock, etc. Agents: Gaytee & Company, Jammahkeoni Chambers, Fort Street, Bombay. Phone: 263446. Grams: "IMPENG."

USINES ET ACIERIES DE SAMBRE ET MEUSE, Paris, France. Steel Castings, Carbon Steel and Alloy Steel. Railroad Parts, Armament Products, Aircraft Bombs, Machinery, etc. Agents: Gaytee & Company, Jammahkeoni Chambers, Fort Street, Bombay. Phone: 263446. Grams: "IMPENG."

FORK LIFT TRUCKS

Coventry Climax Engines Ltd., Widdrington Road Works, Coventry. Fork Lift Trucks, etc. Sole Distributors: William Jacks & Co. Ltd., Hamilton House, Graham Road, Ballard Estate.

Ransomes, Sims & Jefferies Ltd., Fork Lift Trucks, Electric Fork Lift & Works Trucks. Sole Distributors: William Jacks & Co. Ltd., Hamilton House, Graham Road, Ballard Estate.

FOUNDRY MATERIAL & EQUIPMENT

FEDERAL FOUNDRY SUPPLY CO., U.S.A. Manufacturers of "SANDLO" Core Blowers. Sole Agents: Pioneer Equipment Co., Private Ltd., 139, Meadows Street, P.O. Box 1909, Bombay 1 (Phone: 251882). Also at 1, Mangoe Lane, Calcutta 1 (Phone: 251811) and 193, Mount Road, Madras 2. Grams: "FIOMETAL."

Foundry Services Ltd., Long Acre, Nechelles Birmingham. Foundry Fluxes, for use in the founding of light alloys, non-ferrous & ferrous metals. Sole Concessionaires: Greaves Cotton & Co., Ltd., 1, Forbes Street, Fort.

GRAY-WULFEL, G.M.B.H., Germany, manufacturers of Sand Conditioning & Foundry Mechanization Plants. Sole Agents: Pioneer Equipment Co. Private Ltd., 139, Meadows Street, P.O. Box 1909, Bombay 1 (Phone: 251882). Also at 1, Mangoe Lane, Calcutta 1 (Phone: 251811) and 193, Mount Road, Madras 2. Grams: "FIOMETAL."

GUSTAVE KIMMERMAN MASCHINEN-FABRIK, G. M. B. H., W. Germany. Manufacturers of famous Zimmerman Moulding Machines. Sole Agents: Pioneer Equipment Co., Private Ltd., 139, Meadows Street, P.O. Box 1909, Bombay 1 (Phone: 251882). Also at 1, Mangoe Lane, Calcutta 1 (Phone: 251811) and 193, Mount Road, Madras 2. Grams: "FIOMETAL."

Hauck Manufacturing Co., U.S.A. Agents: Guest, Keen, Williams, Ltd., Wakefield House, Sprott Road, Ballard Estate, Bombay 1.

KRON WERKE, Germany, Manufacturers of Moulding Boxes etc. Sole Agents: Pioneer Equipment Co. Private Ltd., 139, Meadows Street, P.O. Box 1909, Bombay 1 (Phone: 251882). Also at 1, Mangoe Lane, Calcutta 1 (Phone: 251811) and 193, Mount Road, Madras 2. Grams: "FIOMETAL."

Houghton, B. F. & Co., Philadelphia. Agents: Hardcastle, Waud & Co., Private Ltd., Alice Buildings, Dr. Dadabhai Naoroji Road, Fort.

Morgan Crucible Co. Ltd., The Battersea Church Road, London, S.W. 11. Morgan's tilting and Lift-out Furnaces—Coke and Oil-fired, Crucibles and Accessories, Plumbago and Patching Materials, Refractoryware and other allied articles. Sole Concessionaires: Greaves Cotton & Co. Ltd., 1, Forbes Street, Fort.

Newton Chambers & Co., Ltd., Thorncliffe. Agents: Killick, Nixon & Co., Private Ltd., Killick House, Home Street, Fort.

Robinson Major & Co., Manchester. Manufacturers of "SCOLS" Iron Cement, Pipe Joint Compound, Tube and Bar Bending Machines. Sole Agents: J. D. Jones & Co. (Bombay), Private Ltd., Ruston Building, Vir Nariman Street, Fort.

SISSON LEHMANN, France, Manufacturers of Shot Blasting machines. Sole Agents: Pioneer Equipment Co., Private Ltd., 139, Meadows Street, P.O. Box 1909, Bombay 1 (Phone: 251882). Also at 1, Mangoe Lane, Calcutta 1 (Phone: 231611) and 193, Mount Road, Madras 2. Grams: "PIOMETAL."

FOUNTAIN PEN

Montblanc Simplo GmbH.—Germany. Manufacturers of Quality Writing Instruments, Pens, Pencils, Desk-sets & Ink. Sole Agents in India:—Jhaveri Bros. & Co., Private Ltd. (Established 1914), 345, Abdul Rehman Street, Opp. Crawford Market, Bombay 8. Grams: "MONTBLANC"

FRUIT JUICES AND EXTRACTS

H. D. Davies & Co., Ltd., 98/100 Bishopsgate, London E.C. 2. Sole Distributors: Spencer & Co. Ltd., Spencer's Building, Forjett Street, Bombay 26.

F. I. Michel & Co., Ltd., 415, Oxford Street, London W.1. Sole Distributors: Spencer & Co. Ltd., Spencer's Building, Forjett Street, Bombay 26.

FUEL INJECTION SERVICING EQUIPMENT

Little Hartridge, England. Fuel Injection Servicing Equipment. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

FUEL LINE PIPES

TECHNO-CHEMIE KESSLER & CO., West Germany. Mfrs. of Fuel Line pipes. Sole Agents: B. Chowdhury, Messrs. Indian Globe Chambers (7th Floor), Fort Street, Fort, Bombay 1. Phone: 26-3479. Grams: "KESSEKEL."

FURNACES

Furnace Construction Co., Birmingham, England. All kinds of Furnaces. Sole Concessionaires: Greaves Cotton & Co. Ltd., 1, Forbes Street, Fort, Bombay.

G. W. B. Furnaces Ltd., England. (Manufacturers of large Electric Furnaces). Sole Agents: Indian Wild-Barfield Co., Private Ltd., Lotus Cinema Buildings, Hornby Vellard, Bombay 8.

I. C. I. LTD., General Chemicals Division, England ("CASSEL" Heat Treatment Furnaces). Selling Agents: I. C. I. (India) Private Ltd., Fort Ben No. 316, Bombay 1.

Morgan Crucible Co. Ltd., The Battersea Church Road, London, S.W. 11. Morgan's tilting and Lift-out Furnaces, Oil and Coke-fired. Sole Concessionaires: Greaves Cotton & Co., Ltd., 1, Forbes Street, Fort.

OTTO-JUNKER, G. M. b. h., Germany. Electric Steel smelting and heat treatment Furnaces. Agents: Pioneer Equipment Co. Private Ltd., 139, Meadows Street, P.O. Box No. 1909, Bombay 1 (Phone: 251882). Also at 1, Mangoe Lane, Calcutta 1 (Phone: 231611) and 193, Mount Road, Madras 2. Grams: "PIOMETAL."

SELENER FURNACES LTD., Cardiff, U.K. Melting Furnaces, Reverberatory—Capacity 25 lb. to 5 tons—oil, coke and gas fired. Also Holding Furnaces. Sole Agents: Pioneer Equipment Co. Private Ltd., 139, Meadows Street, P.O. Box 1909, Bombay 1 (Phone: 251882). Also at 1, Mangoe Lane, Calcutta 1 (Phone: 231611) and 193, Mount Road, Madras 2. Grams: "PIOMETAL."

Stein & Atkinson Ltd., Parnell House, 25, Wilton Road, London, S. W. 1. Sole Agents: Heatly & Graham Ltd., 9, Forbes Street, Fort.

Thermic Equipment and Engineering Co. Ltd., England. Sole Agents in India: Indian Wild-Barfield Co., Private Ltd., Lotus Cinema Buildings, Hornby Vellard, Bombay 8.

Wild-Barfield Electric Furnaces Ltd., England. Associated Company in India: Indian Wild-Barfield Co., Private Ltd., Lotus Cinema Buildings, Hornby Vellard, Bombay 8.

GARAGE EQUIPMENT

A. B. Carl Larsson—Mek-Verkaland, Gothenburg Sweden. Agents: Chandul Mehta & Co., (Private) Ltd., 15, New Queen's Road, Bombay 4.

B. O. Morris Ltd., England. "Morrisflex" Flexible Shaft Equipment for Motor Garages, Workshops and for Boiler Decaling Agents: Armstrong Smith Private Ltd., Sir P. M. Road, Bombay 1.

Barrett Equipment Co., U.S.A. Brake Drum Lathes, Brake Belling Machines, Hydraulic Brake Bleeder & Filler Tanks. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Bear Manufacturing Co., U.S.A. Wheel Alignment and other Automotive Testing Equipment. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Black & Loecker Ltd., England. "UTILITY" Portable Electric Tools, Valve Refacers, Vibrocentric Mills, Bench & Portable Grinders, etc. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

British Tool & Engineering Co., Ltd., England. Sole Agents: Elliott Waud & Hill Private Ltd., 1-2, Lakshmi Bldg., Sir P. M. Road, Bombay 1.

G. & E. Fein, Germany. Heavy Duty Portable Electric Drills with Universal Motors 440 volts AC, Drills, Slow Speed Drills, Multipurpose Drills, Right Angle Drills and Attachments, Screw Drivers, Impact Wrenches, Valve Grinders, Tappers, Tool Post & Precision Lathe Grinders, Brake Drum & Journal Grinders, Shears, Nibblers, Pipe Cutting Saws, Stone (Rock) Drilling Machines, Hammers, etc. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Churchill, V. L. & Co., 27/34, Walnut Tree Walk, Kensington, London, S.E. 11. Agents: Heatly & Graham Ltd., 9, Forbes Street, Fort.

Clayton Manufacturing Co., U.S.A. CLAYTON Engine and Chassis Dynamo motors. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

De Vilbiss Company, Ohio, U.S.A. Air Compressing & Spray Painting Outfits, Hose, etc. Agents: John Fleming & Co., Private Ltd., Baiton Road, Fort, Bombay 1. Phone: 261153.

E. Asbeck-Genelsberg, Germany. Agents: Chandul Mehta & Co., (Private) Ltd., 15, New Queen's Road, Bombay 4.

Hall-Toledo (Division of Baker Bros. Inc.), U.S.A. Production Valve Seat Grinders, Eccentric Grinders. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Harvey Frost & Co. Ltd., England. Garage Tools, Jacks, Tyre Changers, Vulcanising Equipment. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Homestead Valve Mfg. Co. Ltd., U.S.A. Hypressure Steam Jennis & Compounds. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Joseph Bradbury & Sons Ltd., England. Garage Equipment, Jacks, etc. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

King Electric Equipment Co. Inc. Cleveland, Ohio, U.S.A. Agents: Chandul Mehta & Co., (Private) Ltd., 15, New Queen's Road, Bombay 4.

Lisle Corporation, U.S.A. Cylinder Honing Machines, Wet Honing Machines, Ridge Reamers, Rod Aligners, Glaze Brakers, Garage Tools. Also "Lisle" MAGNETIC PLUOS. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Newton Bros. (Cudworth) Ltd., England. Hand or Power Operated Main Wire Bearing Boring Machines, Conrod Aligning & Boring Machines and other Engine Reconditioning Equipment. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Origo—Verken: Halmstad—Sweden. Agents: Chandul Mehta & Co., (Private) Ltd., 15, New Queen's Road, Bombay 4.

Otto—Boge, Belfeld, Germany. Agents: Chandul Mehta & Co., (Private) Ltd., 15, New Queen's Road, Bombay 4.

Rogers Wilson & Co. Ltd., England. Tyre Retreading Plants and Accessories. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Taylor & Jones Ltd., England. "T & J" Expanding Reamers and Tool Holders. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Tecalemit Ltd., Brentford, U.K. Agents: Tecalemit (India) Ltd., 9, Forbes Street, Fort, Bombay.

Van Norman Co., U.S.A. Cylinder Boring Bars, Crankshaft Regrinders, Horizontal Surface Grinders, Automatic Wet Honer, Super Rotary Surface Grinder, Con-Rod Boring Machine, Piston Turning & Grinding Machines, Race-way Grinding Machines, Special purpose Milling Machines. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

GAS CUTTING MACHINERY

Welding Supplies Ltd., England. Electrodes & Welding Plants, Magnetic Crack Detectors, and Gas Cutting Machines. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

GAS GENERATORS

Bottigas Ltd., 6, London Street, Paddington W.2. Agents: Heatly & Graham Ltd., 9, Forbes Street, Fort.

GAS MAKING PLANT, ETC.

Humphreys & Glasgow Ltd., London. Agents: Killick Nixon & Co., Private Ltd., Killick House, Home Street, Fort.

GAS TURBINES

Blackburn & General Aircraft Ltd., Brough, East Yorks, England. Gas Turbine driven Compressors, Generators and Pumping Equipment. Sole Concessionaires: Greaves Cotton & Co., Ltd., 1, Forbes Street, Fort.

Bristol Aero-Engines Ltd., Filton House, Bristol, England. Gas Turbine Marine Engines. Sole Concessionaires: Greaves Cotton & Co., Ltd., 1, Forbes Street, Fort.

Ruston & Hornsby Ltd., Lincoln, England. Gas Turbines. Sole Concessionaires: Greaves Cotton & Co., Ltd., 1, Forbes Street, Fort.

GAUGES & INSTRUMENTS

Bailey & Mackey Ltd., Birmingham, England. Agents: Keshavji Naraldas Jallwala, 157, Abdul Rehman Street, Bombay 3.

BRITISH STEAM SPECIALITIES LTD., Leicester, England. Manufacturers of Pressure Vacuum and Hydraulic Gauges. Agents: Gaytee & Company, Jammabhoomi Chambers, Fort Street, Fort. Phone: 263449. Grams: "IM-PENG."

Coley Thermometers Ltd., Brentford, Middlesex. Thermometers & Pressure Gauges. Sole Concessionaires: Greaves Cotton & Co., Ltd., 1, Forbes Street, Fort.

Dobbie McInnes Ltd., Glasgow. Engine Indicators & Accessories. Sole Concessionaires: Greaves Cotton & Co., Ltd., 1, Forbes Street, Fort.

Heath & Co., London. Mercury and Fluid-in-Glass Thermometers. Sole Concessionaires: Greaves Cotton & Co., Ltd., 1, Forbes Street, Fort.

Joseph Tormey & Sons Ltd., England. Gauge glasses, Pressure-Vacuum & Temperature Gauges. Agents: John Fleming & Co. Private Ltd., Bastion Road, Fort, Bombay 1. Phone: 261153.

GEARS

David Brown Corporation (Sales) Ltd., Huddersfield, England. All types of open Gearing, Totally enclosed Gear units, Automobile Gears, Geared Motors. Sole Concessionaires: Greaves Cotton & Co., Ltd., 1, Forbes Street, Fort.

GENERATING SETS

Hampson Industries Ltd., West Bromwich. Generating Sets. Sole Agents: Marshall, Sons & Co. (India) Ltd., Marshall's Building, Ballard Road, Bombay 1.

GLASS-CRETE BLOCKS

King, J. A. & Co., Ltd., Bridge House, 181, Queen Victoria Street, London, E.C. 4. Agents: Heatly & Gresham Ltd., 9, Forbes Street, Fort.

GLASSWARE

PARKINSON AND SPENCER LTD., England. (Refractory materials). Agents: I.C.I. (India) Private Ltd., P.O. Box No. 310, Bombay 1.

UNITED GLASS BOTTLE MANUFACTURERS LTD., England. ("BERD-LEY" brand Glassware). Selling Agents: I. C. I. (India) Private Ltd., Post Box No. 310, Bombay 1.

GLUCOSE AND STARCH MANUFACTURERS

Irving B. Boody & Co., Inc., New York. Liquid Glucose 45° Beaume. Distributors: F. Bock & Co., Shale Building, Bank Street, Fort.

GLUES, 'CHURN' MINERAL SUPPLEMENT

BHOPAL GLUES & CHEMICALS, Bhopal. Selling Agents: I.C.I. (India) Private Ltd., P.B. 310, Bombay 1.

BRITISH GLUES & CHEMICALS LTD., England. Selling Agents: I. C. I. (India) Private Ltd., Post Box No. 310, Bombay 1.

GRINDING MILLS

Fryma Maschinenbau G.m.b.H., Germany. "Fryma" Drug Mills, High Speed Mills for Grinding, Mixing, Emulsifying, etc. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

GUMS

H. IMAMI & SONS, Teheran (Gum Tragacanth). Selling Agents in India: I. C. I. (India) Private Ltd., Post Box No. 310, Bombay 1.

HEAT TREATMENT & METAL PROCESSING PRODUCTS

Houghton, E. F., & Co., Philadelphia. Agents: Hardcastle, Waud & Co. Private Ltd., Alice Buildings, Dr. Dadabhai Naoroji Road, Fort.

HIGH SPEED, ALLOY AND HIGH CARBON STEELS

Firth's "Speedicut" High Speed Steel. Sole Distributors: William Jacks and Co., Ltd., Hamilton House, Graham Road, Ballard Estate.

HOISTING MACHINERY

Fellows Bros. Ltd., Cralley Heath, England. Agents: Keshavji Naraldas Jallwala, 157, Abdul Rehman Street, Bombay 3.

Geo. W., King, Ltd., London. Conveyors and Electric Hoists. Agents: Richardson and Cruddas, Ltd., Byculla, Bombay 8.

Hvilans mekaniska Verktads ab Kristianstad, Sweden. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

Rowland Pritts & Co. Ltd., England. Pulley, Blocks, Mechanical & Hydraulic Lifting & Traversing Jacks & Other Equipment. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Stroj Export, Praha, Czechoslovakia. Agents for Western & Central India: India Metal Agencies, Post Box No. 1960, Bombay 1.

Yale & Towne Mfg. Co., Ltd., England. For Chain Pulley Blocks, Material Handling Equipment. Agents: John Fleming & Co. Private Ltd., Bastion Road, Fort, Bombay 1. Phone: 261153.

Yale & Towne Mfg. Co., Philadelphia, U.S.A. Pulley Blocks, Hoists, Cranes, Hand & Electric Lift Trucks. Agents: John Fleming & Co. Private Ltd., Bastion Road, Fort, Bombay 1. Phone: 261153.

HOISTS & ROPEWAYS

Theodore Bell & Co. Ltd. Kriens-Lucerne, Switzerland. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

HOSE

De Vilbiss Company, Ohio, U.S.A. Air Compressing, Spray Painting outfits and Hose, etc. Agents: John Fleming & Co., Private Ltd., Bastion Road, Fort, Bombay 1. Phone: 261153.

Lewis & Tyler, Ltd., Cardiff, Gripoly Belting and Hose. Agents: Richardson & Cruddas Ltd. Byculla, Bombay 8.

HOSPITAL EQUIPMENT (MFRS.)

I.C.I. LTD., Pharmaceuticals Division, England. ("Avlon" brand pharmaceuticals.) Selling Agents: I. C. I. (India) Private Ltd., Post Box No. 310, Bombay 1.

Manlove Allott & Co., Ltd., Nottingham. Manufacturers of Sterilizers, Disinfectors, Laundry Equipment, Oil Mill Machinery, etc. Sole Distributors: William Jacks & Co., Ltd., Hamilton House, Graham Road, Ballard Estate.

HYDRAULIC ENGINEERS

Glenfield & Kennedy, Ltd., Kilmarnock. Agents: Glenfield and Kennedy, Ltd., 198, Jamshedji Tata Road, Fort, Bombay 1.

HYDRAULIC JACKS

Epco Ltd., Leeds 7, England. Sole Agents: Heatly & Gresham Ltd., 9, Forbes Street, Bombay.

HYDRAULIC MACHINERY

Glenfield & Kennedy, Ltd., Kilmarnock. Hydraulic Accumulators, Rams and Pumps. Agents: Glenfield & Kennedy, Ltd., 198, Jamshedji Tata Road, Fort, Bombay 1.

J. Blakeborough & Sons Ltd., London & Brighouse, England. Hydraulic Valves, Screening Plant, etc. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

John Blake Ltd., Accrington, Hydram Water Raisers. Agents: Richardson & Cruddas Ltd., Byculla, Bombay 8.

Leeds Engineering & Hydraulic Co., Ltd., Leeds. Makers of Hydraulic Machinery. Agents: Richardson & Cruddas, Ltd., Byculla, Bombay 8.

Theodore Bell & Co. Ltd. Kriens-Lucerne, Switzerland. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

INDUSTRIAL ADHESIVES

B. B. Chemical Company Ltd., Industrial Adhesives. "Bostik" Sole Distributors: William Jacks & Co., Ltd., Hamilton House, Graham Road, Ballard Estate.

INDUSTRIAL EQUIPMENT (MANUFACTURERS)

TEDDINGTON INDUSTRIAL EQUIPMENT LTD., Windmill Road, Sunbury-on-Thames, Middlesex. Manufacturers of Industrial Control Equipment. Representatives: James Finlay & Co., Ltd., P.O. Box No. 73, Bombay 1.

INDUSTRIAL INSTRUMENTS

G. Luft Metallbarometer Fabrik. G.m.b.H. Germany. Representatives: Behram A Co., 1/1, Lakshmi Bldg., 22, Sir P. M. Road, Bombay 1.

HARRY W. DIETERT, INC., Detroit, U.S.A. Manufacturers of Sand Testing Equipment. Agents: Pioneer Equipment Co., Private Ltd., 139, Meadows Street, P. O. Box 1909, Bombay 1 (Phone: 251822). Also at 1, Mangoe Lane, Calcutta-1 (Phone: 251611) and 193, Mount Road, Madras 2. Grams: "PIOMETAL."

STROHLKIN & CO., Dusseldorf, Germany, for Analytical Instruments for Iron and Steel and other metallurgical industries. Sole Agents: Pioneer Equipment Co., Private Ltd., 139, Meadows Street, P. O. Box 1909, Bombay 1 (Phone: 251822). Also at 1, Mangoe Lane, Calcutta-1 (Phone: 251611) and 193, Mount Road, Madras-2. Grams: "PIOMETAL."

W. & L. E. Gurley Troy, New York, U.S.A.
Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

INDUSTRIAL INSTRUMENTS AND STEAM LINE ACCESSORIES

Drayton Regulator & Instrument Co. Ltd., West Drayton (Middlesex, England). Steam Traps & Steam Line Accessories, Instruments for Measuring, Regulating or Controlling Temperature, Pressure and Draught. Electrically and hydraulically operated valves, metal bellows. Sole Concessionaires: Greaves Cotton & Co. Ltd., 1, Forbes Street, Fort, Bombay.

INDUSTRIAL PLANTS

Polysius G.m.b.H. Neubeckum, W. Germany. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

Polysius Limited, The Brackens, Ascot, Berks, England. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

Theodore Bell & Co. Ltd., Kriens-Lucerne, Switzerland. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

Werkspoor N. V., Amsterdam, Holland. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

INDUSTRIAL TRUCKS

Douglas (Kingswood) Ltd., 50, Pall Mall, London. Sole Agents: Healey & Gresham Ltd., 9, Forbes Street, Fort.

INSULATING BOARD & MATERIAL

Continental Diamond Fibre Company, Bridgeport, Pa., U.S.A. Agents: Hardcastle, Waud & Co. Private Ltd., Alice Buildings, Dr. Dadabhai Naoroji Road, Fort.

Diamond Fibre Co., Ltd., 59, Southward Street, London. Agents: Hardcastle, Waud & Co. Private Ltd., Alice Buildings, Dr. Dadabhai Naoroji Road, Fort.

Ioco Ltd., Anniesland, Glasgow. Agents: Balmer Lawrie & Co., Ltd., 5, Graham Road, Ballard Estate, Bombay. Phone: 261494 (3 lines). Grams: "BALMER."

Mo. & Domsjo Trading Co., Ltd., 47, Piccadilly, London, W.1. Sole Agents: Healey & Gresham Ltd., 9, Forbes Street, Fort.

INHALER & ACCESSORIES

CYPRAE LTD., England Selling Agents: I.C.I. (India) Private Ltd., P.B. No. 310, Bombay 1.

INSULATORS (HIGH TENSION)

Ifoverken, Bromolla, Sweden. Manufacturers of Porcelain Insulators. Representatives: Asea Electric India Private Limited, Yam Building, Goe Street, Ballard Estate.

INSURANCE COMPANIES

Alliance Assurance Co., Ltd., London. (Settlement of Marine Claims). Agents: The Anglo-Thai Corporation Ltd., Ewart House, Bruce Street.

Baloe Fire Insurance Co., Ltd., Basle (Inc. in Switzerland). Principal Agents: Volkart Bros., Ballard Estate, Bombay.

United Refining Co., Warren, Philadelphia, U.S.A. Sole Agents for India: Bombay Mercantile Corporation, 211-217, Nagdevi Street, Bombay 3.

MACHINE TOOLS

A. A. Jones & Shipman Ltd., England. Universal & Semi-Universal Grinding Machines, Surface Grinders, Tool & Cutter Grinders etc. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

Adcock & Shipley Ltd., England. Universal, Vertical and Horizontal Milling Machines and Attachments. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

Armstrong Whitworth (Metal Industries) Ltd., England. Rolls for Rolling Mills and Tube Mills. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

Bette & Company, Germany. Pillar Drilling Machines. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

B. M. W. Maschinenfabrik, Germany. Single Spindle Automatics, Gear Deburring Machines, etc. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

B. S. A. Tools Ltd., England. Single & Multi-Spindle Automatic Screw Machines, Centreless Grinding Machines, Multi-Tool Lathes, etc. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

Bretts Patent Lifter Co., Foleshill Works, Coventry, England. Sole Agents: Healty & Gresham, 9, Forbes Street, Fort.

C. & E. Fein, Germany. Portable Electric Tools. Agents in India: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Churchill-Redman Ltd., Parkinson Lane, Halifax. Sole Agents: Healty & Gresham Ltd., 9, Forbes Street, Fort.

Cincinnati Milling Machines, Cincinnati, Ohio, U.S.A. Sole Agents: Healty & Gresham Ltd., 9, Forbes Street, Fort.

Cincinnati Milling Machines Ltd., Woodlands Farm Road, Tyburn, Birmingham, England. Sole Agents: Healty & Gresham Ltd., 9, Forbes Street, Fort.

Coventry Gauge & Tool Co. Ltd., England. Machine Tools: Jig Boring Machines, Tap Grinding Machines, Thread Grinders, Gear Grinders, Cylindrical Grinders, Broach Sharpening Machines, Tread Milling Machines, etc. Measuring Instruments: Floating Carriage Diameter Measuring Machine, "Micro-Mag" Internal Micrometers, Taper Measuring Machines, Pitch Measuring Machines, etc. Gauges: Gap Gauges, Caliper Gauges, Slip Gauges, etc. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

Craven Bros. (Manchester) Ltd., England. Railway Wheel Lathes, Axle Journal Turning & Grinding Machines, and all types of Railway Machine Tools. Heavy Duty B.S. & S. C. Lathes, Gear Cutting Machines, Horizontal Boring Machines, etc. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

D. Mitchell & Co. Ltd., England. General Purpose High Speed B.S. & S.C. Lathes. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

E. H. Jones (M.T.) Ltd., England. British Built "Kearney & Trecker" MILWAUKEE Milling Machines, Vertical and Horizontal and Universal, Duplex, Simplex Die Making Machines. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Emil Sachs, Germany. Thickness Planner, Heavy Duty Smooth Planing, Jointing and Moulding Machines, Upright Chain Mortising machines, tenoning & Slotting Machines and other wood working machinery. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

F. J. Edwards Ltd., England. Complete range of Sheet Metal Working Machinery. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

Fell, W. A., Ltd., Windermere, England. Agents: Heatly & Gresham Ltd., 9, Forbes Street, Fort.

Finlay Engineering Co., England. Hydraulic Cold Benders, Press Units, Rail & Grinder Presses, Hand Operated Press, Plate Section Presses, etc. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Fischer, Karl Eugen, Germany. Press Brakes & Guillotine Shears. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Frederick Town & Sons Ltd., Halifax, England. Radial Drilling Machines, Vertical Drilling Machines, etc. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

Graham & Normanton Ltd., England. "GRANOR" High Speed S.S. & S.C. Lathes & Shaping Machines. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

G.V. Nibbler & Company, Sweden. Nibblers, Cutting and Framing Machines. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Hans-Biel, Germany. Metal Spraying and Sand Blasting Equipment. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Herman Hilbert, Ramsched Germany. Sole Agents: Tirathdas Kesharam, 130, Narayan Dhuru Street, Bombay 3.

Hilgers Maschinenfabrik, Germany. Cold Tube Bending Machines. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Ingenieurdielat G.m.b.H. Germany. Representatives: Behram & Co., 1/1 Lakshmi Bldg., Sir P. M. Road, Bombay 1.

James Neill & Co., (Sheffield) Ltd., England. Representatives: Elliott Waud & Hill Private Ltd., 1-2, Lakshmi Bldg., Sir P. M. Road, Bombay 1.

Junker, Svenska Akkumulator Aktiebolaget, Sweden. Universal Tool & Cutter Grinding Machines. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Kearney & Trecker Corp., U.S.A. "Milwaukee" Milling Machines. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Highley Grinders (M.T.) Ltd. (Newall Group Sales Ltd.), England. Universal Grinders, Precision Cylindrical Grinders and Internal Production Grinders. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Kitchen & Wade Ltd., Halifax, England. Drilling Machines. Agents: Heatly & Gresham Ltd., 9, Forbes Street, Fort.

Malmedie & Co., G.m.b.H., Germany. Wire Drawing Plant, Wire Nail Making Machines, Nut Presses, etc. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Murad Developments Ltd., England. High Speed Capstan Lathes, Double Ended "Dustless" Grinders (the only Grinder in the world with built-in Dust Inhibitors). Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

National Acme Co., U. S. A. Multi-Spindle Bar Automatics. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

Newall Engineering Co. Ltd. (Newall Group Sales Ltd.), England. Jig Boring Machines, Angular Head Grinding Machines, Thread Grinding Machines, Cylindrical Grinding Machines, Internal Grinding Machines & Production Lapping Machines. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Optical Measuring Tools Ltd. (Newall Group Sales Ltd.), England. Projectors, Optical Rotary Table, Optical Rotary Projection Table, Optical Rotary Inclination Table, Toolmaker's Microscope, Thread Template Microscope, Vertical & Horizontal Omitimeters. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Ormerod Shapers Ltd., Hebden Bridge, Yorks, England. Sole Agents: Heatly & Gresham Ltd., 9 Forbes Street, Fort.

Petzting & Hartmann Maschinenfabrik, Germany. Bandsaws. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Pickles, John & Son (Engineers), Ltd., Hebden Bridge, England. Sole Agents: Heatly & Gresham Ltd., 9, Forbes Street, Fort.

Planers (Huddersfield) Ltd., England. Planing Machines. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

Press Tools Ltd., England. Jigs, Fixtures, Press Tools and Gauges, Dies. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Rushworth & Co., England. Bar Cropping Machines, Punching & Shearing Machines, Guillotine Shearing Machines, Plate Bending & Straightening Rolls, Press Brakes. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

Samuel Denison & Son Ltd., England. Compression & Transverse Machine, Wire Twist & Tensile Testing Machines, Universal Machines, Fabric Testing Machines, Creep Testing Machines, Chain Testing Machines, etc. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

Sheffield Twist Drill & Steel Co., Ltd., England. Representatives: Elliott Waud & Hill Private Ltd., 1-2, Lakshmi Bldg., Sir P. M. Road, Bombay 1.

Standall Engineering Ltd., England. Forging Hammers, Air Compressor Plants. Agents: Balmer Lawrie & Co., Ltd., 5, Graham Road, Ballard Estate, Bombay. Phone: 261494 (3 lines). Grams: "BALMER."

Stenners of Tiverton Ltd., England. Log Band Mills, Band Rack Saws, Band Resaws, Saw Doctoring Equipment, etc. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

Sykes, W. E., Ltd., Manor Works, Staines, Middlesex, England. Hobbing and Gear Cutting Machine. Agents: Heatly & Gresham Ltd., 9, Forbes Street, Fort.

Theodor Gen-Kinger Nurlinzen, Germany. Sole Agents: Tirathdas Kesharam, 130, Narayan Dhuru Street, Bombay 3.

Thos. Firth & John Brown Ltd., Sheffield, England. Forged Steel Rolls for Rolling Mills. Sole Distributors: William Jacks & Co. Ltd., Hamilton House, Graham Road, Ballard Estate.

Tollitt Gauges, Ltd., England. Precision Thread and Plain Gauges. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Truform Gauge Co. Ltd., England. Gauges, Jigs & Fixtures, Profile Ground Punches & Dies, Straight Edges, etc. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Turbine Gears Ltd., England. Gears and Gear Units. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

Weingarten, Germany. Plate Bending and Rounding Machines. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Weller, Germany. Precision and Watch Making Lathes and Equipment. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

MACHINERY (BAG FILLING)

Sack Fillers Ltd., London. Sole Agents: Killick Nixon & Co. Private Ltd., Killick House, Home Street, Fort.

MACHINERY (ELEC. & MECH.)

Christy & Norris Ltd., Chelmsford. Dismantlers, Hammer Mills, Screening Plant. Sole Concessionaires: Greaves Cotton & Co., Ltd., 1, Forbes Street, Fort.

Clayton Manufacturing Co., El-Monte, California, U.S.A. Agents: Chandulal Mehta & Co. (Private) Ltd., 15, New Queen's Road, Bombay 4.

Clearing Machine Corporation, Chicago 38, Illinois, U.S.A. (Mechanical and Hydraulic Power presses & Press Brakes). Sole Concessionaires: Greaves Cotton & Co., Ltd., 1, Forbes Street, Fort.

Colcrete Ltd., London. Manufacturers of Colloidal Mixers and Colloidal Grouting. Sole Agents in India: Gammon India Private Ltd., Hamilton House, Ballard Estate.

Electric Construction Co. Ltd., 9, Kingway, London. Electric Motors and Generators. Agents: Balmer Lawrie & Co., Ltd., 5, Graham Road, Ballard Estate, Bombay. Phone: 261494 (3 lines). Grams: "BALMER."

Fluidrive Engineering Co. Ltd., Isleworth (Middlesex, England). Hydraulic Couplings. Sole Concessionaires: Greaves Cotton & Co. Ltd., 1, Forbes Street, Fort, Bombay.

Gebr. Stork & Co. N. V. Hengelo, Holland. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

Head, Wrightson Colliery Engineering Co., Ltd., England. Coal Preparation and Screening Plants. Agents: Balmer Lawrie & Co., Ltd., 5, Graham Road, Ballard Estate, Bombay. Phone: 261494 (3 lines). Grams: "BALMER."

Head, Wrightson & Co., Ltd., Stockton Forge Division, Stockton-on-Tees, England. Ore mining and Treatment Plant, Coal mining and Treatment Plant. Selling Agents: Balmer Lawrie & Co., Ltd., 5, Graham Road, Ballard Estate, Bombay. Phone: 261494 (3 lines). Grams: "BALMER."

Karl-Kack Maschinenbau, Germany. Representatives: Behram & Co., 1/1, Lakshmi Bldg., Sir P. M. Road, Bombay 1.

LEYER & CO., LTD. (R. A.), Dunley, Glos., England; Petrol and Diesel Engines, Pumping, Generating Sets, Cream Separators and Dairy Equipment. Importers: Voltas Limited, Ballard Estate, Bombay 1.

Power Plant Co., Ltd., England. Agents: Balmer Lawrie & Co., Ltd., 5, Graham Road, Ballard Estate, Bombay. Phone: 261494 (3 lines). Grams: "BALMER."

SIEMENS-SCHUKERTWERKE, A.G. SIEMENS-MALME, A.G. of Western Germany. Manufacturers of all types of Electrical Equipment, Steam & Hydro-Power Plants, Telephone & Telecommunication Equipment, Electrical precision machinery, Cables and instruments, Electricity Motors, Water Motors and other Electric Equipment. Sole Representatives in India: Siemens Engineering & Manufacturing Co. of India Private Limited, 81/83, Veer Narayan Road, Bombay 1.

Stroj Export, Praha, Czechoslovakia. Agents for Western & Central India. India Metal Agencies, Post Box No. 1966, Bombay 1.

Stream-line Filters Ltd., London, England. Filters for reclaiming used Engine Lubricating Oil, Transformer Oil Filters. Sole Concessionaires: Graves Cotton & Co. Ltd., 1, Forbes Street, Fort.

SULZER BROTHERS LTD., Winterthur, Switzerland. Diesel Engines, Pumps. Sole Importers: Voltas Limited, Ballard Estate, Bombay 1.

Weston, Shipley & Weston Ltd., Leicester. "Cut-Out" Machines for Pipe Cutting. Agents: Richardson & Cruddas Ltd., Byculla, Bombay 8.

MACHINERY MANUFACTURERS

C. H. & E. Manufacturing Co., 3849, North Palmer Street, Milwaukee 12, Wis. (U.S.A.). Agents in India: Essential Engineering Co., Botawala Building, Elphinstone Circle, Fort.

Cement Gun Co., Ltd., London. Agents: John Fleming & Co., Private Ltd., Bastion Road, Fort, Bombay 1. Phone: 261153.

E. R. & F. Turner Ltd., England. Complete Flour Milling Plant and Machinery. Sole Distributors: William Jacks & Co. Ltd., Hamilton House, Giraham Road, Ballard Estate.

Reckermann Maschinenbau (Germany). Agents for India: Essential Engineering Co., Botawala Building, Horniman Circle, Fort, Bombay.

Sturtevant Engineering Co., Ltd., England. Crushing, Grinding, Screening, Separating and Mixing Machinery including Laboratory Machinery. Contact: Ratansi Morarji Private Limited, Prospect Chambers, 317/21, Dadabhai Naoroji Road, P.B. No. 1270, Bombay 1.

Worthington-Simpson Limited, Newark-on-Trent. Sole Agents: William Jacks & Co. Ltd. Head Office & Depot: Bharat House, Apollo Street, Fort, Bombay.

MACHINERY PRESSURE GAUGES

Eagle & Wrights (Gauges) Ltd., 87, Carver Street, Birmingham 1, England. Sole Agents for Bombay State: R. K. Shapurji & Co., Prospect Chambers, 319, Dr. D. Naoroji Road, Fort, P.B. No. 1065, Bombay 1.

MACHINERY (TEXTILE)

Armstrong Cork Co., Ltd., Kingsbury, London, N.W. 9. Agents: Roberts, McLean & Co., Ltd., Ilaco House, Sir Phiroozshah Mehta Road.

Atwood Division Universal Winding Co., Hartford, U.S.A. Silk Machinery. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Cook & Co., Manchester, Ltd., Spinning and Doubling Travellers, Card Vacuum Stripping Plants, Spinning Specialities. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Daniel Foxwell & Sons, Ltd., Cheadle, Manchester. Cloth Rolling, Folding, Measuring and Lapping Machinery. Sole Concessionaires: Graves Cotton & Co., Ltd., 1, Forbes Street, Fort.

Dronsfield Bros., Ltd., Oldham. Card Mounting and Grinding Machinery, Roller Covers Plant. Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Dronsfield Bros. Ltd., Oldham. Card Grinding Equipment, Emery, Millet Roller Covering Machinery. Concessionaires: Graves Cotton & Co. Ltd., 1, Forbes Street, Fort.

ELLERWERKE MASCHINENFABRIK, Hamburg 33, Germany. Mfrs. of Hydro Extractors. Sole Importers: Popular (Imp.-Exp.) Trading Co., Javeri House, 110, Meadows Street, Bombay 1.

Gebruder Wickl, Zurich, Switzerland. Manufacturers of "KNITTEX" Hand Knitting Machine. Agents: Altex Private Ltd., 147, Mahatma Gandhi Road, Fort, Bombay 1.

Goodbrand & Co., Ltd., Stalybridge. Yarn & Cloth Testing Machines. Concessionaires: Graves Cotton & Co., Ltd., 1, Forbes Street, Fort.

Grob & Co. Ltd., Horgen, Switzerland. Wire and Flat Steel Heads. Sole Importers: Voltas Limited, Ballard Estate, Bombay 1.

H. Brinton Company, Philadelphia, U. S. A. Automatic Knitting Machinery. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Hindle Son & Co., Ltd., Blackburn. Electric Baling Presses. Sole Concessionaires: Graves Cotton & Co., Ltd., 1, Forbes Street, Fort.

Hodges, P. & Co., Ltd., Nottingham. High Speed Braiding and Twisting Machinery. Sole Concessionaires: Graves Cotton & Co., Ltd., 1, Forbes Street, Fort.

John T. Hardaker Ltd., Bradford. Jacquards and Jacquard Sundries. Sole Concessionaires: Graves Cotton & Co., Ltd., 1, Forbes Street, Fort.

Longclose Engineering Co. Ltd., Leeds. Cheese, Cone & Beam Dyeing Plants. Sole Concessionaires: Graves Cotton & Co., Ltd., 1, Forbes Street, Fort.

Mather & Platt Ltd., Manchester. Dyeing, Bleaching, Printing and Finishing Machinery. Sole Concessionaires: Graves Cotton & Co., Ltd., 1, Forbes Street, Fort, Bombay.

Mount Engineering (Sales) Company, Oldham, England. Makers of Improved Mechanical Warp Stop Motions, Pirm Stripping Machines and Hydraulic Beam Trucks, etc. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

OERLIKON MACHINE TOOL WORKS, Zurich 50 Oerlikon, Switzerland. Mfrs. of Roller bearing inserts and Jockey pulleys. Sole Importers: Popular (Imp.-Exp.) Trading Co., Javeri House, 110, Meadows Street, Bombay 1.

Power House Components Ltd., Nottingham. Manufacturers of "WAYNE" patent Self-Winding Electric Cable Reels and Fuel Economy Specialities. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Pulrose Co., Ltd., England. Agents: Altex Private Ltd., 147, Mahatma Gandhi Road, Fort.

REINERS & FURST, M. Gladbach, Germany. Mfrs. of Spinning Rings, Ring Travellers & Automatic Winders Knotters. Sole Importers: Popular (Imp.-Exp.) Trading Co., Javeri House, 110, Meadows Street, Bombay 1.

RHEYDTER MASCHINEN & SPINDEL-FABRIK, Rheydter (Rhld), Germany. Mfrs. of Spinning Fly Frame Parts & Ball Bearing Tops Rollers of every description. Sole Importers: Popular (Imp.-Exp.) Trading Co., Javeri House, 110, Meadows Street, Bombay 1.

RIETER & CO., LTD. (J. J.), Winterthur (Switzerland). Cotton Spinning Machinery. Sole Importers: Voltas Limited, Ballard Estate, Bombay 1.

Rotameter Mfg. Co. Ltd., Crydon, Surrey. Manufacturers of Flow Meters for all Gases and Liquids. Sole Representatives: W. H. Brady & Co. Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Ruti Machinery Works, Ruti (Zch.), Switzerland. Warping, Beaming and Sizing Machinery, Cotton & Silk Looms. Sole Importers: Voltas Limited, Ballard Estate, Bombay 1.

Ryden Mill Stores Ltd., England. Agents: Altex Private Ltd., 147, Mahatma Gandhi Road, Fort.

S. Dodd & Sons Ltd., England. Manufacturers of Hopper Blenders. Conversions of Single Process Blow Room. Suppliers of Melner's Thread Illuminators. Agents: Altex Private Ltd., 147, Mahatma Gandhi Road, Fort, Bombay.

S. Dodd & Sons Ltd., Oldham, England. Makers of Conversion Equipments, etc. Sole Representatives: W. H. Brady & Co. Ltd., 12/14, Veer Nariman Road, Fort, Bombay.

Schwelter Ltd., Horgen, Switzerland. Automatic Pirm Winders and all Winding Machines. Sole Importers: Voltas Limited, Ballard Estate, Bombay 1.

Staehli Bros. & Co., Horgen, Switzerland. Dobbies. Sole Importers: Voltas Limited, Ballard Estate, Bombay 1.

Stone-Wallwork Ltd., London, S.W. 1, England. Suppliers of Ting Tuf Mark 1 Tufting Machine for making Rugs, Carpets, Mats, etc. Agents: Altex Private Ltd., 147, Mahatma Gandhi Road, Fort, Bombay 1.

T. W. Riley & Co., Ltd., Rochdale. Cloth Raising Machines. Sole Concessionaires: Graves Cotton & Co., Ltd., 1, Forbes Street, Fort.

Thos. Holt Ltd., Rochdale. High Speed & Automatic Winding & Warping Machines. Sole Concessionaires: Graves Cotton & Co., Ltd., 1, Forbes Street, Fort.

Vollenweider, Sam., Horgen, Switzerland. Shearing Machines. Sole Importers: Voltas Limited, Ballard Estate, Bombay 1.

Wm. Ryder Ltd., Bolton, England. Makers of Flyers, Spindles, Collars and Fluted Rollers, etc. Sole Representatives: W. H. Brady & Co. Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Wright Hargreaves Engineering Co., Ltd., Blackburn. Vacuum Card Stripping Equipment. Sole Concessionaires: Graves Cotton & Co., Ltd., 1, Forbes Street, Fort.

Zellweger Ltd., Uster, Switzerland. Warp Tying Machines. Importers: Voltas Limited, Ballard Estate, Bombay 1.

MAINTENANCE EQUIPMENT (ELEC. & MECH.)

Martindale Electric Co. Limited, London and Cleveland, Ohio, U.S.A. Electrical and Mechanical Maintenance Equipment, Commstones and Blowers. Representatives: Asca Electric India, Private Limited, Yash Building, Goa Street, Ballard Estate.

MARINE DIESEL ENGINES

Borgins Co. Ltd., Glasgow, England. Agents: India Metal Agencies, India House, Fort, Street, Bombay 1.

MEASURING AND RECORDING INSTRUMENTS

Esterline—Angus Co., Inc. Indiana, U.S.A. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

H. W. Wallace & Co. Ltd., England. Hardness Meters, Dead Load Hardness Testers, Abrasion Testers, Rapid Plastimeters, Compression Set Apparatus, Flexion Testing Machines, Laboratory Ovens. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Hilger & Watts Ltd., England. Measuring Equipment of all types including Projectors, Enlargers, Optical Gauging & Inspection Equipment etc. Sole Distributors: William Jacks & Co. Ltd., Bharat House, Apollo Street, Fort, Bombay.

L. M. Ericssons Matinstrument Aktiebolaget, Stockholm, Sweden. Manufacturers of Electricity Meters. Representatives: Asva Electric India, Private Limited, Yaffi Building, Goa Street, Ballard Estate.

M. S. S. Recording Co. Ltd., England. Dictaphones. Agents: Hind Co., 27, New Queen's Road, Bombay 4.

Pierre Roch, S.A.R.L. Switzerland. Representatives: Behnam & Co., 11, Lakshmi Bldg., Sir P. M. Road, Bombay 1.

Radiometer, Copenhagen, Denmark. Agents: Hindco, 27, New Queen's Road, Bombay 4.

Taylor of London Ltd., London, England. Water Meters, Waste & Cocks Fittings. Agents: John Fleming & Co. Private Ltd., Bastion Road, Fort, Bombay 1. Phone 261153.

Thomas Ashworth & Co. Ltd., England. "Speedy" Moisture Testers. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

MECHANICAL EQUIPMENT

J. Collis & Sons, Ltd., London. Sole Agents: Killick, Nixon & Co. Private Ltd., Killick House, Home Street, Fort.

Loeflex Products Ltd., Essex, England. Sole Agents: Killick, Nixon & Co. Private Ltd., Killick House, Home Street, Fort.

METAL DOORS AND WINDOWS

Gilbons James, Ltd., St. John's Works, Wolverhampton, England. Sole Agents: Healy & Gresham Ltd., 9, Forbes Street, Fort.

METAL MANUFACTURERS

IMPERIAL CHEMICAL INDUSTRIES LTD., Metals Division, England and Yorkshire Imperial Metals Ltd., Leeds. (Wrought Non-ferrous Metals and Alloys). Selling Agents: I.C.I. (India) Private Ltd., Post Box No. 310, Bombay 1.

Mond Nickel Co. Ltd., The, London. Nickel. Sole Concessionaires: Greaves Cotton & Co. Ltd., 1, Forbes Street, Fort.

MICROPHONES AND PICKUPS

American Microphone Co. Division of Elgin Pneumatic Inc., 900 Ballanca Avenue, Los Angeles 45, England. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

SHURE BROS., Inc., Evanston, Illinois, U.S.A. Manufacturers of the World famous Shure Microphones, Magnetic Tape Recording Heads, & Electronic Components. Represented in India by M. V. DADA, Pennsylvania Traders, Post Box 4644, Bombay 1. Telephone: 74444, Telegram: "PENNUNION."

MICROSCOPES

CARL ZEISS JENA, East Germany.—Microscopes, Optical, Surveying, Precision measuring and Scientific Instruments. Sole Agents: Ghordandas Desai Private Ltd., Karmani Bldg., Sir Pherozshah Mehta Road, Bombay 1.

Cooke, Troughton & Simms Ltd., U.K. Manufacturers of Vickers Microscopes. Sole Agents: Pioneer Equipment Co. Private Ltd., P.O. Box 1909, Bombay 1 (Phone: 251882.)

MILL & GIN STORE SUPPLIERS

Frankland Bros., Blackburn. Loom Pickers and Shuttles. Sole Concessionaires: Greaves Cotton & Co. Ltd., 1, Forbes Street, Fort.

Haydock & Drake Ltd., Blackburn. Healds and Reeds. Sole Concessionaires: Greaves Cotton & Co. Ltd., 1, Forbes Street, Fort.

John Atkinson & Son (Sowerby Bridge) Ltd., England. Agents: Altex Private Ltd., 147, Mahatma Gandhi Road, Fort.

Joseph Bykes Brothers, Huddersfield. Card Clothing. Sole Concessionaires: Greaves Cotton & Co. Ltd., 1, Forbes Street, Fort.

Kenyon & Son, Ltd. (James) Bury, Lancs. Textile Clothing and Filter Cloth. Sole Importers: Voltas Limited, Ballard Estate, Bombay 1.

Lupton Bros., Accrington. Loom Sundries. Sole Concessionaires: Greaves Cotton & Co. Ltd., 1, Forbes Street, Fort.

Platt Bros. & Co., Ltd., Oldham. Cotton Gins & Openers. Sole Concessionaires: Greaves Cotton & Co. Ltd., 1, Forbes Street, Fort.

William Kenyon & Son Ltd., Dukinfield, Cheshire. P.L. Cotton Driving Rope and Banding. Spindles, Tape and Twine. Sole Concessionaires: Greaves Cotton & Co. Ltd., 1, Forbes Street, Fort.

MILLING MACHINES

UNION WERKEUGMASCHINENFABRIK M. REUTHER K.O., Germany. Milling Machines. Agents: Gaytes & Company, Jammabhoorni Chambers, Fort Street, Bombay 1. Phone: 263449. Grams: "IMPENG."

MINERAL WATERS, SQUASHES, CORDIALS, ETC.

E. I. Michel & Co., Ltd., 415, Oxford Street, London W.1. Sole Distributors: Spencer & Co., Ltd., Spencer's Building, Forrejt Street, Bombay 26.

H. D. Davies & Co., Ltd., 98-100 Bishopgate, London E.C. 2. Sole Distributors: Spencer & Co., Ltd., Spencer's Building, Forrejt Street, Bombay 26. Societe Des Eaux Mineral Source Cachat Evian Les-Bains. Sole Distributors: Spencer & Co., Ltd., Spencer's Building, Forrejt Street, Bombay 26.

MINING MACHINERY & EQUIPMENT

Broom & Wade Ltd., High Wycombe, England. Portable and Stationary Air Compressors & Pneumatic Tools. Sole Importers: Voltas Limited, Ballard Estate, Bombay 1.

Joy Manufacturing Co., Pittsburg 22, PA., U.S.A. & Joy Sullivan Ltd., London, England. Coal Mining Machinery, Auxiliary Mining Machinery, Air Compressors and Pneumatic Tools. Sole Importers: Voltas Limited, Ballard Estate, Bombay 1.

R. E. Barker & Co., Ltd., England. Barfill Rollers. Agents: Balmer Lawrie & Co., Ltd., 5, Graham Road, Ballard Estate, Bombay. Phone: 261494 (3 lines). Grams: "BALMER".

Sheepbridge Equipment Ltd., England. Tuggers, Haulages, Mine Cars, Vibrating Screens. Agents: Balmer Lawrie & Co., Ltd., 5, Graham Road, Ballard Estate, Bombay. Phone: 261494 (3 lines). Grams: "BALMER".

Uak-Ido Engineering Co. Ltd., Newport, Mon. Agents: Guest, Keen, Williams, Ltd., Wakefield House, Sprott Road, Ballard Estate, Bombay 1.

MOTOR ACCESSORIES

H. D. Jackson Co., Ltd., Summit Works, Walsall. Agents: Soho House, Lohar Street, Bombay 2.

MOTOR CYCLES MFRS.

Associated Motorcycles, Ltd., Plumstead Road, London, S.E. 18. Manufacturers of A.J.S. Motor Cycles. Sole Distributors: Dadajee Dhackjee & Co. Private Ltd., Sandhurst Bridge, Bombay 7.

MOTOR SCOOTERS

"Innocent" Metallurgical and Mechanical General Co. Milan. Manufacturers of Lambretta Motor Scooters. 3-Wheeler Rikshaw and Dely. Van Thas-je, Auto-Bikes. Sole Distributors: Dadajee Dhackjee & Co. Private Ltd., Sandhurst Bridge, Bombay 7.

NON-FERROUS METALS

Henry Wiggin & Co., Ltd., Birmingham. Monel and Nickel alloys. Sole Concessionaires: Greaves Cotton & Co. Ltd., 1, Forbes Street, Fort.

I.C.I. LTD., Metals Division, and Yorkshire Imperial Metals Ltd. Leeds. (Wrought Brass, Copper, Aluminium and other non-ferrous metals.) Selling Agents: I. C. I. (India) Private Ltd., Post Box No. 310, Bombay 1.

Manganese Bronze & Brass Co. Ltd., Ipswich. Agents: Guest, Keen, Williams, Ltd., Wakefield House, Sprott Road, Ballard Estate, Bombay 1.

Mond Nickel Company Limited, The, London. Nickel, 'F' Nickel. Sole Concessionaires: Greaves Cotton & Co. Ltd., 1, Forbes Street, Fort.

Thomas Bolton & Sons Ltd., London, England. Agents: India Metal Agencies, Post Box No. 1968, Bombay 1.

United Wire Works (Birmingham) Ltd., Birmingham. Agents: Guest, Keen, Williams, Ltd., Wakefield House, Sprott Road, Ballard Estate, Bombay 1.

YORKSHIRE COPPER WORKS LTD., Leeds, England. Representatives: James Finlay & Co., Ltd., P.O. Box No. 73, Bombay 1.

NUCLEAR RESEARCH INSTRUMENTS

Baird Atomic Inc., 33, University Road, Cambridge 38, Mass., U.S.A. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay.

NUT & BOLT MAKING MACHINES

Etchells David & Son Ltd., Bull Place Works, Darlaston S. Staffs, England. Sole Agents: Healty & Gresham Ltd., 9, Forbes Street, Fort.

OFFICE APPLIANCES AND EQUIPMENT

Addressograph-Multigraph Corporation, Cleveland, Ohio, U.S.A. Agents for India: The National Cash Register Co., Steelcrete House, Dinsha Wacha Road, Back Bay Reclamation, Bombay 1.

Addressograph-Multigraph Ltd., London, England. Agents for India: The National Cash Register Co., Steelcrete House, Dinsha Wacha Road, Back Bay Reclamation, Bombay 1.

Friden Calculating Machine Co., Inc., California (U.S.A.). Manufacturers of Friden Automatic Calculators. Sole Agents for India: The National Cash Register Co., Steelcrete House, Dinsha Wacha Road, Back Bay Reclamation, Bombay 1.

Kalamazoo Ltd., Kalamazoo Works, Northfield, Birmingham. Loose Leaf Equipment. Agents: Gillanders Arbuthnot & Co., Ltd., 16, Queen's Road Estate, Bombay 1.

UNIVERSAL POSTAL FRANKERS LTD., Frankpost Works, London N-18, Postal Franking and Stamp Cancellation Machines, Totometer-Counting & Imprinting Machines. Sole Agents: Kilburn & Co. Private Ltd., P.O. Box 565, Bombay; Phone: 25-1908. Grams: "TASCONIUM".

OIL BURNERS

Wallend Slipway & Engineering Co., Ltd., Walend-on-Tyne, England. Sole Agents: Healty & Gresham Ltd., 9, Forbes Street.

OIL ENGINES

BLACKSTONE & CO., LTD., Dursley, England. Oil Engines Importers: Voltas Limited, Ballard Estate, Bombay 1.

Lister & Co., Ltd., R.A., Dursley, Gloucestershire, England. Vertical Diesel Engines, Petrol and Kerosene Engines, Lighting and Pumping Sets, Vertical Marine Diesel Engines. Importers: Voltas Limited, Ballard Estate, Bombay 1.

Ruston & Hornsby Ltd., Lincoln & Grantham, England. Horizontal and Vertical Diesel Engines. Sole Concessionaires: Greaves Cotton & Co., Ltd., 1, Forbes Street, Fort.

OIL MILLING MACHINERY

Fukoku Kogyo Co. Ltd., Osaka, Japan. Sole Agents: J. Khushaldas & Co., 77-79, Nagdevi Street, Bombay 3.

Rose Downs & Thompson Ltd., Hull. Maxell & Duplex Oil Expellers. Sole Agents: Marshall, Sons & Co. (India) Ltd., Marshall's Building, Ballard Road, Bombay 1.

V. D. Anderson Co., Cleveland, Ohio, U.S.A. Oil expellers, Continuous Solvent extraction plants. Sole Importers: Voltas Limited, Ballard Estate, Bombay 1.

OIL SEALS

CARL FREUDENBERG, West Germany. Mfrs. of Oil Seals. Sole Agents: B. Chowdhury, Messrs. Indian Globe Chambers (7th Floor), Fort Street, Fort, Bombay 1. Phone: 26-3479. Grams: "EUKEL".

ORE DRESSING & CHEMICAL EQUIPMENT

DENVER EQUIPMENT CO., Denver, U.S.A. Sole Agents: Pioneer Equipment Co., Private Ltd., 139, Meadows Street, P. O. Box 1969, Bombay 1. (Phone: 251882). Also at 1, Mangoe Lane, Calcutta 1. (Phone: 231611) and 193, Mount Road, Madras 2. Grams: "PIOMETAL".

OXYGEN CUTTING & PROFILING MACHINES

Hancock & Co., (Engineers) Ltd., Progress Way, Croydon, England. Sole Agents: Datsun Kaviraj & Co., 43, Tamarind Lane, Fort, Bombay. Phone: 39333.

PACKING & JOINT RINGS

Batey Metallic Packing Co., St. Peters, Newcastle-on-Tyne, England. Agents: Healty & Gresham Ltd., 9, Forbes Street.

British Metallic Packing Co. (1933), Ltd., Britimp Works, Sidcup, Kent, England. Sole Agents: Healty & Gresham Ltd., 9, Forbes Street, Fort.

Walker, James & Co., Ltd., Woking, Surrey, England. "Lion" Brand Packings and Jointings. Agents: Roberts, McLean & Co., Ltd., Ilaco House, Sir Phiroozshah Mehta Road, Fort.

PADLOCKS & KITCHENWARE

Henry Squire & Sons Ltd., Near Willenhall, Staffs, New Invention. Agents: Soho House, Lohar Street, Bombay 2.

PAINTS, ENAMEL & VARNISHES

A. C. C. I. LTD., "DUCO" & "DULUX" Paints and I.C.I. Pre-treatment processes. Agents: I.C.I. (India) Private Ltd., Post Box No. 310, Bombay 1.

Docker Bros., Rotton Park Street, Birmingham 16. Agents: Gillanders Arbuthnot & Co., Ltd., 16, Queen's Road Estate, Bombay 1.

Francisco Nubiola, 648, Avda. Jose Antonio, Barcelona (Spain). Sole Agents for India for Ultramarine Blue: Chemidye Trading Co. Private Ltd., 34, Cawasji Patel Street, Bombay 1.

SIZING MATERIAL

Houghton, E. F. & Co., Philadelphia. Agents: Harcourt, Waud & Co., Private Ltd., Alice Buildings, Dr. Dadabhai Naoroji Road, Fort.

SMALL TOOLS-METAL & WOOD WORKING

Firth Brown Tools Ltd., Sheffield, England. Files, Drills, Augers, etc. Sole Distributors: William Jacks & Co. Ltd., Hamilton House, Graham Road, Ballard Estate.

SOUND RECORDING MAGNETIC TAPES

Minnesota Mining & Mfg. Co., International Division, Minnesota, U.S.A. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

Minnesota Mining & Mfg. Co. Ltd., Birmingham 8, England. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

SPEED INDICATORS & RECORDERS

Hasler Telegraph Works, 28, Victoria Street, Westminster, London, S.W.1. Sole Agents: Healy & Gresham Ltd., 9, Forbes Street, Fort.

SPORTS GOODS MFRS. AND DEALERS

A. G. Spalding & Bros. Ltd., "Sports Goods." Sole Agents: J. L. Morrison, Son & Jones (India) Private Ltd., Contractor Building, Nicol Road, Ballard Estate, Bombay 1.

I. C. I. LTD., Sporting Ammunition Dept., England. ("ELEY" and "KY-NOCK" Cartridges, Gun Powders, etc.) I. C. I. Ltd., Plastics Division: ("Luron" Fishinglines, "Survon" for Tennis racquets.) Representatives in India: I. C. I. (India) Private Ltd., Post Box No. 310, Bombay 1.

SPRAY PAINTING EQUIPMENT

Adolf Ehman, Germany. Alup Air Compressors, Hydraulic Car Lifts, Car Washers, etc. Agents: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

Aerograph Co. Ltd., London, England. Spray Painting Equipments. Agents: John Fleming & Co. Private Ltd., Bastion Road, Fort, Bombay. Phone: 261153.

B.E.N. Patents Ltd., High Wycombe, England. Air Compressors, Spray Painting plants, Tyre Inflators, Car Washers, Spark Plug Cleaners. Sole Concessionaires: Greaves Cotton & Co., Ltd., 1, Forbes Street, Fort.

B. O. Morris Ltd., Coventry, Polishers. Agents in India: Armstrong Smith Private Ltd., 1, Sir P. M. Road, Bombay 1.

DeVilbiss Company, Toledo 1, Ohio, U.S.A. Agents: Gillanders Arbuthnot & Co. Ltd., 16, Queen's Road Estate, Bombay 1.

Richard C. Walther, Germany. Representatives: Behram & Co., 1/1, Lakshmi Bldg., Sir P. M. Road, Fort, Bombay.

SPRAYERS & DUSTERS

Air Pumps Ltd., England. Portable Air Compressors. Sole Distributors: William Jacks & Co. Ltd., Hamilton House, Graham Road, Ballard Estate.

H. Liebherr, Germany. Tower Cranes. Sole Distributors: William Jacks & Co. Ltd., Hamilton House, Graham Road, Ballard Estate.

Page Engineering Co. U.S.A. Walking Draglines. Sole Distributors: William Jacks & Co. Ltd., Hamilton House, Graham Road, Ballard Estate.

SPRINGS

Cope & Timmins (London) Ltd., 91/93, Paul Street, Finsbury, London E.C.2. Agents: Sobho House, Lohar Street.

STATIONERS

HARDYHAUTE, L. & C. (GREAT BRITAIN), LTD., Koh-i-Noor Pen and Pencil Factory, Chard, Somerset. Agents: Wiggins, Teepe & Alex. Pirie (Export) Ltd., Kamani Chambers, Nicol Road, Ballard Estate.

Perry & Co., Ltd., "Perry" Steel Pens and other Stationery Items. Sole Agents: J. L. Morrison, Son & Jones (India) Private Ltd., Contractor Building, Nicol Road, Ballard Estate, Bombay 1.

PIRIE, APPLETON & CO., LTD., Manufacturing Stationers, Chadwell Heath Mill, Essex. Agents: Wiggins, Teepe & Alex. Pirie (Export) Ltd., Kamani Chambers, Nicol Road, Ballard Estate.

STEAM, DIESEL & ELECTRIC LOCOMOTIVES & SPARES

Vulcan Foundry Ltd., Newton-Le-Willows, Lancashire, England. Sole Agents: Healy & Gresham Ltd., 9 Forbes Street, Fort.

STEAM & WATER TURBINES

Charmilles Engineering Works Ltd., Geneva, Switzerland. Agents: Kaycee Industries Ltd. Kermani Chambers, Nicol Road, Bombay.

Hayward Tyler & Co., Ltd., Luton. Steam Turbines. Sole Agents: Marshall, Sons & Co. (India) Ltd., Marshall's Building, Ballard Road, Bombay 1.

Hitachi Limited, Tokyo, Japan. Steam & Water Turbines. Sole Distributors: William Jacks & Co. Ltd., Hamilton House, Graham Road, Ballard Estate.

Svenska Turbin Aktiebolaget Ljungstrom (Stal), Finspong, Sweden. Manufacturers of Steam and Gas-Turbo-Alternators. Representatives: Asea Electric India, Private Limited, Yam Building, Goa Street, Ballard Estate.

STEAM TRAPS & VALVES

Richard Klingers Ltd., Klingert Works, Sidcup, Kent. Agents: Hardcastle, Waud & Co., Private Ltd., Alice Buildings, Dr. Dadabhai Naoroji Road, Bombay 1.

Samson, Apparatebau, A. G. Frankfurt, Germany. Samson Controls, Regulators. Agents: C. Sethia & Co., 59, Forbes Street, Bombay 1.

Velam Engineering Co., Ltd., 13/22, Erskine Street, Leicester, England. Agents: Hardcastle, Waud & Co., Private Ltd., Alice Buildings, Bombay 1.

STEEL

C. D. Walholz, Hohenlimburg, Germany. Cold Drawn and Cold Drawn Steel Strips, Wire, Section and Profiles. Distributors: F. Bock & Co., Shale Building, Bank Street, Fort, Bombay 1.

Samson, Apparatebau, A. G. Frankfurt, Germany. Samson Controls, Regulators. Agents: C. Sethia & Co., 59, Forbes Street, Bombay 1.

STEEL UNION-EXPORT G.m.b.H., Düsseldorf. Steel materials and products of all kinds. The Stahlunion Company Limited, 61, Pall Mall, London, S.W.1. The Stahlunion Company Limited, India House, 4th Floor, Fort Street, Bombay 1. Telegraphic Address: "MARCASTEEL," Bombay. Branch Offices: Calcutta and Delhi.

STEEL & BRASS

Harrison (Birmingham) Ltd., Bradford Street Works, Birmingham 12. Agents: Sobho House, Lohar Street, Bombay 1.

Vossloh Werke, G. m. b. H., Werdahl, Westfalia, Germany (Brit. zone). Agents: Sobho House, Lohar Street, Bombay 1.

STEEL (STAINLESS)

Brown Bayley Steels Ltd., Leeds Road, Sheffield. Agents: Healy & Gresham Ltd., 9, Forbes Street, Fort.

Fox (Samuel) & Co. Ltd., Sheffield, England. Alloy and Stainless Steel Sheets, Bars, Strip and Wire. Sole Representatives: The United Steel Companies (India) Private Ltd., Himalaya House, Dr. Dadabhai Naoroji Road, Fort.

WARDLOWE LTD., Sheffield, England. Manufacturers of Stainless Steel Sheets and Rods. Agents: Gaytee & Co., Jammabheem Chambers, Fort Street, Bombay 1. Phone: 263449. Grams: "IMPENG."

STEEL CASTINGS & FORGINGS

Darlington Forge Ltd., Darlington, County Durham, England. Steel Castings and Forgings. Sole Concessionaires: Greaves Cotton & Co., Ltd., 1, Forbes Street, Fort, Bombay.

Edgar Allen & Co., Ltd., Sheffield. Makers of High Speed Steels, heavy C.S. castings and Metal Working Tools. Agents: Richardson & Cruddas, Ltd., Byculla, Bombay 8.

Wm. Beardmore & Co. Ltd., Glasgow. Agents: Guest, Keen, Williams, Ltd., Wakefield House, Sprott Road, Ballard Estate, Bombay 1.

STEEL MANUFACTURERS

ARTHUR LEE & SONS LTD., Sheffield, (Lee of Sheffield Ltd.), Sheffield, England. Manufacturers of Cold Rolled Steel Strips, Free cutting Steel, Bars, Rounds and Hexagons, Stainless Steel Strips, High Tensile Steel Wires, etc. Representatives for Bombay: Eastern Trading & Engineering Co., Alice Building, 3rd Floor, 339, Dr. Dadabhai Naoroji Road, Fort, Bombay 1.

Dorman Long & Co. Ltd., Middlesborough, England. Agents: Balmer Lawrie & Co. Ltd., 6, Graham Road, Ballard Estate, Bombay. Phone: 261494 (3 lines). Grams: "BALMER".

Dunford & Elliott (Sheffield) Ltd., Attercliffe Wharf Works, Sheffield, England. Mining Drill Steel Bars. Sole Representatives: The United Steel Companies (India) Private Ltd., Himalaya House, Hornby Road, Fort.

Edgar Allen & Co., Ltd., Sheffield. Makers of High Speed Steels, heavy C.S. Castings and Metal Working Tools. Agents: Richardson & Cruddas, Ltd., Byculla, Bombay 8.

English Steel Corporation Ltd., Sheffield. Tool & Alloy Steel. Sole Concessionaires: Greaves Cotton & Co., Ltd., 1, Forbes Street, Fort.

Erzors of James Mills, Ltd., Stockport. Agents: Guest, Keen, Williams (P) Ltd., Wakefield House, Sprott Road, Ballard Estate, Bombay 1.

Guest, Keen & Nettlefolds (South Wales), Ltd., Cardiff. Agents: Guest, Keen, Williams, Ltd., Wakefield House, Sprott Road, Ballard Estate, Bombay 1.

Hallamshire Steel & File Co., Ltd., Hallamshire Works, Sheffield 8, England. Manufacturers of Black & Bright Bars in Alloy & Special Carbon Steels, Wire & Rods, etc. Sole Agents: H. Chokai & Co., Ltd., 104/106, Meadows Street, Fort, Bombay.

Huntman B. (Sheffield) Ltd., Sheffield, England. High Speed and Tool Steel. Sole Representatives: The United Steel Companies (India) Private Ltd., Himalaya House, Hornby Road, Fort.

Johnson Richard & Nephew Ltd., Manchester, England. Mild and High Tensile Steel Wire. Sole Representatives: The United Steel Companies (India) Private Ltd., Himalaya House, Hornby Road, Fort.

Power, Fredrick A. & Sons (Baltley) Ltd., Edgbaston, Birmingham, England. Bright drawn Steel Bars. Sole Representatives: The United Steel Companies (India) Private Ltd., Himalaya House, Hornby Road, Fort.

Shipmans (Sheffield) Ltd., Sheffield, England. Silver Steel and Polished Music Spring Wire. Sole Representatives: The United Steel Companies (India) Private Ltd., Himalaya House, Hornby Road, Fort.

Steel Company of Wales Ltd., London. Agents: Guest, Keen, Williams, Ltd., Wakefield House, Sprott Road, Ballard Estate, Bombay 1.

Summers, John & Sons Ltd., Hawarden Bridge Steel Works, Shotton, Chester, England. Steel Sheets. Sole Representatives: The United Steel Companies (India) Private Ltd., Himalaya House, Hornby Road, Fort.

TINSLEY ROLLING MILLS CO. LTD., Sheffield, England. Manufacturers of Silico Manganese Spring Steel to EN-45A, Quality. Representatives for India: Eastern Trading & Engineering Co., Alice Building, 3rd Floor, 339, Dr. Dadabhai Naoroji Road, Fort, Bombay.

United Steel Companies Ltd., Sheffield, England. Sole Representatives: The United Steel Companies (India) Private Ltd., Himalaya House, Hornby Road, Fort.

STEEL PLATES

Appleby-Frodingham Steel Co., Scunthorpe, England. Mild Steel Plates for Ship-builders, Bridge builders, Structural Engineers, Boiler Makers, etc. Steel Angles, Channels, Joists, Tees, and Flats. Sole Representatives: The United Steel Companies (India) Private Ltd., Himalaya House, Hornby Road, Fort.

STEEL PRODUCTS

Crittall Manufacturing Co. Ltd., London. Steel Windows, Doors and Industrial Sashes. Sole Distributors: William Jacks & Co. Ltd., Hamilton House, Graham Road, Ballard Estate.

Firth Cleveland Steel Strip Ltd., Mfrs. of Cold roll, hardened and tempered Steel strips. Sole Agents in India: Alsales Ltd., 9, Wallace Street, Bombay 1.

Firth Co. Ltd., England. Mfrs. of High Carbon Boric and Acid Steel wires and other Steel Products. Sole Agents in India: Alsales Ltd., 9, Wallace Street, Bombay 1.

Henry Hope & Sons, Ltd., Steel Windows & Doors Mfrs., Smethwick, Birmingham. Agents: Balmer Lawrie & Co., Ltd., 6, Graham Road, Ballard Estate, Bombay. Phone: 261404 (3 lines). Grams: "BALMER."

Pittsburgh Steel Products Co., Pittsburgh, U.S.A. Distributors: Maneklal & Co., 166, Dr. Dadabhai Naoroji Road, Bombay 1.

Richard Hill Ltd., England. Mfrs. of Steel wire, rods and M. S. Bars. Sole Agents in India: Alsales Ltd., 9, Wallace Street, Bombay 1.

STEEL WOOL

Stewals & Co., King Edward Road, Sewri, Bombay. Agents: Killick Nixon & Co., Private Ltd., Killick House, Home Street, Fort.

STONEBREAKERS & GRANULATORS

Baxter W. H. Ltd., Leeds. Knapping Motion Stonebreakers and Granulators. Sole Agents: Marshall, Sons & Co. (India) Ltd., Marshall's Building, Ballard Road, Bombay 1.

Edgar Allen & Co., Ltd., Sheffield. Makers of High Speed Steels, Heavy C. S. Castings and Metal Working Tools. Agents: Richardson & Cruddas Ltd., Byoula, Bombay 8.

STUD WELDING EQUIPMENT

Crompton Parkinson Ltd., London. Agents: Guest, Keen, Williams, Ltd., Wakefield House, Sprott Road, Ballard Estate, Bombay 1.

SUGAR MACHINERY

A. F. Craig & Co. Ltd., England. Complete Sugar Plant. Sole Distributors: William Jacks & Co. Ltd., Hamilton House, Graham Road, Ballard Estate.

Associated Engineering Manufacturers of Australia Pty Ltd., Bowen Street, Maryborough, Queensland, Australia. Sugar Machinery. Sole Concessionaires: Greaves Cotton & Co., Ltd., 1, Forbes Street, Fort, Bombay.

FAWCETT, PRESTON & CO., LIMITED, Bromborough, Cheshire, England. Representatives: James Finlay & Co. Limited, P.O. Box No. 73, Bombay 1.

SURGICAL DRESSINGS

JOHNSON & JOHNSON (Gr. Britain) Ltd., England. (Medical) Aids. Selling Agents: I.C.I. (India) Private Ltd., P.B. No. 310, Bombay 1.

SURGICAL GOODS AND INSTRUMENTS

I. C. I. LTD., Plastics Division, England. (Surgical Nylon Sutures, etc.) Selling Agents: I. C. I. (India) Private Ltd., Post Box No. 310, Bombay 1.

T. J. Smith & Nephew Ltd., Surgical Dressings 'Klastoplast', 'Gypsona', etc. Sole Agents: J. L. Morrison, Son & Jones (India) Private Ltd., Contractor Building, Nicol Road, Ballard Estate, Bombay 1.

Thos. Glover and Son, Ltd., "Verlog" Knee-caps, Anklets etc. Sole Agents: J. L. Morrison, Son & Jones (India) Private Ltd., Contractor Building, Nicol Road, Ballard Estate, Bombay 1.

SURVEYING INSTRUMENTS

Carl Zeiss Jena, East Germany. Sole Agents: Ghoriandas Desai Private Ltd., Kermanshah Building, Sir P. M. Road, Bombay 1.

COOKE TROUGHTON & SIMMS LTD., York, England. For Engineers' Block Levels, Gauges, Surveyors' Levels, Theodolites, Telescopes, etc. Agents: Pioneer Equipment Co. Private Ltd., 139, Meadows Street, P. O. Box 1909, Bombay 1. (Phone: 251882). Also at 1, Mangoe Lane, Calcutta 1. (Phone: 231611) and 193, Mount Road, Madras 2. Grams: "PIOMETAL."

TAPE RECORDERS

Simon Sound Service, Ltd., London W. 1, England. Sales Distributors: Eastern Electric & Engineering Co. 127, Mahatma Gandhi Road, Bombay 1.

TELEGRAPH & RADIO COMMUNICATION EQUIPMENT

Great Northern Telegraph Works, Division of the Great Northern Telegraph Co., Ltd., Copenhagen 5 V, Denmark. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

TELEPHONE EQUIPMENT

Telephone Manufacturing Co., Ltd., Hartell Road, West Dulwich, London. Agents: Hindco, 27, New Queen's Road, Bombay 4.

TELEPHONE, TELEGRAPH AND CARRIER COMMUNICATION APPARATUS

Autelco Mediterranean S.A.T.A.P. Milan, Italy. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

Automatic Electric International Corp., Chicago 7, Illinois, U.S.A. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

Automatic Electric S.A. Antwerp, Belgium. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

Lenkurt Electric Co., Calif., U.S.A. Sales Distributors: Eastern Electric & Engineering Co., 127, Mahatma Gandhi Road, Bombay 1.

TESTING MACHINES (PHYSICAL)

COATS MACHINE TOOL CO., U.K., for Shore Sclerometers, Hardness Testers etc. Sole Agents: Pioneer Equipment Co. Private Ltd., 139, Meadows Street, P. O. Box 1909, Bombay 1. (Phone: 251882). Also at 1, Mangoe Lane, Calcutta 1. (Phone: 231611) and 193, Mount Road, Madras 2. Grams: "PIOMETAL."

RIDSDALE & CO., U.K., Manufacturers of Sand Testing Equipment. Sole Agents: Pioneer Equipment Co. Private Ltd., 139, Meadows Street, P. O. Box 1909, Bombay 1. (Phone: 251882). Also at 1, Mangoe Lane, Calcutta 1. (Phone: 231611) and 193, Mount Road, Madras 2. Grams: "PIOMETAL."

SOLUS SCHALL LTD., U.K., for Non-destructive Testing Equipment. Sole Agents: Pioneer Equipment Co. Private Ltd., 139, Meadows Street, P. O. Box 1909, Bombay 1. (Phone: 251882). Also at 1, Mangoe Lane, Calcutta 1. (Phone: 231611) and 193, Mount Road, Madras 2. Grams: "PIOMETAL."

TEXTILE ENGINEERS

Allen Beam Co., New Bedford, Massachusetts. Wrapper Beams, etc. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Bates Textiles Machine Co., Ltd., Leicester, England. Hosiery Finishing Machinery. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

British Northrop Loom Co., Ltd., Daisfield, Blackburn, England. Automatic Looms. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Cocker Machine and Foundry Co., U.S.A. High Speed Winding & Sizing Machinery. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Devoge & Co., Ltd., Manchester, England. Jacquards, Card Cutting Machinery, etc. Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

Durrant, G. & Sons, Ltd., Textile Specialists. Sole Representatives: W. H. Brady & Co., Ltd., 12/14, Veer Nariman Road, Fort, Bombay 1.

INDIAN HUME PIPE CO., LTD., THE, are the largest Manufacturers in India of Concrete Pipes, Steel Pipes and Concrete Poles. Concrete Pipes manufactured by this Company, better known as "Hume Pipes" and "Homogeneous Pipes" are very extensively used for Water Supply, Drainage, Culverts, Irrigation, etc. They are also used as Cable Conduits, Half-round and One-third round Channels, as well as for Well Sinking, Septic Tanks, Telephone Cabins, Dust Bins, Cattle Troughs, Fencing Posts, Latrines, Policeman Cabins, Pillars, etc.

For High Pressure Mains and Distribution required for Water Supply, the Company manufactures Steel Pipes lined and out-coated with Concrete, known as "Hume Steel Pipes." These too are very extensively used and are considered more economical than any other substitutes used for the purpose. During the World War II, the Company started manufacture of Welded Steel Pipes for Penstock requirements of Hydro-Electric Projects.

The R.C.C. Poles manufactured by this Company have very advantageously replaced the Steel Electricity Poles for both High Tension and Low Tension Transmission Lines. They are also largely used as Lamp Posts in all the big Cities.

Recently the Company has also started manufacturing the Prestressed Concrete Pipes, which can easily stand pressures upto 400 ft. head.

The Company have a large network of about sixty factories spread over India, and Ceylon. Head Office: Construction House, Ballard Estate, Bombay 1. Telephone No. 26-2094 (3 lines). Telegraphic Address: "HUMEPIPE", Bombay.

Excellent tests and testimonials: Maintaining large staff of qualified Engineers.
